The food which was distributed during the past year was all bought in large quantities at wholesale rates, special care being taken to furnish those articles of food which supply the most nutriment at the least expense. A careful system of registration was maintained, by which it was possible to ascertain in a moment by whom each family was investigated, what facts were ascertained, to what extent help was rendered, and on what dates. During the severest cold weather of the past winter on some days as many as a thousand persons applied to the mission in a single day for assistance. The services of a large number of persons were made necessary to record these applications, investigate the applicants, and render assistance in worthy cases. Most of this work was done without compensation through the generous services of mission workers; the only exceptions were cases of persons who were themselves in extreme want and to whom it was a charity to pay a small compensation for services rendered. During a part of the winter about 150 women were employed as seamstresses in making garments which were distributed to the poor. The mission workers believe in the industrial rather than eleemosynary system of charity, and with this in view the mission is endeavoring to extend its industries so as to meet all demands upon it so far as possible by offering work rather than by out-and-out gifts.

BOARD OF DIRECTORS.

E. D. Bailey, chairman; A. L. Swartwout, secretary; N. A. Robbins, treasurer; G. W. Wheeler, O. B. Brown, P. S. Foster, W. C. Tyler, G. W. Havell, A. S. Pratt.

## REPORT OF THE LITTLE SISTERS OF THE POOR.

WASHINGTON, D. C., *August 21, 1895.*

DEAR SIR: Your communication, with inclosure, of June 13 duly received and contents noted.

We herewith beg to state that our established principle is to provide for a limited number (200, more or less) of aged inmates of both sexes, without distinction of color or creed.

We solicit and collect from private parties ample food required daily, and in case of deficiency, which often occurs, such is bought out of the funds also collected daily. Clothing is obtained the same way, repaired if necessary, and kept in readiness when wanted.

The daily money collection is mainly to defray expenses, viz, insurance, fuel, gas, medical supplies, beer and liquor, groceries, meat, ice, etc., and for general repairs (done by outside mechanics).

We do not pay wages or hire for inside labor, all performed by ourselves.

Our approximate expenditures yearly are as follows:

|   |          |
|---|----------|
| Beer and liquor.....  | \$1, 200 |
| Coal.....   | 1, 000   |
| Groceries.....  | 1, 000   |
| Butcher's bills.....  | 500      |
| Medical supplies.....   | 300      |
| Undertaker's bill.....  | 300      |
| Miscellaneous.....  | 600      |
| Total yearly.....   | 4, 900   |
| This year we had to pay insurance for five years.....                                     | 1, 096   |
| The approximate valuation of property and buildings, including furniture and fixings..... | 200, 000 |
| Moneys received from United States through Congress.....                                  | 42, 500  |
| From the District.....  | 12, 500  |
| Total amount received.....  | 55, 000  |
| The total number of inmates on July 1, 1894.....  | 200      |
| Deaths from July 1, 1894, up to June 30, 1895.....  | 36       |
| Left of their own accord during the year.....   | 15       |
|   | 51       |
| Remaining.....  | 149      |
| Inmates admitted from July 1, 1894, up to June 30, 1895.....                              | 48       |
| Total inmates July 1, 1895.....   | 197      |

Hoping our above statement will prove satisfactory, at same time we would be highly pleased should you call to see the progress of our labor.

We remain, with high esteem, your most obedient and humble servants,

LITTLE SISTERS OF THE POOR,  
By SISTER ST. DOSITHÉE, *Superior.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

## REPORT OF THE AGED WOMEN'S HOME.

*Finances.*

|  |               |
|--|---------------|
| Current income from invested moneys.....               | \$144.00      |
| Public funds, District charities.....                  | 300.00        |
| Total .....  | <u>444.00</u> |
| Current expenditures, about.....                       | 500.00        |
| All other items of maintenance, including repairs..... | 100.00        |
| Total .....  | <u>600.00</u> |

*Work done.*

Number of different persons cared for, 13.

Number of inmates on last day of the year, 13 aged poor women.

There have been no deaths or changes during the past year.

M. A. RILEY, *Treasurer.*

## REPORT OF THE WASHINGTON CITY ORPHAN ASYLUM. \*

The year 1895 is fully opened, and the annual report of the Washington City Orphan Asylum for the year past is presented.

In the institution are 161 children—86 girls, 75 boys; returned to friends, 16; 3 have reached the age when the asylum no longer controls them, except by affection.

Died, none; adopted, 3; 6 had homes provided for them by the board of managers.

The year 1894 was a very trying one financially, and those in charge of this noble work were forced to be very careful in admitting children, for the funds had been sadly lessened by death and otherwise of many of the oldest friends and subscribers. The year 1895 promises to be a continuation of the perplexity under which the managers labored.

With the many new and needed charities which have sprung and are springing into existence, it is almost useless to hope for a new subscription list.

The Washington City Orphan Asylum is an old-fashioned charity. Few of those who compose new Washington know anything about it.

The managers feel they have a right to call upon the children, grandchildren, and even the great-grandchildren of those who labored for this work in the early days of the capital city, that their names may fill up the blanks where for so many years those of some dear to them were seen.

In looking back on the year which has rolled past, the managers feel deep gratitude that in spite of all anxieties the same care has been given to God's needy little ones. The health of the children has been unusually good.

Every effort is made to send each child out into the world equipped, not only physically but spiritually, feeling that God's love which sheltered them in their helplessness will be with them to help and to comfort them when for themselves they begin to fight the battle of life. May they fight under His banner!

Must the managers call in vain to those whose right it is to further this work? It is a privilege to do that to which they call attention.

They know that the God of the fatherless has these little ones in His keeping, and He will reward those who give but the cup of cold water in His name.

JANE L. STONE HARRISON.

\* This asylum receiving no appropriation, the information given is from the most recent report to the board of managers furnished to the superintendent of charities by the officers of the institutions.

## REPORT OF THE EASTERN DISPENSARY.

WASHINGTON, D. C., *September 9, 1895.*

DEAR SIR: As president of the board I herewith submit the report of the board of directors of the Eastern Dispensary, 217 Delaware avenue NE., for the fiscal year ended June 30, 1895.

This institution was incorporated under the laws of the District of Columbia on the 13th day of April, 1888.

During the past year there were 5,193 visits recorded, 3,405 new patients admitted, 3,805 cases treated surgically and medicinally, and 5,492 prescriptions filled. An alphabetical report of the cases diagnosed and treated during the year is herewith filed, marked Exhibit A. The growing demands of the sickly poor would have more than doubled this work had the board of directors sufficient funds available to meet the necessary expenses.

During the year the dispensary received from all sources the sum of \$1,167.12, of which \$500 was contributed by the Commissioners of the District of Columbia and \$380 by the lady managers. For the same time the board expended \$799.80 to defray expenses economically incurred, and the lady managers paid the rent, amounting to \$380.

From these figures it will be seen that the dispensary has been economically managed, with a due regard to the pressing needs of the deserving poor. From past experience, the fact can be clearly proven that this institution is greatly in need of more money to carry on the good work.

To meet the charitable demands the board of directors on the 1st day of January, 1894, leased the valuable property No. 217 Delaware avenue NE., for the term of two years, with a right of purchase for the sum of \$10,000. This property was selected with a great deal of care after a thorough investigation. Its location is admirably suited for a dispensary for East Washington, and the building is sufficiently large, not only for dispensary work, but for an emergency hospital, which is an urgent necessity in this section of the city. The board of directors and lady managers desire that Congress should purchase this property for a dispensary and emergency hospital on the terms of the aforesaid contract, and we earnestly request that you recommend this purchase in your report to the Commissioners and use your influence with the Commissioners to have them recommend the same to Congress. We can safely advise that this property is cheap at \$10,000. Land values are steadily increasing in this section of the city and by the end of our lease this property will be worth over \$12,000.

The scope and purpose of this building are intended to cover one-half of the territory and embrace one-third of the population of the city. In this connection the board desire me to report that it is a very difficult matter to raise the necessary funds from private contributions. Many efforts have been made by the board of directors and lady managers to raise sufficient funds to meet the charitable demands of the

deserving poor, but their efforts have not met with the generous response that they had anticipated, owing largely to the depressed financial condition of the country during the past year.

It is the unanimous opinion of the board of directors and lady managers that this institution should be owned and supported by the District government, and that Congress should appropriate the money not only to purchase the property and have the title in the District government, but the necessary funds to enable the board to properly administer the present demands of the needy poor in this section of the city.

This being done, an emergency hospital could be established, which is very necessary, owing to the fact that emergency cases in the north-east and southeast sections of the District have to be carried to the Central Dispensary in the center of the city. Many cases might arise, and have arisen, where dangerous injuries have been incurred, and to take the patient such a long distance as to the Central Dispensary might result in death before proper relief could be secured. This subject has been thoroughly investigated by the board of directors, lady managers, and attending staff, and meets with their earnest indorsement.

In addition to the purchase of this property, the board of directors asks for an appropriation for the fiscal year of 1897 of \$2,500 to meet the increasing demands of the dispensary, and \$5,000 additional for fitting up the building and to establish an emergency hospital, which will require the services of a resident physician, one or two nurses, surgical instruments, and the necessary beds. The board also requests that the appropriation by Congress be made direct for the benefit of the institution, similar to that made to the Central Dispensary.

The board take pleasure in certifying to the faithful services of the attending physicians, their assistants, and the house physician, and the public are greatly indebted to them for their gratuitous efforts in behalf of afflicted humanity.

Too much praise can not be given the lady managers for their laborious work endeavoring to raise money to enable this institution to pay its urgent expenses. Without their courageous support and financial assistance the board of directors would have been compelled to close the institution.

Respectfully submitted.

CHARLES C. LANCASTER,  
*President of the Board of Directors.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

---

#### OFFICERS OF THE EASTERN DISPENSARY.

Charles C. Lancaster, president, 1313 F street NW.; Thomas W. Smith, vice-president, First street and Indiana avenue NW.; George F. Harbin, treasurer, 319 Pennsylvania avenue SE.; Henry K. Simpson, secretary, 302 Pennsylvania avenue SE.

*Board of directors.*—Frank T. Chamberlin, M. D., Llewellyn Eliot, M. D., Louis H. Beatty, M. D., Clarence R. Dufour, M. D., John T. Winter, M. D., D. Olin Leach, M. D., W. P. C. Hazen, M. D., Charles C. Lancaster, Henry K. Simpson, Michael I. Weller, Tracey L. Jeffords, John Miller, William H. Crosby, Charles G. Dulin, Thomas W. Smith, George F. Harbin, A. D. Van Derveer.

The lady managers have the following officers, with a membership of 60 ladies:

Mrs. G. A. Chamberlain, president; Mrs. Isaac R. Hall, vice-president; Mrs. Charles C. Lancaster, treasurer; Mrs. Thomas W. Smith, secretary.

REPORT OF THE WOMAN'S DISPENSARY.

WASHINGTON, D. C., *August 31, 1895.*

SIR: In making a report of the Woman's Dispensary for the fiscal year ended June 30, 1895, we desire to call particular attention to the large amount of medical and surgical relief that has been afforded the poor people of this section out of the small amount of money allowed by the District Commissioners, together with the slight aid from donors.

The allowance from the Commissioners is \$500, and the amount received from other sources is \$362.23, making a total of \$862.23.

Out of a little less than that amount we have managed to compound and give away 4,099 prescriptions, treat 123 male and 1,060 female medical cases, 52 male and 189 female surgical cases, make 816 external applications, and attend 3,568 patients.

This has been accomplished only by the strict supervision of the board of directors. No salaries are paid with the exception of a very small one to the apothecary.

Being located in a section where there are many poor, the calls upon the dispensary for relief are very numerous and steadily increasing.

While we have wards sufficient for the accommodation of many who require hospital treatment, it is a source of great regret that we have been compelled to close the hospital portion for several years, owing to lack of funds to pay for nurse hire and provide proper food.

The amount required for that purpose is so small, compared with the great amount of relief that may be afforded the many sick women and children who daily make application, that we earnestly request that the appropriation be increased to \$1,000.

Very respectfully,

MAGRUDER MUNCASTER, M. D.,  
*Secretary.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

# REPORT OF THE HOMEOPATHIC FREE DISPENSARY AND EMERGENCY HOSPITAL.

WASHINGTON, D. C., *September 30, 1895.*

DEAR SIR: The thirteenth annual report of the Homeopathic Free Dispensary and Emergency Hospital from October 1, 1894, to September 30, 1895, shows that 3,469 prescriptions were given, being pretty evenly divided between white and colored. It is proper to add, however, that circumstances made it necessary to temporarily close the dispensary during part of July, August, and September, so that our prescriptions are many less than they would have been under ordinary circumstances.

The report of the treasurer, as inclosed, gives receipts for the year, \$1,707.66; expenditure for the same, \$1,684.70, leaving a balance of \$22.90, but also with payments of interest on bonds to be met for which at present there is no money available, but an arrangement has been made by which we will probably be able to meet the payments of interest as they fall due.

Of the receipts, the sum of \$500 is received from the District Commissioners, but of this sum \$192 is expended for medicine for the homeopathic physicians to the poor.

As the District furnishes medicine to the allopathic physicians, we think that our appropriation should be increased at least by the sum of \$192, with which we furnish said medicines.

Very respectfully submitted.

SARAH A. VAN DERLIP,  
*President Homeopathic Free Dispensary and Emergency Hospital.*

SARA A. WILLIAMSON,  
*Secretary Homeopathic Free Dispensary and Emergency Hospital.*

Col. JOHN TRACEY,  
*Superintendent of Charities.*

*C. E. Custis, in account with the Homeopathic Dispensary and Emergency Hospital.*

C. E. CUSTIS, Acting Treasurer.

## REPORT OF THE WASHINGTON HOME FOR INCURABLES.

WASHINGTON, D. C., *August 9, 1895.*

GENTLEMEN: On behalf of the Washington Home for Incurables, I hereby request that you include in your estimate for charities \$6,000, for the purposes of the home for the fiscal year ending June 30, 1897.

This application is based on the fact that this institution is wholly nonsectarian and for the relief of all classes of people. It takes those whom the hospitals discharge, and who would otherwise become a burden on the District; and it has no means of support except \$225 from an endowment fund and \$2,970 from pay patients.

These figures are for the year ending March 1, 1895. The total expenditure for that year was \$8,289.76. The items of this expenditure appear in the treasurer's report, a copy of which has been sent you.

The difference has been made up by appealing to the public in various ways: Through fairs, exhibitions, theatricals, and through personal solicitation. It is felt that this is too precarious and irregular a means of support for so large an institution, and it can not be kept up by those on whom the entire labor has hitherto fallen. Such methods will not bear constant repetition. Furthermore, it is the desire of the management, as far as possible, to confine the benefits of the home to the class who are unable to pay, which would lessen the income by about \$3,000.

Trusting the purposes of the home and its management hitherto will commend it to the favorable consideration of your honorable body and that the amount asked for may be incorporated in your estimates,

I am, very respectfully, yours,

CHARLOTTE EVERETT HOPKINS,  
*President.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

---

 REPORT OF THE PRESIDENT.

In the two years that have elapsed since the last report was issued, March 1, 1893, much has changed in the home, which was then only just completed. It was formally opened April 25, 1893, with a "tea," the proceeds of which were \$254.34, under the charge of Mrs. Hill and Miss Strong, assisted by the ladies of the board. We have also at this time most gratefully to acknowledge the placing of the gas lamps on our driveway by the Commissioners and the connection of the gas through the kindness of Mr. Henry W. Winship. For both of these courtesies we are indebted to Miss Trescot's efforts, as we also are for the transfer of the patients, which was made June 27, 1893, under her management and by funds raised by her for the purpose. The total change to the new life and consequent expenses required by the larger home called for endless patience and hard work and ceaseless anxieties to those in charge during the summer. In October, 1893, Miss Dunlop, a graduate of Bellevue Training School, New York, succeeded Miss Ramsauer as matron; the resident physician, Dr. Gibson, remained till June, 1894. The winter months passed without any special events, we every day trying to adjust ourselves to the burdens as they were laid on us, every month enlarging our work and bringing added financial anxieties. There was much to encourage in the sympathy and endless generosity of individuals and of the public. Notably the home is under a great debt of obligation to Mrs. George

C. E. CUSTIS, *Acting Treasurer.*

## REPORT OF THE WASHINGTON HOME FOR INCURABLES.

WASHINGTON, D. C., *August 9, 1895.*

GENTLEMEN: On behalf of the Washington Home for Incurables, I hereby request that you include in your estimate for charities \$6,000, for the purposes of the home for the fiscal year ending June 30, 1897.

This application is based on the fact that this institution is wholly nonsectarian and for the relief of all classes of people. It takes those whom the hospitals discharge, and who would otherwise become a burden on the District; and it has no means of support except \$225 from an endowment fund and \$2,970 from pay patients.

These figures are for the year ending March 1, 1895. The total expenditure for that year was \$8,289.76. The items of this expenditure appear in the treasurer's report, a copy of which has been sent you.

The difference has been made up by appealing to the public in various ways: Through fairs, exhibitions, theatricals, and through personal solicitation. It is felt that this is too precarious and irregular a means of support for so large an institution, and it can not be kept up by those on whom the entire labor has hitherto fallen. Such methods will not bear constant repetition. Furthermore, it is the desire of the management, as far as possible, to confine the benefits of the home to the class who are unable to pay, which would lessen the income by about \$3,000.

Trusting the purposes of the home and its management hitherto will commend it to the favorable consideration of your honorable body and that the amount asked for may be incorporated in your estimates,

I am, very respectfully, yours,

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

## REPORT OF THE PRESIDENT.

In the two years that have elapsed since the last report was issued, March 1, 1893, much has changed in the home, which was then only just completed. It was formally opened April 25, 1893, with a "tea," the proceeds of which were \$254.34, under the charge of Mrs. Hill and Miss Strong, assisted by the ladies of the board. We have also at this time most gratefully to acknowledge the placing of the gas lamps on our driveway by the Commissioners and the connection of the gas through the kindness of Mr. Henry W. Winship. For both of these courtesies we are indebted to Miss Trescot's efforts, as we also are for the transfer of the patients, which was made June 27, 1893, under her management and by funds raised by her for the purpose. The total change to the new life and consequent expenses required by the larger home called for endless patience and hard work and ceaseless anxieties to those in charge during the summer. In October, 1893, Miss Dunlop, a graduate of Bellevue Training School, New York, succeeded Miss Ramsauer as matron; the resident physician, Dr. Gibson, remained till June, 1894. The winter months passed without any special events, we every day trying to adjust ourselves to the burdens as they were laid on us, every month enlarging our work and bringing added financial anxieties. There was much to encourage in the sympathy and endless generosity of individuals and of the public. Notably the home is under a great debt of obligation to Mrs. George

N. Beale for \$1,000 for a food fund raised by her at a fair held December, 1893. Also a gift of \$150 from the late Mrs. Ralph Cross Johnson, a devoted friend of the home, for fuel, and finally, in February, 1894, the "Paint and Powder Club," of Baltimore, most kindly played for us under Mrs. McGuire's management and netted \$1,000 for summer expenses; and April 3, 1894, the home was indebted to Mrs. Bissell for \$616, the proceeds of a concert she kindly gave, assisted by Mrs. Sicard and Mr. Chauncey Olcott, of Buffalo, and for which Mrs. Hale was good enough to lend her house. The benefit of these two entertainments would be hard to overestimate, as with the income derived from pay patients they carried the home through the five summer months. We were also under a debt of gratitude in April to Mrs. De Peyster for \$223.25, the result of a fair, and to a theatrical club at the Arsenal for \$107.26.

The pressing need of an elevator made it necessary in June to put one in, which, thanks to efficient help from Mrs. E. Snowden Bell, the vice-president was able to pay for, the account of which will be found appended. May, 1894, the president, Mrs. Everett, went to Europe, and the first vice-president became acting president, and so remained till February, 1895. Later in the summer the treasurer, Mr. Everett, left, and appointed Mr. Augustine Heard to act for him, which he did most acceptably, remaining in town the entire summer. June 1, 1894, Miss Dunlop resigned on account of her health, and also Dr. Gibson, very much to the regret of the board, their places being filled by Miss Hawkins, a graduate of the Orange Training School, and Dr. Hough, of Johns Hopkins, Baltimore. During the summer an arrangement was perfected, Miss Trescot being appointed the one to arrange the details with the Garfield Training School to furnish the home with nurses, an arrangement which has given great satisfaction and comfort to the home and given good nursing to the patients. November 1 the home had no debts, but only \$2.48 in the bank. but, as ever before, the public responded most generously to an appeal made through the press by Mrs. McGuire and by a lunch at St. John's Parish Hall, resulting in about \$950, a gift of \$100 for fuel from Mrs. Ralph Cross Johnson, in whose death a few days later, the home sustained an irreparable loss, as she was a constant and generous friend. At the election in February both Mr. and Mrs. Everett resigned, being obliged permanently to leave town. There are no words in which the home can adequately express their appreciation of the loss their severing their official connection with the home means. For years they have given their best efforts to it and large sums of money, and the home owes its existence very largely to the courage and faith which enabled Mrs. Everett in its infancy to struggle on against every obstacle. The list of the new management and board will be found in its proper place. Special thanks are due Mrs. Carroll Mercer and Mrs. G. L. Bradley for the large sums they have given for the pay of two nurses for eighteen months, and to Mrs. J. Y. Taylor and Mrs. Allan McLane for the large amounts they have given toward the matron's salary. The home, I am sure, wishes to thus publicly express its gratitude to Mrs. Hearst for the generous opening of her house, March 28, 1885, by which the home netted \$1,276.86. It meant much trouble and care to her and to all the ladies who kindly helped us there during the day and evening.

The diet kitchen, a gift through Miss Trescot from the Misses Kerr and Miss Boulden's schools, is also a great addition to the home. At Christmas the home was indebted to Miss Billings for a charming tree, Christmas service, and much pleasure to all the inmates; and I have also to express warm thanks to Mrs. Fraser for her monthly generous gifts of flour and sugar, and to the Cottage Market for its never-failing Monday dinner, and to C. H. Javins for weekly gifts of fish, and to the many florists who, through Mrs. Turner's kindness, send flowers weekly; in fact, to all those who have by their generosity and sympathy helped us to carry an ever-increasing burden. The home wishes to express its appreciation of the religious services and ministrations of the Revs. Nelson Falls, C. E. Buck, Alexander, and Father Roccofort. The home is also very grateful to all those who with large and small sums have helped raise the amounts paid in by those who are considered as pay patients, and who otherwise, owing to the poverty of the home, could not have been admitted. The treasurer's report shows an indebtedness of only \$11,600, which we hope the sale of the remaining Mount Pleasant property will soon liquidate. The report of the Washington and Georgetown aids are most gratifying, and for our future support we look to them. There are several pressing needs in the home; more and suitable rooms for servants, a storeroom for clothes and material, rooms for nurses, and more rooms for men, as, owing to the demand to admit more men, the board room has temporarily been made into a ward for them, and a ward for colored patients is much needed. I feel obliged to impress on the board the need of continued and unabated exertions, as our average expenses are close on to \$700 a month, and we have only in hand enough to carry us through June. During the two years covered by this report there have been 55 patients in the home, of whom 38 remain. Fourteen have died, and 3 have returned to friends or gone to other institutions.

The working force consists of a resident physician, a matron, seven trained nurses, a janitor, an elevator man, two cooks, two laundresses, one waitress, and two housemaids, making a total of 56 to be fed.

Personally I wish to extend my warmest thanks to the executive committee for their unfailing energy, sympathy, and help in the many perplexities and cares that have come on me as acting president and now as president; without them I should have been helpless. And also to the board for their support. Having no help from Congress, I feel how much it would be to us if in this great city 10,000 people could be found who would give us \$1 a year; we then should be sure of our actual expenses and seldom have to beg, thus relieving the public of our constant importunity.

Respectfully submitted.

CHARLOTTE EVERETT HOPKINS,  
President.

APRIL 16, 1895.

#### REPORT OF THE MEDICAL STAFF.

The medical staff of the Washington Home for Incurables submits the following tabulated statement of the workings of its department from the opening of the institution to the beginning of the present year. It has been the aim of the staff to make the examination of each applicant for admission so thorough that the benefit of the home shall be extended to only that class of cases for which it was originally intended. Should this examination of applicants be less searching, there would soon be a preponderance of cases of senile debility and epilepsy.

We take pleasure in referring to the excellent hygienic condition of the home, and to the fact that there has been no case of sickness which could be attributed to any defect in that direction. Our branch of the training school for nurses has now been in active and successful operation for some months, and it is now an assured fact that it will prove an agent of great value to our institution as well as a benefit to the general public.

The staff takes this opportunity of expressing to Dr. William H. Fox their appreciation of his kindness in having given his valuable aid as a specialist whenever called on. We also wish to commend the highly satisfactory services of the resident physician, Dr. J. S. Hough. The excellent work done by Miss Hawkins, the matron, and her efficient corps of nurses, speaks for itself.

MIDDLETON F. CUTHBERT, M. D.  
G. WYTHE COOK, M. D.  
SAM'L S. ADAMS, M. D.  
W. SINCLAIR BOWEN, M. D.

The following table is a report of all cases admitted to the home from the time of its opening to the present:

| Diagnosis.                             | Admitted. |         |        | Died. |         |        | Discharged. |         |        | Remaining. |         |        |

## 418 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

During the year 1894 there have been admitted 21 cases, of which 10 were males and 11 females. There have been 10 deaths, 4 being males and 6 females.

| Admissions:                 |    | Deaths:                         |    |

### REPORT OF THE MATRON TO THE PRESIDENT.

The past year has brought changes and improvements to the home. The elevator enables the more helpless patients to come to the dining-room, but being run by hand power leaves much to be desired. The overcrowded condition of the house has made it necessary to convert the board room temporarily into a men's ward, in which we now have four beds. Another most necessary desirable addition is the diet kitchen, which has been beautifully furnished through the earnest efforts of Miss Trescot, and we are now looking forward to the time when it will be opened and put into practical use. Four of the rooms have been painted.

The greatest improvement has been in the nursing—an arrangement entered into with the Training School for Nurses, connected with the Garfield Memorial Hospital, to supply the home with pupil nurses, of which we now have five.

The greatest need of the home is a telephone. There is none in the building and the nearest that can be reached is several squares off. This, besides being inconvenient and delaying the work of the house, makes necessary, at all times and in disagreeable weather, many trips to town, which could be saved by having a telephone in the house. The grading of the approach to the home materially conduces to its well being.

Respectfully submitted.

ELLEN HAWKINS.

### THE TREASURER'S REPORT.

Two years have elapsed since our last report, and the record of the home is one of fair prosperity. Like all institutions dependent entirely upon voluntary contributions, its success has been the result of unceasing effort and great anxiety on the part of the active managers; and the fact that it relieves the District of the care and expense of many persons who would otherwise become a charge upon the almshouses, entitles it as a matter of right to some consideration from Congress, which it has never received. Even a small appropriation would be an inestimable relief, and it may not be out of place for the treasurer to say that the unselfishness and devotion of the ladies who have borne the burden thus far and have brought the home to the high position that it occupies to-day, merits practical recognition by the authorities.

The appended accounts are full and leave little room for comment. For the year preceding March 1, 1893, the average number of patients was 11 and the average monthly expense about \$195. For the year ending March 1, 1895, the average number of inmates was 32, and the average monthly expense about \$690. Constant growth and constantly increasing expense, which means constantly increasing usefulness, are the conditions of its existence.

The balance in the treasury is \$1,068.59, enough with receipts from the pay patients to carry us through the next three months, and it is hoped that the public will respond heartily and promptly to our present appeal for assistance to meet the demands upon us for the remainder of the summer. We can look for no income during the interval between the dispersion in the spring and the reassembling of the board for the winter.

AUGUSTINE HEARD, Treasurer.

WASHINGTON, April 16, 1895

*Assets.*

## Cost of home (subject to a mortgage of \$5,000):

|  |             |
|--|-------------|
| Lot north of Road street.....  | \$12,047.00 |

FANNIE HYDE, *Treasurer.*

THE SHOREHAM, WASHINGTON, D. C., April 16, 1895.

DEAR MADAM: I am requested to state that Mrs. Clara V. Pope, treasurer for this society, died on February 27, at her residence, No. 1109 Fourteenth street.

At that time her accounts showed that the amount invested in American Security and Trust Company 5 per cent bonds was \$2,000. At present date the sum deposited in West End National Bank is \$106.67.

Respectfully submitted, on behalf of the Washington Ladies' Aid Society, Home for Incurables.

Miss GENA R. HARDING, *Treasurer.*

Mrs. ARCHIBALD HOPKINS,

*President of Board of Managers, Home for Incurables.*

#### RULES FOR ADMISSION.

1. Application for admission to the home shall be made to one of the managers on a printed form provided for the purpose, and should be laid before the board at the next regular meeting.

2. Cases of all incurable applicants shall be considered, except those suffering from mental derangement, contagious diseases, cancer, and epilepsy. For the two last-mentioned we hope to be able to provide in the future.

3. Applicants shall be subject to careful inquiry, and a certificate furnished them shall be signed by a physician in good standing. They must also submit to the examination of two physicians approved by the board, and the certificate shall be signed by them. This certificate and a written report shall be presented by the admission committee to the board. All cases must be admitted on probation of not less than six months. The president must give a written order for the patient's reception into the home.

4. In the event of any patient becoming lunatic, idiotic, or violent, or contracting contagious disease, the board shall have power to reconsider the case.

5. Should the condition of any inmate become so altered by recovery that the case is no longer suitable for the home, the board shall have power to dispose of such case. This, however, can only be done with the certificate of two physicians named by the board, and one chosen by the patient, if desired.

6. All patients must be subject to the rules of the home, and for continued violation thereof shall be liable to dismissal. Disrespectful conduct to the matron in charge will not be allowed.

#### MEMORIAL ROOMS.

*Matron.*—Miss Ellen Hawkins.

*Resident physician.*—Dr. J. Spencer Hough.

THE LUCY WEBB HAYES NATIONAL TRAINING SCHOOL, DEACONESS HOME, AND SIBLEY MEMORIAL HOSPITAL.

WASHINGTON, D. C., *November 14, 1895.*

SIR: The Deaconess Home was organized in February, 1890; the Lucy Webb Hayes National Training School, October, 1891; the Sibley Memorial Hospital was dedicated October, 1894.

The design of our training school is to prepare young women for active Christian work as visiting deaconesses, nurse deaconesses, city missionaries, pastoral helpers, or as industrial and kindergarten teachers. The instruction includes biblical and ecclesiastical training, such knowledge of medicine as is preparatory to nursing, and practical teaching in all that is necessary to fit pupils as superintendents of deaconess homes, orphanages, hospitals, and for kindred employment.

The deaconesses and students in the training school and the home have assisted during the past year in revival services in many of the churches, and during one month 45 persons were led to Christ through their personal efforts. They have taught in the Sunday schools, conducted industrial and kindergarten schools among the poor, visited from house to house, taken part in Epworth League work, and have aided in special services at Central Union Mission. Hundreds have been clothed and fed, and the sick and dying have been visited at their homes and in the hospitals. Sibley Hospital since its opening has been a benediction to the poor and suffering.

Yours, respectfully,

C. L. ROACH,  
*Corresponding Secretary.*

The SUPERINTENDENT OF CHARITIES.

---

HISTORY OF THE INSTITUTION.

The Lucy Webb Hayes National Training School had its origin in a thought which was expressed at Spiegel Grove when the thousands were gathered there for the funeral services of Mrs. Hayes, who, as the wife of a President of the United States, and as the president of the Woman's Home Missionary Society of the Methodist Episcopal Church, had so greatly endeared herself to the hearts of the women of this land. On this impressive occasion the remembrance of the deep interest which Mrs. Hayes had manifested in the training of women as missionaries suggested the founding of a school to carry out this purpose as a suitable monument to her memory.

When, at the meeting of the board of managers, resolutions expressing the sense of bereavement felt in the loss of their president were prepared, the following was introduced by Mrs. R. S. Rust, the corresponding secretary, and adopted:

*"Resolved further,* That we invite the auxiliaries, circles, bands, and friends of the society to contribute offerings as precious memorials, to be forwarded to the general executive board of managers to meet in Indianapolis the last of October, to be consecrated to the erection of a building which shall bear her name, and serve as a reminder of her deep interest in behalf of missions in our land."

At the annual meeting of the general executive board in Indianapolis the establishment of an institution for the training of young women for Christian work, to be a memorial of Mrs. Hayes, was determined upon, and in answer to circulars sent out the sum of \$4,000 was gathered.

In the winter of 1889-90 Miss Jane Bancroft (now Mrs. George O. Robinson, of Detroit), the author of that standard work, *Deaconesses in Europe and America*, and the secretary of the bureau for deaconess work, visited Washington, and by her presentation of the subject in the leading churches, and at the residences of Bishop Hurst, Postmaster-General Wanamaker, Senator Blair, and Mrs. E. J. Somers, so aroused public interest that the rental of a house was offered by Mrs. Susan J. Wheeler for the beginning of the work in Washington. This house, No. 133 F street NE., was formally opened and dedicated May 15, 1890. During that year 8 Christian women offered themselves for deaconess work and spent more or less time in the home. Of this number nearly all still remain in active work.

This successful beginning seemed to indicate that Washington City was the proper place for the location of the training school designed as a memorial of Mrs. Hayes.

During this year Mr. Ephraim Nash, now deceased, a friend and helper of the poor, and a man of most benevolent spirit, was so moved with interest in the deaconess work that he determined to give his own residence, a most desirable property at 1140 North Capitol street, to the Woman's Home Missionary Society as a National Training School.

At the annual meeting of the society at Syracuse, N. Y., in October, 1890, the following action was taken:

*"Resolved*, That the training school for missionaries and the Deaconess Home be united in one institution, and named in memory of Lucy Webb Hayes, and located at Washington, D. C."

The home was enlarged and beautified, and was formally dedicated in October, 1891, many distinguished ministers and laymen of the Ecumenical Council, then in session, being present and assisting.

Rev. I. N. Dalby, M. D., was elected the first president of the institution. To his wise and successful planning very much of the prosperity of the school and home is due. Upon his resignation, September 1, 1894, Rev. A. H. Ames, M. D., D. D., the present incumbent, was selected as his successor, entering upon his duties December 1, 1894. In May, 1892, Mrs. Christine B. Dickinson was elected preceptress, and still continues her invaluable services.

The institution has sent deaconesses and other workers to the following places: Baltimore, Md.; Buffalo, N. Y.; Cleveland, Ohio; Grand Rapids, Mich.; Greensboro, N. C.; Morristown, Tenn.; Philadelphia, Pa.; Rome, N. Y.; Salt Lake City, Utah; San Francisco, Cal.; South Bend, Ind.

In October, 1894, the institution was further enriched by the donation to it of a hospital, costing \$10,000, the generous gift of a noble layman of Washington, D. C., William J. Sibley, esq., as a memorial of his deceased wife, Dorothea Lowndes Sibley. The hospital is built upon the grounds attached to the school, forms with it one corporation, and has already entered upon its mission of active beneficence.

*Trustees*.—Bishop John F. Hurst, chairman, Washington, D. C.; Hon. Hiram Price, secretary, Washington, D. C.; Mrs. Clinton B. Fisk, president Woman's Home Missionary Society, New York, N. Y.; Mrs. R. S. Rust, corresponding secretary Woman's Home Missionary Society, Cincinnati, Ohio; Mrs. George O. Robinson, secretary Deaconess Bureau, Detroit, Mich.; Mrs. J. W. Mendenhall, treasurer Woman's Home Missionary Society, Delaware, Ohio; Mrs. Clara L. Roach, corresponding secretary, Baltimore Conference Woman's Home Missionary Society, Washington, D. C.; Judge Woodford S. McDowell, Washington, D. C.; B. H. Stinemetz, esq., Washington, D. C.

*Licensed deaconesses*.—Ida E. Miner, Elizabeth Humphrey, Kirstine Petersen, Ada C. Randall.

*Deaconesses on probation*.—Leona C. Bartolet, Minnie Benton, Fannie A. Cosden, M. Emma Robbins, Dora E. Sandy, Cartes K. Swartz, Mary E. Spence, Alice M. Wells.

The Lucy Webb Hayes National Training School, so named in memory of the honored wife of ex-President Hayes, was founded in 1891. It is the authorized training school of the Woman's Home Missionary Society of the Methodist Episcopal Church, which owns the property of the school, exercises supervision and jurisdiction over its management, and looks to it to supply the trained workers employed by the society in its widely diversified fields of labor. The privileges of the school are not, however, confined to those connected with the Woman's Home Missionary Society. It opens its doors to all who wish to prepare themselves for any department of Christian activity.

In 1894 the school was chartered by act of Congress in conjunction with the Deaconess Home and Sibley Memorial Hospital, and forms with them one corporation. By this means unity of administration is secured, and a guaranty furnished that the object of the institution, which is specifically the training of Christian workers, shall not be lost sight of.

The institution is located at 1140 North Capitol street, in the city of Washington. It occupies high ground, and is in a healthy section, with much open space about it, furnishing good sanitary conditions, and commanding quite extensive views of the city. Lines of street railway are near it, which make all parts of the city accessible.

The property of the institution consists of a large building used for all purposes by the training school, and the Sibley Memorial Hospital immediately contiguous to it, a narrow passageway alone separating the rear of the buildings. Access is therefore easy from one to the other in all kinds of weather.

Its pupils are instructed as superintendents of deaconess homes, orphanages, hospitals, and for kindred employments.

The lecturers in the medical department are selected from the staff of Sibley Hospital, and include some of the most eminent and skillful physicians and surgeons of Washington. While some opportunity of studying nursing is given to all pupils, those contemplating to be nurse deaconesses will have special facilities both for study and practice.

#### DEACONESS HOME.

This is a part of the institution. Deaconesses who have been licensed by the church and assigned to Washington live here with the pupils of the school, assisting them by precept and example.

This common life in the home is not only an important part of the training and discipline of the school, but furnishes to the workers, whose sympathies are heavily drawn upon by actual contact with the poor, the suffering, and the distressed, a place of rest and relief, the value of which can be appreciated only by those who have experienced its help.

The expenses of the school have been purposely reduced to the minimum. The entire cost, including board, room, tuition, and lectures, will be from \$3 to \$5 a week, varying with the share of household work assumed by the student. Those who pay \$5 a week are exempt from domestic service. As a matter of fact, almost all the pupils prefer doing their share of household work, thereby bringing their expenses to the limit of \$3 a week. Those who come on this basis can be educated and boarded an entire scholastic year for \$100. The work is so arranged as not in any case to interfere with studies.

#### THE SIBLEY MEMORIAL HOSPITAL.

This hospital is the generous gift of W. J. Sibley, esq., a lay member of Foundry Methodist Episcopal Church, in Washington, and is a memorial of his deceased wife.

The building adjoins the school. It is provided with a fire escape, and has all necessary conveniences.

The staff of the hospital comprises a number of the most skillful surgeons and physicians in the city. Many of them have a national reputation.

They are as follows:

*Consulting physicians and surgeons.*—Dr. W. W. Johnston, Dr. J. Ford Thompson, Dr. Z. T. Sowers, Dr. S. S. Adams.

*Attending physicians and surgeons.*—Dr. H. B. Deale, Dr. D. Olin Leech, Dr. Frank Leech, Dr. G. C. Ober, Dr. D. B. Street, Dr. J. L. Suddarth, Dr. J. T. Winter, Dr. W. C. Woodward, physicians; Dr. E. A. Balloch, Dr. H. H. Barker, Dr. C. W. Brown, Dr. I. S. Stone, Dr. J. Van Rensselaer, Dr. J. R. Wellington, surgeons; Dr. C. R. Dufour, ophthalmologist; Dr. H. S. Medford, resident physician; Dr. E. C. Ferguson, extern; Miss Jeannette R. White, superintendent of nurses.

The hospital has two free wards, as well as rooms for private patients, and has in all twenty beds.

The hospital was opened for the reception of patients March 25, 1895. Already a number have been treated or are now undergoing treatment. Some very important and highly interesting operations have been successfully performed.

It is believed that our pupils will have the opportunity of witnessing a wide range of diseases, and that they can acquire as accurate skill in the nursing of the sick as a larger hospital could afford. Those who purpose to be nurse deaconesses have greater facilities allowed them than other pupils, and spend much more of their time in the hospital.

The demand for nurse deaconesses is increasing rapidly. There is not a deaconess home in the church which is not needing some of these workers, and a field of usefulness whose breadth none can calculate is opened for consecrated young women who are willing to enter the work in the name of the Master.

## WORK DONE.

The following is a part of the work done by the pupils of the school, in the year beginning October 9, 1894, and ending May 21, 1895:

|   |            |
|---|------------|
| Calls made.....                         | 4,639      |
| Opportunities for prayer.....           | 1,007      |
| Visits to sick.....                     | 618        |
| Hours in hospital.....                  | 679        |
| Hours of nursing.....                   | 364        |
| Lessons taught in Sunday school.....    | 395        |
| Scholars secured for Sunday school..... | 80         |
| Persons induced to attend church.....   | 28         |
| Persons professing conversion.....      | 79         |
| Meetings attended.....                  | 2,322      |
| Meetings conducted.....                 | 132        |
| Hours spent in lectures and study.....  | 11,681     |
| Hours spent in industrial schools.....  | 767        |
| Hours spent in kindergarten.....        | 186        |
| Hours spent in domestic work.....       | 2,666      |
| Families relieved.....                  | 1,055      |
| Value of relief.....                    | \$1,089.00 |
| Garments given.....                     | 969        |
| Bibles, tracts, etc., distributed.....  | 2,055      |

## REPORT OF THE SOCIETY OF ST. VINCENT DE PAUL.

SIR: The donations to the various conferences were far in excess of those of 1893, the total collections greater, and the expenditures greater. Situations were procured for fifty-seven persons, many more persons were relieved, and more visits were made than during last year, which shows the society as a whole to be in most excellent working order.

While our ranks have been considerably depleted by the dropping out of many who have become too enfeebled for active work, and for other causes, others have taken their places, and it is gratifying to note an increase in membership.

The average attendance at meetings of conferences is about the same as that of last year. Although we have no cause for complaint in this particular, we hope to be able to show an improvement in our next report.

It is with the deepest sorrow that we report the death of our former spiritual director, the Reverend Jacob A. Walter, which occurred April 5, 1894. In him the Society of St. Vincent de Paul mourns the loss of one of its most worthy and valued members. He was not only respected and honored for his zeal and wisdom, but he was endeared to all, especially the poor, his beloved children, by his unfailing charity and his humble and kindly nature.

*Comparative number of families relieved, visits made, and state of finances during the years 1893 and 1894.*

*Boys' Reform School.*—This school contains 201 boys of both colors, 35 of whom are Catholics—20 white and 15 colored.

With the exception of the months of July and August, when vacation from lessons is given the boys, this institution is visited regularly every Sunday, from 4 to 5 o'clock, by four brothers and three ladies. The order of exercise is as follows: Opening prayer, singing, catechism, and good advice. One of the ladies accompanies the singing with the organ.

*Washington Asylum hospital and workhouse.*—Our brothers continue their good work in this institution. Four of them visit it every Sunday morning and remain with the inmates about an hour and a half. Some of the visitors address the old people of the asylum assembled in the parlors.

Many suits of clothes, underclothing, hats, and tobacco were distributed, all gifts of our brothers. Catholic books and papers were also distributed.

Several days' board and lodging were furnished many of the men on leaving the institution, thus giving them time to shape their future course. One old man was sent to the "Little Sisters of the Poor."

The temporal as well as spiritual welfare of these people was looked after at Christmas time.

The ladies distributed 200 packages of good things, 108 of which went to the white and 92 to the colored inmates. Chewing and smoking tobacco and pipes were added to the gifts of the brothers.

Through the kindness of one of our brothers transportation is furnished the visitors to this institution free of cost.

*District Jail.*—We regret to state the loss of the visits and services of the Sisters of the Holy Cross, who for several years (until August last) were devoted to the welfare of the women prisoners. An order from their mother house put an end to their visits to penal institutions. We are glad, however, that four ladies have volunteered to take up the work of the Sisters.

Every Sunday morning an average of four brothers visit the prisoners assembled in a large cell. They have prayers, the rosary, reading of the gospel, and short sermons.

Prisoners confined to cells are also visited.

Our temperance advocate devotes himself to redeeming the poor inebriates who continually find their way to the jail by inducing them to take and keep the pledge.

Christmas was celebrated by the brothers giving a treat of good things to 75 prisoners. Six pounds of tobacco and a box of cigars were also donated by the brothers.

*Freedmen's Hospital.*—This hospital contains 200 beds for white and colored men and women.

It is visited regularly every Sunday morning by four or five brothers. In a chapel used by different denominations a brother leads in prayer the Catholics and others who wish to attend, and reads from a book of short sermons.

A man was sent to the Little Sisters of the Poor, and a number of discharged patients were furnished with board and lodging for a few days at a time.

Garfield Hospital is visited every Sunday morning by three brothers of the Conference of St. Paul.

*The Hospital for Incurables.*—The visiting of this recently established hospital is a new field of labor for the special works conference. The visits are made by the brothers of Holy Trinity Conference.

JAS. D. MANKIN,  
*Secretary Particular Council.*

Col. JOHN TRACEY,  
*Superintendent of Charities, District of Columbia.*

## REPORT OF LEGION OF LOYAL WOMEN.

WASHINGTON, D. C., *October 26, 1895.*

SIR: Report of relief and employment work of the Legion of Loyal Women of Washington City for the year ending April 1, 1895:

## RELIEF.

|                                       |            |
|---------------------------------------|------------|
| 190 families received groceries.....  | \$232. 16  |
| 87 families received coal.....        | 134. 28    |
| 293 persons received clothing.....    | 927. 78    |
| 1 person received medicine.....       | 1. 00      |
| 571 Total.....                        | 1, 297. 25 |
| Cash for immediate relief.....        | 38. 87     |
| Expended for labor and materials..... | 258. 80    |
| Total.....                            | 1, 594. 92 |

## EMPLOYMENT.

|   |     |
|---|-----|
| Days' work.....                         | 250 |
| Definite persons employed.....          | 47  |
| Articles made.....                      | 271 |
| Persons who get regular employment..... | 60  |

It is the custom of the relief committee to investigate carefully each applicant, and only in desperate cases is help given before this is done. It is the constant aim to assist all able-bodied persons to become self-supporting. During the severe winter weather employment was given to needy women repairing the clothing donated and making such new garments as there was an immediate demand for. A shoemaker was also employed to repair shoes. Those thus employed in many cases, when they proved themselves capable and industrious, procured permanent employment. The aged, the sick, those in sorrow, and little children are the special care of this sisterhood of workers, who strive to minister not only to the material wants, but to comfort, strengthen, and encourage the unfortunates who come to their door.

Respectfully submitted.

ELLEN SPENCER MUSSEY,  
*President.*

LAURA V. McCULLOUGH,  
*Secretary.*

Col. JOHN TRACEY,  
*Superintendent of Charities, District of Columbia.*

## REPORT OF MISSION SCHOOL OF COOKERY.

WASHINGTON, D. C., *August 15, 1895.*

DEAR SIR: In answer to the request contained in your letter of June 13, I send a short account of the founding and progress of the Mission School of Cookery and Housework, and a report of its work for the year ended June 30, 1895.

The school is one of the oldest in America, and my interest in this branch of manual training and the efforts to promote it, which resulted in its establishment in 1879, began here at about the same time that the movement in the same direction was started in New York and Boston, and quite independently of that. For many years it was regarded as a sort of center, and was visited by persons from every part of this country and from Europe who were interested in obtaining information which might be of use to them; for schools of cookery were then rare, and were regarded as a very doubtful experiment. A large number of circulars were sent out, and it exerted a very important influence in developing the movement which led to the general establishment of such schools in other places. Partly on account of its position at the national capital, and partly because the simple, practical way in which it was managed commended itself to those who were anxious to avoid unnecessary expense, it had succeeded when other schools had ended in discouragement, and was also regarded as having "brought order out of chaos."

It was opened nearly sixteen years ago with two classes of little girls in a house at the corner of Thirteenth and I streets, and removed the next year to the old Chain House, 1323 H street, where it remained eight years until the building was torn down, when it was moved to I street for the summer, and then to its present location at 1228 N street.

In order to awaken an interest in the work, classes of young girls were invited at the beginning of the second year from several of the charitable and educational institutions of the city, and from four to five classes came in this way for several years, while the remaining classes were formed from such girls as applied. As the school was conducted from the first with a view to promoting the introduction of cookery into the public-school system, these children and their parents were encouraged to interest others, and great pains were taken to arrange a system by which it could be taught thoroughly without being too expensive and elaborate.

In the year 1887 an application was made to the Commissioners of the District and to Professor Powell and Mr. George Cook asking that classes might be sent to the school free of expense. They all responded with interest, and classes from the seventh and eighth divisions were detailed. Two classes were also invited from the Webster and High schools, who came after school hours, and by their interest and their efforts to interest others contributed greatly toward making this experimental year a successful one, and in the spring the trustees decided to introduce cooking into the public-school system here. The school has

always followed a method of teaching of its own, and the young ladies who were to have charge of the schools were instructed in this, which made it possible to introduce it without exceeding the small sum which was available that year.

A system had been arranged by which one teacher could teach several classes in a day with 15 girls in a class, each girl in turn taking a share in the cooking. A course of lessons was also prepared with great care and printed, and this was found to be in every way preferable to the older method of dictation, and of allowing a few girls to cook while the others looked on. The success of the school has been due to this and to the fact that it teaches home or household cookery, and without following any fixed or special theory it teaches the pupils what they need to learn in order to have a good knowledge of this.

The work of the public schools has in no way superseded our work, for, however extended a system of public instruction may become, there will always be some who can not profit by it, and to help these to become self-supporting members of society is surely as worthy and important a charity as to take care of them after they have failed to become such because they have never had the opportunity. We occupy now a rented house, but if funds could be obtained for a building we could enlarge our work by adding other branches of household work, and could co-operate usefully with the other charities of the District.

The school is organized with permanent officers and committees. It is non-sectarian and makes no distinction of race or color. We take about 150 girls every year, and last winter a class was added for girls who would like to be fitted expressly for domestic service: they were selected from those who had previously attended the school and were obliged to pass an examination for it.

The pay school is distinct from the free school, and receives no donations. Lessons in all kinds of cooking are given to ladies and to cooks; it pays its own expenses and helps the mission school by paying part of the salaries and fuel. A number of ladies have been fitted as teachers, and those who have obtained schools have proved very successful in their work.

The mission employment bureau, in charge of Mrs. E. G. Davall, was opened nearly three years ago, and is doing a very satisfactory work. It aims at helping both employers and employed. So far as is possible all references are inquired into and a record is kept of those persons who are proved to be good and reliable, while an effort is made to arouse an ambition in all to make themselves worthy to be on it. A moderate fee is asked, and after the expenses are paid there is a small balance, which is given every month to the free school.

During the first eight years the school was chiefly dependent on me for its support, but every year since then money has been contributed by its friends here and at the North. In 1889, and again in 1891, the sum of \$100 was asked for and received from the Commissioners of the District of Columbia. We are greatly in need of funds and should be very glad to receive, if possible, even a few hundred dollars annually from the appropriations for the District, for the uncertainty of our income interferes with our work, and is a constant source of anxiety. Our report is always made at the end of the calendar year, but I send, as requested, a statement of receipts and expenditures for the year ended June 30, 1895; but a small unpaid debt incurred in previous years is not included in this.

# REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA. 439

## RECEIPTS.

**ESTIMATES OF GOVERNMENT HOSPITAL FOR THE INSANE.**

WASHINGTON, D. C., *September 4, 1895.*

SIR: I have the honor respectfully to report that the estimate to be placed in the District bill for the fiscal year ending June 30, 1897, will be \$104,049.

Very respectfully

W. W. GODDING,  
*Superintendent.*

Hon. JOHN TRACEY,  
*Superintendent of Charities.*

---

**ESTIMATES OF THE COLUMBIA INSTITUTION FOR THE DEAF AND DUMB.**

WASHINGTON, D. C., *August 27, 1895.*

GENTLEMEN: I have the honor to request that the sum of \$10,500 may be included in your estimates for the fiscal year ending June 30, 1897, to provide, as heretofore, for expenses attending the education of deaf and dumb persons admitted to this institution from the District of Columbia.

Very respectfully, your obedient servant,

E. M. GALLAUDET, *President.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

**REPORT OF THE PROPERTY CLERK.**

OFFICE OF THE PROPERTY CLERK,  
EXECUTIVE DEPARTMENT, DISTRICT OF COLUMBIA,  
*Washington, D. C., September 2, 1895.*

GENTLEMEN: In accordance with your request I have the honor to submit herewith a brief statement of the operations of the office of the property clerk for the fiscal year ended June 30, 1895, with recommendation, with the object of increasing its efficiency. The office of the property clerk is the office to which all requisitions for supplies for the various branches of the District government are forwarded and from which all orders for supplies are issued and all purchases made. Accounts are kept with each appropriation for each and every department of the District government, and great care is taken that no appropriation shall be overdrawn, such care being very laborious and exacting, and, owing to the limited number of employees, almost impossible.

The large number of contractors and the varied kinds of supplies requires the writing of a great many orders. There are twenty classes of supplies, embracing stationery, printing, schoolbooks, furniture, hardware, groceries, etc., and from all requisitions for supplies great care must be exercised to give the orders for the different articles upon the proper contractors. There are also a great many kinds of articles required from time to time that are purchased in the open market, and great care is exercised that the goods may be procured at the lowest possible prices. The bills for goods purchased are presented to me monthly, when they are carefully scrutinized and examined to see that prices are in accordance with the contracts and that extensions and footings are correct. Bills are then briefed and approved and forwarded to the auditor for payment.

The number of requisitions for supplies for the year was 4,320. The number of orders given 9,500, and the number of bills examined and approved was 7,950, thereby showing an increase of labor during the year of over 10 per cent, and the increase in the labors of the office have been for several years about 10 per cent yearly, with no increase of the clerical help. The smallpox epidemic of last winter increased my labors greatly. In my former reports I have urged you to allow me one more employee, and I again urge you to do so. The amount of work of the office is so greatly increased that nearly all my time is employed in clerical work at my desk and my outside work has to be done after office hours.

The office work is systematized and arranged perfectly, but more help should be given me to make an annual exhibit of the number of each and every article purchased, and the disposition and cost of same. I sincerely think that the efficiency of the office would be increased by increasing the compensation of the employees now in the office. Their compensation is totally inadequate to the amount of labor and the kind of labor performed. The salary of the deputy property clerk is but

# 442 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

\$1,000 per annum. and I earnestly recommend that it may be increased to \$1,400 per annum. which is no more than the position demands. The employee who examines and briefs bills, whose salary is but \$720 per annum. should be allowed \$1,200 per annum. I therefore urgently request that the compensation of the employees of this office may be arranged as follows. viz: One property clerk at \$1,600 per annum, one deputy property clerk at \$1,400, one clerk at \$1,200, one clerk (new) at \$1,000; one messenger clerk at \$600.

Below you will please find schedule of prices paid for supplies under contract.

I am, very respectfully, your obedient servant,

F. O. BECKETT, *Property Clerk.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

## CLASS I.—Stationery.

## ENGINE HOUSES.

The houses occupied by the department are thirteen in number, ten of which are engine houses, the remaining three being used as truck houses. At the last session of Congress an appropriation of \$25,900 was allowed for the purpose of building new quarters for engine company No. 2, the present quarters being entirely too small for a full-fledged engine company. The new house when completed will be located on D street, between Fourteenth and Fifteenth streets NW. It is my intention, in order to give the business portions of the city the best possible protection against fire, to place the chemical engine company, now located in the house of truck company C, in the quarters that will be vacated by engine company No. 2. The building will need some slight alterations and repairs, and can be put in condition for the purpose for which it is to be used at a very small expense. The house occupied by engine company No. 4 is entirely too small for the purpose for which it is used, and it is also in very bad repair. This house should be replaced by one of more modern improvements to give the men the conveniences they should by all means have. Engine house No. 3, although occupied by this department, is the property of the United States Government. In consequence we experience a great amount of trouble in having repairs made that are absolutely necessary. The remaining engine houses need some minor repairs and alterations, and with a small outlay of money on each can be put in first-class order.

## CHEMICAL ENGINE.

There are now in the department two chemical engine companies, one located in the house of truck company C, Fourteenth street and Ohio avenue, the other in engine house No. 11, situated on Fourteenth street, between Kenesaw avenue and Kenyon street NW., the last mentioned having been placed in service at 12 o'clock noon on Saturday, June 22, 1895. The locating of a new chemical engine company in Mount Pleasant caused a great deal of rejoicing on the part of the citizens of the above-mentioned suburb, all of whom had been clamoring for recognition in the way of fire protection for a number of years, and finally obtaining the much-desired relief. I have every reason to believe that this new company will be able to do some very effective fire duty and prove a valuable addition to that growing and prosperous suburb. There is no doubt in my mind but that the chemical engines are a valuable addition to the department, they being very easily handled, and operated with one or two lines of hose, such as may be desired at a very short notice. The use of the chemical engine also reduces the loss at an ordinary fire, for if discovered in time it can be put out by this method and with but very little damage. We are also very often

relieved of the necessity for placing into service our steam fire engines by the use of the chemical engine, also to do away with the dragging of heavy lines of hose through a building, which, if not properly handled, are liable to cause a great amount of unnecessary loss. I have certainly been more than pleased with the work of the chemical engines on several occasions.

#### NEW COMPANIES.

The department, notwithstanding its high degree of efficiency, is seriously hampered by its lack of an adequate force and the necessary apparatus to protect the property of the large area for which it is responsible. Each year the number of buildings is increasing, especially in the outskirts of the city, and in the business portions larger and more costly structures are supplanting those which have been found poorly adapted to the wants of a growing city. Thus the territory to be guarded by the various companies, especially those stationed in the vicinity of the suburbs, and the value of the property to be protected in all sections of the city are fast increasing. The present force, consisting of but nine engine and three truck companies, is of necessity widely scattered, in order that each district may have as just a division of the means at command for its protection as possible. The result of this enforced condition of things may at any time work serious loss of life and valuable property, as a large fire may break out in one locality, necessitating the calling out of the entire department, and while the force is concentrated at that point an equally urgent call upon it is liable to come from some distant district. Too much can not be said regarding the necessity for increased facilities for fire protection. It is of the utmost importance that the department be granted the appropriation asked for. The estimates herein given are made on account of the urgent needs. By making provision for an increase in the number of companies and apparatus the district of each company will be narrowed down, and the department will be enabled to keep a reserve force, and therefore meet any emergency which may arise. I have recommended that an appropriation for three engine companies be allowed and for the transfer of chemical engine company No. 2, now located on Fourteenth street, between Kenesaw avenue and Kenyon street, to the vicinity of Brightwood and the placing of one of the engine companies in the house vacated by them.

The expense necessary to put into service and maintain this additional force is extremely small as compared with the great benefit which the city will derive therefrom.

#### PAY AND PROMOTIONS.

I have the honor to repeat my recommendation of a preceding year for an increase of 15 per cent on the pay of the members of the department. The pay of the men has only been increased on one occasion since the organization of the department; the privates received this increase, which amounted to only \$5 per month. The men are required to reside in the neighborhood of the company in which they are doing duty. In these localities house rents are, as a rule, high, and the other expenses to which the men are subjected make it impossible for them to obtain anything but the plainest necessities of life for their families. The Commissioners, in their estimates submitted to Congress at its last session, recommended an increase of 15 per cent, and

a petition having the signatures of 26,543 names of the leading business citizens of the District of Columbia was presented to Congress praying that body to grant the desired increase. I am of the opinion that the firemen do not receive the recognition due them in the way of pay for the hard, trying, and dangerous duties imposed upon them, which they perform with unflinching courage. The pay of the men even with the proposed increase would be less than that received in a great many other cities with a much smaller population. I have also recommended that the pay of the clerk of the department be increased from \$900 to \$1,200 per annum. As stated in my estimates, the amount of work the clerk is called upon to perform, and the ability and experience required, certainly entitle him to the proposed increase.

#### PENSION FUND.

Congress at its last session appropriated the sum of \$2,500 toward establishing a permanent relief fund that would benefit those of the members of the fire department who become incapacitated after years of faithful service, in their endeavor to save the lives and property of their fellow-citizens, and also the widows and orphans of those who are unfortunate enough to lose their lives in the service. It is certainly a pleasure to me to see Congress make such a move, and I think it is a starting point in the right direction. For several years past we have had to resort to the giving of an annual excursion, and have been forced to sell tickets, appealing to the charitable public of the District of Columbia to purchase same, in order to meet the expenses of the pension fund. We have also received an occasional donation for the fund from some kind-hearted citizen who was no doubt interested in the success and welfare of the department. It is my intention, now that Congress has established a pension fund, although it be small, to do away with the giving of our annual excursion, and if possible obtain from the next Congress an increase over the amount appropriated by the last Congress, as that amount appears not sufficient to meet the demands made on this fund. We have on hand now a small reserve which, in addition to the \$2,500 appropriated by Congress, will soon become exhausted. There is now deducted \$1 per month from the pay of each of the 154 members of the department, making a total of \$1,848 for the year, and, with the \$2,500 appropriated by Congress, makes a grand total of \$4,348 for the year. We are paying seventeen pensions, a sum of \$425 per month, or a total of \$5,100 for one year, leaving a yearly deficit of \$752. We are now carrying on our rolls about six members of the department who are incapacitated and unfit to perform first-class fire duty, owing to disabilities incurred while in line of duty. These men should be relieved, and strong, able-bodied men appointed to their places. The reliefment of these men would necessitate the appropriating by Congress of at least \$3,000 more annually, which is a small matter when the efficiency of the department is taken into consideration.

#### DISCIPLINE.

The discipline during the past year has been excellent, and with but few exceptions has been of the best order. We have on several occasions been called upon to reprimand and fine some of the men, and some have been dismissed. The duties of a fireman require a strict observance of the rules governing the department, and it is absolutely essential that they be enforced in the strictest manner. I am determined

to enforce the observance of the rules and obedience to officers, which alone can make a department like this effective. It is a duty I owe to the public to promptly bring the offenders to justice, where the rules are disregarded by the members. Neglect to do this would tend to demoralize and seriously impair the department's usefulness. The men have been regularly drilled during the year, and I feel justified in saying that they are about as near perfect as they could possibly be. All persons appointed to positions in the department are required to serve a probationary term of twelve months, and are subjected to four examinations during the said probationary term. Three of these examinations are conducted by the foreman of the company in which the appointee is doing duty; the last and final examination is conducted by the assistant chief engineer in charge of the company in which the appointee is stationed. These examinations I consider absolutely necessary in order to ascertain the appointee's knowledge of the appliances used in the department for the extinguishing of fires, location of fire hydrants, water supply, fire-alarm boxes, signals, and rules and regulations governing the department. If at the end of the probationary term the appointee passes a satisfactory examination he is then appointed to a permanent position in the department, otherwise he is dropped. During the past year the department has on several occasions been complimented by several of the unfortunate citizens who have suffered loss by fire, also by public-press notices for the efficient services rendered, and the gentlemanly conduct on the part of the officers and members. It is certainly gratifying to me as chief engineer of the fire department to see that the citizens of the District are so much interested in the success and the workings of the fire department.

## APPLICATIONS.

During the year there were 149 applications for positions in the department, and 28 applicants were reexamined. Of this number, 39 were reported upon as qualified by the board of surgeons, and 138 were rejected.

## OFFICER IN CHARGE OF REPAIRS TO APPARATUS.

I have the honor to renew my former recommendations that a practical machinist and engineer be employed to take charge of the repair to all apparatus, respond to alarms of fire, and make an inspection of the working of each engine at fires; also to make a daily tour to each

house and inspect all the apparatus. He will be charged with the control and direction of all employees assigned to duty under him, note and report all derelictions or incompetency on the part of employees, and see that the time of all men assigned him is employed to the greatest advantage to the department. He shall be subject to the rules and regulations governing the fire department and the orders of the chief engineer. I have therefore recommended that such an officer be employed at a salary of \$1,200 per annum.

#### APPARATUS.

The apparatus of the department consists of 11 engines, 9 in service and 2 in reserve; 2 fuel wagons in service; 1 chemical engine, capacity 160 gallons; 1 chemical engine, capacity 170 gallons; 12 hose carriages, 9 in service and 3 in reserve; 4 trucks, 3 in service and 1 in reserve. Attached to each of the 9 carriages are two 6-gallon fire extinguishers; attached to each of 3 carriages are two 3-gallon fire extinguishers; attached to 1 truck are four 5-gallon fire extinguishers; attached to 1 truck are two 6-gallon fire extinguishers; attached to each of 2 trucks are two 15-gallon fire extinguishers, 2 Empire life-saving nets, and 4 life-saving belts. There is also in the department 1 buggy for use of the chief engineer, 1 buggy each for the use of two assistants to the chief engineer, 1 buggy for the use of the fire marshal, 1 extra buggy, and 2 supply wagons.

Two and three way Siamese, with 3-inch leading hose, are used by the department.

#### HOSE.

The following hose was purchased for the department during the past fiscal year: Paragon brand, 2,000 feet; Maltese Cross brand, 2,400 feet, which was distributed to the following engine companies:

|                   | Feet. |
|-------------------|-------|
| Paragon to—       |       |
| No. 3 .....       | 600   |
| No. 4 .....       | 700   |
| No. 8 .....       | 700   |
| Maltese Cross to— |       |

## FIRE PLUGS.

I desire to renew my recommendation of former years in relation to fire plugs, if possible, with stronger emphasis. The necessity of more fire plugs can not be overestimated. With the water permeating every section of the city and an adequate number of fire plugs, comparative safety would be insured, and many serious conflagrations avoided. Public safety demands immediate attention to the matter. The total number of fire plugs in the District at present is 1,688, which is insufficient for protection from fire. I respectfully recommend that the addition of at least 300 is necessary, they being located in suitable places, as our lead of hose in the heart of the city on an average is about 700 feet.

*Description of fire engines.*

| Assistant chief engineers..... | 2            | 1, 200                  |
| Fire marshal.....              | 1            | 1, 000                  |
| Clerk .....                    | 1            | 900                     |
| Foremen .....                  | 14           | 1, 000                  |
| Engineers.....                 | 10           | 800                     |
| Firemen .....                  | 10           | 840                     |
| Tillermen.....                 | 3            | 840                     |
| Hostlers .....                 | 15           | 840                     |
| Privates .....                 | 92           | 800                     |
| Watchmen.....                  | 6            | 600                     |
| Veterinary surgeon.....        | 1            | 400                     |
| Total .....                    | 156          | .....                   |

Annexed will be found a statement of the fire marshal, William O. Drew, in relation to the storage and grade of illuminating oils, etc., also a detailed statement of fires, losses, and insurance for the year ended

June 30, 1895. There were 256 alarms of fire and 264 local alarms during the year. The estimated loss entailed was \$602,180, covered by an insurance of \$290,175, against a loss of \$202,441, covered by an insurance of \$145,139, for the preceding year.

The report of the veterinary surgeon is also annexed hereto, which shows that the surgeon has rendered an unusual amount of service during the past year. Seventeen horses were purchased and 12 condemned as not fit for fire service, which were turned over to the property clerk of the district. One hundred and twenty-eight horses were sent to the hospital for treatment for the various ailments as stated in the report of the veterinary surgeon.

In conclusion, I beg to return my thanks to the Commissioners for the courtesy at all times extended me; also to my two assistant chiefs and the officers and men under my command; to the major, officers, and members of the police force; to the superintendent of the fire alarm, etc., and the operators connected with the office, all of whom have rendered valuable service, making it easier for me to fulfill the various and important duties intrusted to me.

Very respectfully,

JOSEPH PARRIS,  
*Chief Engineer Fire Department.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

#### ESTIMATES FOR THE FIRE DEPARTMENT FOR FISCAL YEAR ENDING JUNE 30, 1897.

GENTLEMEN: I have the honor to submit my estimates for the expenses of the fire department for the fiscal year ending June 30, 1897:

|                                  | Appropriation for<br>fiscal year ending<br>June 30, 1896. |         | Amount of appro-<br>priation asked for<br>fiscal year ending<br>June 30, 1897. |         |
|----------------------------------|---|---------|--|---------|
|                                  | Salary.   | Total.  | Salary.  | Total.  |
| 1 chief engineer.....            | \$2,000   | \$2,000 | \$2,300  | \$2,300 |
| 2 assistant chief engineers..... | 1,200   | 2,400   | 1,380  | 2,760   |

| Total.....                       |   | 131,420 |  | 151,598 |

#### Increase of force recommended:

|  |         |
|--|---------|
| 1 foreman.....                                     | \$1,150 |
| 1 tillerman.....                                   | 966     |
| 1 hostler.....                                     | 966     |
| 9 privates.....                                    | 8,280   |
| 1 machinist in charge of repairs to apparatus..... | 1,200   |
| 6 additional watchmen.....                         | 4,140   |
| Total.....   | 16,702  |

|  |         |
|--|---------|
| Repairs to engine houses.....  | \$4,500 |
| Repairs to apparatus, and new appliances.....  | 3,500   |
| Purchase of hose.....  | 7,000   |
| Fuel.....  | 6,500   |
| Horses.....  | 6,500   |
| Forage.....  | 10,000  |
| Contingent expenses, including horseshoeing, furniture, fixtures, laundry,<br>oil, medical and stable supplies, harness, gas, ice, and other necessary<br>items..... | 10,500  |
| For the pension fund.....  | 7,500   |
| Total.....   | 56,000  |
| 1 aerial turntable truck, to replace old-style truck.....  | 3,500   |
| To exchange old-style straight-frame engine for modern upright.....  | 4,000   |
| Total.....   | 7,500   |
| House, lot, and furniture for one engine company in Anacostia.....   | 22,000  |
| 1 new engine.....  | 4,500   |
| 1 new hose carriage.....   | 900     |
| 1 foreman.....   | 1,150   |
| 1 engineer.....  | 1,150   |
| 1 fireman.....   | 966     |
| 1 hostler.....   | 966     |
| 6 privates.....  | 5,520   |
| 5 horses.....  | 1,250   |
| Total.....   | 38,402  |
| House, lot, and furniture for one engine company, to be located in the vicinity<br>of North Capitol street and Florida avenue.....                                   | 23,000  |
| 1 new engine.....  | 4,500   |
| 1 new hose carriage.....   | 900     |
| 1 foreman.....   | 1,150   |
| 1 engineer.....  | 1,150   |
| 1 fireman.....   | 966     |
| 1 hostler.....   | 966     |
| 6 privates.....  | 5,520   |
| 5 horses.....  | 1,250   |
| Total.....   | 39,402  |
| 1 new engine, to be placed in house now occupied by chemical engine com-<br>pany No. 2.....  | 4,500   |
| 1 hose carriage.....   | 900     |
| 1 foreman.....   | 1,150   |
| 1 engineer.....  | 1,150   |
| 1 fireman.....   | 966     |
| 1 hostler.....   | 966     |
| 6 privates.....  | 5,520   |
| 5 horses.....  | 1,250   |
| Total.....   | 16,402  |
| House, lot, and furniture, to be located in the vicinity of Brightwood, to<br>accommodate chemical engine company No. 2, now in service in Mount<br>Pleasant.....    | 15,900  |

In the foregoing statement I have given the amount of salary now received by the different employees of the department, and have also submitted an estimate for the increase of same in the various grades. I would earnestly urge upon you the justice of such increase. I would also urge this increase for the reason that the present rate of pay makes it almost impossible for me to keep a full complement of men in the department. The pay, also, of the clerk of the department is not commensurate with the duties he is called upon to perform. Being allowed only one clerk under the law he has charge of and has to perform all the clerical work of the department. In addition to his office duties he has to attend the trials of members of the department for violation of the rules and regulations and make a verbatim

report of such trials, which necessitates that the clerk must also be a stenographer and typewriter. His work is exacting and requires experience and ability, and entitles him to the increased compensation herein earnestly recommended.

In estimating for an increase of force I would say that Congress at its last session provided for a house, lot, and furniture in the northwestern section of the city for a new truck company, but failed to provide men for the company. The increase of 1 foreman, 1 tillerman, 1 hostler, and 9 privates is asked for to enable me to place this company in service.

In asking for a machinist at a salary of \$1,200 per annum I feel confident that the saving to apparatus would more than justify the outlay.

There are in the department a number of men who by reason of long service are eligible for retirement. They are unable to perform the hard and trying duties devolving upon firemen, and it is recommended that they be put on duty as watchmen. This change would enable the department to supply the vacancies made by their transfers with new, strong, and able-bodied men. The department would be greatly benefited if this change were made.

The amount for repairs is based upon an estimate of work necessary to be done. The ten engine and three truck houses are constantly occupied day and night, and in some of these houses it will be necessary to make repairs other than those caused by ordinary wear and tear. Some are old buildings upon which more or less repairing must be done, and still other buildings have had no work done on them for some time past.

Past experience has shown the necessity of a slight increase in the appropriation for fuel. Failure to grant the increase herein specified would cause hardship should the winter be more severe than usual or should there be a large number of fires.

The amount estimated for horses is to replace horses which have become physical wrecks. It is of the utmost importance that the department should not run short in this particular.

The increase asked for in forage is absolutely necessary, as the amount heretofore appropriated has been found not sufficient to meet the demands.

The amount estimated for contingent expenses is increased \$2,500. This has been found necessary to keep the department supplied with the sundry articles purchased out of this fund.

I have given in the foregoing report the exact condition of the fireman's pension fund, and it is earnestly hoped that the estimate for \$7,500 will be allowed.

In estimating for a new aerial turntable truck, I would say that this is to replace an old truck that has been in service since March 19, 1877, and which has been found inadequate to meet the demands that are made upon it.

In asking to exchange an old-style straight-frame engine for a modern upright it is my desire to equip the different companies with the best possible apparatus. The old-style engines that are in the department are very much inferior to the modern engine, and experience has proven that a company equipped with a modern engine has been able to do far more efficient work than a company with an old-style engine, and it is earnestly recommended that the appropriation be granted.

An increase in the number of engine companies can not be too strongly urged. It is necessary that one company be located in Anacostia and one in the vicinity of North Capitol street and Florida avenue. Anacostia, which covers an area of 1 square mile, with a population of 5,870 and 1,107 buildings, not including churches, schools, and outbuildings, is practically without any fire protection whatever. The distance from the engine house located on North Carolina avenue between Sixth and Seventh streets to the nearest fire-alarm box in Anacostia is  $1\frac{1}{2}$  miles. It can readily be seen that by the time an engine could be at the scene of a fire so far from the engine house much damage would be done; in fact, the department could hardly hope to do much more than save adjoining property. Additional evidence of the need of having an engine company in Anacostia is that the St. Elizabeth Asylum for the Insane and the German Orphan Asylum, both located a considerable distance from Anacostia, are dependent upon this department for protection from damage by fire. The protection afforded these asylums is now very slight, and much damage might be done and a great number of lives placed in jeopardy by the time an engine could be put into service at either of these places.

What has been said concerning Anacostia and near-by places can be said concerning Brookland and Eckington. These places are in the district assigned to the engine company located on R street between Ninth and Tenth streets. By the establishment of a company in the vicinity of North Capitol street and Florida avenue much loss might be averted at the above-named places.

I have also estimated for a new steam fire-engine company to be located in Mount Pleasant to take the place of the chemical company now stationed there, and for the removal of that company (the chemical) to the vicinity of Brightwood. This locality, including the Soldiers' Home, Petworth, Brightwood, Takoma Park, and other

suburban villages, is also very much in need of fire protection. It is an undisputed fact that should a fire occur in any of the above-mentioned subdivisions it would be impossible for the city apparatus to reach the fire ground in time to be of any great service. In transferring the chemical company from its present location and placing a steam fire-engine company in the house vacated by them both localities would receive the very best of fire protection.

As I said in the body of this report, an appropriation for these additional facilities for the protection of valuable property would be money well spent, and not to be considered in connection with the great amount of good to be derived therefrom. Many complaints have been made, and with reason, of the inadequate protection from damage by fire afforded to the outlying districts, and the time has certainly come when this department should be granted the additional facilities requested to enable it to properly protect life and property in adjoining localities.

Very respectfully,

JOSEPH PARRIS,  
Chief Engineer, Fire Department.

To the COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

### REPORT OF THE DISTRICT VETERINARIAN.

WASHINGTON, D. C., July 1, 1895.

SIR: I have the honor to transmit the following report as veterinarian to your department for the fiscal year ended June 30, 1895.

During the past year there has been an unusual amount of veterinary service required owing to the large number of sick and lame horses.

There have been 17 new horses purchased and 12 condemned as unfit for fire service, which were turned over to the property clerk for disposal.

There have been admitted to the hospital for treatment 128 patients, which were under treatment on an average of 11.87 days, or a total of 1,520 days, suffering with the following ailments:

| Under treatment for—          | Cases. | Days at hospital. | Under treatment for—     | Cases. | Days at hospital. |
|-------------------------------|--------|-------------------|--------------------------|--------|-------------------|
| Lameness from various causes. | 42     | 626               | Strangles.....           | 1      | 38                |
| Rest.....                     | 27     | 378               | Indigestion.....         | 1      | 6                 |
| Wounds.....                   | 1      | 11                | Pneumonia.....           | 1      | 38                |
| Inflammation of urethra.....  | 1      | 14                | Impaction.....           | 1      | 14                |
| Influenza.....                | 2      | 24                | Laryngitis.....          | 1      | 6                 |
| Scratches.....                | 5      | 45                | Nail in foot.....        | 1      | 6                 |
| Colds.....                    | 8      | 44                | New horses on trial..... | 20     | 111               |
| Osteoporosis.....             | 3      | 34                | Split hoof.....          | 1      | 21                |
| Azoturia.....                 | 3      | 12                |                          |        |                   |
| Colic.....                    | 6      | 15                | Total.....               | 128    | 1,520             |
| Injuries.....                 | 3      | 77                |                          |        |                   |

In addition to the hospital treatment there have been some three hundred visits made to the different houses and six trips to Baltimore for inspection of new horses about to be purchased.

The present condition of the different horses will be seen by the following table, giving their location:

| Engine house, etc. | Horse No. | Condition. | Engine house, etc. | Horse No. | Condition. |
|--------------------|-----------|------------|--------------------|-----------|------------|
| Truck A.....       | 85        | Fair.      | No. 1.....         | 156       | Good.      |
|                    | 140       | Good.      |                    | 1         | Fair.      |
|                    | 160       | Do.        |                    | 166       | Good.      |
|                    | 141       | Do.        | No. 2.....         | 127       | Fair.      |
| Truck B.....       | 123       | Do.        |                    | 120       | Do.        |
|                    | 130       | Do.        |                    | 150       | Do.        |
|                    | 98        | Do.        |                    | 121       | Do.        |
|                    | 110       | Do.        | No. 3.....         | 89        | Good.      |

|                    | 132       | Do.        |                    | 165       | Do.        |
|                    | 139       | Fair.      |                    | 100       | Fair.      |
|                    | 112       | Bad.       |                    | 57        | Bad.       |
| No. 8.....         | 76        | Good.      |                    | 78        | Do.        |
|                    | 77        | Do.        |                    | 113       | Fair.      |
|                    | 63        | Do.        |                    | 138       | Good.      |
|                    | 143       | Do.        |                    | 169       | Do.        |
|                    | 4         | Fair.      |                    | 170       | Do.        |

It will be seen from the above list that we have 74 horses; of these 48 are in good condition and fit for any service required of them; 17 are in fair condition only, and 9 in bad condition and will be replaced with new ones as soon as they can be purchased.

I must again call your attention to the need of a hospital department. For the past five years the sick horses, also many of the extra ones, have been taken care of by your veterinarian at a great expense to him, which should not be, as no private individual can afford to keep these animals without pay. If it is thought to be inadvisable to maintain a hospital, I would recommend that \$1 per day be allowed for the feed and medicine with hospital accommodation for all District stock when sent to hospital.

I would also draw your attention to the fact that the pay of this office is not in accordance with the service required or the responsibility attached thereto, and would therefore ask that it be fixed at not less than \$1,000 per year.

I have the honor to be, yours, respectfully,

C. B. ROBINSON, V. S.,  
District Veterinarian.

JOSEPH PARRIS,  
Chief Engineer Fire Department, District of Columbia.

## REPORT OF THE FIRE MARSHAL.

WASHINGTON, D. C., August 23, 1895.

DEAR SIR: I have the honor to transmit the following report of the transaction of this office for the fiscal year ended June 30, 1895.

During the year I visited and inspected the scene of 256 fires for which alarms had been rung, entailing a loss of \$572,025, with an insurance on the same of \$277,495; also the scene of 264 local alarms for which no alarm was sounded, causing a loss of \$30,155, with an insurance of \$12,680. Total loss, \$602,180; insurance, \$290,175.

A list of causes for said fires, with detailed statement of the loss and insurance, will be found in this report; also number of samples of kerosene oil tested during the year and the quality of the same.

During the year I inspected 318 samples of kerosene oil, which in the test prove to be of excellent quality, every sample being up to requirements.

I also visited 13 different buildings which were reported to this office as being in an unsafe condition and in danger by fire from defective flues, stovepipes, and other causes, all of which were attended to and put in safe condition.

The following tables will show the number of fires and alarms from July 1, 1894, to June 30, 1895, with causes, kind of buildings, and how occupied.

I take pleasure in stating that the efficiency of the department for the past year speaks well for its management, and should be a pride to the citizens of the District of Columbia.

Most respectfully, your obedient servant,

JOSEPH PARRIS, Esq.,  
Chief Engineer Fire Department.

WM. O. DREW, Fire Marshal.

# REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA. 477

## A.—Statement of number of fires, loss, and insurance for the year ended June 30, 1895.

## REPORT OF THE MAJOR AND SUPERINTENDENT OF THE METROPOLITAN POLICE DEPARTMENT.

WASHINGTON, D. C., July 1, 1895.

*To the Honorable Commissioners of the District of Columbia.*

GENTLEMEN: I have the honor to submit the following estimate of the amount required for the conduct and support of this department for the fiscal year ending June 30, 1897, accompanied by a detailed statement of its operations for the fiscal year ended June 30, 1895:

|   |          |
|---|----------|
| 1 major and superintendent.....   | \$3, 300 |
| 1 captain .....   | 1, 800   |
| 4 lieutenants, inspectors, at \$1,500 each.....   | 6, 000   |
| 1 chief clerk, who shall also be property clerk.....  | 2, 000   |
| 1 clerk .....   | 1, 500   |
| 1 clerk .....   | 900      |
| 4 surgeons of the police and fire departments, at \$540 each.....   | 2, 160   |
| Additional compensation for 12 privates, for special service.....   | 2, 880   |
| 9 lieutenants, at \$1,320 each.....   | 11, 880  |
| 31 sergeants, at \$1,140 each.....  | 35, 340  |
| 308 privates, class 1, at \$900 each.....   | 277, 200 |
| 247 privates, class 2, at \$1,080 each .....  | 266, 760 |
| 20 station keepers, at \$720 each.....  | 14, 400  |
| 8 laborers, at \$480 each .....   | 3, 840   |
| 1 laborer, in charge of morgue.....   | 680      |
| 1 messenger.....  | 700      |
| 1 messenger.....  | 500      |
| 1 major and superintendent mounted.....   | 240      |
| 1 captain mounted.....  | 240      |
| 43 lieutenants, sergeants, and privates mounted, at \$240 each.....   | 10, 320  |
| 23 drivers, at \$480 each.....  | 11, 040  |
| 3 police matrons, at \$600 each.....  | 1, 800   |
| To meet a deficiency in the police relief fund and to be deposited with the Treasurer of the United States, out of the receipts from fines in the police court .....  | 16, 650  |
| Rent of police headquarters, including fuel, light, and janitor's service, and of substation at Anacostia.....  | 2, 080   |
| Fuel.....   | 2, 200   |
| Repairs to stations.....  | 3, 000   |
| Miscellaneous and contingent expenses, including stationery, books, telegraphing, photographs, printing, binding, gas, ice, washing, meals for prisoners, furniture and repairs thereto, beds and bed clothing, insignia of office, purchase and care of horses, police equipments and repairs of same, harness, forage, repairs to vehicles, van, ambulance, and patrol wagons, and expenses incurred in prevention and detection of crime, and other necessary items..... | 20, 000  |
| 1 light wagon, harness, and horse.....  | 365      |
| 1 light ambulance.....  | 350      |
| Extending the patrol system in the Fifth, Seventh, Eighth, and Ninth precincts, and changing location of certain boxes.....   | 7, 500   |
| Improving the stable and grounds of the Third precinct station.....   | 2, 673   |
| Total .....   | 710, 298 |
| Appropriation for 1896.....   | 565, 245 |
| Excess.....   | 145, 053 |

These estimates exceed by \$145,053, including \$16,650 for the police relief fund, the appropriation for the current year. The items of increase are as follows:

|  |                |
|--|----------------|
| 1 additional inspector .....             | \$1,500        |
| 62 privates of class 1, at \$900 .....   | 55,800         |
| 63 privates of class 2, at \$1,080 ..... | 68,040         |
| 3 additional drivers, at \$480 .....     | 1,440          |
| Police relief fund .....                 | 10,150         |
| Repairs to stations .....                | 1,000          |
| Contingent expenses .....                | 2,250          |
| Ambulance .....                          | 350            |
| Extension of patrol service .....        | 7,500          |
| <b>Total increase .....</b>              | <b>148,030</b> |
| <b>Less total decrease .....</b>         | <b>2,977</b>   |
| <b>Net increase .....</b>                | <b>145,053</b> |

#### AN OVERWORKED AND INSUFFICIENT POLICE FORCE.

In the work of the police department, more particularly that of the police force during the fiscal year just closed, no apology is necessary for any apparent shortcomings, but a broader field would have been covered and a more general effective surveillance observed had it not been for a reduction in the number of men on active street duty, occasioned by numerous details, overwork, and a consequent disability list. While the statistics, when compared with those of the preceding year, show that but two more men were assigned to other than street duty, the fact should be borne in mind that there was a larger population in the District, that the hard times induced the commission of more crimes of a higher grade, and the severe winter and long hours of attendance at the police court depleted the ranks by sickness. Where there is an increase of crime there should be extra vigilance, but with an insufficient number of men to exercise such watchfulness the chances of preserving life and property are not what they should be.

During the past year the number of days lost by members of the force on account of sickness was materially increased over previous years, as is manifested by the following tabulation:

|                              |               |
|------------------------------|---------------|
|                              | Days.         |
| Absent with leave .....      | 4,175         |
| Absent without leave .....   | 31            |
| Absent with sick leave ..... | 8,031         |
| Absent, suspended .....      | 47            |
| <b>Total .....</b>           | <b>12,284</b> |

Another factor which has operated against the efficiency of the force is the continuance in service of men permanently incapacitated to perform police duty. But rather than discharge these men, who have incurred disabilities after long years of faithful work, with no means to provide for the sustenance of themselves and families, it has been the policy to retain them, in the hope that at an early day such steps may be taken as will enable the Commissioners to retire them, as authorized by the act of Congress approved February 25, 1885.

It may also be urged that if members of the force are to be assigned to other duty than that of preventing and suppressing crime, by the failure of Congress to make provision for the employment of other persons to do such work, an adequate number of men should be given the department to supply the deficiency thereby created. It might be argued that it is against good policy to make such details, but law and

order at the bathing beach, the protection of funds and property at municipal headquarters, the proper transaction of business in the office of the superintendent, the enforcement of the humane law, the guarding of the poundmaster in his rounds, the operations of the patrol steamer, the maintenance of order at the police court, and the safety of the Executive Mansion and the Capitol, are all matters which have demanded these assignments, in spite of any disposition to keep these employees in their ordinary capacities.

It stands to reason that the bathing beach, which is supported by Congress, should be cared for by persons appointed for that purpose; that the District building should have watchmen rather than policemen; that the health department should have its own officer, with police powers, to look after its interests in connection with the pound master; that the Humane Society should be equally as well equipped for the carrying out of the law under which it is operated; that the steamer which patrols the harbor should be granted the necessary appropriation for the employment of a crew; that the police court should have its bailiffs; that the workhouse should have its guards, and that the Executive Mansion and Capitol should have a force of skilled guardians—all, however, from funds provided distinctly for such purposes—rather than to utilize policemen and decrease thereby the number of available privates for street service in the District of Columbia.

Your attention has already been invited in previous reports to the delays incident to the conduct of cases in the police court. On Monday mornings the prisoners held at the several station houses are arraigned there for trial. They number at the beginning of the week seldom less than 100. When it is considered that one officer or more must be at court to make the information or appear as witnesses, can it be wondered that the streets and avenues of the District are alarmingly unprotected at times? With only two judges to dispose of the various classes of cases arising under the laws and ordinances, notwithstanding that the business is expedited at a rate consistent with justice, the delay in the disposition of this vast number of cases must be considerable. Even on the several days following during the week, with a reduced number of prisoners, the prosecution demands the attention of police officers for such a length of time as to interfere materially with the efforts of the department to furnish the patrol service contemplated by law. During the last year members of the force were required to remain in or about the police court for the purpose named 1,794 times after the hour of 11 o'clock in the morning. When an officer makes an arrest the night before, whether it be his time for rest at home or for reserve duty at his station, it becomes necessary for him to remain at the court until the final disposition of the case or cases in which he may be interested.

Were this state of affairs confined to a jurisdiction of smaller area and a population less in number, such delays would not seriously embarrass the transaction of current police business, but as it is the force is sadly overstrained in the making of arrests and the prosecution of cases. It is reasonable to assume that when officers are delayed and deprived of needed rest and recreation they are mentally and physically unprepared to pursue the duties which belong to them as preservers of the public peace. The conditions should be such that men making arrests the night before should have their cases disposed of, and be relieved of all responsibility therefor, at such an hour the following morning as would give them ample time to recover from the work of the previous night. In 1864 police magistrates gave hearings during the day to persons

taken into custody, and their sessions were held as early as 7 o'clock in the morning at the several stations. By this course those liable were either imprisoned, fined, or released at the earliest possible hour without requiring the officers in the cases to go beyond the confines of their station houses, and consequently they were permitted to enjoy the rest and relief to which they are entitled under the regulations prescribed for their discipline and government.

In the interests of efficiency and for the better protection of this community, consisting of 270,519 people spread over an area of nearly 73 square miles, I have no hesitation in recommending that Congress be urged to make such provision as will secure the appointment for each of the precincts of a magistrate whose duty shall be to give a preliminary hearing to all classes of cases subject to prosecution by police officers. The adoption of such a system, with a requirement that the magistrates shall try cases as early as 7 o'clock each morning and as late as 7 o'clock each evening, would do away with existing evils, and often afford an arrested person an opportunity to avoid the humiliation of confinement in a cell.

It seems to me that with this simple explanation of the situation there is little room left for the maintenance or advocacy of the present system of all-night incarceration and the transportation in the police van of prisoners from one end of the District to the other. Prisoners taken on Saturday night are conveyed from the stations to the police court on Monday in a vehicle constructed for such a purpose, and the same process is followed every morning throughout the week. At times, when the heat is excessive and the number of arrests largely exceed those during the winter months, human beings are packed in this inclosed conveyance to such an extent as to border on inhumanity. Such means tend to degrade those who may be declared not guilty when tried, and also to the spread of infectious diseases. After being transported to the police court to await trial, such prisoners as may be sentenced to the workhouse or jail are again confined in the van in numbers generally beyond its capacity, so that by the time they reach the place assigned them they have undergone almost sufficient penalty to justify their release.

These are some of the more important propositions which have presented themselves to this department and which exhibit weaknesses that have materially interfered with a satisfactory administration of its affairs. It is hoped that they will be accepted as ample justification for an addition to the force of at least 125 men, an increase which would not be more than enough to give the District of Columbia a proper patrol, at all hours, of its streets and thoroughfares, both city and suburban, and which proposes an addition of only 47 more men than those on detached service, shown by the following table to number 78:

|                                       |    |                      |    |
|---------------------------------------|----|----------------------|----|
| Bathing beach.....                    | 2  | Humane Society.....  | 1  |
| Capitol building.....                 | 4  | Hack inspector.....  | 1  |
| District building.....                | 7  | Patrol steamer.....  | 3  |
| Detective office.....                 | 13 | Police court.....    | 6  |
| Detective office, night clerk.....    | 1  | Post-office.....     | 1  |
| Executive Mansion.....                | 26 | Rock Creek Park..... | 1  |
| Headquarters, in charge at night..... | 1  | Workhouse.....       | 4  |
| Headquarters, clerk's office.....     | 4  |                      |    |
| Headquarters, sanitary office.....    | 2  |                      |    |
| Health department.....                | 1  | Total.....           | 78 |

It is a matter of congratulation that the police force, handicapped as it is in the several respects hereinbefore mentioned, has proved its ability to care for persons and property so far as it goes. The statistics

of crime embraced in this report speak loudly in praise of its employees, for while increase of crime, which has generally prevailed throughout the country, has existed here, the arrests and convictions, as well as the value of property and money recovered, have been most satisfactory, taking into account both numbers and amount.

## DISPOSITION OF THE FORCE.

When it is understood that the police district includes the entire territory of the District of Columbia, with a force of 450 to patrol it by four divisions or reliefs, the student of criminal statistics can not feel otherwise than amazed at the peace, good order, and feeling of security to persons and property that prevail therein. This condition is not due alone to the police power exercised in the District, but in a great measure to prevalent moral influences. There is, however, as is well known, an extensive element which is beyond the hope and scope of sentiment to control, and which must be managed wholly by the application of the laws. The same state of affairs exists to some extent in every well-regulated municipality, but none of them labors under the disadvantage of having so extensive an area as a police jurisdiction as has the District of Columbia, excepting Chicago, with its force of 3,150, and Philadelphia, with a force of 2,140. When it is considered that the District force aggregates over 400 officers and men, it is not intended to convey the idea that these are all doing duty at one time. The superintendent, captain, and lieutenants are required by law to be on continuous duty, but the privates are divided into platoons, and the platoons into sections, enabling the men to alternate in the performance of police work. Before this division of the force is made those detailed and the sick and injured are deducted from the total. Thus, on the 30th day of June, 1895, at 8 o'clock a. m., there was an available police force of 459, employed as follows: On duty, 1 superintendent, 1 captain, 2 inspectors, 9 lieutenants, 30 sergeants, and 416 privates, assigned as follows:

| Precinct.     | Lieutenants. | Sergeants. | Privates. |
|---------------|--------------|------------|-----------|
| First .....   | 1            | 1          | 13        |
| Second .....  | 1            | 1          | 7         |
| Third .....   | 1            | -----      | 11        |
| Fourth .....  | 1            | 1          | 9         |
| Fifth .....   | 1            | 2          | 8         |
| Sixth .....   | 1            | 1          | 9         |
| Seventh ..... | 1            | 2          | 13        |
| Eighth .....  | 1            | 2          | 14        |
| Ninth .....   | 1            | 1          | 9         |

At 1 o'clock p. m. those who went on duty at 8 o'clock a. m. were relieved, and another division came on duty, consisting of 1 superintendent, 1 captain, 2 inspectors, 9 lieutenants, 9 sergeants, and 96 privates, assigned as follows:

| Precinct.     | Lieutenants. | Sergeants. | Privates. |
|---------------|--------------|------------|-----------|
| First .....   | 1            | 1          | 12        |
| Second .....  | 1            | 1          | 8         |
| Third .....   | 1            | -----      | 11        |
| Fourth .....  | 1            | 1          | 10        |
| Fifth .....   | 1            | 1          | 12        |
| Sixth .....   | 1            | 1          | 11        |
| Seventh ..... | 1            | 2          | 9         |
| Eighth .....  | 1            | 2          | 14        |
| Ninth .....   | 1            | -----      | 9         |

The above assignment was relieved at 6 o'clock p. m. by the night force, which embraced platoons of men instead of sections, in this manner doubling as nearly as possible in every police precinct. The force at this hour embraced 1 superintendent, 1 captain, 2 inspectors, 9 lieutenants, 9 sergeants, and 150 privates, assigned as follows:

| Precinct.     | Lieutenants. | Sergeants. | Privates. |
|---------------|--------------|------------|-----------|
| First .....   | 1            | .....      | 17        |
| Second .....  | 1            | 1          | 14        |
| Third .....   | 1            | 1          | 15        |
| Fourth .....  | 1            | 1          | 19        |
| Fifth .....   | 1            | 1          | 17        |
| Sixth .....   | 1            | 1          | 18        |
| Seventh ..... | 1            | 1          | 18        |
| Eighth .....  | 1            | 2          | 18        |
| Ninth .....   | 1            | 1          | 14        |

When 12 o'clock midnight rolled around another platoon patrolled the District and relieved the 6 o'clock detail. The midnight force should always be the strongest, and on the date referred to consisted of 1 superintendent, 1 captain, 2 inspectors, 9 lieutenants, 9 sergeants, and 126 privates, under the following assignments.

| Precinct.     | Lieutenants. | Sergeants. | Privates. |
|---------------|--------------|------------|-----------|
| First .....   | 1            | 1          | 14        |
| Second .....  | 1            | 1          | 14        |
| Third .....   | 1            | .....      | 14        |
| Fourth .....  | 1            | 1          | 16        |
| Fifth .....   | 1            | 1          | 10        |
| Sixth .....   | 1            | 1          | 14        |
| Seventh ..... | 1            | 1          | 13        |
| Eighth .....  | 1            | 2          | 17        |
| Ninth .....   | 1            | 1          | 14        |

This detail continued until 6 o'clock a. m. July 1, which was the "dog-watch" hour (from 6 until 8 o'clock), during which time the beats were doubled and the least number of men were performing duty.

It will thus be observed that a police day begins at 8 o'clock a. m. and ends at 8 o'clock a. m., and that the greatest number of policemen on duty in the District of Columbia at any one period during the day which terminated the last fiscal year was 150.

#### DISCIPLINE.

It would be strange, indeed, if in a body of nearly 500 men there should not be those who err in judgment and fall short in discretion. The policeman is human, with all the attributes and qualities—good and bad—which belong to the race. That he should make mistakes is natural, but having been selected in view of his special qualifications for police service, it is fair to assume that he will, in a measure at least, set a wise example for sobriety and straightforwardness. The policeman's career is filled with temptations, and he must be a strong man to withstand them all. The new appointee is usually selected as a victim. It is a trifling matter, apparently, for him to accept a drink, but from the moment of its acceptance the alluring hospitality makes him subject to orders from without instead of within headquarters. In all cases where violations of this character have been reported prompt action has been taken against the accused.

To be required to forcibly execute the law against unequal numbers, or where parties at issue are persons of wealth and influence, at times interferes with the policeman's conscientious performance of his obligations. A disregard of duty makes him liable to charges from his lieutenant, while if he perform it complaint may be made against him by the persons interested; and so in either case he may find himself cited to appear before the trial board. There, with numerous witnesses against him, he occupies an unpleasant position, be his cause a righteous one or not. In many instances where his life is endangered the club and revolver are discarded for fear of loss of bread and butter. The good citizen can measurably appreciate the disagreeable duties which at times are incumbent upon the official charged with the enforcement of the law. The policeman is not anxious to make trouble, or to provoke or annoy, to arrest and convict, but sworn to protect the community at large, which should lend him at least a moral support in the performance of his onerous task.

Intoxication, neglect of duty, illegal arrests, unnecessary violence, and kindred violations on the part of members of the force should of course not be tolerated, and the citizen who has good ground for complaint ought to be afforded every means to secure prompt redress.

So long as the existing method of disposing of charges made against members of the force for breaches of discipline prevails, important matters which should receive the attention of the superintendent can not be given that consideration which they require. Since the inauguration of the present form of government in the District of Columbia there has been a police trial committee, composed of the captain of the force and two lieutenants, who act as prosecuting officers in the hearing of evidence and taking of testimony in each case.

These proceedings consume a considerable portion of the time of the officers so detailed and demand the constant services of a stenographer, the testimony frequently aggregating hundreds of pages a month. When it is read over by the trial committee and their verdict pronounced, the documents are forwarded to the superintendent, who must in time go over the testimony, either approve or disapprove the finding of the trial committee, and place the cases, with his conclusion, before the Commissioners for final disposition. This condition should be remedied in some way, at least to such an extent as will give the superintendent opportunity to dispose of the current business of the department, which has steadily increased every succeeding year. It would be within reason to have the law department of the District government review the testimony taken by the trial committee, the same to be forwarded with an opinion from that office.

An examination of the accompanying statistics shows the no inconsiderable amount of attention members of the force received at the hands of the trial committee. All offenses known under the manual are enumerated in the schedule, with the disposition in each case. There was a slight increase in the number of hearings had last year over the year before, and the penalties imposed were just as numerous and far-reaching. The statistics go to prove that out of a given body of men the weaker ones who place themselves liable to reprimand, fine, or removal will average about an equal number each year. The rules and regulations, with which every member of the force is expected to familiarize himself, are replete with rigid requirements, a conscientious compliance with which is made the more difficult when prolonged and extra labor is demanded of the men. Within the fiscal year the lieutenants have been urged to have their respective commands give full

attention to their attire, and the general appearance of the force has been decidedly improved. It is common report that the District police force presents a neater uniform inspection than any other in the country. The cleanliness of the city and the absence of coal dirt and factory smoke naturally contribute to the advantage of the force in this respect. The excellent average demeanor on the part of the force has been maintained the year past, and a continuance is expected the year to come.

#### ANOTHER INSPECTOR.

The law now provides for three inspectors, one of whom is in charge of the detective bureau during the day, the other two visit the station houses and beats in the several precincts at unexpected hours during the night, and see that all the members of the force are vigilant in the discharge of duty. Another inspector is needed, that he may either be thus employed or take charge of headquarters from 8 o'clock in the evening until 8 o'clock the next morning in lieu of a sergeant, the responsibilities and requirements of the position having grown to be such as to need a skilled, experienced, and able officer.

#### DRIVERS.

At present there are 20 drivers employed by this department, viz, 1 van driver, 1 ambulance driver, 2 assistant ambulance drivers, and 16 drivers of patrol wagons, at an annual salary of \$480 each. The estimates call for 23 drivers at the same rate of compensation, an increase of 3, 2 of these to be assigned to patrol wagons of precincts in which, for want of such employees, an all-night patrol service can not be established, and one for duty with the ambulances, the drivers of which—so great and constant are the demands upon them—are unable to give proper care and attention to the horses and vehicles; indeed, in case of sickness of one of them the wagon to which he may be attached must be laid aside from duty. It is deemed best to consolidate the drivers, in order that each may be assigned to the service for which he may be found best fitted.

#### REPAIRS TO STATIONS.

The proposed increase of \$1,000 for repairs to stations is in accordance with the recommendation of the inspector of buildings. There are 9 station houses and 10 stables, which are in continuous occupancy night and day. Sanitary conditions are constantly changing. All old appliances should be replaced with modern devices and the buildings protected from decay.

#### LIGHT WAGONS.

The light wagons for suburban work in the Fifth and Eighth precincts have been advantageously used to relieve the officers on the far distant rural beats from the necessity of bringing prisoners to the stations. It is therefore recommended that \$365 be granted for another vehicle of this character, to be assigned to the Seventh, or Georgetown, precinct. For information as to the detailed work accomplished by the wagons, reference may be had to the statistics bearing upon the patrol system.

#### NEW AMBULANCE.

Allusion has been made to the demands upon the ambulance service, three wagons being now employed therein, one of them of heavy construction and requiring two horses. Another light wagon is asked for,

in the interest of a more economical and yet efficient administration of this branch of police operations.

#### POLICE SIGNAL SERVICE.

The appropriations for the present year contain an item of \$7,000, to be immediately available, for extension of the police-patrol service and fire alarm telegraph to suburbs and city. It was deemed advisable to use this fund exclusively for the extension of the fire-alarm system. I am therefore constrained to ask for an appropriation of \$7,500 to meet urgent demands for telegraph facilities in the growing and exposed outlying localities, the residents of which are justly clamoring for greater police protection.

#### THIRD PRECINCT STABLE.

Careful inspection has developed the necessity of extensive alterations of the stable and wagon house of the Third police precinct. The yard and buildings should be lowered and a driveway made through the wall into the market yard alongside of the station house. The present elevated situation is very inconvenient, requiring a drive of two-thirds of a square from the stable to the front of the station, a part of the distance over a roughly paved alley, resulting in loss of time and much wear and tear to horses and wagons. The estimated cost of this improvement is \$2,673.

#### CONTINGENT EXPENSES.

In its expenditures this department has been conducted on economical principles. Every requisition for supplies, and every voucher in payment, are carefully inspected. It has been the aim to provide only such facilities as conduce to thorough business in office administration and effective efforts in the general service. From the contingent fund are derived the means to prevent and suppress crime, and yet the department has depended entirely upon the skill of its own operators, and saved to the Government expenditures in the way of rewards for the apprehension of criminals, which is not the general policy of like institutions in this country and Europe.

An increasing expense is that paid for the repair of ambulances and patrol wagons. Some of these have been in service for many years, and require frequent overhauling. The constant employment of the horses in use, even with the best care and attention, makes frequent replenishment necessary, while an increased number calls for additional forage and more blacksmithing. Meals furnished prisoners are a growing expense, especially since the department has been instructed to feed, every morning in the week, all persons conveyed from the stations to the cells of the police court, the increased cost on this account causing a monthly outlay of \$60. As the force of privates is augmented so must be the contingent expenditures, the first equipment of a member of the force costing on an average \$30, with thereafter a swelled amount for laundering and other items. The erection of upper stories to stations not only brings about the burning of a greater amount of fuel and the consumption of more gas, but bills for substantial but not elaborate furniture. Congress, within the past ten years, has not been called upon for any deficiency for the maintenance of the police, and the proposed increase of \$2,250 in the contingent appropriation for the next fiscal year is not more than sufficient, if indeed enough, to meet the needs of this department.

## THE POLICE CENSUS.

An important feature of this report is the full and detailed statement of the census taken and completed in December, 1894. The enumeration was made at a time when the city was devoid of the usual floating population, extensive discharges had been made from the Government Departments, and dullness in building and other pursuits had compelled mechanics to seek other fields for employment—in fact, under circumstances and at a period when the least possible showing for the best could be made. Notwithstanding this unpropitious state of affairs an increase of 17,332 in the population in two and a half years was shown. In taking the number of children 1 year of age and under (referred to as births) those living only were enumerated. The total of these, when added to the aggregate under 6, under 15, and over that age, constitutes the whole population.

A useful feature, which will be found serviceable in many ways and by many persons, is the population by squares and villages. A comparison of the number of deaths among those living in a certain square and the prevalence of infectious and other diseases in certain squares sparsely inhabited, while none exist in others thickly settled, will yield information of advantage and interest to the community. The number as well as character of residents where crime prevails is another question that may be determined from the figures. The real-estate dealer will be enabled to discover the squares that are growing in population by comparing the report of this year with that of 1892, when the same method was followed in enumerating the District population. The tallying or taking of the figures was done with the utmost care, and the tabulation and compilation of the same were consummated with the utmost vigilance to avoid error. First the population is given by precincts, then by villages and subdivisions, and finally by blocks, reservations, and squares. The most remarkable item in this connection is the fact that the expense attending the work did not exceed \$40 outside of the labor bestowed by the chief clerk and his assistants.

## POLICE PENSION RELIEF FUND.

For over a year such former members of the force as were permanently incapacitated for active duty and discharged upon a yearly allowance, and numerous families of deceased policemen who are eligible to like aid under the act of February 25, 1885, have been mainly supported from funds derived at the hands of a charitable public, in the absence of Congressional appropriation for their relief. The roll at the present time, on which will be found the amount allowed each person per month, is as follows:

|                           |      |                           |      |
|---------------------------|------|---------------------------|------|
| Gorman, John J .....      | \$10 | Buil, J. McL .....        | \$50 |
| Gorman, Elizabeth .....   | 10   | Harbin, Sarah .....       | 20   |
| Harper, J. G .....        | 30   | Kenner, Margaret A .....  | 20   |
| Atchison, H. L .....      | 25   | Tilling, Andrew .....     | 25   |
| Shelton, Joseph .....     | 50   | Larrabee, E. H .....      | 50   |
| Coomes, Sarah A .....     | 30   | Fitzgerald, T. D .....    | 50   |
| Redway, Loretta .....     | 25   | Cunningham, Wm .....      | 50   |
| Findley, John T .....     | 50   | Ferguson, Annie H .....   | 20   |
| Skidmore, Mary A .....    | 20   | Ferguson, Mark E .....    | 10   |
| Harper, Elizabeth A ..... | 20   | Collins, S. H .....       | 50   |
| Warwick, L. K .....       | 10   | Nokes, Mary J .....       | 20   |
| Kearney, Harry .....      | 10   | Nokes, R. A .....         | 10   |
| Crippen, Florence .....   | 20   | Constantine, J. H .....   | 10   |
| Reilly, Margaret .....    | 10   | Constantine, Mary L ..... | 10   |
| Greene, Marion V .....    | 20   | Clawson, J. M .....       | 50   |
| Greene, Minnie B .....    | 10   | Arnold, J. E .....        | 50   |

*Police Pension Relief Fund—Continued.*

|                            |      |                              |      |
|----------------------------|------|------------------------------|------|
| Slack, Mary E .....        | \$20 | Powell, Mary .....           | \$10 |
| Slack, J. H .....          | 10   | Moore, Ellen .....           | 20   |
| Slack, E. H .....          | 10   | Prather, R. O .....          | 50   |
| Chamberlain, Laura E ..... | 20   | Broderick, T. M .....        | 25   |
| Sebastian, Ann E .....     | 20   | Kearney, Pleasance .....     | 20   |
| Ohlsen, Nora .....         | 20   | Treadwell, Helen L .....     | 20   |
| Ohlsen, Hattie .....       | 10   | Blaisdell, Mary E .....      | 20   |
| Ohlsen, Peter .....        | 10   | Blaisdell, S. F .....        | 3    |
| Bast, Mary .....           | 20   | Blaisdell, Ernestine M ..... | 4    |
| Bast, Irene H .....        | 10   | Blaisdell, J. W .....        | 5    |
| Bast, C. L .....           | 10   | Blaisdell, Edna A .....      | 6    |
| McHenry, Margaret .....    | 20   | Blaisdell, C. W .....        | 10   |
| Guy, Mary L .....          | 25   | Hagan, Mary E .....          | 20   |
| Guy, John M .....          | 10   | Raff, Annie B .....          | 20   |
| Brosnan, Timothy .....     | 50   | Kerby, Kate A .....          | 20   |
| Gantz, William .....       | 30   | Kerby, J. P .....            | 6    |
| Nicholson, Mary E .....    | 20   | Kerby, Mary K .....          | 6    |
| Nicholson, Albert B .....  | 10   | Kerby, T. E .....            | 6    |
| Nicholson, Edgar P .....   | 10   | Kerby, C. H. N .....         | 6    |
| Milstead, Frances E .....  | 20   | Kerby, Florence M .....      | 6    |
| Dubois, William .....      | 50   | Parker, Bridget C .....      | 20   |
| Powell, Elizabeth .....    | 20   | Parker, Georgette .....      | 10   |

Thus it will be seen that the existing roll requires a present expenditure of \$20,316. To meet this amount \$1 a month is deducted from the pay of each member of the force, to which may be added \$4,000 appropriated by the last Congress and about \$1,200 a year derived from penalties inflicted upon members of the force for derelictions of duty, making in the aggregate \$10,600 for the support of the police roll, and leaving a deficiency of \$9,716 per annum.

With this contingency the question presents itself, How may the efficiency of the force be increased by the retirement of numerous privates now eligible to discharge by reason of permanent physical disabilities incurred in the line of duty?

Aside from the exposure to weather, the risk of personal harm arising from the difficulty in apprehending desperate criminals, and the dangers incident to fire, riot, and flood, in no event is the police officer permitted to spare himself in the endeavor to secure the peace and safety of the community over which he keeps watch and ward. His occupation is "extra hazardous," in the terms of the insurance companies.

There are now on the force subject to retirement for physical disabilities ten persons, and statistics go to show that out of the whole number employed the deaths will average six per year. Each case of death of a policeman not only makes his family dependents upon the roll, in addition to those who may have already been discharged on account of incompetency, but involves an expenditure of a sum not exceeding \$75 for his funeral expenses.

The allowance of municipal pensions originated with the New York police department as far back as the year 1858, and to-day there is paid out annually to pensioners on its rolls the vast sum of \$595,592. The practice, however, did not begin to grow until some years later. An investigation of the subject reveals the fact that out of 44 of the largest American cities 18 of them have legally established pension systems, confined to the police and fire departments. The question is now being considered by those cities which have made no provision for such a fund, and no doubt some like arrangement will be made by most of them during the ensuing year.

The Baltimore police department in 1886 had 21 pensioners who received \$3,610, and in 1894 the same department carried a list of 40 pensioners, who received \$11,914 a year.

During the period from 1885 to 1894 the amount paid the Boston police department increased from \$29,318 to an annual allowance of \$68,867.

Taking the methods of granting pensions in some of the cities the actual conditions are as follows:

In Brooklyn officers are retired on half pay after twenty years' service; widows and minor children of deceased officers who have served at least ten years receive pensions not exceeding \$300 a year.

In Boston, after twenty years' service or when permanently injured while on duty, policemen are retired on half pay; widows and orphans receive not to exceed \$300 per annum.

In Baltimore members of the force may be retired after sixteen years' service, upon permanent disability, which must be certified by the department physicians.

In Syracuse, upon disability, policemen may be retired on quarter to half pay; for a disability incurred after ten and not more than twenty years' service they may receive from \$300 to \$600 per annum; and after twenty years' service not more than \$1,000; widows and children of men killed while on duty or who may die while drawing pensions are allowed \$300 a year. The children derive this benefit up to the time they are 18 years of age.

In St. Louis, after twenty years' service, members of the force suffering from disability receive half pay, and the same allowance is made widows and children of officers who are killed on duty.

In Milwaukee, after twenty years' service, half pay is allowed when an officer becomes unfit for further duty, and \$30 a month are granted the widow and \$6 a month to minor children.

In Philadelphia not exceeding \$600 per annum is allowed in the way of pensions; widows and children of policemen who are killed or who may die from injury received in the line of duty are pensioned, the widows receiving \$20 per month unless they remarry, the children \$6 per month until 14 years of age.

The San Francisco policemen may retire on half pay if they become disabled in the line of duty or after twenty years' service, and upon the death of a member of the force from natural causes the widow or children may receive the sum of \$1,000.

The New Haven police officers are pensioned after twenty years' service or if they become disabled in the line of duty.

Buffalo makes provision for the widow of any member of the police force who may be killed in the actual performance of duty or who may die from the effects of injuries received in the actual discharge of duty, at the rate of \$300 per year as long as she shall remain unmarried. If there is no widow the same goes to the children surviving. The same pension is allowed to a member of the force who, while in the actual discharge of duty, shall become injured or permanently disabled, or become physically or mentally disqualified in any way for the efficient performance of duty.

Upon disability incurred after fifteen and less than twenty years' service, from \$250 to \$500 a year is allowed the members of the Rochester force.

In New York City, after permanent disability or twenty years' service, policemen are retired on half pay, and any member over 60 years old may be retired on half pay, the payments not to exceed \$1,000 a year, except in case of the chief, inspectors, and captains.

Police pension funds are created and supported in various ways, from fines imposed on members, moneys paid for special service, such

as for attendance at parties and balls, from receipts for the sale of lost, stolen, and abandoned property, from the issuance of permits to carry concealed weapons, issuance of licenses for billiard and pool tables and bowling alleys, pawnbrokers, saloons, etc., and from fines from such sources, from deductions from the pay of members of the force, from appropriations from city taxes, taxes on foreign insurance companies, and from theatrical entertainments.

At the present time pensioners in New York City are receiving nearly \$600,000 per annum; in Boston, \$68,867; in Brooklyn (238 dependents), \$109,000; in Baltimore (40 pensioners), \$11,914; in San Francisco, \$20,427; in Philadelphia (48 pensioners), \$16,240; in Cleveland, \$16,000; and so of several other municipalities having pension laws.

#### THE SUPPRESSION AND DETECTION OF CRIME.

The citizens of the District of Columbia have not the innumerable extensive robberies chronicled daily in the leading cities of the United States. No formidable affairs, such as railroad strikes, involving thousands of employees, are known here. The department has no unsolved mysteries upon its record. No murderers or assassins have failed of apprehension. The banks and business houses have been exceptionally secure in their transactions without interference from the confidence man and burglar. The Government officials and institutions have been unmolested. The robbery of a diplomatic residence by a trusted employee is among the few cases of prominence where theft has been extraordinary during the year just closed. On the contrary, on every side and from one end of the country to the other, daily reports during the past year indicated a material increase in all character of crime and disorder. Much of it was made responsible by the hard times and consequent misery from idleness.

Crime in the District of Columbia during the last fiscal year, basing the assertion upon the police statistics of arrests and complaints from citizens, has increased in some and diminished in other respects, the reduction more than offsetting the increase.

It is unreasonable to presume that crime and immorality, drunkenness, and vagrancy can be effectually cured. Under normal conditions they advance with population. Good government can be had by proper policing. Crimes may be checked by the apprehension and punishment of criminals, but there will continue to be murders, thefts, and drunkenness. This department has reason for congratulation when, in closing the business of a year, the facts and figures show such a favorable condition of affairs within its jurisdiction.

It should not be forgotten that a great reform wave swept over the country during the year just closed; that the severest penalties were inflicted under the new excise law; that the concealed-weapon act was put into unquestionable effect; that numerous police regulations were established and enforced; that increased vigor was applied in enforcing the health ordinances; that the Edmunds law, prescribing a penalty for adultery and fornication, was declared effective within these limits by the higher court, and that stringent discipline was maintained in directing the police force. Yet the statistics of complaints and the number of arrests generally have not materially increased, the most apparent growth being under specific charges arising from the enforcement of measures wherein the law was for the first time declared operative, where more stringent action was taken against violators of police regulations, and also in cases of forgery and embezzlement. The last-

During the period from 1885 to 1894 the amount paid the Boston police department increased from \$29,318 to an annual allowance of \$68,867.

Taking the methods of granting pensions in some of the cities the actual conditions are as follows:

In Brooklyn officers are retired on half pay after twenty years' service; widows and minor children of deceased officers who have served at least ten years receive pensions not exceeding \$300 a year.

In Boston, after twenty years' service or when permanently injured while on duty, policemen are retired on half pay; widows and orphans receive not to exceed \$300 per annum.

In Baltimore members of the force may be retired after sixteen years' service, upon permanent disability, which must be certified by the department physicians.

In Syracuse, upon disability, policemen may be retired on quarter to half pay; for a disability incurred after ten and not more than twenty years' service they may receive from \$300 to \$600 per annum; and after twenty years' service not more than \$1,000; widows and children of men killed while on duty or who may die while drawing pensions are allowed \$300 a year. The children derive this benefit up to the time they are 18 years of age.

In St. Louis, after twenty years' service, members of the force suffering from disability receive half pay, and the same allowance is made widows and children of officers who are killed on duty.

In Milwaukee, after twenty years' service, half pay is allowed when an officer becomes unfit for further duty, and \$30 a month are granted the widow and \$6 a month to minor children.

In Philadelphia not exceeding \$600 per annum is allowed in the way of pensions; widows and children of policemen who are killed or who may die from injury received in the line of duty are pensioned, the widows receiving \$20 per month unless they remarry, the children \$6 per month until 14 years of age.

The San Francisco policemen may retire on half pay if they become disabled in the line of duty or after twenty years' service, and upon the death of a member of the force from natural causes the widow or children may receive the sum of \$1,000.

The New Haven police officers are pensioned after twenty years' service or if they become disabled in the line of duty.

Buffalo makes provision for the widow of any member of the police force who may be killed in the actual performance of duty or who may die from the effects of injuries received in the actual discharge of duty, at the rate of \$300 per year as long as she shall remain unmarried. If there is no widow the same goes to the children surviving. The same pension is allowed to a member of the force who, while in the actual discharge of duty, shall become injured or permanently disabled, or become physically or mentally disqualified in any way for the efficient performance of duty.

Upon disability incurred after fifteen and less than twenty years' service, from \$250 to \$500 a year is allowed the members of the Rochester force.

In New York City, after permanent disability or twenty years' service, policemen are retired on half pay, and any member over 60 years old may be retired on half pay, the payments not to exceed \$1,000 a year, except in case of the chief, inspectors, and captains.

Police pension funds are created and supported in various ways, from fines imposed on members, moneys paid for special service, such

as for attendance at parties and balls, from receipts for the sale of lost, stolen, and abandoned property, from the issuance of permits to carry concealed weapons, issuance of licenses for billiard and pool tables and bowling alleys, pawnbrokers, saloons, etc., and from fines from such sources, from deductions from the pay of members of the force, from appropriations from city taxes, taxes on foreign insurance companies, and from theatrical entertainments.

At the present time pensioners in New York City are receiving nearly \$600,000 per annum; in Boston, \$68,867; in Brooklyn (238 dependents), \$109,000; in Baltimore (40 pensioners), \$11,914; in San Francisco, \$20,427; in Philadelphia (48 pensioners), \$16,240; in Cleveland, \$16,000; and so of several other municipalities having pension laws.

#### THE SUPPRESSION AND DETECTION OF CRIME.

The citizens of the District of Columbia have not the innumerable extensive robberies chronicled daily in the leading cities of the United States. No formidable affairs, such as railroad strikes, involving thousands of employees, are known here. The department has no unsolved mysteries upon its record. No murderers or assassins have failed of apprehension. The banks and business houses have been exceptionally secure in their transactions without interference from the confidence man and burglar. The Government officials and institutions have been unmolested. The robbery of a diplomatic residence by a trusted employee is among the few cases of prominence where theft has been extraordinary during the year just closed. On the contrary, on every side and from one end of the country to the other, daily reports during the past year indicated a material increase in all character of crime and disorder. Much of it was made responsible by the hard times and consequent misery from idleness.

Crime in the District of Columbia during the last fiscal year, basing the assertion upon the police statistics of arrests and complaints from citizens, has increased in some and diminished in other respects, the reduction more than offsetting the increase.

It is unreasonable to presume that crime and immorality, drunkenness, and vagrancy can be effectually cured. Under normal conditions they advance with population. Good government can be had by proper policing. Crimes may be checked by the apprehension and punishment of criminals, but there will continue to be murders, thefts, and drunkenness. This department has reason for congratulation when, in closing the business of a year, the facts and figures show such a favorable condition of affairs within its jurisdiction.

It should not be forgotten that a great reform wave swept over the country during the year just closed; that the severest penalties were inflicted under the new excise law; that the concealed-weapon act was put into unquestionable effect; that numerous police regulations were established and enforced; that increased vigor was applied in enforcing the health ordinances; that the Edmunds law, prescribing a penalty for adultery and fornication, was declared effective within these limits by the higher court, and that stringent discipline was maintained in directing the police force. Yet the statistics of complaints and the number of arrests generally have not materially increased, the most apparent growth being under specific charges arising from the enforcement of measures wherein the law was for the first time declared operative, where more stringent action was taken against violators of police regulations, and also in cases of forgery and embezzlement. The last-

named crimes have been on the increase the world over. It is quite manifest that the bank burglar and highway robber have been succeeded by the forger and embezzler. The intelligent precautions which are adopted in these days against the safe blower and robber will not apply to "Jim the Penman." Forgery and embezzlement are generally the work of educated and intelligent persons, trusted experts in employ, or plausible purchasers or dealers.

During the fiscal year which preceded July 1 there were 8 persons held for murder, being 3 less than for any year since 1891. In the line of other crimes of greater magnitude there were reported to the police 172 cases of housebreaking by night, of which number there were 123 arrests, 96 cases being held by the grand jury. During the previous year 280 cases were reported, 153 arrests were made, and 120 held by the court, a very prominent change for the better in one direction, there being 108 cases less reported. There is no more emphatic demonstration of the force's efficiency than in the fact that there were 30 cases of housebreaking by day complained of to the police by citizens, while the cases of arrest upon the same charge numbered 45, and of these 33 were bound over for trial. The prior year there were 42 cases of arrest upon the same charge, 19 of them being held by the court. It will be observed that the police last year made convictions on the preliminary hearings in 33 out of 45 cases, while in 1894 they secured but 19 in the 42 cases of arrest. There were 1,302 cases of arrest under the charge "petit larceny" during the twelve months ending June 30 last. Upon examination 824 of these were convicted, or 46 less than for the year before, when 1,264 cases of arrest were recorded. There were 328 cases of grand larceny reported to the department. On this charge 203 arrests followed, 113 of which were sustained. Larceny from the person was the complaint in 130 cases. There were 91 cases of arrest upon this charge, 64 of which were held by the court. In the preceding year there was an equal number of these cases, but only 80 arrests followed and 50 convictions. In 1894 there were 3 cases of larceny from the United States Government reported; 3 arrests were made and convictions had in all the cases. Last year 4 convictions were secured out of 6 cases of arrest. Highway robbery was the charge in 6 cases held by the court, as against 8 for the year preceding. Fifty-four cases where false pretenses were alleged were reported at police headquarters. There were 79 arrests on the same charge and 41 convictions, or 11 cases of arrest and 14 convictions less than during the prior year.

The number of cases of embezzlement complained of was 46; the police made arrests in 77 cases, and 33 of these were sustained; an increase of 10 cases over the year 1894. So it was with forgery. There were 30 cases reported, 41 cases of arrests were recorded, and 37 convictions—22 more than for the year before. These two subjects have already been referred to as items of increase. The most prominent feature of the criminal report is where it can be made clear that there is a general decrease in wickedness. As there is always a less number of cases of crime reported to the police than arrests, it is reasonable to accept the number of cases of arrest and convictions that succeed as a proper criterion in making comparison.

Charged with affray, there were 431 cases of arrest in 1895, 342 of which were held, while in 1894 there were 492 cases of arrest, 386 of which were held; a difference of 44 in favor of the year 1894.

The cases of assault for the year just closed exceeded those of the previous year, but there were not so many cases of assault and battery, assault with intent to kill, assaulting an officer, or attempt at rape.

There was one case of buying stolen goods where conviction was had. There should have been many more. The inability of the police to have this class of people punished by the courts is an incentive to thieving, an encouragement to the petit-larceny practitioner, who feels secure of a place to sell his stolen wares so long as the purchaser can not be convicted. It is set up and maintained by the purchasers of stolen goods that they are not aware of the seller's character at the time of purchase. The law provides a penalty, when the purchaser knows the goods have been stolen. This unwise provision furnishes a loophole for the escape of the guilty. There are many innocent purchasers among the dealers, but when an article worth \$50 is sold for \$5 the buyer must be convinced that wrong attaches to the property in some way, and the plea of ignorance should not be accepted as an excuse.

The cases of disorderly conduct aggregated 3,778 for last year, as against 4,849 for the previous year; intoxication and disorderly (one charge), 803, as against 1,050; intoxication, 2,816 for 1895 and 2,823 for 1894.

The commissioning of an additional officer to enforce the law to prevent cruelty to animals resulted for the better, the court fining in 107 more cases than for the previous year.

There was no noticeable decrease in concealed-weapon cases. This class of offenders does not seem to be reduced by the stringency of the law concerning them.

There were fewer cases where fast driving was charged. This is the most difficult character of violations for the police to deal with. If mounted, a policeman has an advantage, but the footman is powerless in the great number of cases to pursue and make arrest. It is the disposition of the department to create a bicycle corps, which it is believed would tend to effect the apprehension of offenders of this class.

There were 9 more cases of perjury last year, but no cases of passing counterfeit money or rape; whereas in 1894 there were 9 convictions upon the charge of rape alone.

There were nearly 200 more cases of vagrancy than for the preceding year, which is accounted for by the fact that after the close of last winter the force was ordered to clean up the District in this respect. Many who had lingered here after the failure of the Coxey move, and who depended upon the soup house and Mission during the cold months, could only be made to "move on," when warm weather came, by arrest and conviction.

Unlicensed bar was charged in 114 cases and 77 were held, as against 60 the previous year. There were 23 cases of open Sunday bar where the persons were convicted, as against 7 during the prior twelve months; 6 cases were made against proprietors who kept open after hours and 13 against dealers who sold to minors.

The number of cases of arrest for the last fiscal year was 23,104, or 1,219 less than during the fiscal year 1894. Of the whole number 10,921 were white and 12,183 colored, the latter constituting in the entire number of arrests about 53 per cent, while they constitute 32 per cent of the population. Of the total arrests 16,191 were held by the court and 2,816 cases of intoxication were dismissed by the police lieutenants, the offense not being illegal in this District.

The Edmunds, law having been declared applicable to the District of Columbia, resulted in 64 arrests upon the charge of adultery, 10 being white and 54 colored; 28 cases of the whole number were sustained, for which imprisonment was the penalty. Charged under the same law

with fornication, there were 80 cases, 10 white and 70 colored. Sixty convictions were had, and the penalty (a fine) was imposed, the act making the charge a misdemeanor only.

It is with regret that the department must express its chagrin at the seeming miscarriage of justice in some cases where arrests have been made for grave crimes committed. The acquittal of thieves, with indisputable evidence at hand to convict, must necessarily tend to discourage those who work faithfully and arduously to rid the District of criminal classes.

The police of the District have given much attention to the questionable patrons of near-by race courses, at least to the extent of their authority, and in their efforts to aid the law-abiding citizens of Virginia in an attempt to prevent gambling on the Virginia side of the Potomac they have secured convincing evidence for the prosecution.

The gambling instinct is strong in the young American, and the resorts in this vicinity furnish means of attraction for the Washington youth. Depravity among certain classes of young men of this city is largely due to the want of a convenient and interesting place of amusement. Boys are driven from pillar to post in the city. They are a source of more complaint from the citizen than all other "nuisances." The result is, the boy without a playground seeks recreation indoors with cards, cigarette, and drink. The small boy in this city is to a certain extent an outlaw in the sight of those whose peace he may disturb. Give the boys plenty of room outside, and they will neglect the perils of indoor sports.

The table of arrests and schedule of offenses included in this report give in detail the work performed by the police of the District during the past year.

#### WORK OF THE PRECINCTS.

In all communities having police protection persons are arrested for trivial offenses and on suspicion whose cases, upon hearing, are dismissed by the authority having jurisdiction. The same is true, as has been shown, in the District of Columbia; that is, about 35 per cent of the cases of arrest were dismissed by the police lieutenants, police courts, or nolle prosequed by the District attorney. This calculation leaves about 65 per cent of convictions, or, in other words, cases that were held by the coroner or the courts on preliminary examination. This 65 per cent aggregates about 15,017 cases of arrest, which, when divided among the several precincts and compared with the population of the same, makes an interesting study for those interested in the social problem, the solution of which in this District would materially benefit its many interests.

The First police precinct, which includes all of the theaters, the principal business houses, and the more or less polluted section known as the "Division," contains within its boundaries (which will be found upon the map attached to this report), according to the police census taken in December last, 11,201 white and 1,783 colored persons, or a total of 12,984. In this precinct, the smallest in area and population of any in the District, the police made the largest number of arrests during the year, viz, 2,143.

The Fourth precinct comprises the section known as Southwest Washington, with a population of 18,792 white and 14,286 colored, or a total of 33,078. This precinct ranks second in the number of arrests, which aggregated 2,140.

The Sixth precinct, in which are located the depots of the Baltimore and Ohio and Baltimore and Potomac Railroad companies, several banks, and extensive business interests, has under its protection a population of 19,152 white and 5,154 colored; a total of 24,306. The number of cases of arrest made therein was 1,799.

The Second precinct, which embraces a large residence portion of the District, with a population of 24,306 white and 14,177 colored, a total of 38,483, contributed the fourth largest number of cases, 1,765.

The Third precinct, in which are many of the handsomest residences in the city, the Executive Mansion, State, War, Navy, and Treasury Departments, with other Government institutions, and which has a population of 18,785 white and 15,083 colored, a total of 33,868, furnished the fifth greatest number of arrests, 1,755.

The Eighth precinct, or that section of the District which extends north of R street to the Maryland line, with a population of 22,847 white and 14,994 colored, a total of 37,841, made 1,492 cases before the courts.

The Fifth precinct, comprising Southeast Washington, Anacostia, and contiguous territory, with a population of 28,826 white and 11,133 colored, a total of 39,959, made a total of 1,425 cases.

The Seventh precinct, including Georgetown and that portion of the District northwest of Rock Creek, with a population of 14,509 white and 4,952 colored, a total of 19,461, recorded 1,078 cases of convictions.

The Ninth precinct, or Northeast Washington, with a population of 25,092 white and 5,447 colored, a total of 30,539, made the smallest number of arrests of any of the precincts, 977 of its cases being held by the courts.

The detective bureau, having for its principal purpose the prevention and detection of *crime*, prosecuted 440 cases of arrest successfully.

Of the whole number of cases made by the several police precincts 47 per cent was of white and 53 per cent of colored persons. It is reasonable that the greatest number of arrests should have been made in the First precinct, where are to be found the resorts that are maintained during the late hours of night, and the same conditions largely prevail in the Fourth and Sixth precincts. It may be added that the offenses making the cases in these several precincts are largely the outgrowth of idleness and ignorance, and in many instances the outcroppings from that condition, where the idle and ignorant are residents of tenement houses, in the alleys and courts, which in some places are built up with small brick and frame shanties, unsanitary and uncomfortable in every respect, where a single vicious individual often makes life unbearable for those who must live with or beside him.

#### MISCELLANEOUS REQUIREMENTS.

A policeman has something more to do than to wear brass buttons and twirl his baton. The preservation of the public peace and protection to life and property constitute but a fraction of the duties incumbent upon him in the District of Columbia. At roll call he must hear and understand general as well as special orders and circulars issued from headquarters for his guidance, and he is given a list of telephone dispatches which may concern him during his tour of duty. Personal tax notices, orders from the excise board, regulations issued by the health office, are distributed through this medium. The miscellaneous calls which are demanded in the way of reports are sufficient to require his continued, undivided attention. Reports of the varied addi-

with fornication, there were 80 cases, 10 white and 70 colored. Sixty convictions were had, and the penalty (a fine) was imposed, the act making the charge a misdemeanor only.

It is with regret that the department must express its chagrin at the seeming miscarriage of justice in some cases where arrests have been made for grave crimes committed. The acquittal of thieves, with indisputable evidence at hand to convict, must necessarily tend to discourage those who work faithfully and arduously to rid the District of criminal classes.

The police of the District have given much attention to the questionable patrons of near-by race courses, at least to the extent of their authority, and in their efforts to aid the law-abiding citizens of Virginia in an attempt to prevent gambling on the Virginia side of the Potomac they have secured convincing evidence for the prosecution.

The gambling instinct is strong in the young American, and the resorts in this vicinity furnish means of attraction for the Washington youth. #### POLICE AND THE SMALLPOX.

For the first time in many years the District was subjected to a small-pox scare near the closing period of the year. The aid of the police was invoked. Not only did it become necessary to detail privates from the force to assist in confining the disease, but this department, in the threatened emergency, furnished the health authorities with ambulance, harness, horse, and humane restraint appliances. One of the police surgeons was placed in charge of the hospital, and after a brief career the disease was stamped out before becoming epidemic.

#### RELIEF OF THE POOR.

As an agency for the relief of the poor this department has for many years been regarded as indispensable—not from the standpoint of a distributing agency so much as from its facilities to make prompt and thorough investigation as to the worthiness of those who appeal for aid. Charity work in the District has been so ably seconded by the police organization that there has been in recent years a disposition to impose upon it the bulk of what there is to do in that direction. It must be admitted that such should be the situation, as the police come in daily and nightly contact with every section of the District. The dark and lonesome alleyways, the dilapidated tenement houses, the suburban shanties, all come within the shadow of the police.

In these out-of-the-way places the poor have their lodgings and dwellings. When the snow covers the ground and the wintry winds send a thrill of horror to the hearts of the half-fed and half-clad children who dare not expose themselves, it is then that the police find their location and wants and bring comfort to their condition. With the patrol, signal box and telephone, and the ever-ready patrol wagon, the needs of the suffering poor are supplied without delay or discount. Last winter was one not soon to be forgotten. Not only was it severely cold and prolonged, but it was a time of great general business depression, when thousands who had never known what want was were made dependents upon charity. During that period this department was taxed to its utmost. The members of the force were overworked, ministering to prevent freezing and starvation. The extra duty thus imposed was fully and cheerfully discharged.

The sad situation seemed to shame the criminal from his rounds, the better to enable the policemen to render succor to the needy poor. In fact, so great was the suffering that the entire community organized itself into one great relief committee. Contributions of provisions, clothing, and cash were made to the citizens' relief committee, which selected this department as the principal agency for investigation and distribution. The patrol wagons were constantly employed during the bitter weather hauling supplies from the committee's central depot to the several station houses. The lieutenants in the various precincts supervised the allotting of the supplies to the needy as they requested relief.

Thousands of cases appealing for help were looked into by members of the force, and where favorable report was made thereon the lieutenants would issue orders for fuel and provisions. These orders were subsequently forwarded to the department, examined, audited, and paid from funds furnished by the citizens' central relief committee, of which Judge C. C. Cole was chairman and Beriah Wilkins, esq., treasurer. The distributing branch of this committee was in charge of Lawrence Gardner, Miss Harriet Loring, John F. Cook, and Thomas Somerville, jr., who were ever vigilant and active in responding to requisitions for supplies made by the department. Upon the inauguration of this work, at the suggestion of this department, it was required by the committee that a daily report of supplies received and to whom and where distributed should be made by the several agencies operating for the relief committee.

In this respect this office was engrossed with additional clerical labor, but the name and address of each person receiving assistance from the committee's goods were furnished that body each morning during the relief period. By pursuing such a course the names of parties who received duplicate assistance were obtained and imposition avoided thereafter by publication of such persons to the police.

During the extreme cold season the department received from the citizens' central relief committee \$6,533.26 out of an appropriation of \$9,200, leaving an unexpended balance in the hands of the treasurer to the credit of the police allowance of \$2,666.74. By the expenditure of the amount of money drawn, together with supplies furnished to the department, orders were given out to worthy persons as follows:

|                    |            |
|--------------------|------------|
| Provisions .....   | 5,665      |
| Fuel .....         | 2,800      |
| Clothing .....     | 687        |
| Total orders ..... | 9,152      |
| Expense .....      | \$6,533.26 |

There was allowed the department interest from the Centennial Inaugural Fund, from which there was expended for charity during the fiscal year \$2,076.14. Under this disbursement orders were given for provisions to the number of 641; fuel, 153; shoes, 10—in all, 804, and 424 persons were furnished cash for rent. The orders given on the foregoing funds aggregated 10,380, rendering assistance to 41,520 persons. In addition to the above there was donated by the personal friends of the department the sum of \$1,816.15, which was received by the superintendent and paid out by the chief clerk on the former's orders. This money was largely expended to prevent the eviction of women and children from their homes, none of the committee funds having been used for that purpose. The number of persons thus relieved was 1,500, about 60 per cent being women.

It will thus be observed that the department rendered aid to 43,020 people during the cold season of last year, and the thorough and

business-like manner in which it was conducted won for it the praise and indorsement of all concerned. While not one dollar of the funds appropriated by Congress for charity is expended by the police, it is perhaps just as well for the department that such is the case, for it is already overloaded with requirements not strictly in the line of police duty. The charity details allotted the department by the citizens' committee have been heavy and exacting, but it has accepted and fulfilled the trust with warm interest and earnest zeal, and it will ever be ready and willing to do so.

There are facts in connection with this business which should be given consideration if any efforts are to be made toward systematizing charity work in the District of Columbia. In the first place, experience shows that there are three classes of persons who need assistance to bridge over temporary emergency—the worthy, the chronic solicitor, the beggar or tramp. The first class is composed of men, women, and children, women and children being largely in the majority. It embraces discharged Government clerks, mechanics out of employment, laborers without work, those who, dependent on roomers, are left without patrons, and not a few deserted wives. This class becomes dependent on charity only when forced to do so. Pride keeps many of them secluded until found in dire distress. They are those who ask because they have to do so, not out of desire, and they are slow to repeat a request for aid. A load of coal and a week's supply of provisions place most of them on a safe footing. Those who are always willing to accept public charity comprise old and debilitated colored families, who pick coal from the ash dumps when the weather permits and live on a scanty supply of bacon and corn meal.

To the next class belong those who lack the faculty of doing anything for themselves, many of whom are honest but lazy; women with drunken husbands, who earn a dollar one week and starve the next. Assistance given them once is an incentive for them to come again. Relief extended them simply encourages their disposition to idleness.

The third class is composed of that element which migrates. The announcement through the public press of generous donations in aid of the poor, the maintenance of institutions where food and lodging may be had for the asking, without expense in labor or money, readily and rapidly reaches the ears of the tramp and street beggar of other localities, and they come to Washington by the nearest and most direct route. Last winter's experience with this class of strangers is not forgotten. When the police were ordered early in the spring to clear the city of those who had anchored here without visible means of support, the station houses and workhouse were well filled with those of their number, who were defiant and refused to "move on."

These conditions indicate that the District is much better off with respect to dependent poor than other localities. There are no great factories with idle hands shut out, and no extensive commercial institutions with employees discharged. With regard to the poor, Washington is purely an "emergency" city. Temporary extension of aid for a month or so during severe winter seasons is all that is required. The dispensing of charity to the second and third classes of applicants encourages idleness, which begets crime. What factor is better equipped to discriminate between classes than the police? Misapplication of assistance is avoided. That such is the case is borne out by the fact that of all the large sums allowed the various distributing agencies by the citizens' relief committee the appropriation made to this department was not exhausted by \$2,666.74, which amount remains to its credit in

the hands of the treasurer. In other words, a proper expenditure of the funds did not warrant the use of every available dollar.

Those aided by the police were largely women and children, who could not be expected to render manual labor in return for charity, unless in the way of sewing. But even this is hardly practicable where there is a mother with several small children to feed and keep warm. Temporary employment on the public streets or in preparing macadam would bring some return for fuel and provisions furnished men who could and would work. The greatest hardship is experienced by deserving people who are evicted for nonpayment of rent. It is a strange commentary, the fact that there are more evictions in this District in the course of a year than in all Ireland. Many cases of this character are brought to the attention of the police. Payment of back rent is discouraged, and the unhappy tenant, when assisted, is moved into smaller and cheaper quarters. Last winter a family of children with the measles was kept housed and nursed through their sickness, despite they had been ordered to vacate by an unfeeling landlord, and discharged Department people were enabled to keep shelter through police intervention.

The report of the sanitary officer exhibits a steady growth of the work under his direction. The number of paupers furnished transportation was 867, at a cost of \$1,776.55, a decrease in persons of 45 and an expenditure of \$209.52 as compared with the previous year. Hospital accommodations were given to 3,558 individuals, an increase of 483. Of the number thus cared for, 197 were from Virginia and 135 from Maryland, a decrease from the former State of 13, and an increase from the latter of 16. The number of runs made by the police ambulances was 2,871, 534 more than during the year before. Admissions to the Government Hospital for the Insane were 201, a decrease of 6.

The number of cases investigated by the officer detailed to assist the Humane Society in the enforcement of the law for the protection and care of children was 312, of whom 158 were placed in charitable or reformatory institutions. Of these, 127 were white and 31 colored, the males aggregating 101, the females 57.

The officer in charge of the hackney service reports 547 as the number of licensed passenger conveyances on June 30, 1894. He inspected 541 vehicles and made 423 visits to the various stands.

The cases of sickness among the members of the police force during the past twelve months numbered 1,073; 396 applicants for police appointments were examined by the board of surgeons, the percentage of rejections being 76.7, and 96 cases of suspected insanity were investigated at the several stations by the four surgeons who constitute the board.

The good work performed by the police harbor patrol, in charge of the harbor master, speaks for itself. His report shows an excellent return for the amount expended in saving life and property, recovering bodies of the drowned, and directing the operations for clearing the river of ice gorges, the result of the severe winter, thereby preventing threatened disastrous floods.

With grateful acknowledgment of the interest manifested by the Commissioners in the operations of this department, and of their efforts to improve the discipline and efficiency of the police service, I beg their careful and favorable consideration of the estimates and recommendations submitted in the foregoing report.

Very respectfully,

W. G. MOORE,  
Major, and Superintendent  
Metropolitan Police, District of Columbia.

## REPORT OF THE CHIEF, ALSO PROPERTY CLERK.

METROPOLITAN POLICE DEPARTMENT, DISTRICT OF COLUMBIA,  
CLERK'S OFFICE,  
Washington, D. C., July 1, 1895.

SIR: I have the honor to transmit for your information my twelfth annual report, which includes the compilation of the District census, enumerated by the police the 15th of December, 1894, and the financial, criminal, and property statistics of the department for the fiscal year which closed June 30, 1895.

The financial transactions of the clerk's office aggregated \$632,621.20, in detail as follows:

|   |                |
|---|----------------|
| Paid for salaries.....  | \$510, 621. 25 |
| Police court fines received and deposited .....                       | 22, 729. 65    |
| Fines, rewards, ball receipts, and property clerk's sales.....        | 3, 934. 91     |
| Installments collected and paid for uniforms.....                     | 15, 147. 93    |
| Charity disbursements .....   | 8, 609. 40     |
| Verification of department expenses, contingent, fuel, rent, etc..... | 24, 597. 36    |
| Verification police pensions.....                                     | 14, 000. 00    |
| Police relief payments .....  | 2, 861. 00     |
| Estimated value of lost, stolen, and abandoned property received..... | 30, 119. 70    |
| Total.....  | 632, 621. 20   |

In addition to the above, those dependent upon the police pension roll received from the sales of the "District of Columbia Police," or "Police History," compiled by Richard Sylvester, the sum of \$4,212.45, this money supporting them in the absence of congressional appropriation.

There is no stronger indication of the multiplying business of this department than is furnished by the foregoing statement.

While the general clerical work exacted is steadily increasing year by year, the estimated value of property received would point to an apparent diminution in that required in the receipt and disposition of the same. This, however, was not the case. There was a reduction in the aggregate amount of property returned to this office, but the lots recovered and deposited were more numerous. In other words, the labors of the police were more diversified and taxing, necessitating, as a consequence, a greater number of decisions and register or docket entries by the property clerk.

In this connection I ask to be indulged the privilege of referring to the inferior facilities afforded for the conduct of public business in this branch of the service. The office space for the clerks and storage purposes is inadequate. In the allotment of rooms to this department the best division possible was no doubt made under the circumstances, but with six employees in one medium-sized office the sanitary state can not be the best. Here, also, persons having business with the departments must be received. Not only has this condition of affairs operated as a detriment in the transaction of business, but it has necessitated the storing of property, for which I am held responsible under the law, in the basements and stable rooms of the precinct stations, away from personal inspection.

The preparation of trial cases, general and special orders, and circulars, recording and responding to complaints, and requests for information, preservation of morning and property reports, as required by law, and numerous other details incumbent upon this office, have been systematically and accurately disposed of by the limited force assigned to my assistance.

It may be of interest to you to know that the clerical system in vogue in this department, the manner of keeping the records, making reports, and transaction of internal police business, has been the subject of special and personal inspection by officials of other departments, with a view to simplifying their existing methods. It has been my pleasure to be able to present a satisfactory exhibit.

The investigation of indigent cases applying or presented for relief has been conducted by this office, and the keeping of accounts in connection therewith has involved no inconsiderable clerical attention. The process of discriminating between the good, bad, and indifferent, and prevention of duplication of assistance was accomplished satisfactorily. In the expenditure of funds allotted by the citizens' relief committee I was ably seconded by the distributing committee of that organization adopting the proposition of this office that each auxiliary should furnish a daily report of persons assisted. While the dispensing of relief to the unfortunates

through the perilous months of winter has been a cause in which myself and assistants always gladly enter, it is one, it seems to me, which should appropriately be shared by the bureau which is directly engaged in charity affairs. I refer to that of the superintendent of charities, whose office might liquidate all accounts rendered against funds furnished by the relief committee in aid of the suffering poor. This would involve no change beyond the forwarding of all accounts properly audited to the superintendent of charities for settlement. I sincerely hope that my suggestion may prevail, not only so far as it relates to the police department, but to the extent it may apply to other auxiliaries engaged in the same field of labor. There are no law requirements in the premises, and this overture is respectfully presented, with a view of bringing about a more equitable distribution of the details required. I assume the superintendent of charities would heartily cooperate in the matter to the extent I have mentioned.

I have deemed it expedient and to the best interests of the department to have all collections made in District cases at the police court deposited to the credit of the District once a week. This with a view of preventing the accumulation of funds in my custody and in stricter conformity to business principles. Heretofore deposits have been delayed by the inability of your representative to secure comparison with the court docket. Such deposits will hereafter be made weekly, and the comparisons will be made subsequently at such periods as they may be without interference with the conduct of the clerical work of that institution.

As to the individual records in this department, I would suggest the adoption of the card system, successfully inaugurated by Colonel Ainsworth in the War Department, having in view the completion of the records of all persons who have been connected with the force since the assumption of affairs by the District Commissioners in 1878. These records are not only consulted by officials of the District, but by the several Departments of the United States Government, and it is a matter of importance that they be maintained in the simplest possible order.

The clerks in this office have performed the exacting work demanded of them in a conscientious, untiring manner, each one of them demonstrating by his close attention to office affairs that he has the interest of the public as well as the welfare of the department at heart. They have been at their desks each day in the week, not excepting the seventh, and none of them have enjoyed the usual leave of absence accorded General Government employees.

RICHARD SYLVESTER,

*Chief, also Property Clerk, Metropolitan Police, District of Columbia.*

Maj. WILLIAM G. MOORE,

*Superintendent of Police, District of Columbia.*

*Amounts received from fines, rewards, lost time, and sales, and the disposition of the same.*

## REPORT OF THE CHIEF, ALSO PROPERTY CLERK.

METROPOLITAN POLICE DEPARTMENT, DISTRICT OF COLUMBIA,  
CLERK'S OFFICE,  
Washington, D. C., July 1, 1895.

SIR: I have the honor to transmit for your information my twelfth annual report, which includes the compilation of the District census, enumerated by the police the 15th of December, 1894, and the financial, criminal, and property statistics of the department for the fiscal year which closed June 30, 1895.

The financial transactions of the clerk's office aggregated \$632,621.20, in detail as follows:

|   |                |
|---|----------------|
| Paid for salaries.....  | \$510, 621. 25 |
| Police court fines received and deposited .....                       | 22, 729. 65    |
| Fines, rewards, ball receipts, and property clerk's sales.....        | 3, 934. 91     |
| Installments collected and paid for uniforms.....                     | 15, 147. 93    |
| Charity disbursements .....   | 8, 609. 40     |
| Verification of department expenses, contingent, fuel, rent, etc..... | 24, 597. 36    |
| Verification police pensions.....                                     | 14, 000. 00    |
| Police relief payments .....  | 2, 861. 00     |
| Estimated value of lost, stolen, and abandoned property received..... | 30, 119. 70    |
| Total.....  | 632, 621. 20   |

In addition to the above, those dependent upon the police pension roll received from the sales of the "District of Columbia Police," or "Police History," compiled by Richard Sylvester, the sum of \$4,212.45, this money supporting them in the absence of congressional appropriation.

There is no stronger indication of the multiplying business of this department than is furnished by the foregoing statement.

While the general clerical work exacted is steadily increasing year by year, the estimated value of property received would point to an apparent diminution in that required in the receipt and disposition of the same. This, however, was not the case. There was a reduction in the aggregate amount of property returned to this office, but the lots recovered and deposited were more numerous. In other words, the labors of the police were more diversified and taxing, necessitating, as a consequence, a greater number of decisions and register or docket entries by the property clerk.

In this connection I ask to be indulged the privilege of referring to the inferior facilities afforded for the conduct of public business in this branch of the service. The office space for the clerks and storage purposes is inadequate. In the allotment of rooms to this department the best division possible was no doubt made under the circumstances, but with six employees in one medium-sized office the sanitary state can not be the best. Here, also, persons having business with the departments must be received. Not only has this condition of affairs operated as a detriment in the transaction of business, but it has necessitated the storing of property, for which I am held responsible under the law, in the basements and stable rooms of the precinct stations, away from personal inspection.

The preparation of trial cases, general and special orders, and circulars, recording and responding to complaints, and requests for information, preservation of morning and property reports, as required by law, and numerous other details incumbent upon this office, have been systematically and accurately disposed of by the limited force assigned to my assistance.

It may be of interest to you to know that the clerical system in vogue in this department, the manner of keeping the records, making reports, and transaction of internal police business, has been the subject of special and personal inspection by officials of other departments, with a view to simplifying their existing methods. It has been my pleasure to be able to present a satisfactory exhibit.

The investigation of indigent cases applying or presented for relief has been conducted by this office, and the keeping of accounts in connection therewith has involved no inconsiderable clerical attention. The process of discriminating between the good, bad, and indifferent, and prevention of duplication of assistance was accomplished satisfactorily. In the expenditure of funds allotted by the citizens' relief committee I was ably seconded by the distributing committee of that organization adopting the proposition of this office that each auxiliary should furnish a daily report of persons assisted. While the dispensing of relief to the unfortunates

through the perilous months of winter has been a cause in which myself and assistants always gladly enter, it is one, it seems to me, which should appropriately be shared by the bureau which is directly engaged in charity affairs. I refer to that of the superintendent of charities, whose office might liquidate all accounts rendered against funds furnished by the relief committee in aid of the suffering poor. This would involve no change beyond the forwarding of all accounts properly audited to the superintendent of charities for settlement. I sincerely hope that my suggestion may prevail, not only so far as it relates to the police department, but to the extent it may apply to other auxiliaries engaged in the same field of labor. There are no law requirements in the premises, and this overture is respectfully presented, with a view of bringing about a more equitable distribution of the details required. I assume the superintendent of charities would heartily cooperate in the matter to the extent I have mentioned.

I have deemed it expedient and to the best interests of the department to have all collections made in District cases at the police court deposited to the credit of the District once a week. This with a view of preventing the accumulation of funds in my custody and in stricter conformity to business principles. Heretofore deposits have been delayed by the inability of your representative to secure comparison with the court docket. Such deposits will hereafter be made weekly, and the comparisons will be made subsequently at such periods as they may be without interference with the conduct of the clerical work of that institution.

As to the individual records in this department, I would suggest the adoption of the card system, successfully inaugurated by Colonel Ainsworth in the War Department, having in view the completion of the records of all persons who have been connected with the force since the assumption of affairs by the District Commissioners in 1878. These records are not only consulted by officials of the District, but by the several Departments of the United States Government, and it is a matter of importance that they be maintained in the simplest possible order.

The clerks in this office have performed the exacting work demanded of them in a conscientious, untiring manner, each one of them demonstrating by his close attention to office affairs that he has the interest of the public as well as the welfare of the department at heart. They have been at their desks each day in the week, not excepting the seventh, and none of them have enjoyed the usual leave of absence accorded General Government employees.

RICHARD SYLVESTER,

*Chief, also Property Clerk, Metropolitan Police, District of Columbia.*

Maj. WILLIAM G. MOORE,

*Superintendent of Police, District of Columbia.*

*Amounts received from fines, rewards, lost time, and sales, and the disposition of the same.*

## REPORT OF BOARD OF SURGEONS.

HEADQUARTERS METROPOLITAN POLICE, DISTRICT OF COLUMBIA,  
BOARD OF SURGEONS,  
Washington, July 1, 1895.

SIR: I have the honor to submit to you the accompanying report of the work of the board of surgeons to the police department during the year ended June 30, 1895.

Of the visits of inspection to station houses and services to sick and injured prisoners no record has been kept, and they can not therefore be detailed. Such visits have, however, been numerous and formed no inconsiderable part of the work of the surgeons.

Very respectfully,

CLIFTON MAYFIELD, M. D., *Secretary.*

Maj. WILLIAM G. MOORE,  
*Superintendent of Police, District of Columbia.*

## POLICE PATROL BOAT.

HEADQUARTERS METROPOLITAN POLICE, DISTRICT OF COLUMBIA,  
POLICE PATROL BOAT WHARF,  
Washington, D. C., June 30, 1895.

SIR: The following report of the river patrol service for the fiscal year ended June 30, 1895, is respectfully submitted:

1894.

- July 4. Arrested Julia Johnson and Jane Grey, disorderly on excursion boat.  
7. Recovered the body of Christopher Hoth, drowned.  
8. Recovered the body of Henry J. Porter, drowned.  
15. Arrested William A. Johnson, indecent exposure.  
17. Recovered the body of William Johnson, drowned.  
17. Arrested William Ford, assault and battery.  
20. Recovered the body of James Brown, drowned.  
22. Recovered the body of Francis H. Horan, drowned.  
27. Recovered stolen boat; value, \$10.  
28. Went to tramp camp at Aqueduct Bridge and stopped them from nude bathing.  
29. Went to the rescue of two boats that capsized, five persons in one and three in the other; all saved.  
31. Recovered the drowned body of unknown colored boy.
- Aug. 2. Recovered the drowned body of William Anderson.  
4. Removed two vessels out of the channel.  
5. Found bateau boat adrift.  
8. Recovered the drowned body of W. G. Henderson.  
9. Found boat stolen from B. Cumberland; value, \$3,000.  
11. Dr. William Tindall, secretary Board of Commissioners, District of Columbia, made an inspection of garbage left in river.  
12. Health Officer Woodward made an inspection of garbage down the river.  
13. Removed four vessels from the wharves.  
16. Removed four vessels from the wharves.

- 1894
- Aug. 17. Removed seven vessels from the wharves.
18. Went to regatta in Georgetown, D. C., rescued a man from drowning and took him to the Potomac boathouse.
27. Removed four vessels.
29. Arrested Mary Brown for disorderly conduct on excursion steamer.
31. Secured escaped inmate of St. Elizabeth's Asylum and sent him to Fourth precinct station.
- Sept. 3. Arrested Henry Marion for disorderly conduct.
5. Found steam tug *Templar* disabled; towed three vessels to Buena Vista; removed three vessels from the channel.
6. Recovered the drowned body of Thomas Brown.
10. Gave assistance to fire at the Riley stables on the river front.
12. Removed three vessels out of channel.
16. Recovered the drowned body of J. W. Wells.
20. Removed four vessels out of the channel.
23. Removed two vessels from the channel.
25. Recovered the drowned body of J. M. Rogers.
27. Removed two vessels from the channel.
- Oct. 3. Turned in alarm for fire at Ferry Company's wharf.
10. Removed six vessels out of channel.
13. Recovered stolen boat for Philip Hutchinson; value, \$20; arrested Edward McKenna for stealing the boat.
15. Recovered stolen boat.
18. Found six fyke nets in Eastern Branch sunk under the water. All had fish in them. Sold fish at auction and proceeds turned in to lieutenant of the Fourth precinct.
22. George Lee lighted a match in the cabin of a barge loaded with coal. The gas from the coal exploded and burnt him severely; sent to Emergency Hospital.
23. Removed three vessels out of the channel.
- Nov. 2. A horse and cart backed overboard in the night at Marshall Hall-Mount Vernon wharf. Saved horse from drowning.
6. Removed four vessels out of channel.
11. Removed three vessels out of channel.
13. George Wallace dropped dead on the flats. *Joe Blackburn's* crew brought body to harbor police office. Sent to morgue.
14. Word came to the wharf that a boat had capsized at Buena Vista with three men in it. Crew of *Joe Blackburn* went to the scene, and found Joseph Thompson and John Dolan nearly frozen to death. Brought them to this office; sent for the surgeons at Emergency Hospital who worked on them for about an hour at office and then took them to the hospital.
22. Removed three vessels out of the channel.
27. Removed four vessels out of the channel.
- Dec. 6. Removed three vessels out of the channel.
17. Vessel on fire at Great Falls Ice Company's wharf; went there and gave assistance.
21. Removed three vessels at oyster wharf.
30. *Joe Blackburn* laid up. River frozen.
- 1895.
- Jan. 2. Arrested George Washington for assault and battery.
3. Police boat patrolled the river front and prevented the cutting of ice to store in ice houses.
6. Dragged for W. Harmon's body in James Creek Canal.
7. River clear of ice and *Joe Blackburn* in commission. Dragged the canal for the body of Harmon.
19. Recovered the body of Frank Willet, drowned.
21. Arrested William Lawrence for disorderly conduct.
25. Arrested Joseph Green and George Eichelberger.
27. Sent Samuel Brown to hospital. He had been badly treated by an oyster captain while dredging down the Potomac.
- Feb. 14. Turned in alarm. Steamer *Lady of the Lake* burned.
16. With tugs *William H. Mohler* and *D. M. Key*, breaking ice.
17. Breaking ice.
18. Breaking ice.
22. Tugs *Hercules*, *Vulcan*, *Wm. H. Mohler*, and *D. M. Key*, breaking ice.
23. With tugs breaking ice.
24. Breaking ice in river.
25. Breaking ice in river.
26. Breaking ice in river.
27. Breaking ice in river.
28. Breaking ice in river.

1895.

- Mar. 1. Breaking ice.  
 2. Breaking ice.  
 3. River clear of ice. *Joe Blackburn* in commission.  
 25. First copy of new harbor law served on John B. Lord and W. McGlue, for sunken scows in Seventeenth Street Canal. The law was complied with.  
 26. Removed six vessels at oyster wharf.  
 27. Man by name of Frank J. Myers attempted suicide by jumping in the river. Sent to the Fourth precinct station.  
 29. Removed seven vessels at oyster wharf. Recovered the body of G. Boyle, drowned.  
 30. Arrested Joseph J. Desmer, Daniel F. Hartnett, George W. Ferris, and James C. Benson for larceny.
- Apr. 1. At oyster and fish wharves to regulate vessels. Removed four vessels out of channel. Officers of police boat, in company with Lieutenant Vernon, searched coal barge to see if anything could be found concerning the robbery of the ferry company's wharf. Searched the flats for papers stolen from the ferry company.  
 2. At oyster wharf to regulate vessels.  
 3. Stopped W. W. Riley from throwing fish offal into the river. Stopped E. M. Willis from dumping dirt on the banks of the river.

J. R. SUTTON,  
 Harbor Master, Commanding Police Patrol Boat.

Maj. WILLIAM G. MOORE,  
 Superintendent of Police, District of Columbia.

## AGENT OF THE HUMANE SOCIETY.

HEADQUARTERS METROPOLITAN POLICE, DISTRICT OF COLUMBIA,  
*Washington, July 1, 1895.*

SIR: I respectfully submit herewith a tabulated statement of work done by me during the fiscal year ended June 30, 1895, as agent of the Humane Society, in the enforcement of the laws for the protection of children under the act of February 13, 1895.

There were 312 cases investigated by me during the year, and 158 children were placed in the care of charitable or reformatory institutions or agencies, all except one within the District of Columbia. Of these dependent children 127 are white and 31 colored, while 101 are males and 57 females.

Comparison of these statistics with those for the next preceding fiscal year ended June 30, 1894, shows an increase of 10 in the number of cases investigated. The commitments to the Board of Children's Guardians of children brought to the police court by the Humane Society fell off from 59 to 8, as the subordinates of that board extended their own preparatory work, but on the other hand there was an increase of 46 in the number of children cared for through me and committed to institutions without the intervention of any other agency.

These figures give evidence of a natural and normal enlargement of the field of usefulness of the Washington Humane Society as a child-saving organization.

Referring to the recommendations in my reports of 1893 and 1894, the experience of another year causes me again to respectfully ask attention to the great importance of effective legislation for compelling the support of bastards and of legitimate children neglected by parents. The laws of the State of New York, as recently amended, seem to furnish the best models as to simplicity, directness, and the saving of public outlay for expenses that should be paid by delinquent persons. The adaptation of such laws to the District would, according to my observation as agent of the Humane Society, promote morality, diminish destitution and crime, and lessen public burdens.

It is also respectfully submitted that commitments to the reformatories, the House of Mercy, and the House of the Good Shepherd, and likewise to other child-saving corporations by the police court should be authorized for definite terms, not less than one year, as well as in the manner provided by the law of 1885.

Cases referred to me during the year induce me to report upon the lack of institutional accommodations in the District for wayward colored girls, whose tendencies and associations call for their being placed in a "preservation class," free from contact with fallen women. The Reform School for Girls has not adequate accommodations for this purpose, and the Baltimore House of the Good Shepherd for Colored Girls, in which wayward negro females from Washington have been received, is now so crowded that further admission of District dependents can not be relied on.

Permit me to express appreciation of your always considerate direction of my duties, the performance of which has been much aided by the efficient action of the officers of the Washington Humane Society and the hearty cooperation of the managers of the institutions for dependent and delinquent children.

Respectfully submitted.

S. WILSON, *Agent Humane Society.*

Maj. WILLIAM G. MOORE,  
*Superintendent of Police, District of Columbia.*

| Number of hack stands in the city .....                                      | 30  |
| Number of visits to the various stands.....                                  | 423 |
| Number of cases for charging excessive rates.....                            | 5   |

You will observe that the number of licenses issued this year is about the same as were issued last year, notwithstanding the hard times, the great facilities of the street railways, and their serious interference to the detriment of the hackney business. Within the last few years the street railways have extended their lines to nearly every section of the District. The great number of bicycles in use is also somewhat detrimental. Yet the hackmen continue to take out their licenses. Many of them use their hacks only on extra occasions and engage in some other business during dull seasons. This explains why so few hacks are at the present time on our streets.

During the past year I had occasion to visit New York, Philadelphia, and several other large cities. My special attention was naturally attracted to their respective

hackney services. Thorough investigation convinced me that our system is superior to any I have so far examined. Our rates, requirements, and all our arrangements are in every respect more simple and reasonable.

The few violations for overcharge and the few complaints that are made clearly prove that the hackmen have due consideration for their patrons and the public.

The stands are kept in a clean condition; there is no stand which is a serious annoyance; yet occasionally a complaint against a stand comes from someone living near.

Hackmen must make a living, and their patrons should be accommodated. The hacks are a public necessity, and they should have a place to stand. I desire to call your attention to certain requests or requirements of contractors for asphalt pavements. Whenever the streets are repaired under the five-year contract the hackmen are frequently required to stand in places without shade. The contractors do not consider the great inhumanity shown both to man and beast by being removed from under the shade trees during the extremely hot weather, nor do they consider the inconvenience it causes both the public and the hackmen. It is well enough to have all vehicles kept from the asphalt till it sets or is hardened, but to confine them to certain limits for weeks in the sun at a temperature of nearly 100 degrees is certainly a hardship. Their horses do not deface nor injure the concrete any more than do other horses which daily stand in front of business places, hotels, etc. My experience is that repairing is not required oftener on the hack stands than at many other places.

In conclusion, please accept my expressions of gratitude to you and to many officers of your department for kind acts and assistance accorded me in the performance of my duties.

Very respectfully, yours,

SAMUEL A. GROFF,  
*Hack Inspector, District of Columbia.*

Maj. WILLIAM G. MOORE,  
*Superintendent Metropolitan Police, District of Columbia.*

### REPORT OF SANITARY OFFICER.

HEADQUARTERS METROPOLITAN POLICE, DISTRICT OF COLUMBIA,  
SANITARY OFFICE,  
Washington, July 1, 1895.

SIR: I have the honor to submit herewith my annual report of the operations of this office for the fiscal year ended June 30, 1895. The statistics presented herewith do not exhibit by a considerable degree the great amount of work that the sanitary officer is called upon to perform. There are numerous calls upon this office for assistance and information that can not be specifically classified, and which, owing to their general nature, do not come under any particular head; therefore, the subjoined tables do not show the number of applications made to this office for various kinds of aid. While this is true, yet the figures will nevertheless demonstrate the steady increase of the legitimate work of the office. This, of course, should be expected with the growth in population. The year just closed has proved to be no exception as to the number of impostors, tramps, and cranks who have endeavored to force themselves upon this office, seeking the aid or relief that is intended for the worthy sick and indigent.

In the lawful administration of the affairs of the office I have always considered the paramount object of this "charity," or beneficial bureau of our police system, to be the amelioration of the condition of the worthy poor and destitute sick of the District of Columbia; and with this end in view I have investigated each application, endeavoring, if possible, to "winnow out," as it were, the chaff from the corn. Perhaps some unworthy ones have obtained by false representations the aid intended to be bestowed upon the honest poor man out of employment but willing to work. During the past severe winter I have been called upon to witness many sad sights. A large number of persons seeking transportation to different points called. Some were sick, others lame, and most of them were without any funds whatever. In addition to those who were anxious to go to their former homes, there were persons seeking admission to the various hospitals, and in many cases the applicants were more in need of nourishment and a place to sleep than they were in need of medicine. Indeed, I have reason to believe that many poor people who applied for hospital permits did so to get a home for a few days where they would get food and shelter.

## TRANSPORTATION.

While I consider this branch of the work of the sanitary office of the least importance, yet it requires the utmost precaution to deal with those who seek relief of this character, requiring, as it does, the expenditure of public funds. Perhaps more than the usual number of impostors and tramps have made their presence known in seeking a free railroad ride to some other city, and I confess that it has been no easy task on numerous occasions to determine between the worthy applicants and importunate impostors. Many of the latter were urgent and unreasonable in their requests. During the past year the whole number of persons furnished with transportation to their homes, or as near thereto as practicable, was 867, at an expenditure of \$1,776.55, while for the previous year the number receiving this benefit was 912 persons, at a cost of \$1,986.37, thus showing a decrease of 45 persons, and \$209.82 less than the preceding year. This decrease in the number furnished with transportation is not because there was not an equal number of worthy applicants, as in corresponding years; indeed, I am quite sure that the number who made application for this relief and were necessarily refused the needed assistance was larger than any previous year. The reason for the refusal to grant transportation to many, who I believe were worthy, is accounted for by the decrease in the appropriation, which has heretofore been \$4,000, for the transportation of paupers and prisoners, and for the year just closed the amount was reduced to \$3,500. More than one-half of that sum was used in transportation by this office. I have made no departure from the principle that worthy people should be aided at all times when we find the means at hand, and I have studiously adhered to the belief that the only legitimate cases we are called upon to consider and dispose of are such as I have brought to your attention from time to time, and which have received your approval.

I am pleased to note a decrease in the number of ex soldiers and sailors who have come to this city in reference to their pension claims, and, becoming stranded in our midst, have sought through this office transportation to their homes, in many instances quite remote. During the past year this number embraced 95 persons of this character, a decrease of 22 as compared with the year preceding. Many of these unfortunate men were imprudently attracted to the capital by the delusive prospect that their claims would be immediately adjusted. It is of common knowledge that the national capital is the center of pensioners and others who come here to prosecute their claims, real or imaginary, and it frequently occurs, by reason of delays and disappointments, that they find themselves stranded in our midst without money or friends, perhaps many miles from home. It is within the legitimate field of our work to care for this class, and upon satisfactorily showing their worthiness and honesty of purpose they are provided with transportation to their homes, or as near thereto as practicable. But it is only by the most thorough investigation of each individual case that we can satisfactorily and legally establish any such claim upon this charity.

I looked forward with hope that I would be able to record a decrease in the number of cranks who frequent our city with their delusive ideas, but in this I regret to say I am disappointed. Fourteen persons of this character were sent to their homes or friends during the year just closed, while the preceding year the same number was disposed of in like manner. This class of persons are the most troublesome with which we have to deal, coming here, as they do, from all parts of the country, and in some instances from Europe. Soon after the elections throughout the United States last autumn the so-called Presidential crank, who thinks he has a right to run affairs of state, began to appear. He wants to see the President, of course, and incidentally, although the rightful owner of millions or a claimant thereto, he invariably wants assistance from the Chief Executive. These individuals have all kinds of delusions and hallucinations, and frequently it requires the most persuasive influences to induce them to return whence they came. Just how or when they come to this city no one knows; they generally room in some small lodging house, and, as a rule, say very little about their affairs until taken in custody by the police.

There is another class of persons who frequent our city that should receive more than a passing thought in this report. I refer to those who come here seeking private employment, and remain with the hope of succeeding until their limited funds become exhausted, and then, failing in their object, are of necessity compelled to seek aid through the police department. Numbers of them come from distances quite remote, and many of these unfortunate persons are objects of pity, and not only call for our aid, but also merit our sympathy. During the preceding fiscal year 217 persons of this character were furnished transportation, and during the year just closed 269 were aided in like manner, showing an increase of 52 over the preceding year. This number (269) who came to the District on the business indicated is far in excess of any year in the history of this office. No small number of these unfortunate individuals were furnished with food before starting on their return from whence they came; and in this connection I will state that during the year 149

meals were furnished to destitute persons. Previous to last year the sum of \$4,000 has been appropriated for the transportation of paupers and prisoners. The appropriation for that purpose has been reduced to \$3,500—a sum far too small—and I would most respectfully recommend an appropriation for the next fiscal year for the transportation of paupers of \$2,500, and earnestly repeat my suggestions in several reports that the fund be separated and the appropriation, so far as it relates to this office, should be for the transportation of paupers.

#### THE HOSPITALS.

There has been a notable increase in the number of persons sent to the several hospitals of the District within the past year. During the preceding fiscal year the number thus disposed of was 3,075, and for the past year 3,558, thus showing an increase of 483 over the previous year. This marked increase of sick and indigent persons provided for is unprecedented, especially when we consider the absence of an epidemic. Indeed, the number sent to the various institutions within the year just closed is in excess of the number receiving hospital treatment during the prevalence of the "grip" in the winter of 1890 and 1891. I believe this undue increase can be properly attributed to the severity of the past winter, when a large number of our population were out of employment, causing much suffering among the poor, with which this office has chiefly to deal. As before mentioned, many of the applicants for hospital treatment were more in need of nourishment and shelter than of medicine. The States of Virginia and Maryland continue to contribute their yearly number of sick and destitute persons to our hospitals. The number thus accommodated during the year from the former State was 197, and the latter 135, a decrease from the State of Virginia of 13, while the State of Maryland increased its number 16. It seems to me that this is manifestly unjust, not only to the taxpayers of the District, but also to the worthy sick and indigent, as it has come to my knowledge on several occasions that our own poor have been refused admission to some of the hospitals for the want of room because the beds were occupied by outsiders.

I am well aware that the State of Virginia has but few hospitals, but it is a well-known fact that the State of Maryland is not surpassed in institutions of this character, and the access to them is equally as good from the counties of the State to the city of Baltimore, where most of them are located, as it is to this city. I can recall quite a number of cases where persons were sent to this city from the States mentioned, and after remaining in our hospitals, some of them for months, were finally furnished transportation to their homes, only to return in a few weeks seeking the same aid. While this injustice will doubtless be recognized, yet it would be inhuman to refuse these applicants the necessary hospital permit, as it frequently occurs that many of them are in a deplorable condition. Notwithstanding the fact that one-half of the cost of maintaining our hospitals is borne by the taxpayers of the District, yet we can not, from a humane standpoint, refuse a permit for care and medical treatment to anyone who may be suffering or in distress. Events in the past winter have in a very emphatic manner called attention to the necessity for the proper facilities for handling contagious diseases. I fully realize the difficult and perplexing duty in the location of a hospital for the treatment of such diseases, but it is in the interest of common humanity that such an institution be erected and properly equipped as soon as possible. Such a hospital has been a long-felt want, and no doubt it is universally regretted that we are without an institution of this character where the poor and afflicted should have some place of refuge.

In this connection, permit me to renew my former recommendations, that in the absence of a hospital for the treatment of contagious diseases an isolated ward be set apart in each of the several hospitals for the treatment of such diseases as scarlet fever and diphtheria. Providence Hospital has kindly consented to care for cases of this character, having fitted up a ward for the purpose, and several cases of the diseases mentioned have been successfully treated at that institution. Washington Asylum Hospital has also on several occasions received children and others suffering with infectious diseases, and both of these hospitals have treated with success the unfortunate ones without communicating the disease to other patients. I am again pleased to state that I am not aware of any patients in any of the hospitals having just cause for complaint. I have learned of many grateful acknowledgments of the benefits received, and it is also pleasant to note that the relations between the officials of the several hospitals and this department have continued to be of the most friendly and courteous character, and their prompt responses to our requests entitle them to the thanks of this department.

## AMBULANCE SERVICE.

Considering the number of persons sent to the various hospitals during the year, it must of a necessity show an increase in the work of this important branch of the service. For the year the number of runs made by the ambulances under the direction of this department was 2,871, being 534 more than were made during the former year. Thus it will be seen that this part of the work has largely increased, and it is very gratifying to know that this unusual demand on the ambulance service has been met in a commendable manner by the drivers. Many seriously injured or wounded persons, as well as those who were dangerously sick, have been carefully and successfully removed to the various hospitals, or their homes. The performance of this work calls for care and discretion as well as neatness and civility on the part of the employees, all of which I am pleased to say has been exercised on their part. To perform this great amount of labor there is one driver and two assistant drivers, who not only have to respond to the calls for the ambulance, but have also to care for the horses and vehicles, which is more than should be demanded of them, and in order to improve the service I respectfully recommend the appointment of a hostler at a salary of \$50 per month, so that the drivers may be relieved of that work and be able to give more time and attention to responding to other demands made upon them. Of the number of calls made for the ambulance during the year, 176 are returned as having rendered no service, 15 less unnecessary runs than in the previous year.

While I am pleased to note this decrease in the mistakes made in calling for the ambulance, yet I believe they could still further be reduced by proper care and discretion on the part of those who call for the vehicle, and thus improve the service. While I am pleased to know that the pay of the two assistant drivers has been increased to \$40 each per month, yet I am convinced that their salaries should be still further increased to \$50 per month, and in making this recommendation permit me to renew my former recommendation that the word "assistant," so far as it relates to the drivers, be dropped, and that the three employees of the service be known as "ambulance drivers." I earnestly hope that my recommendation as to an increase of salary to \$600 per annum for these faithful employees may become a law. This sum is certainly small enough for the services of these men. In other cities men performing similar service receive from \$50 to \$85 per month. The service could also be improved by the purchase of a new one-horse ambulance, similar to the one furnished to this department in October last, and I respectfully recommend that such a vehicle be secured, thus doing away with the heavy two-horse ambulance now in use.

## THE INSANE.

It is pleasing to note even a small decrease in this class of persons with whom we have to deal. The number of persons admitted to the Government Hospital for the Insane during the year was 201, a decrease of 6 as compared with the previous year. Of this number, 27 are individuals who came here from other States or cities, and because of their violent or strange conduct in the streets were arrested by the police and, after a proper examination by the police surgeons, were admitted to the insane asylum as "nonresident indigent insane persons," as provided by section 4850 of the Revised Statutes of the United States. Of this class 8 were females. These persons were dangerous to be at large, and as they could not give a correct account of their place of abode, it was necessary to care for them at the Government Hospital at the expense of the District. I am pleased to say, however, that 8 of these unfortunate persons have recovered and were furnished transportation whence they came.

I have in several former reports urged the importance and necessity of providing some suitable place of detention for the alleged insane that come into the custody of this department where they could be under the observation of a physician. It frequently occurs that cases of alleged insanity caused by inebriety, and others of a temporary nature, are brought to our attention that it would be hardly proper to admit at once to the Hospital for the Insane, nor are they fit subjects for an ordinary hospital. Such persons should be detained until it could be definitely determined as to the proper disposition to be made of them. I am convinced by experience in dealing with such persons that my recommendations in former reports are all important, and I again urge my suggestions that a ward or rooms be assigned for such cases at the Washington Asylum Hospital. I desire again to express my thanks for and appreciation of the continued kindness and consideration of Dr. W. W. Godding, the able superintendent of the Government Hospital for the Insane, and to his corps of efficient assistant physicians for the valuable services they have rendered this department in dealing with this dangerous and unfortunate class.

## ASYLUM FOR INEBRIATES.

Permit me to renew again, and if possible with stronger emphasis, my former recommendations looking to the establishment of an asylum or hospital for inebriates where the treatment of such patients should be compulsory. During the last session of Congress a bill for this purpose was favorably reported to the House of Representatives by the District Committee. The erection and maintenance of a hospital for inebriates within the District for the care and cure of persons who are suffering from the excessive and habitual use of liquors seems to meet with the heartiest indorsement of this community. If inebriety is a disease, and it is so admitted by the medical profession, then it seems that it is necessary to care for the inebriate. I am sure I have had more cases of this character brought to my attention during this fiscal year than at any other period. They were men of intellect who have become moral, mental, and physical wrecks by the excessive use of intoxicants, and I believe I can safely say that some of the cases of insanity can be directly traced to alcohol. Doubtless some of these men could be reclaimed and again become good members of society. An asylum for inebriates would be in the interest of morality and good government, and such an institution, to my mind, is equally as necessary as an asylum for the insane. I trust that in the near future a hospital for the compulsory treatment of this unfortunate class will be erected and properly equipped, and that Congress will at the coming session make a law similar to the bill reported at the last session for the establishment of an asylum for inebriates.

In conclusion, I desire to express my thanks for your able counsel and liberal support in all the matters relating to the business of this office, and to the officers at headquarters, as well as to the several lieutenants of the force. I desire to express my appreciation for their earnest cooperation in the performance of the duties devolving upon the sanitary officer. I have also received valuable information and assistance from the police surgeons and the physicians to the poor, for which I return my thanks. I desire to express my grateful acknowledgments to Dr. W. W. Godding, superintendent of the Government Hospital for the Insane, for his generous assistance in cases of insanity, as I can recall several of this unfortunate class in which the efficient superintendent has rendered this office valuable service. I feel it due to the intendant of the Washington Asylum, and all those in charge of the hospitals and charitable institutions, to extend my thanks for their kind assistance in caring for the sick, the homeless, and destitute with which this office has to deal.

Respectfully submitted.

J. A. FRANK,  
*Sanitary Officer, Metropolitan Police.*

Maj. WILLIAM G. MOORE,  
*Superintendent of Police, District of Columbia.*

## REPORT OF THE SUPERINTENDENT OF THE TELEGRAPH AND TELEPHONE SERVICE.

OFFICE TELEGRAPH AND TELEPHONE SERVICE,  
*Washington, D. C., July 31, 1895.*

SIRS: In presenting the thirty-first annual report of the telegraph and telephone service of the District of Columbia, while treating mainly of the operations and expenditures of the department during the fiscal year ended June 30, 1895, it will be necessary in order to a proper statement of the subject to take a look backward, and to say many things which will have to be repeated in the report for the fiscal year just entered upon, for the reason that the work of extending and enlarging the fire-alarm telegraph was begun in March last and is not yet completed, and is to be paid for when completed out of the appropriation for the fiscal year ending June 30, 1896.

The urgent necessity for enlarging and extending both the fire-alarm telegraph and the police-patrol system in the city and to the suburbs has been called to the attention of Congress year after year, and the necessary appropriations asked for by the Commissioners; but not until the passage of the last appropriation bill has any provision been made for the extension of the fire-alarm telegraph to the suburbs, and even now, owing to the small amount appropriated, but little can be accomplished.

It will be remembered that in the estimate submitted last year, and by you approved, I had the honor to recommend:

|   |          |
|---|----------|
| For battery supplies, purchase and rent of telephones, and general expenses of all kinds, including ordinary repairs..... | \$15,000 |
| Extension of fire-alarm telegraph in city and suburbs.....  | 10,000   |
| Special repairs and renewal of the police-patrol system.....  | 5,000    |
| Total .....   | 30,000   |

Congress, however, cut the first item down to \$11,000, and the second and third items combined to \$7,000, thus providing only \$18,000, where the full sum of \$30,000 was necessary to do that which ought to be done this year. It follows that only a portion of the work can be done until further appropriation shall have been made.

The extensions of the fire-alarm telegraph which are now being made to the suburbs, with the small appropriation available, will be of great service, but many other places need protection quite as much as do those reached this year, a notice of which will be found further on in this report.

### EXTENSIONS OF THE FIRE ALARM SERVICE NOW BEING MADE.

On account of the meager appropriation for extension of the fire-alarm telegraph to the suburbs, only 27 boxes can be put in service this year, and one of that number will be paid for by the German Orphan Asylum and placed in that institution.

Owing to the limited capacity of the switch board and the repeaters in the fire-alarm office, all of which have been in service twenty years,

two new repeaters and one new switch board has to be procured at considerable expense to accommodate the new circuits which are required for suburban extension, and hence a smaller number of boxes can be purchased than would be had the old repeaters a capacity for the increased number of circuits required for the extensions.

Three new signal circuits for suburban boxes and two additional alarm circuits—one each to the two new engine houses—are being constructed.

One new signal circuit covers the territory north of Washington, between Seventh and Twentieth streets west, as far north as Howard avenue in Mount Pleasant, and will be supplied with 11 fire-alarm boxes.

Another of the new signal circuits will cover portions of Eckington, Ivy City, and Trinidad, and will have distributed thereon 9 boxes.

The third new signal circuit will go out by way of the Washington Asylum, thence across the river to Twining City to the German Orphan Asylum, and thence to and through Anacostia, and will have 7 boxes.

#### ADDITIONAL FIRE-ALARM BOXES VERY MUCH NEEDED.

Within the area covered by the three new circuits now being constructed there ought to be at least 15 additional boxes for protection of houses.

The present Georgetown signal circuit ought to be extended to Tenallytown, and have 10 new boxes properly distributed thereon.

A new signal circuit should be constructed running along Brightwood avenue to and through Takoma Park, returning through Brookland, on which 20 boxes should be distributed.

Another new signal circuit would be desirable along the Bladensburg road as far out as the Reform School for Boys, and thence to Benning, and thence back to the city through the eastern portion, between B and G streets NE., with at least 15 boxes on the circuit.

In addition to these 60 additional suburban boxes, the city should have not less than 40 boxes added to its present number, making a total of 100 new boxes, and the several new circuits mentioned, which should be provided for in the next annual appropriation bill.

#### *Alarms for fire received and transmitted during the year.*

| Total.....     | 245      | 268    | 7       | 3      | 3        |

Grand total, 526.

Regular alarms as tabulated above are given through the fire-alarm boxes, and transmitted by telegraph direct to the entire fire department, as received from the box, automatically.

Local alarms are received over the exchange wires by telephone, and transmitted by telephone to fire company nearest to the locality from whence the information is received.

During the year there was one alarm each from boxes 12, 14, 15, 17, 121, 128, 136, 148, 153, 165, 213, 231, 234, 236, 237, 238, 245, 31, 37, 314, 315, 318, 321, 326, 327, 328, 417, 427, 431, 52, 53, 54, 58, 512, 513, 517, 526, 531, 534, 65, 68, 69, 623, 73, and 721; two each from 13, 16, 132, 145, 146, 147, 21, 23, 24, 216, 217, 247, 32, 35, 38, 319, 413, 428, 516, 523, 612, 613, 618, 621, 625, 628, 632, 634, 712, and 731; three each from 124, 134, 143, 151, 214, 239, 243, 254, 41, 45, 415, 423, 63, and 732; four each from 125, 135, 212, 524, and 62; five each from 123, 129, 152, 241, 416, 514, and 518; six each from 131 and 142; seven each from 127 and 714; eight from 43, and nine from 426.

BETWEEN WHAT HOURS THE ALARMS WERE GIVEN.

|   | Alarms. |
|---|---------|
| Between midnight and 6 o'clock a. m ..... | 75      |
| Between 6 a. m. and 12 o'clock m .....    | 126     |
| Between 12 o'clock m. and 6 p. m .....    | 135     |
| Between 6 p. m. and midnight .....        | 190     |

TIME SPENT BY THE FIRE DEPARTMENT SUBDUING FIRES.

In response to the 526 alarms during the year, a portion of the fire department was absent from quarters four hundred and seventy-six hours and eight minutes.

Allowing eight hours for a day's work, fifty-nine days, four hours, and eight minutes were devoted to the task of fighting fire during the year, divided by the month as follows:

| Month.          | Hours. | Minutes. | Month.         | Hours. | Minutes. |
|-----------------|--------|----------|----------------|--------|----------|
| July .....      | 68     | 34       | January .....  | 44     | 44       |
| August .....    | 18     | 47       | February ..... | 53     | 2        |
| September ..... | 49     | 22       | March .....    | 48     | 48       |
| October .....   | 24     | 29       | April .....    | 33     | 54       |
| November .....  | 30     | 1        | May .....      | 25     | 19       |
| December .....  | 37     | 10       | June .....     | 41     | 58       |

During the year four fire-alarm boxes, Nos. 231, 316, 617, and 618, were purchased. Early in April of this year six fire-alarm boxes, Nos. 36, 312, 321, 327, 731, and 732 were so badly damaged by the wire on which they were connected coming in contact with a live trolley wire in Georgetown, that new boxes had to be bought to replace them, involving an expense of \$600. Ten keyless boxes were put up in the places of as many of the old style in March last, and have given very good satisfaction.

Thirty-three new poles were set to replace that number of decayed ones, during the year, at a cost of \$844. The new poles have greatly improved the old trunk lines, especially along Fourteenth street north of L street NW. Many additional new poles are yet needed to take the place of decayed and rapidly decaying poles put in service years ago.

No serious delays in the transmission of alarms occurred during the year, and as a whole the fire-alarm apparatus has done its work well.

POLICE-PATROL SERVICE.

The patrol telegraph and telephone service covering the city portions of the nine police precincts have 126 street stations from which reports are made hourly or oftener by each officer on patrol duty to his

respective precinct station day and night, from which it will be seen that these patrol boxes work almost constantly year in and year out. The first precinct has 13 street stations; the second, 16; the third, 16; the fourth, 16; the fifth, 14; the sixth, 13; the seventh, 14; the eighth, 10, and the ninth, 14. Total number of city street stations in the nine precincts, 126.

The substation at Anacostia has a telephone connected with the fifth precinct station house, and the Tennallytown substation has telephonic connection with the Georgetown (seventh precinct) station house.

In the eighth precinct there are five telephone-reporting stations in the county, all connected with the station house on U street, between Ninth and Tenth streets NW. These reporting stations are located, one each at Brookland, Takoma Park, Brightwood, Seventh street and Rock Creek Church road crossing, and Mount Pleasant.

Additional patrol boxes and reporting stations are much needed in several of the precincts. In the fifth, seventh, eighth, and ninth precincts the service should be greatly enlarged, so that the officers on patrol duty outside of the city could make frequent and regular reports, and call for assistance when needed.

#### NEW FURNITURE REQUIRED.

The furniture in connection with the patrol instruments in the first, fourth, sixth, and ninth precincts ought to be renewed, as the old was never as good as it should have been; it is out of harmony with surroundings, and not of the kind to insure the highest degree of service.

Several new and improved registers will also be required, all of which will be estimated for.

#### WHEN CONSTRUCTED.

The patrol telegraph was erected and put in operation in the several precincts as follows: In the first, October 1, 1884; in the sixth, March 16, 1885; in the fourth, November 1, 1886; in the second, October 26, 1887; in the third, November 1, 1888; in the ninth, May 1, 1889; in the seventh, October 1, 1890; in the fifth, June 24, 1891; in the eighth, June 24, 1891.

#### TELEPHONE MESSAGES SENT AND RECEIVED AND RECORDED AT THE CENTRAL OFFICE.

During the year covered by this report 141,355 police official messages were sent and received which were duly recorded in the official record books kept by this department, monthly, as follows:

| Month.          | Number. | Month.         | Number.  |
|-----------------|---------|----------------|----------|
| July .....      | 10, 194 | February ..... | 12, 718  |
| August .....    | 12, 143 | March .....    | 12, 174  |
| September ..... | 9, 662  | April .....    | 12, 203  |
| October .....   | 10, 264 | May .....      | 13, 394  |
| November .....  | 10, 970 | June .....     | 12, 351  |
| December .....  | 13, 253 |                |          |
| January .....   | 12, 029 | Total .....    | 141, 355 |

In addition to the official messages recorded as above, hundreds of unofficial messages are sent and received daily, of which no record is kept.

There was an increase of 15,645 official messages over the previous year, and no doubt a corresponding increase in the nonofficial messages handled, making it exceedingly difficult during ten or twelve hours of each day for the limited force employed to handle the mass of business with the promptness that is desirable for public business.

I respectfully recommend that provision be made for two additional telephone operators, so that from 8 o'clock a. m. until 12 o'clock midnight two telephone operators may be on duty, thus making it possible to handle the constantly increasing telephone business with greater promptness than is now possible with the limited force.

In the handling of official business a record is, and necessarily must be, made at the time; it happens hundreds of times a day that someone calls over the lines while the telephone operator is recording a message, and hence it often happens that a short time at least elapses before the call can be answered.

The expense of fitting up an additional switch board for an additional operator, as suggested, would not be great, while the advantages of the increased service would be large, and greatly appreciated by the public.

During the entire year the District used, on its own wires, 199 sets of telephones rented from the Chesapeake and Potomac Telephone Company at a rental of \$10 per set per annum during the first three quarters of the year. From and after the 1st of April last, the rate of rent was reduced by the president of that company to \$5 per set per annum.

From the beginning of the year until the 4th of February the District rented from the same company 15 exchange telephones on the wires of that company's exchange, and since February 4, 16 sets at an annual rental of \$50 for each set of telephones.

In addition to these rates of rental, and by virtue of an old agreement, the Chesapeake and Potomac Telephone Company continues to charge the District \$300 per annum for general exchange service, under the assumption that the District uses the exchange wires much more frequently than their patrons use the wires of the District Government.

*Expenditures for support of department during the year.*

|   |             |
|---|-------------|
| In the payment of salaries of all employees.....    | \$10,800.00 |
| For battery supplies and new battery.....           | 2,075.99    |
| New instruments and fire-alarm boxes.....           | 2,121.50    |
| Telephone rents and exchange service.....           | 2,821.13    |
| New poles and repairs of the lines.....             | 1,286.06    |
| Forage and care of horse and wagon.....             | 193.31      |
| Purchase of horse, and repairs to harness, etc..... | 192.68      |
| Hardware, including fire-alarm box keys.....        | 105.99      |
| Register paper and chemicals for patrol.....        | 81.77       |
| Blacksmithing, including horseshoeing.....          | 38.00       |
| Ice consumed in central office.....                 | 25.55       |
| Stationery, including record books.....             | 25.02       |
| Washing for the central office.....                 | 24.00       |
| Office rent, including fuel and light.....          | 450.00      |
| Total disbursements.....                            | 20,241.00   |

Estimates will be submitted at a later date for appropriations for the various objects briefly referred to in this report; also for the salaries and ordinary running expenses of the department for the fiscal year ending June 30, 1897.

In conclusion I desire to thank each of the Commissioners for the kindly advice and generous support given me in the effort to make this department as efficient as possible.

I also tender my thanks to the members of both the police and fire departments for their uniform efforts to make both the fire-alarm and patrol systems a success for the purposes for which each was intended, realizing, as I do, that without their cooperation neither system would have been as efficient as it has been.

The several employees of this department deserve and have my thanks.

Respectfully submitted.

HENRY R. MILES,

*Superintendent Telegraph and Telephone Service.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

REPORT OF THE INSPECTOR OF BUILDINGS.

OFFICE OF THE INSPECTOR OF BUILDINGS,  
Washington, September 17, 1895.

GENTLEMEN: I have the honor to submit herewith the annual report covering the transactions of this department during the fiscal year ended June 30, 1895, together with the estimates and recommendations for the year ending June 30, 1897.

Statement of permits issued from July 1, 1894, to June 30, 1895.

| Description.                                 | Number. | Value.            |
|--|---------|-------------------|
| Brick dwellings .....                        | 811     | \$2, 915, 845. 00 |
| Brick repairs .....                          | 417     | 556, 793. 00      |
| Frame dwellings .....                        | 256     | 243, 201. 00      |
| Frame repairs .....                          | 444     | 86, 865. 00       |
| Theaters .....                               | 1       | 250, 000. 00      |
| Stores .....                                 | 32      | 188, 905. 00      |
| Hotel .....                                  | 1       | 150, 000. 00      |
| Churches .....                               | 6       | 136, 900. 00      |
| Office buildings .....                       | 15      | 115, 750. 00      |
| Private stables .....                        | 56      | 70, 885. 00       |
| Armory .....                                 | 1       | 60, 000. 00       |
| Warehouses and storage houses .....          | 11      | 43, 800. 00       |
| Apartment houses .....                       | 3       | 33, 800. 00       |
| Car and power houses .....                   | 2       | 34, 000. 00       |
| Abattoir .....                               | 1       | 28, 000. 00       |

| Private schoolhouses .....                   | 2       | 14, 600. 00       |
| Workshops .....                              | 8       | 4, 750. 00        |
| Livery stables .....                         | 2       | 4, 650. 00        |
| Hall .....                                   | 1       | 4, 500. 00        |
| Frame stables .....                          | 7       | 2, 475. 00        |
| Carriage houses .....                        | 2       | 1, 800. 00        |
| Frame stores .....                           | 8       | 1, 362. 00        |
| Bakery .....                                 | 1       | 700. 00           |
| Frame church .....                           | 1       | 4, 000. 00        |
| Vault, 5,939 cubic feet, at 10 cents .....   | 15      | } 2, 127. 27      |
| Vault, 10,222½ cubic feet, at 15 cents ..... |         |                   |
| Boiler locations .....                       | 119     | .....             |
| Awnings .....                                | 148     | .....             |
| Railings, permits to March 16, 1895. * ..... | .....   | .....             |
| Total .....                                  | .....   | 4, 989, 897. 27   |

\* Railings transferred to engineer department.

The fees for permits for the use of water for building purposes amounted to the sum of \$1,285.51; the fees from building permits amounted to the sum of \$6,254.27, making the total revenue \$7,539.78.

The above statement shows an increase in the building operation when compared with the report of the previous year, as follows:

|                       |                   |
|-----------------------|-------------------|
| 1894. Buildings ..... | 914               |
| 1895. Buildings ..... | 1, 233            |
| Increase .....        | 319               |
| 1894. Dwellings ..... | 783               |
| 1895. Dwellings ..... | 1, 067            |
| Increase .....        | 284               |
| 1894. Valuation ..... | \$4, 304, 941. 00 |
| 1895. Valuation ..... | 4, 989, 897. 27   |
| Increase .....        | 684, 956. 27      |

The following summary will show the distribution of the improvements and the value of same:

|  |                        |
|--|------------------------|
| Buildings in northwest .....             | 2, 150, 682. 00        |
| Buildings in county .....                | 1, 215, 716. 00        |
| Buildings in northeast .....             | 458, 975. 00           |
| Buildings in southeast .....             | 296, 400. 00           |
| Buildings in southwest .....             | 206, 750. 00           |
| <b>Total</b> .....                       | <b>4, 328, 523. 00</b> |
| Repairs in northwest .....               | 475, 436. 00           |
| Repairs in county .....                  | 102, 142. 00           |
| Repairs in northeast .....               | 40, 528. 00            |
| Repairs in southeast .....               | 31, 463. 00            |
| Repairs in southwest .....               | 9, 378. 00             |
| <b>Total</b> .....                       | <b>659, 247. 00</b>    |
| <b>Total buildings and repairs</b> ..... | <b>4, 987, 770. 00</b> |
| Vaults .....                             | 2, 127. 27             |
| <b>Total</b> .....                       | <b>4, 989, 897. 27</b> |

In addition to the permits above enumerated miscellaneous permits were issued for which no fees were obtained, consisting of renewal of parking railings, laying pavement within parking spaces, rebuilding entrance porches and terrace steps, temporary structures for the use of builders in connection with new construction, and extra occupancy of public space for building materials.

The present corps of assistants has been faithful and painstaking in the discharge of the duties assigned them. Appended is a statement of the performance of the miscellaneous character of their assignments.

WASHINGTON, —, 1895.

SIR: We, the undersigned, respectfully submit the following statement of the character and the amount of work done by us during the fiscal year ended June 30, 1895:

|   |        |
|---|--------|
| Examined and notices sent for the condemnation of party walls ..... | 18     |
| To make good defective construction, notices .....                  | 78     |
| For the condemnation of frame buildings, notices .....              | 51     |
| For the condemnation of brick buildings, notices .....              | 31     |
| For defective chimneys, notices .....                               | 29     |

| Examinations made of new buildings in city and county .....         | 1, 594 |

We would simply reiterate the statement made in our last report that the duties and responsibilities attending the position we hold are increasing every year, and while the character of the work done and the materials used are up to the average, the territory to be visited is enlarging every year. We are still without transportation, except street cars, which makes it a physical impossibility to give the work the supervision the building public is entitled to receive.

Thanking you for the uniform courtesy you have extended to us during the time you have held the position of inspector of buildings, we are, respectfully, yours,

B. C. KING,  
R. E. EVANS,

*Assistant Inspectors of Buildings.*

JOHN B. BRADY,  
*Inspector of Buildings.*

WASHINGTON, D. C., September 16, 1895.

SIR: I have the honor to submit the following as a list of the inspections made by me during the fiscal year ended June 30, 1895:

|  |     |
|--|-----|
| Elevator inspections.....                                  | 624 |
| Elevators inspected and condemned.....                     | 124 |
| Premises examined to locate steam boilers and engines..... | 23  |
| Miscellaneous inspections.....                             | 550 |
| Gas engines located.....                                   | 7   |
| Ovens located.....   | 2   |
| Inspections for United States.....                         | 3   |
| Premises examined and fire escapes ordered.....            | 15  |
| Fire escapes inspected.....                                | 75  |

Your attention is called to the necessity for a law governing the erection of fire escapes in the District of Columbia. I have the honor to recommend the following as a substitute for the existing defective law:

"SECTION 1. That it shall be the duty of the owner or owners, in fee or for life, of every building constructed or used, or intended to be used, as a hotel, factory, manufactory, theater, tenement house, boarding house, store or ware house, office building, seminary, college, academy, hospital, asylum, hall, or place of amusement, and of the trustee or trustees of every estate, association, society, college, academy, school, hospital, or asylum, owning or using any building three stories high or upward, used for any of the purposes herein mentioned, to provide and cause to be erected and affixed to said building iron fire escapes and combined stand pipes and ladders, or either of said appliances, as may be approved and adopted by the Commissioners of the District of Columbia.

"SEC. 2. That in all hotels, factories, manufactories, workshops, schools, seminaries, colleges, hospitals, asylums, halls, or places of amusement, or other places mentioned in this act, the hallways and stairways shall be properly lighted when occupied at night, and at the head and foot of each flight of stairs and at the intersection of all stairways with main corridors shall be kept during the night a red light, and one or more proper gongs or alarms, capable of being heard throughout the building, shall always remain easy of access and ready for use in each of said buildings, to give notice to the inmates in case of fire; and there shall be kept posted in a conspicuous place in every sleeping room a notice descriptive of such means of escape, and the building inspector and chief engineer of the fire department shall have the right to designate the location of said fire escapes and stand pipes in conformity with this act, and shall grant certificate of approval to every person, firm, or corporation, trustee, and board of trustees complying with the requirements of this act, which certificate shall relieve the party or parties from the liabilities of fires or damages imposed by this act.

"SEC. 3. That it shall be unlawful to issue a license to the lessee or proprietor of any building in the District of Columbia used as a hotel, factory, manufactory, theater, tenement house, hall or place of amusement, or other building used for a business for which a license is required, unless the application for such license is accompanied with the certificate of the inspector of buildings that such building is provided with fire escapes, stand pipes, and ladders, lights, alarms, gongs, and descriptive notices, as required by sections 1 and 2 of said act. That on the failure or neglect, after thirty days' notice, of the owner or lessee of any building used as a factory, manufactory, tenement house, boarding house, store, warehouse, or to the trustees of any building used as a seminary, college, academy, hospital, or asylum, in the District of Columbia, to provide fire escapes, stand pipes, ladders, lights, and alarms, or gongs, as required by sections 1 and 2 of this act, such person or persons shall be liable to a fine of not less than fifty nor more than one hundred dollars for each day, he or they shall fail to provide the same, such fine to be collected by prosecution in the police court in the name of the District of Columbia. *Provided also*, That the lessee or owner, trustee, as the case might be, of any such building who shall fail to erect fire escapes, as in said act provided, shall be liable to an action for damages in case of death or personal injury resulting from fire in building not provided with fire escapes, as required by said act, and that such act may be maintained by any person or persons now authorized by law to sue, as in other cases of injury or death by wrongful act: *Provided further*, That as to any building which the Commissioners shall determine to be fireproof they may, in their discretion, require the erection of fire escapes."

## 570 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

That the following be adopted as the standard sheave for ropes of given diameter with 19 wires to the strand:

| Trade No.              | Diameter.       | Circumference.  | Weight per foot of rope with hemp center. | Breaking strain in tons of 2,000 pounds. | Proper load in tons of 2,000 pounds. | Minimum size of drain or sheave. |
|------------------------|-----------------|-----------------|---|--|--------------------------------------|----------------------------------|
|                        | Inches.         | Inches.         | Pounds.                                   |  |                                      | Feet.                            |
| 1.....                 | 2 $\frac{1}{2}$ | 6 $\frac{1}{2}$ | 8   | 74                                       | 13                                   | 15                               |
| 2.....                 | 2               | 6               | 6.30                                      | 65                                       | 13                                   | 13                               |
| 3.....                 | 1 $\frac{3}{4}$ | 5 $\frac{1}{2}$ | 5.25                                      | 54                                       | 11                                   | 10                               |
| 4.....                 | 1 $\frac{5}{8}$ | 5               | 4.10                                      | 44                                       | 9                                    | 8 $\frac{1}{2}$                  |
| 5.....                 | 1 $\frac{3}{8}$ | 4 $\frac{3}{4}$ | 3.65                                      | 39                                       | 8                                    | 7 $\frac{1}{2}$                  |
| 5 $\frac{1}{2}$ .....  | 1 $\frac{3}{8}$ | 4 $\frac{3}{8}$ | 3   | 33                                       | 6 $\frac{1}{2}$                      | 7                                |
| 6.....                 | 1 $\frac{1}{4}$ | 4               | 2.50                                      | 27                                       | 5 $\frac{1}{2}$                      | 6 $\frac{1}{2}$                  |
| 7.....                 | 1 $\frac{1}{8}$ | 3 $\frac{1}{2}$ | 2   | 20                                       | 4                                    | 6                                |
| 8.....                 | 1               | 3 $\frac{1}{8}$ | 1.58                                      | 16                                       | 3                                    | 5 $\frac{1}{4}$                  |
| 9.....                 | $\frac{7}{8}$   | 2 $\frac{3}{4}$ | 1.20                                      | 11.50                                    | 2 $\frac{1}{2}$                      | 4 $\frac{1}{2}$                  |
| 10.....                | $\frac{3}{4}$   | 2 $\frac{1}{4}$ | .88                                       | 8.64                                     | 1 $\frac{3}{4}$                      | 4                                |
| 10 $\frac{1}{4}$ ..... | $\frac{5}{8}$   | 2               | .60                                       | 5.13                                     | 1 $\frac{1}{4}$                      | 3 $\frac{1}{2}$                  |
| 10 $\frac{1}{2}$ ..... | $\frac{3}{8}$   | 1 $\frac{5}{8}$ | .44                                       | 4.27                                     | $\frac{3}{4}$                        | 2 $\frac{3}{4}$                  |
| 10 $\frac{3}{4}$ ..... | $\frac{1}{2}$   | 1 $\frac{1}{2}$ | .35                                       | 3.48                                     | $\frac{3}{8}$                        | 2 $\frac{1}{4}$                  |
| 10a.....               | $\frac{1}{8}$   | 1 $\frac{1}{8}$ | .29                                       | 3  | $\frac{1}{4}$                        | 2                                |
| 10 $\frac{7}{8}$ ..... | $\frac{1}{8}$   | 1 $\frac{1}{4}$ | .26                                       | 2.50                                     | $\frac{1}{8}$                        | 1 $\frac{1}{2}$                  |

I also recommend that all passenger-elevator shafts be inclosed from the floor to the ceiling, and where iron wire or fancy or ornamental ironwork is put up that no greater space than 2-inch mesh be permitted and that all beams for supporting overhead work be of iron for all elevators hereafter erected.

My object in making these recommendations is that with small openings in the wire inclosure it will be impossible for a person to move the shipping rope and start the elevator.

In measuring buildings under the present act, I find so many of them just an inch or two under fifty feet in height, and it appears that they are most in need of fire escapes.

JOHN B. BRADY,  
Inspector of Buildings.

E. F. VERMILLION,  
Assistant Inspector of Buildings and Fire Escapes.

## DISTRICT BUILDINGS.

The plans and specifications were prepared in this office for the several municipal buildings provided for in the annual appropriation bill. There were erected during the year two 8-room school buildings, two engine houses, and a ward for the Washington Asylum, and also the reconstruction of the Western Market house. The several appropriations were expended as follows:

| MOUNT PLEASANT SCHOOL, SIXTH DIVISION.                 |           |             |
|--|-----------|-------------|
| Appropriation .....                                    |           | \$29,000.00 |
| Clearing site.....                                     | \$700.00  |             |
| Contract price .....                                   | 21,993.00 |             |
| Heating .....  | 2,152.00  |             |
| Draftsman .....  | 64.00     |             |
| Removal and repairs to old frame building on site..... | 553.10    |             |
| Foundation for old building.....                       | 322.50    |             |
| Excavation for old building.....                       | 25.50     |             |
| Superintendence .....                                  | 718.00    |             |
| Drawing materials .....                                | 20.39     |             |
| Printing .....   | 15.54     |             |
| Lumber and fence.....                                  | 82.49     |             |
| Iron fence and painting same.....                      | 272.70    |             |
| Surveying .....  | 5.00      |             |
| Extra work .....                                       | 1,812.00  |             |
| Blackboarding.....                                     | 56.25     |             |
| Board walk.....  | 74.00     |             |
| Total cost.....  |           | 28,848.47   |
| Balance.....   |           | 153.53      |

The Potomac Building should at the earliest practicable date be replaced by a new 8-room building of modern construction. The building is old and unsightly, has no conveniences, is not properly heated

or ventilated, and is entirely unfit for the purposes to which it is devoted. Its occupation constitutes a continual menace to the health of the children taught there.

A recommendation of similar import has heretofore been made regarding this building, and the matter is of sufficient importance to justify me in reiterating it.

Your attention is again called to the situation at the Curtis Building. It is placed but 4 feet from the west line of the lot, and a dilapidated building having been condemned and removed from the adjoining lot, the ground is now vacant. If a building should be erected on the lot, it would destroy the light of the west windows, and to avoid this the ground should be purchased, or Potomac street carried through the square as was intended when the building was located near the west end of the lot. It is a matter of importance that some arrangement be made to prevent damage that would be caused to the building as stated.

I herewith append a statement of the number of school buildings, their location, number of rooms, how heated, and the cost of buildings and sites:

| Name.              | Location.   | Style of building. | Size.              | Description.                    | How heated.   | When erected. | No. of rooms. | Value of site.        | Value of building.     | Total.                 |

REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA. 577

The appropriation for repairs to school buildings was expended in the several divisions as follows:

|                        |             |
|------------------------|-------------|
| Appropriation .....    | \$26,000.00 |
| First division .....   | \$2,374.21  |
| Second division .....  | 4,585.11    |
| Third division .....   | 2,444.30    |
| Fourth division .....  | 2,255.11    |
| Fifth division .....   | 1,827.83    |
| Sixth division .....   | 3,106.33    |
| Seventh division ..... | 1,983.51    |
| Eighth division .....  | 3,204.22    |
| High schools .....     | 3,835.10    |
| Total .....            | 25,615.72   |
| Balance .....          | 384.28      |

SPECIAL REPAIRS TO SCHOOLS.

|   |            |
|---|------------|
| Steam boilers (Sumner School):                            |            |
| Appropriation .....                                       | \$2,500.00 |
| Amount expended .....                                     | 2,175.43   |
| Balance .....   | 324.57     |
| Fireproof stairways (Curtis, Seaton, and Abbott schools): |            |
| Appropriation .....                                       | 9,000.00   |
| Expended .....  | 8,933.69   |
| Balance .....   | 66.31      |

This is an appropriation which should be increased to at least \$33,000. Because of the lack of funds, I will be compelled to omit many necessary repairs. The number of school buildings increases yearly, and the amount which sufficed for repairs to 50 or 75 buildings will not do for over 100 buildings. Like all other buildings, these deteriorate as time passes, and year by year a necessity exists for constant watchfulness and additional repairs.

There are 103 school buildings now occupied; of these, including the three large high schools, 20 are supplied with large and expensive steam-heating apparatus, and 44 fitted and provided with the Smead heating and ventilating apparatus.

The expenses each year on the heating apparatus are large, and on account of the limited appropriation (\$26,000) from which the buildings, grounds, outhouses, and fences are to be kept up, I found it only sufficient to repair the buildings to the extent of keeping them in a habitable condition. The roof and plumbing work require constant attention. The glazing also each year is a large item. All the recently constructed buildings have sand-finished walls and ceilings for calcimining, but there are 40 that I have been unable on account of the limited funds to have a brush put on. You can therefore see the necessity for the increase.

BATHING BEACH.

|                     |           | <hr/>        |
| Balance.....        |           | 69. 20       |

I renew the recommendation of last year, that the appropriation for repairs to stations be increased to \$3,000, as it is necessary to have this amount to keep the buildings in a good state of preservation and for the comfort of the officers and prisoners.

On account of the limited appropriation, \$2,000 for the current year, necessary repairs will be omitted.

We have nine station houses, and attached to each are stables, and also a large stable for ambulances and horses attached to the department. The wear on these stable buildings consumes at least one-third of the annual expenses, and for that reason the sum of \$3,000 is not more than sufficient to keep the buildings in a fair state of repair and to prevent decay on the exterior and make the inhabitants comfortable.

REPAIRS TO MARKET HOUSES.

|  |           |           |
|--|-----------|-----------|
| Appropriation (account of contingent expense)..... |           | \$720. 00 |

|----------------------------------|------------|
| Appropriation .....              | \$1,000.00 |
| Expended on general repairs..... | 999.00     |
| Balance.....                     | 1.00       |

## STEAM-HEATING APPARATUS, WASHINGTON ASYLUM.

|                                 |          |
|---------------------------------|----------|
| Amount allowed .....            | \$546.00 |
| Cost of work and materials..... | 546.00   |

## ENGINE-HOUSE REPAIRS.

|                         |            |
|-------------------------|------------|
| Appropriation .....     | \$3,000.00 |
| No. 1 engine house..... | \$144.96   |
| No. 2 engine house..... | 61.36      |
| No. 3 engine house..... |            |
| No. 4 engine house..... | 465.51     |
| No. 5 engine house..... | 24.10      |
| No. 6 engine house..... | 412.69     |
| No. 7 engine house..... | 800.05     |
| No. 8 engine house..... | 484.82     |
| No. 9 engine house..... | 34.00      |
| Truck A.....            | 252.72     |
| Truck B.....            | 187.99     |
| Truck C.....            | 41.44      |
| Total.....              | 2,909.69   |
| Balance .....           | 90.31      |

With the two new buildings now in course of construction we have 12 engine houses and 4 truck houses, and they are in a fair state of repair, except houses Nos. 2 and 4. The wear on these houses is more than on any other class of buildings. To keep them up I must urge that the appropriation be made \$4,000, as I desire to expend at least \$1,500 in fitting up the present No. 2 engine house for use of a chemical engine company.

## REPAIRS TO MARKET, GEORGETOWN.

| One clerk (additional) .....   | \$1, 200       |
| Messenger .....  | 480            |
| Contingent expenses, books, blanks, stationery, and livery of horse..... | 600            |
| <b>Total .....</b>   | <b>15, 580</b> |

## Care of the District office building:

|   |               |
|---|---------------|
| One steam engineer (\$200 additional) .....               | 1, 100        |
| One fireman .....   | 480           |
| Janitor.....  | 700           |
| Two elevator operators (\$360 each) .....                 | 720           |
| Six laborers, at \$1.50 per day; in all, 1,878 days ..... | 2, 817        |
| <b>Total for District office building.....</b>            | <b>5, 817</b> |

## Repairs to buildings:

|   |                |
|---|----------------|
| Public-school buildings .....             | 33, 000        |
| Police stations.....                      | 3, 000         |
| Fire-engine houses .....                  | 4, 000         |
| Market houses.....                        | 2, 000         |
| Police-court building .....               | 700            |
| Interior of District office building..... | 1, 000         |
| <b>Total for buildings.....</b>           | <b>43, 700</b> |

In submitting the above estimates I desire to express the hope that the increased assistance for general inspection therein provided for will not be denied. As before stated, its necessity is and has been urgent, and will become more and more so in the future, and the consequence of a failure on the part of Congress to give this recommendation favorable consideration should not be visited on this office. Manifestly, the building inspector has but little opportunity to give this branch of the work his personal attention; office work and the care and supervision of so many municipal buildings engross his whole time, and entire reliance for the proper inspection of general construction must be placed in his assistants.

The estimate for increasing the salaries of the assistant inspectors is one I hope you will find consistent to approve. Their fidelity and willingness, the character of their work, and the multiplicity of their duties merit a compensation in excess of that which they now receive.

Your attention is especially called to my request for an additional clerk at \$1,200, and I respectfully ask your approval for this assistance. For the proper administration of this department since my incumbency I have been obliged to have additional clerical assistance, the compensation of which I have paid for.

The building now occupied for District offices involves the performance of more labor on the part of the engineer than was exacted of him in the old building, by reason of an elevator plant in addition to the heating apparatus, and for that reason I have asked for an increase of \$200 to his salary.

In conclusion, I beg to extend to you the acknowledgment of my obligations for the uniform kindness and courtesy which you have always manifested toward me.

Very respectfully,

JNO. B. BRADY,  
*Inspector of Buildings.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA,

## REPORT OF THE CORONER.

WASHINGTON, D. C., *October 14, 1895.*

GENTLEMEN: I have the honor to hand you herewith a tabulated statement of the deaths certified to by the coroner during the fiscal year ended June 30, 1895. Later on I will submit for your consideration a few suggestions which, in my opinion, will facilitate the working of the coroner's office.

Very respectfully,

C. M. HAMMETT, M. D.,  
*Coroner.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

REPORT OF MARKET MASTERS.

EASTERN MARKET,  
*Washington, D. C., July 29, 1895.*

GENTLEMEN: I have the honor to herewith submit my annual report, embracing the receipts of the Eastern Market for the fiscal year ended June 30, 1895, and showing the changes made within the past year, together with recommendations for the forthcoming or present year.

During the year there was received from the dealers for rent, \$3,435.50; for the same period in 1894, \$3,505, showing a decrease in income of \$69.50. The decrease in receipts is due to the fact that during the year the rents on butcher stalls were reduced from \$4.50 to \$4, and one baker stall was reduced from \$4 to \$3, placing it upon the same grade as a huckster.

Per contra one stall that was used as a huckster stall was changed to a miscellaneous stall and another to a bacon stall, raising the two for the year to \$24. The present disposition of stalls is as follows:

|                             | Number. | Price. | Months. | Amount.  |
|-----------------------------|---------|--------|---------|----------|
| Fish.....                   | 4       | \$3.00 | 12      | \$144.00 |
| Miscellaneous.....          | 4       | 4.00   | 12      | 192.00   |
| Do.....                     | 1       | 4.00   | 6       | 24.00    |
| Huckster.....               | 39      | 3.00   | 12      | 1,404.00 |
| Do.....                     | 1       | 3.00   | 6       | 18.00    |
| Butcher.....                | 18      | 4.00   | 12      | 864.00   |
| Bacon.....                  | 7       | 4.00   | 12      | 336.00   |
| Butter.....                 | 7       | 4.00   | 12      | 336.00   |
| Café.....                   | 1       | 6.00   | 12      | 72.00    |
| Making a total of.....      |         |        |         | 3,390.00 |
| Received for extra gas..... |         |        |         | 45.50    |
| Total.....                  |         |        |         | 3,435.50 |

For the next year I would make the following recommendations:

|                              |            |
|------------------------------|------------|
| Salary of market master..... | \$1,200.00 |
| Salary of laborer.....       | 125.00     |
| Coal.....                    | 16.50      |
| Brooms.....                  | 10.56      |
| Tapers.....                  | 2.00       |
| Stationery.....              | 3.00       |
| Street brooms (rattan).....  | 2.50       |
| Total.....                   | 1,359.56   |

A word or two as to much needed improvements in and about the building:

Ventilators in the roof.

Concreting the floor.

To have sheds built at the back of the market that the horses may be taken off Seventh street.

The woodwork should be painted.

Slat doors in the six main entrances for air.

The brick wall on the exterior should be pointed up.

The interior of the roof should be painted.

These constitute all the necessary improvements.

I would also suggest that the salary of the laborer be raised to \$300 per year. If this be done better service can be obtained than where help must be gotten for \$10 per month. At the time when this amount was allotted the market was open every other day, while at present it is open every day. Again, it has ever been the custom for the market master to pay \$15 out of his monthly salary for the support of the laborer. The two rooms above the office were supposed to be the abode of the laborer, but are insufficient for such a purpose. After years of vacancy I rented the rooms for a café, which now brings an income of \$6 per month.

I hope that the foregoing recommendations will not be considered by you as extravagant, considering their permanency and the fact that such will not need to be repeated for years.

This is made in response to your favor of June 5, 1895, and is very respectfully submitted.

B. F. GRAHAM, *Market Master*.

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

WASHINGTON, D. C., *July 24, 1895.*

GENTLEMEN: I have the honor to transmit to you a statement of the operations of the Georgetown market for the fiscal year ended June 30, 1895.

During the year the market has been rebuilt and everything is in excellent order.

Number of stands in the market, 37, as follows: 18 butcher stands, 18 produce stands, 1 butter stand. Number of stands rented, 20; number of stands vacant, 17. Monthly rent for each stand, \$5. There are also 4 fish stands that are yearly sold to the highest bidder.

In regard to the business done in this market, it is very limited in consequence of the number of provision stores and a large company market located in the center of the town.

#### RECEIPTS.

|                           |              |                     |
|---------------------------|--------------|---------------------|
| Rent of stands.....       | \$1, 145. 26 |                     |
| Sale of fish stands ..... | 50. 00       |                     |
|                           |              | <u>\$1, 195. 26</u> |

#### EXPENSES.

|                             |         |                   |
|-----------------------------|---------|-------------------|
| Market master's salary..... | 900. 00 |                   |
| Laborer at market .....     | 100. 00 |                   |
| Amount of gas bills.....    | 90. 32  |                   |
|                             |         | <u>1, 090. 32</u> |
| Balance .....               |         | 104. 94           |

Very respectfully,

W. H. WILLIAMS, *Market Master*.

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

WASHINGTON, D. C., *July 27, 1895.*

GENTLEMEN: The following shows receipts of the Western Market for the fiscal year ended June 30, 1895:

|                      |           |                     |            |
|----------------------|-----------|---------------------|------------|
| July, 1894.....      | \$421. 10 | February, 1895..... | \$410. 00  |
| August, 1894.....    | 414. 00   | March, 1895.....    | 412. 70    |
| September, 1894..... | 421. 00   | April, 1895.....    | 405. 50    |
| October, 1894.....   | 427. 40   | May, 1895.....      | 418. 00    |
| November, 1894.....  | 424. 66   | June, 1895.....     | 420. 25    |
| December, 1894.....  | 439. 00   |                     |            |
| January, 1895.....   | 434. 00   | Total .....         | 5, 047. 61 |

The market is in a deplorable condition, but if the amount appropriated, together with that allowed from the contingent fund, be used for repairs, while not sufficient to place it in proper condition this amount would be a great improvement. If in addition to these changes the fish stands be removed to the courtyard, where they properly belong, I believe the receipts of the market will be increased at least \$400 per year. But in order to put this market in thorough condition it will require at least \$1,500 in addition to that already appropriated.

Respectfully submitted.

J. ELDRIDGE BURNS,  
*Market Master, Western Market.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

## REPORT OF INSPECTORS AND MEASURERS OF FIREWOOD.

WASHINGTON, D. C., *July 25, 1895.*

GENTLEMEN: Inclosed please find statements of wood inspected and measured by me in Anacostia district for the year ended June 30, 1895.

In reply to circular of June 5 I would state that the prospects for the coming year, from all information I can gain, tend to show an improvement.

Very respectfully,

A. W. EATON,  
*Inspector and Measurer of Wood,  
Anacostia District, D. of C.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

Very respectfully,

DANIEL M. GOODACRE,  
*Inspector and Measurer.*

Subscribed and sworn to before me this 1st day of July, 1895.

[SEAL.]

ABNER Y. LAKEMAN,  
*Notary Public.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

## REPORT OF INSPECTORS OF FLOUR.

WASHINGTON, D. C., *August 31, 1895.*

GENTLEMEN: I herewith hand you my report of the receipts and expenditures of the office of flour inspector of the District for the months of June and July, 1895; also amount of flour inspected for fiscal year ended June 30, 1895:

| Month.    | Fees.     | Expenses. |
|-----------|-----------|-----------|
| June..... | \$107. 45 | \$58. 60  |
| July..... | 118. 00   | 49. 80    |

Total amount of flour inspected for the fiscal year ended June 30, 1895, 63,543 barrels.

In connection with this I beg to submit the following statement of facts, and would most respectfully beg your careful consideration of the same. You will readily see by the accompanying report that the office I now hold is barely self-sustaining, owing to the fact that the law in regard to the inspection of flour is being daily evaded by those receiving the same, and I appeal to your honorable body in hopes that you can, by issuing orders covering the same, cause the inspection of all flour under the original intent of the inspector's laws.

As I understand it, the original law intended that all flour coming into the District, passing through the hands of bakers and merchants, should be inspected, regardless of the shape in which it was received. At the time this law was passed the shipment of flour in jute sacks was practically unheard of, and the law was made to read "Flour in barrels and half barrels."

In late years the mills throughout the country have found that they can ship in sacks containing 140 pounds cheaper than in wooden barrels, and they offer inducement to the buyers of 20 to 25 cents per barrel to purchase it in this way.

Thus you see there are thousands of barrels received yearly by the bakers and others that are not inspected, they, the receivers, taking advantage of this wording of the law, which was clearly intended to cover any and all shipments, whether in "barrels or half barrels," coming into the District.

The expenses of my office are such that they can not be curtailed or regulated according to the amount of business done, and being fully equipped to do the business of inspecting flour thoroughly and fully I should be allowed the inspection of everything in the shape of flour that the law requires.

I have endeavored, in as few words as possible, to state the case to you clearly and fully, and I feel confident that upon giving this matter

your careful and kind consideration you will issue orders covering the inspection of flour, so as to bring all of the flour received under the original intent of the law.

I shall be glad at any time, if allowed to do so, to appear before your honorable body in person and give any further information on the subject you may require. Trusting that this statement may bring about an investigation that will prove that the same is correct, and that you can put the office of flour inspector on a more satisfactory basis.

I have the honor to remain, your most obedient servant,

JAMES H. WELCH,  
*Flour Inspector, District of Columbia.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

---

GEORGETOWN, D. C., *July 3, 1895.*

GENTLEMEN: I have the honor to report having inspected during the year ended June 30, 1895, 43,994 barrels family and 1,103 barrels "Extra" flour, making a total of 45,097 barrels.

I am, with much respect,

F. D. SHOEMAKER,  
*Inspector of Flour.*

Subscribed and sworn to before me this 5th day of July, 1895.

[SEAL.]

CHARLES D. SHOEMAKER,  
*Notary Public.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

**REPORT OF COMMISSION OF FLOUR INSPECTION.**

GEORGETOWN, D. C., *August 1, 1895.*

GENTLEMEN: In answer to a request for a detailed statement of our office for the year ended June 30, 1895, we would report that we have not been called upon to perform any duties and have therefore received no fees.

Yours, truly,

G. W. CISSEL.

W. H. GASKINS.

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

---

**REPORT OF SEALER OF WEIGHTS AND MEASURES.**

WASHINGTON, D. C., *July 29, 1895.*

GENTLEMAN: I have the honor to report that the new law passed by Congress on March 2, 1895, was put in full operation on March 6, 1895, and should it receive the support of the courts of the District will in my opinion accomplish the desired object. The law is, however, not as clear and decided as it might be, and should be amended. We find many scales incorrect, and it is impossible to say whether they are so by accident or design. It is only by constant supervision that the public can be protected.

For the quarter ended June 30 of the present year there was collected in fees the sum of \$1,158.10, and the total expenses of the office were \$1,117.96, leaving a balance of collections over expenditures of \$40.14. The collections for the present year under the new law exceed the collections for 1894, made under the old system, by the amount of \$79. The law seems to be accepted favorably by those interested, but it should be made so clear as to leave no doubt in the minds of the most obtuse.

Very respectfully, your obedient servant,

FRANK A. BOND,

*Sealer of Weights and Measures.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

**REPORT OF INSPECTORS AND MEASURERS OF LUMBER.**

WASHINGTON, D. C., *July 6, 1895.*

GENTLEMEN: I have the honor to submit to you my report as lumber inspector for the fiscal year ended June 30, 1895. I have measured and inspected 2,560,816 feet of merchantable lumber and 110,318 feet of condemned lumber; total, 2,671,134 feet.

Respectfully submitted.

ROBT. T. BALLARD, *Inspector.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

---

GEORGETOWN, D. C., *July 1, 1895.*

GENTLEMEN: I have the honor to report having inspected and measured for the year ended June 30, 1895:

|   |               |
|---|---------------|
| 2,608,251 feet of lumber, at 30 cents per M feet..... | \$782. 47     |
| Expenses .....  | 111. 00       |
| Balance .....   | <hr/> 671. 47 |

EDWARD J. DAW, *Inspector.*

Sworn and subscribed to before me this 1st day of July, 1895.

[SEAL.]

ABNER Y. LAKENAN,  
*Notary Public.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

---

WASHINGTON, D. C., *July 1, 1895.*

GENTLEMEN: I have the honor to report that I have measured and inspected 2,265,267 feet of lumber during the fiscal year ended June 30, 1895.

Respectfully submitted.

E. A. CHAMPLIN, *Inspector.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

---

WASHINGTON, D. C., *July 16, 1895.*

GENTLEMEN: I most respectfully submit the following as the amount of lumber measured by me for the year ended June 30, 1895: Merchantable lumber, 1,956,740 feet; condemned lumber, 79,175 feet.

GEO. Z. COLISON, *Inspector.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

**REPORT OF THE HARBOR MASTER.**

OFFICE OF THE HARBOR MASTER,  
Washington, D. C., July 1, 1895.

GENTLEMEN: The following report of the operations of this office and its expenditures for the fiscal year ended June 30, 1895, together with the estimate for the fiscal year ending June 30, 1897, is respectfully submitted:

|   |            |
|---|------------|
| One engineer .....  | \$780. 00  |
| One watchman .....  | 276. 00    |
| One deck hand .....   | 324. 00    |
| Repairs to boat .....   | 154. 23    |
| Repairs to wharf and office .....   | 289. 24    |
| Insurance on boat and office .....  | 39. 75     |
| Fuel .....  | 197. 75    |
| Miscellaneous, paints, oils, ice, lumber, hardware, and other items ..... | 539. 03    |
| Total .....   | 2, 600. 00 |

*Estimates of appropriation for the fiscal year ending June 30, 1896.*

|   |            |
|---|------------|
| One engineer .....  | \$900. 00  |
| One watchman .....  | 480. 00    |
| One deck hand .....   | 480. 00    |
| New sponsons for boat, new deck, and to raise house 12 inches .....   | 900. 00    |
| For miscellaneous and contingent expenses, including boats, hull, engine and boiler, repairs to wharf, fuel, insurance, waste, paints, oils, lamps, and other necessary items ..... | 1, 220. 00 |
| Total .....   | 3, 980. 00 |

The most important piece of work done under the supervision of the harbor master during the fiscal year 1895 was breaking the ice in the Potomac River during the severe cold spell of February. Ice formed in the river to a thickness of from 10 to 12 inches, completely closing the river to navigation and threatening, in case of sudden thaw, to form gorges and flood the low-lying parts of the city. Apprehension of danger from this source led the Commissioners of the District to ask Congress for a special appropriation of \$5,000, to be made immediately available, for the purpose of clearing the river of ice. This sum was appropriated by joint resolution of February, 1895.

As no large tugs for this work were in the Washington Harbor, Baltimore tugs *Hercules* and *Vulcan* were hired, and three small tugs from Washington Harbor were also hired—the *A. P. Gorman*, *D. M. Key*, and *Wm. H. Mohler*.

Through the kindness of the Secretary of War the U. S. tug *Triton* was tendered to the Commissioners to assist in breaking the ice. She was fitted with an ice beak by the District, at a cost of \$531.89.

February 16 the Commissioners ordered the harbor master to employ two tug boats to break ice from P. Mann's wharf, at the foot of South

Capitol street, to P. Mann's factory. The tugs *Wm. H. Mohler* and *D. M. Key* were employed to go to work Sunday morning, February 17, at 8 a. m. Captain Robinson, of the tug *Wm. H. Mohler*, informed the harbor master that he could not get his ice beak ready until noon Sunday. However, the *Wm. H. Mohler* did not go to work until the morning of the 18th of February. The tug *D. M. Key* left Stephenson's wharf Sunday morning, 17th, at 9.45 a. m., and made as far as the harbor office at 10.25 a. m.; then to the inland wharf at 12.30 p. m. Commissioner Ross called at the harbor master's office at 12 o'clock m., and went with the harbor master to the end of the Arsenal grounds to look after the tug *Wm. H. Mohler* and find out what time she would be ready for service. He also observed the tug *D. M. Key* trying to break ice. The *D. M. Key* made about midway of the Arsenal grounds at 12.30 p. m. The tug *Triton* started Sunday morning (17th) and made cut through the ice from navy yard to opposite Alexandria; found ice very heavy. The *D. M. Key* then reached the channel. The *Triton* had cut and made her way to P. Mann's factory; broke the ice around the wharf, and then back to the wharf at the foot of South Capitol street. Officer S. D. Lewis was in charge of the *D. M. Key*.

Monday morning, February 18, the tugs *Wm. H. Mohler* and *D. M. Key* started at 9 a. m. breaking ice from P. Mann's wharf, at the foot of South Capitol street, to P. Mann's factory, in order to remove the great number of dead horses and other dead animals that had accumulated during the hard freeze. They worked until 6 o'clock p. m. The harbor master then informed the captains of the tugs that he would have to lay them off, as they could make very little progress without the assistance of the large tugs that had been engaged from Baltimore.

February 20 S. D. Lewis was sent to Baltimore to accompany the tug *Vulcan* to Washington. On the 22d, at 5 p. m., the tug *Vulcan* arrived. To make the trip from Baltimore to Washington required two days, allowing ten hours to the day. February 22 *Hercules* left Baltimore at 5 p. m., in charge of J. J. Perry, and arrived in Washington on 23d, at 1.30 p. m. February 23 harbor master started with the tugs *Vulcan*, *Wm. H. Mohler*, and *A. P. Gorman* at 1 o'clock p. m.; went to Fort Washington and returned; worked at the forks of the channel; found ice very heavy; returned to wharves at 6 p. m., each boat making one-half day.

February 24 the harbor master started at 8 a. m. with tug *Triton*, R. Dean with tug *Wm. H. Mohler*, S. D. Lewis with tug *Vulcan*, J. J. Perry with tug *Hercules*, R. L. Ferguson with tug *A. P. Gorman*; went to Liverpool Point; ice very heavy from River View to the forks of the Washington channel. At 3 p. m. the harbor master boarded the tug *Hercules*, and with the other three tugs proceeded to Georgetown, breaking 10 inches of ice through the channel as far as the Aqueduct Bridge, and returned to the wharves at 6 p. m.

February 25 *Hercules*, *Vulcan*, and *A. P. Gorman* left the wharves at 8 a. m., breaking ice in Georgetown channel; at 3.30 p. m. started the tugs *Vulcan*, *Wm. H. Mohler*, and *A. P. Gorman* above the Long Bridge; found ice very heavy; kept the *Hercules* at work, going through the draws of the Long Bridge to keep the ice from gorging there, as this is the place where the ice jams and gorges and causes the river to swell.

February 26 all the tugs were sent to work above the Long Bridge, and with the assistance of a strong northwest wind succeeded in clearing all the ice from the Aqueduct Bridge to the Long Bridge; at 2.30 p. m. sent three boats above the Aqueduct Bridge and broke about 1 mile up; returned to wharves at 6 p. m.

February 27 the tugs *Wm. H. Mohler* and *A. P. Gorman* went to work above the Aqueduct Bridge, breaking the ice as far as Dixies Landing, about 3 miles above the Aqueduct Bridge. The tugs then went to the Long Bridge, as the wind had carried the broken-up ice down the river and lodged it against the Long Bridge. The tugs succeeded in clearing it away, the tug *Hercules* and tug *Vulcan* breaking gorges of ice from Indian Head to Fort Washington; returned to the wharves 6 p. m.

February 28, at 6 a. m., left the wharves with tugs *Hercules* and *Vulcan*; made cut through the ice to the Long Bridge; then went down the river as far as Indian Head in lead of the side-wheel steamers plying on our river to break the ice and gorges that had formed and break the ice about the wharves so that steamers could land.

March 1 the tugs *Hercules* and *Vulcan* went to Georgetown and found some drift ice had lodged against the Long Bridge and about the draw. The tug *Vulcan* worked this out by going backward and forward through the draw. The tug *Hercules* worked in the river as far down as Fort Washington. Returned to wharves at 5.30 p. m.

March 2, the tug *Hercules* and tug *Vulcan*, on the river making tour of inspection, found the river very clear of ice, and, at 1 o'clock p. m., the harbor master notified the captains of the tugs that their services were no longer required.

In my previous report I mentioned the necessity of having a harbor boat. I have the honor to renew my recommendation that a boat be purchased, and am of the opinion that \$50,000 invested in an iron boat with fire pumps, electric lights, etc., would be a wise expenditure and that it would afford increased protection from fire and could also assist in breaking ice. The boat should be the strongest and fastest on the river. During the past six years there have been some very expensive fires in the harbor, with damages footing up \$250,000. Such calamities may occur at any time and under circumstances which greatly handicap the fire department, and in such cases a boat of the kind asked for would be able to render valuable service to the river front and vessels in the harbor.

The following is an estimate of the cost of breaking the ice in the Potomac:

|   |          |
|---|----------|
| Building ice beak for the U. S. tug <i>Triton</i> .....   | \$531.89 |
| The tugs <i>D. M. Key</i> and <i>A. P. Gorman</i> , 6½ days' work .....   | 305.00   |
| The tug <i>Wm. H. Mohler</i> , 5½ days' work .....  | 412.50   |
| Traveling expenses for harbor master and two men to Baltimore and return .....                                      | 18.30    |
| R. L. Ferguson, as inspector of the tug <i>A. P. Gorman</i> , 4 days' at \$1.50 per day .....                       | 6.00     |
| The American Towing Company, for use of the tugs <i>Hercules</i> , 8½ days' work; the <i>Vulcan</i> , 9½ days ..... | 2,209.00 |
| Total .....   | 3,482.69 |
| Unexpended balance .....  | 1,517.31 |

Very respectfully,

J. R. SUTTON,  
Harbor Master, District of Columbia.

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

## REPORT OF STREET AND ALLEY CLEANING DEPARTMENT.

WASHINGTON, D. C., September —, 1895.

GENTLEMEN: I have the honor to herewith submit annual report for fiscal year ended June 30, 1895, showing the work of same and the expense incurred; also estimates for operating expenses of fiscal year ending June 30, 1897, together with such recommendations and suggestions as I believe will be for the best interest of the public and improvement of the service.

## PAVED STREETS AND AVENUES.

TABLE 1.—Area cleaned, cubic yards of refuse removed, with cost of same for fiscal year 1895.

[Work is done by contract at 24½ cents per 1,000 square yards. Improved streets and avenues 24½ cents per 1,000 square yards.]

\* In May and June newly paved streets were swept. Area was not furnished until June 30th, carried as extra on table. As all the work of this department during the fiscal year was done under contract, it was not a difficult matter to apportion the amount appropriated—viz, \$137,500—to the various branches of the service, and for pay of all employees. This being done, the apparent amount that would be available for sprinkling, cleaning, etc., the paved streets and avenues of the city was about \$80,000. Said amount would doubtless have all been expended as proposed had not the severity of the winter prevented any work of this kind for nearly the entire months of January and February, 1895. The amount of sweeping, etc., is shown by Table 1 to have been 289,553,181 square yards, costing \$70,216.25 at contract price of 24½ cents per 1,000 square yards. During the fiscal year 1894 there was swept and cleaned 248,094,425 square yards, at a cost of \$60,162.82. Increase of work for fiscal year 1895 was 41,458,756 square yards, and represents the difference of expenditures on this class of work between 1894 and 1895. The increase of sweeping for 1895 over 1894 is, of course, due to the fact of our appropriation being greater, allowing increased service on a number of streets and avenues and the sweeping of newly paved ones. The snow and ice work, together with the extra work done upon the paved streets, costing, as shown by Tables 6 and 7, \$9,886.94, makes a trifle in excess of the difference between the \$80,000 set apart as stated for street-cleaning purposes and the amount of \$70,216.25 as actually expended.

The schedules for present fiscal year have been enlarged by still further increasing the service on many of the streets and avenues, and now average about 1,500,000 square yards each, a total of 8,943,753 square yards per week, an increase over the schedule of 1894 of about 1,571,310 square yards per week. If sweeping can be done for 246 days during present year, or during 41 weeks, the area swept should be about 366,693,135 square yards (or an increase of 77,139,954 square yards over past year, 1895), costing, at contract price, \$88,098. Cut-offs, however, for obstructions, streets torn up, barricades, etc., will naturally reduce that to about \$86,000, the amount calculated as available for sweeping during year 1896. There are four inspectors in charge of this work. Hours of duty, from 8 p. m. to 8 a. m., also reporting daily at the superintendent's office at 2 p. m. for instructions. They are paid by the District, and are allowed additional compensation for use of horse and buggy furnished by themselves.

PENNSYLVANIA AVENUE AND OTHER STREETS.

TABLE 2.—Cost of hand cleaning Pennsylvania avenue, Executive avenue, New York avenue from Fourteenth street west to Fifteenth street west, Fifteenth street west from Pennsylvania avenue to New York avenue, and First street west from Garfield Circle to the Peace Monument.

[Work is done by contract. Cost of inspection is not included.]

|                                  |                |              |
|----------------------------------|----------------|--------------|
| Total area cleaned.....          | square yards.. | 46, 712, 884 |

| Total cost.....                  |                | \$5, 234. 17 |

This branch of the street-cleaning service is, I presume, more noticed and regarded more critically by both strangers and residents than any other. While a portion of other streets are cleaned, the principal feature of the work is the avenue above named, the cleaning extending from the Peace Monument to Rock Creek Bridge. In addition to the

hand cleaning, that portion from the Peace Monument to Seventeenth street west is now machine swept three times per week. If it could be done at present without curtailing the work elsewhere the entire avenue from the monument to the bridge named should be machine swept daily. The work of hand cleaning is done by contract.

Table 2 shows force employed, cost of same, etc., during the fiscal year. Contract for this work was re-let for fiscal year 1896. Proposals fixed the number of laborers at 16, and horses and carts at 4. Accepted bid was \$21.50 per day of eight hours, \$2.50 per day over the past year, but really cheaper when it is considered that there is an additional force of 4 laborers and 1 horse and cart furnished.

That the increased force has made a great improvement in the work is very apparent.

## IMPROVED ALLEYS.

TABLE 3.—*Cost of cleaning the improved alleys of the city; area cleaned in square yards, and amount of refuse removed in cubic yards.*

[Work done by contractor, at 42.4 cents per 1,000 square yards.]

Total, 602,856 square yards.

\* Bituminous brick.

This branch of the service is one of the important ones, as the public health depends very largely upon the manner in which such places are kept. The almost total absence of complaint shows that cleanliness has been the rule. The work is done under contract let annually. Price for 1895 was, as stated, 42.4 cents per 1,000 square yards. The entire city is divided into eighteen routes, three of which are cleaned each day. Average area of each route was for 1895 about 33,653 square yards, which would show a total area of improved alley surface of about 605,754 square yards. Total area cleaned in 1895 was 24,533,315 square yards, costing \$10,571.64. Total cleaned during 1894 was 25,012,559 square yards, costing \$13,381.71. Difference in favor of 1894, 479,244 square yards. This excess is explained by the fact that no alley cleaning was done during entire month of February, 1895, owing to snow and ice. Contract for 1896 was let at same figures as for 1895; force the same, viz, 18 men, 9 horses and carts, and 3 sprinklers. There is now scheduled for cleaning daily three routes with area of about 34,682 square yards each, which will be increased to some extent before close of fiscal year by the paving of other alleys. There are on this work 3 inspectors paid by the District, and allowance is made to them for horse and buggy furnished by themselves. They are on duty eight hours per day, the hours to commence and close being fixed by contractor, as he has from sunrise to sunset to do the work.

## UNIMPROVED STREETS.

TABLE 4.—*Work done on this class of streets by the four labor gangs, with cost of same, less cost of inspection.*

[The work is done by contract combined with work on unimproved alleys.]

| Total .....     | 242          | .....         | 11,393.36       | 907.89              | 10,485.47  | 14,658,089        | 13,798           |

This branch of the service deals with not only the unimproved streets of the city, but a large area of streets and roads outside of the boundary, lately assigned to this department and heretofore in that of "county roads." There is also quite a large area of cobble and rubble paved streets cleaned under this head, they being too rough to sweep by machine with good results. The contract to furnish the labor and carts and tools to do this work was let in connection with unimproved alley work, contract being to furnish 40 laborers, 10 horses and carts, with drivers, and tools for the sum of \$58.85 per day of eight hours, with provision to furnish extra laborers, horses, and carts, at \$1.10 and \$1.65, respectively, whenever ordered by the Commissioners of the District of Columbia. An equal division of said force into 5 gangs gives 8 laborers and 2 horses and carts to each gang. Of these, 4 gangs were

assigned to unimproved street work. The cost, therefore, of the street gangs, collectively, would be four-fifths of the contract price, or \$47.08 per day; balance, or \$11.77, being applied to unimproved alley work, which makes total \$58.85, as per contract. The work on unimproved streets is not continuous throughout the year, usually commencing about March 15 and being discontinued about November 15, though occasionally it is continued later, owing to the weather. Like the unimproved alley gang, the street gangs deal with the bye and out-of-the-way places, clearing up roadways, keeping the drainage of the gutters clear, freeing them of weeds and grass, and also attends to complaints, if there are any that need attention. The foremen in charge are employed and paid by the District, one in charge of each gang. The contract for fiscal year 1896 was let at a trifle higher rate than that for 1895, being \$59.50, the force to be furnished being the same.

## UNIMPROVED ALLEYS.

TABLE 5.—*Work of the force employed and cost of same, less cost of inspection.*

\* January and February, no work on account of snow and ice. † January, snow and ice work.

This work, while not as prominent as some other branches of this service, is a most difficult and trying one to operate, and probably renders more valuable service to the public than almost any other. There is but one gang of 8 men and 2 horses and carts employed on this work. It is into this class of alleys that much of the garbage

and other filth of the adjacent premises finds its way in defiance of police and sanitary regulations, where it would rot and fester, only to breed disease and death, were it not for the labors of this gang. In attending to this work they not only have to contend with the vile odors from the filth removed, but in many instances with the bad tempers of the occupants of the premises adjoining. The work is done by contract at a cost of \$11.77 per day of eight hours (under the same contract as that of unimproved streets, as explained in remarks under Table 4). The inspector and his assistant are paid by the District. These alleys number 387 and embrace an area of about 268,000 square yards. They are cleaned once in about 8 days. They are not decreasing, as the opening up of new ones about keeps pace with those being paved.

#### REMOVING SNOW AND ICE.

Under this head is included all work done of this character and paid for out of appropriation for sprinkling, cleaning, etc., streets and alleys, but which would have otherwise gone for sweeping, cleaning, etc., streets and avenues, as explained under head of paved streets and avenues.

TABLE 6.

| Date.                  | To whom paid.   | Amount.    |
|------------------------|---|------------|
| January, 1895.....     | Ellis & Daggett.....  | \$978. 97  |
| Do .....               | Horn & Horn.....  | 202. 43    |
| February, 1895.....    | do .....  | 459. 48    |
| Do .....               | Ellis & Daggett.....  | 6, 998. 39 |
| March, 1895.....       | do .....  | 176. 41    |
| Do .....               | Horn & Horn.....  | 92. 95     |
| February 14, 1895..... | 300 shovels purchased by order of Commissioners of District of Columbia for use in snow and ice work. | 179. 37    |
| Total .....            | .....   | 9, 088. 00 |

This class of work is an uncertain quantity, there being no basis for calculation as to amount and cost. During January, February, and March of 1895 it cost this service almost as much for this work as it had for the previous five years combined, the amount expended being \$9,088. In addition to this the sum of \$5,000, appropriated by the organized board of charities of this city, was expended under the direction of this department, making a total of \$14,088 paid out for snow and ice work. Even this sum enabled the cleaning of but few streets, those being the business ones. Had the entire sum been taken from the funds of this service it would have crippled it seriously, causing the curtailment of regular sweeping to such an extent as to give good cause for complaint by citizens, though no fault could justly be charged to the department. It is proper to state that all the funds coming directly from this service, viz, \$9,088, were taken from the \$80,000 set apart for sweeping paved streets and avenues, there being no separate and distinct appropriation for snow and ice work. All work of this nature is paid for out of estimate made for sweeping paved streets. This should not be the case, as in estimating for expenses of coming year the calculation is never made on a basis of 313 working days, but on the average number of days on which sweeping has been done during the preceding five years; in fact, all estimates of cost are made upon a like calculation.

The only other factor entering into the estimate, particularly as to sweeping paved streets, is the increase of service on some and the taking up of new streets; hence there is but small margin to meet any expense outside of the estimates made for the regular and legitimate work of the department. I therefore respectfully suggest to the honorable Commissioners the propriety of asking for a separate appropriation for snow and ice work, to be used for that purpose only, or so much thereof as may be necessary. I may here with propriety call attention to the act approved March 2, 1895, relative to the cleaning of the sidewalks, cross walks, and gutters of the cities of Washington and Georgetown from snow and ice, also sand, dirt, etc., washed on to sidewalks. First, I would suggest that in line 14, section 1 (see laws affecting the District of Columbia, third session, Fifty-third Congress), after the word "sidewalk," that the word "roadway" be inserted, so as to read "all sand, gravel, or other refuse matter that may fall or be washed upon any paved sidewalk, roadway, or alley inside," etc.

If the Commissioners of the District of Columbia are required to keep all cross walks of the city free at all times from snow and ice for a width "of at least 10 feet," and to "open up all the gutters 1 foot wide after every fall of snow, and to keep them open as further provided by said act, it appears to me that an appropriation to meet the expense of such work should have accompanied the act, but this very necessary provision was omitted. To do the work required of the Commissioners by the act of March 2, 1895, would involve a very large sum should the winter be a very severe one, much larger than at first would seem apparent. The cost, however, might be materially reduced by a regulation requiring, as in the case of sidewalks, the owner, occupant, or tenant of any property to open up the gutter 1 foot wide after every fall of snow, and to keep them open on their respective fronts. It would add but little, if any, to the expense when cleaning off their sidewalks to do so. I enter into this subject for the reason that in case the act referred to has to be carried into effect it is fair to presume that this service would be called upon to do the work, but without funds provided especially therefor I do not see how it could be done.

## EXTRA WORK.

The following table shows cost of all extra work done on streets that involved more labor than the specified amount stipulated to be furnished by contract, but at contract prices; also such other labor for work not specifically provided for by contract but authorized by the Commissioners of the District of Columbia, at prices fixed by them:

TABLE 7.

| Date.               | To whom paid.        | Amount.  |
|---------------------|----------------------|----------|
| October, 1894.....  | Horn & Horn.....     | \$14. 85 |
| November, 1894..... | do.....              | 34. 65   |
| March, 1895.....    | Ellis & Daggett..... | 601. 19  |
| Do.....             | Horn & Horn.....     | 33. 00   |
| April, 1895.....    | do.....              | 8. 25    |
| May, 1895.....      | do.....              | 24. 20   |
| June, 1895.....     | do.....              | 52. 80   |
| Do.....             | Ellis & Daggett..... | 30. 00   |
| Total.....          | .....                | 798. 94  |

This class of work was done only upon order of Commissioners when it was found necessary in the interest of the public to employ more labor than was specifically stated by contract or that came within the scope of contract for cleaning, but such extra labor was paid at contract rates, as provided by such contract if extra labor should be required. The extra work performed by Ellis & Daggett was paid for at rates fixed by the Commissioners of the District of Columbia, said rate being market rate of labor, with 10 per cent added, as in the case of snow and ice work. The extra labor supplied by Horn & Horn was used in strengthening the gangs on street and alley work, with either men or horses and carts, or both if necessary, usually occurring in spring and fall. The unusually heavy fall of snow and length of time it remained on many of the streets left behind it a large deposit of refuse matter that could only be cleared away by hand labor. This was supplied by Ellis & Daggett, contractors for street cleaning, at rates established (as heretofore stated) by the Commissioners of the District of Columbia, the total cost being \$798.84, which, together with the snow and ice work paid for from funds of this service, make in all \$9,886.84, which sum, added to \$70,216.25 expended for paved-street cleaning, as shown by Table 1, gives \$80,193.09, about the sum set apart originally for cleaning the paved streets and avenues.

#### CONTINGENT EXPENSES AND OFFICE RENT.

TABLE 8.—*Purchase of all tools, printing, street-car tickets, office furniture, horse, harness, livery of superintendent's horse, all repairs, etc., and office rent.*

|   |          |
|---|----------|
| Contingent expenses July 1, 1894, to June 30, 1895..... | \$952.16 |
| Office rent July 1, 1894, to June 30, 1895.....         | 420.00   |
| Total .....   | 1,372.16 |

The above table shows the amount expended under head of contingent; also the separate item paid for office rent. One item, however, that may properly belong to contingent expenses, but which I have charged up to snow and ice work, is the amount paid for shovels needed (see Table 6) for use of laborers employed on snow and ice work under the auspices of the Board of Charities, the same being purchased by order of the Commissioners of the District of Columbia to meet the emergency. Said tools are in the storehouse of this service and can be had for future use should occasion require.

#### COMPLAINTS.

TABLE 9.

[During the fiscal year 1895 but sixty-two complaints were received that required any attention.]

|                           |                        |
|---------------------------|------------------------|
| Number of complaints..... | 62                     |
| Area cleaned .....        |                        |
| Refuse removed.....       | square yards.. 115,750 |
|                           | cubic yards.. 184      |

The cost of attending to said number of complaints is embraced in Tables 4 and 5, the work being done by the labor gangs on unimproved street and alley work, and in the time accounted for in said tables.

## OFFICE ROLL—EMPLOYEES OF ALL CLASSES.

TABLE 10.—Persons employed, period of service during year, and amount paid per day and total for year, from superintendent to laborers, including the allowance to inspectors furnishing their own horse and buggy.

## PAY ROLL.

| How employed.                                  | From—         | To—            | Num-<br>ber of<br>days. | Rate<br>per<br>day. | Annual<br>amount. |

## Recapitulation of expenditures for fiscal year 1895.

## ITEMS.

|   |               |
|---|---------------|
| Cost of sweeping paved streets and avenues, 289,553,181 square yards, at 24½ cents per 1,000 square yards ..... | \$70, 216. 25 |
| Cost of hand cleaning Pennsylvania avenue and other paved streets, 276 days, at \$19 per day .....              | 5, 234. 17    |
| Cost of cleaning improved alleys, 24,533,315 square yards, at 42.4 cents per 1,000 square yards .....           | 10, 572. 04   |
| Cost of cleaning unimproved streets, 242 days, at \$47.08 per day, less deductions for lost time .....          | 10, 485. 47   |
| Cost of cleaning unimproved alleys, 255 days, at \$11.77 per day, less deductions for lost time .....           | 2, 550. 76    |
| Cost of removing snow and ice .....   | 9, 088. 00    |
| Cost of extra work on streets and alleys additional to contract .....   | 798. 94       |
| Pay to employees as per pay rolls .....   | 26, 452. 87   |
| Contingent expenses .....   | 952. 06       |
| Office rent .....   | 420. 00       |
| Total .....   | 136, 770. 56  |
| Amount of appropriation .....   | 137, 500. 00  |
| Amount expended .....   | 136, 770. 56  |
| Unexpended balance .....  | 729. 44       |

The unexpended balance of \$729.44 was caused by the fact that during the last week of the year two days of rain occurred, which prevented sweeping; had the two routes been cleaned, amounting as they would to about \$350 each, but a very small balance would have remained.

There are several matters that I wish to present to the attention of the honorable Commissioners. Possibly some or all of them may have received consideration already at their hands. If so I trust no harm will result if repeated here. There are a large number of cobble and rubble paved streets that have become so rough and uneven that we have been compelled to cut them off sweeping schedules and sweep

them by hand, as machine sweeping did no good and was simply a waste of public funds to continue. The area of the streets so struck off aggregate about 215,000 square yards. I particularly wish, however, to direct attention to B street north, from Seventh west to Twelfth west; Louisiana avenue, Ninth to Tenth west; Little B street, from Tenth to Twelfth, and both Ninth and Tenth streets west, from Louisiana avenue to B street north. The traffic on the streets named is possibly greater than upon any others of a similar area in the city, particularly on B north and Louisiana avenue. B street on the north side is occupied by the Central Market Building from Seventh to Ninth; from Ninth to Tenth by wholesale and retail produce, meat, and provision dealers; from Tenth to Twelfth is the District lot, soon to be made a rendezvous for farmers and others dealing in vegetable and other farm products. The south side of the street is used from Seventh to Twelfth as a wagon stand by farmers and others. The balance of the street, less the space occupied by two street-railroad tracks, is filled daily with hucksters', truckers', and dealers' wagons, who come there to purchase and sell supplies. By actual count, on Saturdays there has been found on B street, between the points named, 800 vehicles of all kinds, 99 per cent being those of dealers.

It is therefore not surprising, with the refuse from the stores and sidewalk dealers, the farmers' wagon stands, the litter from the market, and the droppings and trimmings from the hucksters' and other wagons, that this street is at all times in a disgraceful condition, notwithstanding the efforts of this service to keep it clean. To add to the difficulties we have to contend with is the bad state of the roadway, paved originally with rubble stone, then patched with cobble or occasional additions of block, full of holes everywhere, and the gutters even worse. If the streets named were paved with material that would present a reasonably smooth surface, the labor of cleaning would be greatly lessened and results would be much more gratifying. As a matter of fact, in their present condition it is impossible to clean them as they should be. Some of them are swept daily by machine, but good results do not follow. B street is probably by far the worst; machines can not be used, so broken and uneven is the surface. The refuse material is taken up daily by hand and on Saturday it is hand cleaned as well as possible and the gutters flushed. I have entered into this case at length for the reason that I think that the market places should present a cleanly aspect, also that the public and the authorities may fully understand the situation and the real difficulties that confront this department in regard to the streets named. I earnestly urge upon the honorable Commissioners the repaving of the streets described in the interest of health and comfort.

I desire to call attention to the general practice of casting grass, weeds, vine trimmings, leaves, and trash of all kinds from parkings, lawns, and back yards into the streets and alleys. To do so is a violation of law and contrary to police regulations. Doubtless those who violate the law do so in ignorance and would cease if officially informed by notice from the police. It not only litters up the streets, but in the event of heavy rains is swept into the sewers and tends to choke them up. Another practice that is indulged in to a great extent is that when the householders sweep their sidewalks they are not content with sweeping the refuse to the gutter, where it should be left, but continue on to the center of the street. Neatness of course is what they have in view, but in fact where it is left it presents a most untidy appearance, for if left in the gutter the line of curb would hide

it. If, however, appearances were all there was to it, no harm would result. Swept into the roadway, it is cut up by horses and vehicles, and what does not blow about is pasted to the pavement and can not be entirely removed by the machine sweeper. The practice should be discontinued. The sweepings from many of the stores, fruit stands, and many other places are brushed or thrown into the streets, apparently regardless of the law and police regulations to the contrary. To remedy any or all of these matters would cost but little effort, and it is well worth trying, considering the good results that would naturally follow. Grass, weeds, vine trimmings, etc., should be carried off at private expense, sweepings from sidewalks should be left in the gutters. Sweepings from stores, fruit stands, etc., should be disposed of by placing same in receptacles. Persons throwing any paper or refuse on public streets should be arrested.

Comparisons as to area swept and cost of same between other leading cities and Washington are not easily made, as in nearly all of them only the number of miles swept is stated but width of streets is omitted. Again, as no data in many instances is given as to alleys (if they exist), it might be inferred that they were included in the general term "streets." In many cases the garbage and ashes are included in the cost charged up to street cleaning. With us all work is carried on under separate heads and cost charged accordingly. Also all cleaning of paved streets and improved alleys is done and paid for by the 1,000 square yards, each street and alley being scheduled, with areas of each in square yards shown. Contracts are let by the 1,000 square yards, and bidders base their proposals on approximate amount to be annually swept as shown by schedules. This is deemed a clearer and better method than by the running mile, width of streets averaged.

The only city that proceeds nearly upon the same line as this is Buffalo, N. Y. In another respect it also agrees, and that is the most of the pavement is of asphalt or asphalt block. Buffalo calculates its areas cleaned and paid for by the "great square" of 10,000 square feet. In 1893 there was swept in Buffalo 189,155 great squares, costing \$92,714; in 1894 237,553 great squares, costing \$105,090. The prices ranged during both years, under a three-year contract, as follows: 32, 34, and 45 cents per great square for asphalt pavement, and 60 cents per great square for stone pavement. Throwing the great squares into square yards, we have—

| Year.      | Square yards. | Average cost per 1,000 square yards.      | Total cost. |
|------------|---------------|---|-------------|
| 1893 ..... | 210, 174, 084 | Cents.<br>44 <sup>2</sup> / <sub>16</sub> | \$92, 714   |
| 1894 ..... | 263, 947, 767 | 39 <sup>13</sup> / <sub>16</sub>          | 105, 090    |

The average cost for the two years is about 42 cents per 1,000 square yards. If the above work had been done under the prices prevailing here for same class of work, cost for sweeping in 1893 would have been \$50,964.72, and for year 1894 would have been \$64,007.33, or for the two years a difference of \$82,831.95 in favor of Washington. I am not in position to say if the work was done any better in Buffalo than in this city or not. I infer, however, that in so far as the machine sweeping of the streets is concerned there can be but little difference, the conditions in both cities being about the same as to character of pave-

ment, side sweepers of same make being used in both. If hand work or flushing was done in addition to machine sweeping, then the streets should be cleaner, but such work would be an additional cost and does not affect the statement as made above.

Our present contract for cleaning paved streets expires June 30, 1897, and when re-let I am of the opinion that we will have to pay more for the work than at this time. The present contract having been made before the passage of the eight-hour law, its operations did not affect it, but it will reach the new one. Again, dumping facilities are becoming scarcer each year, and longer hauls will be necessary. At present, however, Washington is getting this work done at cheaper rates than in any city I have knowledge of, and, I am led to believe, is a cleaner city than any other—at least such seems to be the general opinion as expressed by visitors from all parts of the country. As I have said, all work done upon the streets and alleys, both paved and unpaved, is done either by contract, at so much per 1,000 square yards, or a stipulated number of laborers, horses, and carts are furnished at a given price per day, but controlled by this service. I must say that in economy and good work the system has done well, yet for several reasons I am inclined to think that the better plan would be to have the work done by the city directly. While labor might cost more than now obtained for by contractor, all else should be had at same or cheaper prices; improvements in the mode and manner of work could be made, and the force necessary would be at all times at the disposal of the department. I do not enter into all the details that go to convince me, as I doubt if this is the time and place.

*Estimate of expenses for fiscal year 1897.*

|   |            |
|---|------------|
| For sprinkling, sweeping, and cleaning improved streets and avenues, at 24½ cents per 1,000 square yards.....                                   | \$106, 000 |
| For hand cleaning Pennsylvania avenue and other streets.....  | 6, 500     |
| For improved alleys, sprinkling, sweeping, and cleaning, at 42½ cents per 1,000 square yards.....   | 13, 000    |
| For unimproved streets and alleys, complaints, etc.....   | 20, 000    |
| For employees of all classes, superintendent, assistant superintendent, inspectors, foremen, assistant laborers, and horses for inspectors..... | 27, 375    |
| For contingent expenses, street-railroad tickets, stationery, office supplies, livery of superintendent's horse, shoeing, etc.....              | 1, 200     |
| For office rent.....  | 420        |
| Total .....   | 174, 495   |

*Special estimate, snow and ice work.*

|  |         |
|--|---------|
| For cleaning roadways of snow and ice, to be used only for this purpose, or so much as may be necessary.....                         | 5, 000  |
| For cleaning snow and ice from cross walks, gutters, etc., under act approved March 2, 1895.....                                     | 20, 000 |
| For sprinkling unimproved urban streets and Pennsylvania avenue, from First to Seventeenth streets, from May 15 to September 15..... | 10, 000 |
| For sprinkling suburban streets and roads.....   | 5, 000  |

Increase is asked for sweeping and cleaning the paved streets, for the reason that there is about 1,000,000 square yards of street surface that can not now be swept but once per week that should be swept twice per week; that there are other streets now swept twice and three times per week that should be swept oftener; that health and comfort require it and the citizens are demanding of this service more frequent sweeping than the present fund at its disposal will permit. For the fiscal year 1896 there will be, as heretofore stated, for street sweeping

about \$86,000. This sum will sweep our present schedules, allowing that we work 246 days during the year, which is the average. To sweep the 1,000,000 square yards once additionally will cost about \$10,000, and the additional service on the other streets as proposed would require about \$10,000 more. This would, on basis of present year's allowance, make the sum asked for, viz, \$106,000. I wish to say that in arriving at what we deem to be the needs of the service, and what the public require, the time made on any branch of work is averaged for past five years and estimate made accordingly.

Increase is asked on the hand cleaning of Pennsylvania avenue and other streets, for the reason that the price of work being now done is not a fair one on which to estimate for coming year of 1897. Increase is asked on the improved alley cleaning for the reason that alleys are being paved and added to the schedules, and the amount asked for will not be more than will be actually required. Increase is asked for on the unimproved streets and alleys for the reason that this work is continually increasing by new streets inside and outside of the city limits, and for the further reason that there has lately been assigned to this department a large area of territory outside the city which was heretofore under the control of superintendent of county roads.

The amount asked for to pay employees of all classes is based simply upon the actual pay allowed them per day and the number of days it is presumed they will be engaged, as shown by former years. I wish at this point to request, on behalf of the employees of this service who are permanently employed, that they be transferred to the annual roll. It will add nothing to the expenses of the public service, but be an act of justice to a deserving class of public servants who do their duty faithfully, and entitle them to the benefit of annual and sick leave, as others now obtain.

As to salaries I make no recommendations, leaving that matter to your judgment. The amount asked for as contingent expenses is what is deemed just sufficient to cover same.

Office rent is a fixed item that requires no comment. In regard to the items contained in the special estimate I wish to say that the amount asked for cleaning off snow and ice from roadways in the city is about an average of what has been expended annually in the last five years, but which has heretofore been taken from funds that should have been devoted to street sweeping and cleaning. I ask this special sum in order that our street-cleaning work may not be curtailed. The estimate made and deemed necessary to carry out provisions of the act approved March 2, 1895, relative to the cleaning of cross walks and gutters, and keeping them free of snow and ice, after every fall of snow, may be considered extravagant. I am satisfied, however, that it is far too small; that is, if the work is to be general throughout the cities named. As the act referred to carried with it no appropriation to execute its requirements, should the work devolve upon this service funds to at least partially carry it out should be had.

There have been for several years demands made by citizens living on the unimproved streets within the city limits that the same should be sprinkled during the summer months. While recognizing the need of such work and the great relief the same would afford, we were powerless to do anything, the funds of this department being insufficient for its legitimate work. I have in estimating for this work coupled it with the daily sprinkling of Pennsylvania avenue, from First west to Seventeenth west. Frequent applications have been made to have this avenue sprinkled daily, but we were compelled to refuse for the reason

stated in regard to the unimproved streets. Probably there is no street in the city that is so uncomfortably hot during the extreme heat of summer as this. There are but few trees to shade it, and, wide as it is, what few there are do little good in protecting it from the direct rays of the sun throughout the entire day. I think there would be almost unanimous approval of the expense necessary to do the work proposed. The street is traversed more than any other one in the entire city by both vehicles and pedestrians. Two-thirds, I believe, of the citizens of Washington are on this street at some time or other during the day or night, particularly during the hot weather, either for business or pleasure. Of the \$10,000 estimated, I think \$2,000 would sprinkle the avenue daily as proposed, the remaining \$8,000 to be used on the unimproved streets.

The estimate as made for the unimproved suburban streets is, I think, sufficient for the purpose, as the area there to be sprinkled (where water could be had) is not large. That there is great need of such work being done is evident by the many applications received therefor from residents and others.

In closing my annual report I wish to say that in all ways have I received the earnest and hearty support of all employees, and that if any success has attended the conduct of this department, much of it is due to them.

Very respectfully,

A. G. McKENSIE,

*Superintendent Street and Alley Cleaning Department.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

## REPORT OF BOARD OF DENTAL EXAMINERS.

WASHINGTON, D. C., *July 25, 1895.*

GENTLEMEN: In accordance with the requirements of "An act to regulate the practice of dentistry in the District of Columbia, and to protect the people from empiricism in relation thereto," the board of dental examiners hereby respectfully reports its transactions for the year ending June 30, 1895, to wit:

The board held four regular and two special meetings during the year for the transaction of business.

Twenty-five applications for certificates of qualification to practice were received and passed upon. Twenty-three were graduates of colleges requiring a three-years' course of study, and were, therefore, entitled to and were granted certificates without examination as to their qualification. One was a graduate of a college professing to require a three-years' course of study, but did not do so in his case. The applicant was therefore refused a certificate.

One applicant passed a satisfactory examination and was granted a certificate.

Twenty-four certificates have been issued since our last report, making a total of 247 legally authorized to practice dentistry in this District.

One case of violation of the act was tried and the minimum fine of \$50 imposed.

The defendant had at one time applied to the board for a certificate of qualification, presenting a diploma from a bogus institution as evidence of his right to a certificate. He was refused, and in the trial when he claimed to be a "student" the judge told him that he had already professed to be a dentist, and that such a claim was not consistent with his former declarations. Without hearing the United States side of the case, his honor imposed the fine as above stated.

At our last report there was a balance in the treasury of \$3.46; received since from all sources, \$33; making a total of \$36.46. The expenditures have been \$33.46, leaving a balance of \$3.

Respectfully submitted.

H. M. SCHOOLEY, *Secretary.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

**REPORT OF SUPERINTENDENT FREE PUBLIC BATHING BEACH.**WASHINGTON, D. C., *September 12, 1895.*

SIRS: The following annual fall report upon the bathing beach antedates the closing for this season by two weeks, at the suggestion of one of your board. About \$1,300 has been expended in improvements, increasing the facilities to 20 houses in a separate yard for ladies, 100 houses for gentlemen, and 12 new houses for colored people; the wharves have been repaired; a large yard enclosed with a board fence; a refreshment stand built, and a float, having on it a trapeze, horizontal bar, and spring boards, has been provided.

The beach has been well patronized, and for the first time has fully paid expenses of maintenance. It was opened to the public June 8, 1895, and will close September 22, 1895. In the three months already past 29,100 bathers have registered on the beach books. One death has occurred at the beach this year—that of Carlton Snell, who died of heart disease while swimming. So far in the history of the Washington bathing beach there never has been but one drowning of a registered bather—that of young Keith three years ago. In contrast with this, let me refer you to the board of health record, in which you may find that among the few boys who still continue to run off and bathe at dangerous places nine or ten have been drowned this year, and that has been about the number annually drowned in the tidal reservoir, not within helping distance of the beach.

It is a wonderful record, to the credit of the beach plan and management, that the life guard has rendered saving aid as often as once a day on an average this season, and never when an alarm was given has he lost one who was alive at the time the alarm came.

August 21 a tournament was held at the beach, in which the patrons of the beach entered into a friendly contest for gold and silver medals, affording free and highly appreciated entertainment to a multitude of people. Even if a report of this nature were the proper place for sentimentalism it would be impossible for me to set forth in detail the evidences of enthusiastic enjoyment of the revelry by that vast audience. The display of agility, strength, bodily contortion, and intentional awkwardness of amateur acrobats, gymnasts, swimmers, and divers brought forth roar after roar of applause and a forest of dainty kerchiefs waved by fair shining arms is what I remember of it. The throng was so great that every available foot of standing place was occupied and some of the seats of 2 by 12 inch planks provided for ladies were broken down. A gratifying fact to state is that the number of lady bathers is continually increasing. All who come once, come again and often. It becomes my disagreeable duty to report a source of annoyance to ladies. George Tasker asked my permission to rent boats near the beach. Knowing that if properly conducted this would accommodate a portion

of the public, I consented for him to make the trial, but soon it proved very objectionable. He rented boats at a very low price, and boys would hire them and go into the water naked within sight but beyond jurisdiction of the beach. His wharf float is directly beside the ladies' premises, and frequently a gathering of low characters on that float make remarks about lady bathers within their hearing. I have repeatedly notified Tasker to move away, and such notice has been served on him by Government officials, but with the impudence characteristic of squatters he defies all authority and stays.

Some one should be held responsible for good behavior on this beautiful estuary of the Potomac, which is now visited daily by hundreds of sightseers and those who have their own conveyances, and if held responsible that party should have power to maintain order and public decency. I think that the three policemen granted for the bathing beach by Congress nearly three years ago at Major Moore's solicitation should be kept in charge of the beach and its neighborhood all the year.

There have been five arrests at the beach this season—two for theft from the bath houses and three for fighting. To call for a patrol wagon or for the assistance which the Emergency Hospital freely tenders renders a telephone necessary. The nearest telephone now is the Fish Commission, a quarter of a mile away, only free to us by courtesy, and not always open. The great success of our new float is seriously impaired by the fact that there is no place reasonably near the beach where it can be located that a man can not wade at low tide on the muddy bottom, to the disgust of deep divers. The opposite extreme, when the tide was 5 feet higher, caused the overexertion that resulted in young Snell's death. The week previous he easily swam to the diving stand at low tide, but now the high tide doubled the distance to swim and his thread of life snapped when the goal was within his reach. Every year's experience adds further evidence that the pool system, long ago recommended, is the only means of securing reasonable safety—a broad bathing area, and water always at one depth—and though all things are not ripe for occupancy of the inner basin, yet certain plans are maturing which render immediate action necessary if we would obtain that ideal spot.

In response to my inquiries Maj. Chas. E. L. B. Davis, the engineer officer in charge of filling the Potomac flats, says it is his present intention to fill up this basin this fall, and he very kindly furnished me details from which I estimate the fill to be 175,000 yards, which, at 14 cents a yard, would cost \$24,500. Now, if Major Davis could be persuaded to fill in only about 2 feet instead of 16 feet, to evenly grade the banks, to level a roadway around it, to lay an 8-foot pipe and make a gate at its mouth and cover in the pipe, making solid ground all around the inner basin, he could do it for \$10,000 or less, saving the Government about \$15,000 and leaving a beautiful pool surrounded with hundreds of common willow and a few weeping willow trees, which are already of many years' growth. This pool is twice as long as the present beach and would furnish ten times as much safe bathing area as we now have—enough to serve all of Washington and its visitors for a century. The water could then be kept at one constant, safe depth in bathing hours and be changed as often as required by tides in the night, and the time for change could be selected to avoid muddy water. We would have no more dead animals, weeds, logs, and trash floated onto our beach, and it could be made the most beautiful spot in the city. The drive around it would add an enchanting half mile to the proposed boulevard.

I would propose to fit up one-half of this for entirely free bathing, including two large yards with a high fence for naked bathers. That would save eight or ten lives a year of boys who run off and bathe in dangerous places because they can not afford bathing suits. The other half I propose to fit up for the use of people who prefer to pay something for exclusive accommodations, and I think the pay thus received would cover all expenses of keeping the whole, and it would accommodate a class who will not patronize a free beach.

If the general populace can be encouraged to keep their persons clean they will very quickly clean up their dwellings and alleys, and the excitement of a romping swim will bring into the water many to whose bodies water is a stranger. Twenty thousand dollars expended in making an attractive bathing place will do more for the health of the city and more to ward off epidemics and contagion than any other one agency of that cost. New York has tried free baths for a number of years, and as a result she spends every year for this purpose five times as much as I ask to provide Washington with better accommodations for all time than it is possible for New York to ever have. Furthermore, New York State has passed a general law requiring all her cities of 10,000 inhabitants or more to provide free public baths.

The much-talked-of Seventeenth street sewer is an open canal 50 feet wide and a half mile long, extending to the river about parallel with New York avenue. Its contents is filth of the most abominable sort. A blue froth interspersed with great gas bubbles forms so thick a coating as to hang immovably to the shores even when the tide rises and falls. At low tide this slimy coating rests on the filth-saturated mud, festering in the sun and exhaling gases too foul to be named. And this blot on civilization lies within smelling distance of the White House and the State, War, and Navy building, and is directly in front of all the city west of them. It is nearer those places than to the bathing beach. In God's name, why can not this rottenness be buried now? Why wait to poison another generation?

The peculiar relations of this city to the General Government have heretofore left the whole region of the flats out of any regular police precinct, and among the thousands of skaters every winter the steady influence of the policeman's badge is never present; therefore rows are frequent, to the scandal of our girls and most of the boys.

In view of the facts above stated, I recommend as follows:

1. That rules be formulated peculiar to the situation and prevailing conditions to maintain public order and decorum at the bathing beach and in all the adjoining neighborhood, and that such rules be incorporated in the police regulations.

2. That a police beat be located on the line of Seventeenth street and the shore fronting on the water of the Potomac and extending from B street north to D street south, and that a full relief of three policemen be assigned to that beat all the year around, with headquarters at the beach office.

3. That no person shall be permitted to rent boats or other water appliances within 100 yards of the bathing beach without the written consent of the superintendent of the beach.

4. That a telephone connected with the city system be located at the bathing beach.

5. That whatever would be deemed indecent exposure in daytime shall be adjudged as such if committed at any time upon the bathing beach, or within 50 feet of any public highway or resort.

6. That your honorable body strongly recommend to the proper authorities the immediate burial of the Seventeenth street sewer.

7. That you use your influence to have the little basin preserved and improved as hereinbefore suggested.

8. That you ask Congress to exchange the grant to this city of the present bathing beach for a grant of the said little basin and sufficient ground around it for buildings, driveways, etc.

9. That you recommend an appropriation of \$10,000 to move our present equipment to the new premises and to fit up the latter in permanent shape.

Very respectfully submitted.

W. X. STEVENS,  
*Superintendent Washington Bathing Beach.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

**GENERAL ORDERS OF THE COMMISSIONERS OF THE DISTRICT OF COLUMBIA MADE DURING FISCAL YEAR ENDED JUNE 30, 1895.**

JULY 3, 1894.

*Ordered,* That in accordance with the provisions of "An act to provide for the opening of alleys in the District of Columbia," approved July 22, 1892, and upon petition of the owners of the abutting property, the 10-foot alleys in square 830, running south 90 feet from L street northeast, and also the 10-foot alley in the same square running north 90 feet from K street northwest, are hereby closed as per attached plat.

---

JULY 5, 1894.

*Ordered,* That in accordance with public act No. 91, approved June 19, 1894, the alley 20.17 feet wide, running east and west through square 622 for a distance of  $560\frac{3}{4}$  feet, beginning at and running west from the west line of North Capitol street about equidistant between I and K streets northwest, and extending to the west boundary line of the property of the president and directors of Gonzaga College, is hereby declared closed and abandoned as a public thoroughfare.

---

JULY 9, 1894.

Permission is hereby granted the Eckington and Soldiers' Home Railroad Company to put down an underground electric railway on North Capitol street, between New York avenue and T street, under United States Patent, Serial No. 511214, a blue print of which is on file in the engineer department.

All work must be done subject to the supervision of the engineer department, and such deposits shall be made to cover the costs of inspection and guarantee of good work as may be deemed necessary by the Commissioners of the District of Columbia. Street intersections must be so prepared as to leave no obstruction to travel. Street intersections at R street must be entirely repaved with sheet asphalt or vitrified brick upon a concrete base.

---

JULY 10, 1894.

*Ordered,* That a sewer be constructed from the sewer recently laid in Kentucky avenue across Kentucky avenue and down East Capitol street to lot 22, square 1013, the sewer crossing the avenue to be built at the whole cost of applicant, and the line from Kentucky avenue down East Capitol street to be built under the provisions of the permit system; estimated total cost \$361, of which the applicant's share is estimated to be \$218. (E. D. 4226, 1894.)

JULY 14, 1894.

*Ordered*, That section 2 of article 6 of the police regulations of the District of Columbia is hereby amended by adding the following:

No horse, mule, sheep, swine, bovine or other cattle shall be allowed to run at large in or upon any street, avenue, alley, highway, footway, sidewalk, parking or other public space in the city of Washington and Georgetown.

JULY 24, 1894.

*Ordered*, That hereafter the assessor of the District of Columbia include in each certificate issued by him under an act relating to tax sales and taxes in the District of Columbia, approved February 6, 1879, as amended May 13, 1892, a statement of all tax sales affecting the property covered by said certificate from which the property has not been redeemed.

JULY 26, 1894.

*Ordered*, That the amendment of July 14, 1894, to section 2 of article 6 of the police regulations of the District of Columbia is hereby amended so as to read as follows:

No horse, mule, sheep, swine, dog or bitch, bovine or other cattle, shall be allowed to run at large in the District of Columbia, and any person owning or harboring any such animal who shall suffer or permit the same to wander, rove, or run at large unrestrained, shall, upon conviction thereof before the police court of said District, be fined as hereinafter provided, with costs of prosecution for each offense.

JULY 27, 1894.

*Ordered*, That paragraph 1 of section 12 of the building regulations of the District of Columbia, made May 2, 1894, is hereby amended by the addition thereto of the following:

*Provided*, That no building shall be erected, or any existing building be reconstructed, for stabling horses above the first or ground floor.

JULY 27, 1894.

*Ordered*, That paragraph 13 of section 4 of the building regulations of the District of Columbia is hereby amended by the addition thereto of the following:

No building shall hereafter be erected or altered on any resident street of the District of Columbia to exceed in height above the sidewalk the width of the street in its front; and in no case shall such building exceed 90 feet in height. No building shall be erected or altered on business streets as defined in the building regulations to a greater height than the width of the street abutting its front: *Provided*, That no such building shall exceed 110 feet in height in any case: *Provided further*, That spires, towers, and domes may be erected to a greater height than the limit hereinbefore prescribed when approved by the Commissioners of the District of Columbia.

JULY 30, 1894.

*Ordered*, That hereafter when a public water main has been laid upon a street in which there are private mains that were laid under agreement that all premises should be disconnected from them and connected with the public main when laid, it shall be the duty of the chief clerk of the water department to require that this agreement be carried out and the private main be disconnected from the public main at its junction with the latter.

AUGUST 1, 1894.

*Ordered*, That William C. Woodward, M. D., be and he is hereby appointed health officer of the District of Columbia; and that Charles M. Hammett, M. D., be and he is hereby appointed coroner of the District of Columbia, appointments to take effect August 1, 1894.

AUGUST 11, 1894.

*Ordered*, That the appropriation for relief of the poor, for the fiscal year to end June 30, 1895, is hereby apportioned as follows:

|  |               |
|--|---------------|
| For the physicians to the poor.....  | \$7, 200      |
| For medicine and printing prescriptions for the physicians to the poor.....                    | 3, 700        |
| For the Homeopathic Dispensary, including medicine for homeopathic physicians to the poor..... | 500           |
| For the Eastern Dispensary .....   | 500           |
| For the Woman's Dispensary .....   | 500           |
| For the Hope and Help Mission.....   | 500           |
| For the Newsboys' and Children's Aid Society.....  | 500           |
| For the Aged Women's Home.....   | 300           |
| For coffins for the indigent dead.....   | 300           |
|  | <hr/> 14, 000 |

AUGUST 16, 1894.

*Ordered*, That James A. Bates, Samuel T. G. Morsell, and J. Harrison Johnson are hereby appointed members of the permanent board of assistant assessors, under the provisions of the act "To provide an immediate revision and equalization of real estate values in the District of Columbia; also to provide an assessment of real estate in said District in the year 1896 and every third year thereafter, and for other purposes," approved August 14, 1894, appointments to take effect when appointees shall have qualified according to law.

AUGUST 27, 1894.

*Ordered*, That the order of July 24, 1894, relative to certified statements of taxes and assessments under act of May 13, 1892, is hereby modified so as not to require the assessor to include reference in said certificates to any sales prior to the year 1878, sales where deed has been executed and delivered by the Commissioners in completion of said sale, and any sales whose omission is requested by the applicant. In case of such omission by request the certificate shall state on its face, "Tax sales omitted by request of applicant;" also that a copy of this order be printed on said certificate.

AUGUST 29, 1894.

*Ordered*, That the following regulations governing the disinterment of bodies from the Graceland Cemetery and their reinterment in other cemeteries, under the act of Congress entitled "An act prohibiting the interment of bodies in Graceland Cemetery, in the District of Columbia," approved August 3, 1894, are hereby made:

SEC. 1. No body or part of any body shall be exhumed or reinterred until a permit therefor shall have been issued by the health officer, nor otherwise than in accordance with such permit. Application for such permit shall be made in writing, in duplicate, to the health officer, and shall be signed by the secretary of the Graceland

Cemetery Association. Said application shall state the name and age of the deceased; the place, date, and cause of death; the date of burial in Graceland Cemetery; the location of the grave and the number of bodies, if more than one, interred therein; and shall state the exact location of the grave in which the body is to be reinterred. Said application shall, when approved by the health officer, be considered as a permit to exhume and reinter the bodies of those persons named therein, subject to the restrictions and conditions of these regulations, and not otherwise. When such exhumation and reinterments shall have been made the secretary of said Graceland Cemetery Association shall indorse said application opposite each name the date which reinterment was made, and shall certify that all exhumations and reinterments for which permission was asked in said application have been completed in accordance with the permit and in conformity with these regulations.

SEC. 2. No grave shall be opened for the purpose of disinterment during June, July, August, and September. No body or part of any body of any person under 12 years of age shall be disinterred within a less period than one year from the date of burial, nor in case of any person more than 12 years of age within a period of less than two years from the date of burial: *Provided*, That the foregoing restrictions of this section shall not apply to any body buried in a solid metallic casket if such casket is not opened at any time during exhumation and reinterment: *And provided further*, That when two or more bodies have been interred in a single grave such grave shall not be opened until it is permissible under this section to remove the older of the bodies or the one last interred.

Each body or part of body, together with any article or articles or the remains of any article or articles of any description whatsoever which may have been buried with such body, including the casket, coffin, and box in which such body was buried, shall be transferred directly from the grave to a tight box, which shall be immediately closed and which shall not be opened until the contents thereof are to be deposited in the grave in which such body is to be reinterred. Reinterment shall be completed in every case within twenty-four hours from the time when the remains were exhumed.

Bodies of such persons who have died of diphtheria shall be thoroughly wetted before being removed from the grave with a solution of chloride of lime of the strength of 1 pound to each 2 gallons of water. No body or part of any body, or anything pertaining to any body or to its interment, shall be disposed of otherwise than in accordance with these regulations. Each grave from which the remains of any body or bodies have been removed shall be allowed to remain open for twenty-four hours before it is filled.

SEC. 3. No body or part of any body which has been interred in a single grave in Graceland Cemetery shall be reinterred in any less space or in the same grave with any other body or part of any other body in any other cemetery; but when two or more bodies have been interred in the same grave in said Graceland Cemetery these same bodies or the remains thereof may be interred in a similar manner in the grave in which they are reinterred.

SEC. 4. No person except such as are actually engaged in the removal of the bodies, relatives of the deceased or such as are authorized by the health officer, shall be permitted to witness the exhumation or reinterment of any body or part of any body or to handle or examine the same.

SEC. 5. Each monument, tombstone, and marker marking any grave or graves in Graceland Cemetery shall be transferred to mark the grave or graves in which such body or bodies are to be reinterred, and shall be there placed in position as soon as this can be done without danger of settling.

SEC. 6. Any permit or any part of any permit may be revoked by the health officer if in his judgment the work is being done otherwise than in accordance with these regulations or becomes in any way dangerous to public health.

These regulations may be altered or amended at any time by the District Commissioners.

AUGUST 31, 1894.

*Ordered*, That Dr. Larkin White Glazebrook is hereby appointed deputy coroner in and for the District of Columbia under the act approved August 23, 1894.

That, pursuant to the request of the Assistant Treasurer of the United States under date of the 25th instant, the collector of taxes will receive no more 8 per cent certificates of indebtedness (greenbacks) or coupons therefrom in payment for special taxes.

That William H. Fugitt, jr., William P. Hess, and George N. Fillen are appointed privates of the metropolitan police force, District of Columbia, to take effect September 1, 1894.

That section 7, article 4, of the police regulations in and for the District of Columbia, as revised and amended August 8, 1892, is hereby amended by adding thereto the following:

Drivers of vehicles occupying public wagon stands established by the Commissioners shall keep the streets or portions of streets and avenues occupied by their vehicles cleanly swept to the satisfaction of the superintendent of the street-cleaning department, and failure on the part of any driver to do so shall be reported by the police officers to the chief of police, who shall cause the arrest and prosecution of such driver or drivers for creating a nuisance, and on conviction thereof in the police court such driver shall be fined as prescribed in section 8 of this article, together with the costs of prosecution.

---

SEPTEMBER 1, 1894.

*Ordered*, That Section VII of the orders of June 26, 1891, "To regulate the construction, repair, and operation of elevators in the District of Columbia," is hereby amended by the addition thereto of the following:

In all buildings in the District of Columbia in course of construction it shall be unlawful to use hoists or elevators for hoisting building material, etc., in any such building or buildings unless the wellholes or openings for such elevator or hoists on each and every floor of the building shall be closed with temporary guard rails composed of boards placed 6 inches apart to a height of 5 feet, with a gate or door swinging outward, and such other equivalent appliances as the inspector of buildings may determine to be necessary for the protection of life and limb.

---

SEPTEMBER 12, 1894.

*Ordered*, That the alley, 15 feet wide, more or less, along and abutting the east side of lot 10, and the southerly fronts of lots 1 to 9, both inclusive, of square east of square 93, Georgetown, and 24 feet wide, more or less, along the west side of lot 1 in said square, will be considered a public alley, in accordance with the opinion of the attorney in and for the District of Columbia dated July 9, 1894 (L. R., 203, 686), and the report of Capt. G. J. Fiebeger under date of August 11, 1894, that the alley is constantly used.

---

SEPTEMBER 15, 1894.

*Ordered*, That the Columbia Railroad Company be, and it is hereby, granted a permit to lay temporary tracks, not unreasonably obstructive, and to open the streets for the construction of its cable road on its line between Fourteenth street east and Thirteenth street west under the following conditions, viz:

All work shall be done at the risk and expense of the Columbia Railroad Company, and said company shall be responsible for any accidents or damages caused by or due to any work that may be done by it or others in connection with the construction of said road.

Said company shall, during the construction, keep open for travel a sufficient and reasonable width of all cross streets, so as to incommode the public as little as possible.

There shall not be open at any one time more than six squares, and this number may be modified by the Commissioners of the District of Columbia if deemed necessary by them, nor shall any place in the street be kept open more than sixty days.

Said company shall deposit with the collector of taxes the sum of \$1,000, to defray such expenses as may be incurred by the District of Columbia in connection with the inspection of the work, and in making good all damages to any District work injured in restoring all pavements disturbed by changes made in connection with said work in sewers, water mains, and gas mains, or other underground construction in the streets, and to hereafter deposit such further sums for said purposes and at such time as the Commissioners of the District of Columbia shall request: *Provided*, That when the work is finished, such amount as shall not have been expended shall be returned to said company within ninety days with statement of account in full.

Said railroad company shall restore, repair, and repave the streets and avenues along the lines of its road that may be cut, damaged, or injured by it in consequence of the reconstruction of its road, and put the same in first-class condition to the satisfaction of the Commissioners, and shall also keep the same in good repair for a period of time such as is usually required in contracts by the District for similar work: *Provided*, That if said company shall refuse or neglect to do said work or make such repairs, the District of Columbia may do the same and charge the expense thereof to the company.

If deemed necessary, there may be employed by the District of Columbia and paid out of the deposit of said company, an inspector at \$4 per diem for each working day, who shall carry out all orders that may be given him by the Commissioners or their agents, and shall also report to said Commissioners any cuts in the pavements of streets torn up for which said company is not responsible.

Whenever the grade of the tracks of the railroad shall not be on the grades of the present paved streets, all expenses of making the same conform with said grades shall be borne by said company.

All paving material and macadam taken out of the streets and not previously paid for by the said company shall be hauled to a District property yard or to such other place as the Commissioners may direct: *Provided*, That the haul be no greater than the nearest District property yard at the expense of said company.

All rights of the District to the material taken out of the streets under this permit and not hauled to the District property yards, or not otherwise taken possession of by the said District, are hereby reserved for future consideration, and the District shall not be deemed estopped from asserting its rights thereto by the issuance of this permit; the District claiming said material so far as it shall not be used by said company in repaving its tracks with it at such points where like material is used in the pavements of that part of the street more than 2 feet beyond the exterior rails of said company's tracks under the direction of the Commissioners.

The kind of pavement placed on the part of the street for which the said company is responsible shall be subject to the approval of the Commissioners of the District of Columbia.

Every precaution against accidents shall be taken, such as barricading the work and lighting the same, and also piles of material at night, as provided by law or the regulations of the Commissioners of the District of Columbia.

The tracks must be laid in accordance with the plans on file in the engineer department, and to the exact grade given by that department. No projections of any kind will be allowed above the surface of the pavement.

The construction of the road shall conform in all respects to the specifications filed in the engineer department by the Columbia Railroad Company.

Construction material may be deposited near the curb so as to obstruct the street as little as possible, provided that upon H street north this material shall not at any one time occupy more than six squares; all in excess of this amount may be deposited temporarily in intersecting streets.

---

SEPTEMBER 21, 1894.

*Ordered,* That the road from Fifteenth and H streets NE. to Anacostia road in Benning, heretofore known as Benning road, is hereby named Florida avenue.

---

SEPTEMBER 25, 1894.

Under the authority of the provision of the act of Congress of August 7, 1894, authorizing and empowering the Commissioners of the District of Columbia to make and enforce all reasonable regulations in respect to requiring street cars operated by other means than horsepower in the District of Columbia to be provided with proper fenders for the protection of the lives and limbs of all persons within the District of Columbia, it is—

*Ordered,* That the Washington and Georgetown Railroad Company, the Brightwood Railroad Company, the Eckington and Soldiers' Home Railway Company, the Rock Creek Railway Company, and the Georgetown and Tennallytown Railroad Company, and each of them, shall, on or before October 25, 1894, equip at least two of its cars so operated on each of its main lines, and on each of its branch lines more than 1 mile long, with fenders for the protection of life and limb, which on each car may be of a combined kind or be in two or more parts, but shall consist of a front fender and a wheel guard, and shall be of a design or designs approved by said Commissioners, and until a different regulation is made said companies shall regularly run upon their roads said number of cars so equipped.

It is further ordered that a copy of this order shall be served upon each of said companies.

---

SEPTEMBER 26, 1894.

*Ordered,* That when the chief engineer of the fire department believes that bodies of persons or animals may have been buried in the ruins at large fires it shall be his duty to collect from the bystanders or elsewhere such a force of laborers as he may require, with one person capable to act as foreman, and employ them to remove the bodies under his general supervision. The laborers so employed shall be paid at the rate of \$1.50 per diem and the foreman at the rate of \$3 per diem, from the emergency fund.

That the Baltimore and Ohio Railroad Company is hereby directed to cause electric signals, similar to those in use at Ivy City, to be placed at the railroad crossings at Benning, D. C.

---

OCTOBER 2, 1894.

*Ordered,* That hereafter applications for subdivisions of land must be accompanied by duplicate plats of the proposed subdivision, one of which, when approved by the Commissioners, shall be transmitted to the surveyor of the District of Columbia, and the other filed in the office of the assessor.

OCTOBER 4, 1894.

The Commissioners of the District of Columbia met in board session at 12 m. to-day, pursuant to the following notice, which was published twice a week for three successive weeks in the Washington Post:

OFFICE OF THE COMMISSIONERS OF THE DISTRICT OF COLUMBIA,  
September 12, 1894.

Notice of the Extension of North Capitol Street.—Notice is hereby given to the trustees of Prospect Hill Cemetery and Annie E. Barbour and all other persons interested that, pursuant to an act of Congress approved December 21, 1893, entitled "An act to extend North Capitol street to the Soldiers' Home," and the provisions of chapter 11 of the Revised Statutes of the United States, relating to the District of Columbia, that there will be a meeting of the undersigned on Thursday, the 4th day of October, 1894, at 12 o'clock noon, at their office in the District Building, at which time and place all persons having objections to the proposed extension of said street are invited to be present to make known their objections, if any they have. If no objections are made it will be taken for granted that no damages are or will be claimed, and that the plat of the proposed extension will be recorded and the said street declared a public highway. A map or plat of the proposed extension, showing the lines thereof and the area of land proposed to be taken, has been prepared and may be seen on application at the office of the undersigned.

JOHN W. ROSS,  
GEORGE TRUESDELL,  
CHAS. F. POWELL,

*Commissioners of the District of Columbia.*

The following communications were presented by the attorneys, whose names are signed thereto:

WASHINGTON, D. C., October 4, 1894.

GENTLEMEN: You will please take notice that the Prospect Hill Cemetery objects to the extension of North Capitol street through its grounds, because it will ruin the cemetery, and for the further reason that the land has already been condemned and damages awarded it, the judgment of the court for which is still subsisting, as you well know. Should said judgment be vacated the cemetery will claim damages for all its land which may be taken and for all done to what is left, by the extension of said street as proposed.

Very respectfully,

PROSPECT HILL CEMETERY.  
Per WM. F. MATTINGLY, *Attorney.*  
HENRY WISE GARNETT, *Attorney.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

WASHINGTON, D. C., October 4, 1894.

GENTLEMEN: You will please take notice that Annie E. Barbour objects to the extension of North Capitol street through her ground, for the reason, among others, that the land has already been condemned and damages awarded her, the judgment of the court for which is still subsisting, as you well know.

Should said judgment be vacated she will claim damages for all her land which may be taken and for all done to what is left, by the extension of said street as proposed.

Very respectfully,

ANNIE E. BARBOUR.  
By HENRY WISE GARNETT, *Attorney.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

OCTOBER 17, 1894.

*Ordered,* That a wagon stand is hereby established on the south side of B street NW., between Tenth and Eleventh streets (north side of the Hay Market); and

That a wagon stand for twenty vehicles is hereby established on east side of Sixth street NW., extending southwardly from Missouri avenue.

OCTOBER 18, 1894.

*Ordered,* That section 16 of article 10 of the police regulations of the District of Columbia, made August 31, 1894, is hereby amended as follows:

The gates at the crossing of the Baltimore and Potomac Railroad at Fourth and Fifth streets SE. need not be operated between midnight and 6 o'clock a.m.; but the Baltimore and Potomac Railroad Company shall maintain on each of said crossings a plain notice to that effect, of a kind and exact location satisfactory to the engineer department of the District of Columbia.

OCTOBER 23, 1894.

The Baltimore and Potomac Railroad Company is hereby notified that the gates at Maryland avenue and Sixth street SW. are not suitable for all the crossings at that location. The gates do not cover the north sidewalk of Maryland avenue at the west side of Sixth street, nor the north roadway of Maryland avenue. Said company is also notified that under the police regulations it is required to fence along its tracks on Maryland avenue between Sixth and Seventh streets SW., and elsewhere in the District where the grade of the railroad track is approximately even with the adjacent surface.

OCTOBER 21, 1894.

*Ordered,* That the following regulations are hereby made to prevent the spread of smallpox in the District of Columbia:

SEC. 1. That it shall be the duty of every physician or other person in charge of any patient who may be reasonably suspected of being affected by smallpox to report to the health officer in writing within twelve hours from the time of the discovery of the existence of such disease the full name and address and place of business or school attended by such person with names and addresses of such persons as have been exposed to the disease from such case, together with the probable source of contagion.

In any case upon the death or complete recovery of any person who has had smallpox, it shall be the duty of the physician or person in charge of such case to report in writing such fact to the health officer.

SEC. 2. A placard, flag, or warning signal shall remain displayed upon the front of any premises deemed by the health officer to be infected by smallpox until removed by order of the said health officer; and no person shall remove, without permission of the health officer, such placard, flag, or warning sign.

SEC. 3. No person except the physician or the nurse or nurses in attendance shall be admitted to the room in which is a patient suffering with smallpox; and no person shall enter the house, except members of the family already dwelling therein, or other people necessarily employed there.

SEC. 4. Persons who have been exposed to the infection of smallpox shall remain under daily observation of the health officer, or his duly authorized agent, for such a period of time as may be necessary to demonstrate their freedom from the disease, and shall not attend any place of public or private assemblage during such period. No person suffering from smallpox shall willfully expose himself in any public place, but shall remain isolated until no longer capable of transmitting the disease to others.

SEC. 5. The apartments and the contents thereof, occupied by any person suffering from smallpox, and adjoining apartments and contents thereof, when such apartments are deemed infected, shall be properly disinfected before such apartment shall be occupied by any other person or before such articles contained therein shall be removed.

SEC. 6. The body of a person dead from smallpox shall at once be completely enveloped by the person in charge of such patient in a sheet wetted with a 1 to 500 solution of bichloride of mercury, and shall then be placed by such person in a coffin, which shall be immediately closed, and such body shall not be taken to any church or place of assembly, and it shall be buried privately within twenty-four hours.

The body of any person dead with smallpox shall not be removed into or out of the District of Columbia.

SEC. 7. Any person in charge of any premises wherein a case of smallpox has occurred shall adopt such measures of disinfection as may be directed by the health officer.

No person shall cause to appear in any public or exposed place any article which has been exposed to infection of smallpox, and which has not been properly disinfected since such exposure.

SEC. 8. Whenever smallpox shall have been declared by the health officer of the District of Columbia to be epidemic therein, no person having charge of any building or place wherein people assemble shall admit thereto for such period as may be designated by the health officer any person who has not been protected from smallpox by a successful vaccination within the five years immediately preceding, or by a previous attack of smallpox.

SEC. 9. Whenever the health officer shall deem any building or place where people assemble to be especially exposed to the danger of infection by smallpox and shall have so notified the owner or person in charge of such building or place, no such owner or person shall admit to any such building or place for such period as may be designated by the health officer any person who has not been protected from smallpox by a successful vaccination within the five years immediately preceding, or by a previous attack of smallpox.

SEC. 10. No person shall interfere with or obstruct the entrance or inspection of any building by the officers of the health department, when there has been reported the case of a person ill with smallpox therein; nor shall any person in any manner hinder or prevent such disinfection or destruction of any articles as may be, in the opinion of the health officer, necessary to prevent the spread of this disease.

SEC. 11. Nothing in these regulations shall be construed to interfere with any physician, nurse, clergyman, or officer of the health department in the discharge of duty.

SEC. 12. Any person found guilty of the violation of any of the foregoing regulations shall be punished for each offense by a fine not to exceed \$50 or by imprisonment in the District jail not to exceed thirty days, or by such fine and imprisonment, in the discretion of the court.

---

OCTOBER 25, 1894.

*Ordered,* That the plumbing regulations of the District of Columbia be amended by striking out section 33 of said regulations.

---

OCTOBER 26, 1894.

*Ordered,* That a copy of section 16 of article 10 of the police regulations of the District of Columbia be furnished to the president and principal local agent of each steam railroad in the District of Columbia, with the information that the requirement therein contained for the maintenance of gates or guards will be enforced, except where this police regulation is or may be modified to suit a particular case or cases; that the regulation about headlights or other equivalent reflecting lanterns will also be enforced; that forty days from this date action will be taken to enforce the requirement for the closure of steam railroad tracks by fences and the guarding of street crossings by gates where such do not now exist.

That hereafter the surveyor shall record all plats showing ground condemned for alley purposes referred to his office by the Commissioners.

---

NOVEMBER 5, 1894.

The major of police will report to the Commissioners as soon hereafter as practicable all cases of occupation of streets by stands or other structures or materials not authorized by law or the building regulations; the size, material, and other characteristics of each such stand or structure or the nature of other occupation; whether such use of the street continues after business hours; under what authority the

right to such use is claimed; the name of the user; whether the user pays rental or makes other compensation therefor; if so, what and to whom; and the name of the owner of the abutting property.

---

NOVEMBER 6, 1894.

*Ordered*, That section 3 of article 9 of the police regulations of the District of Columbia, made August 31, 1894, is hereby amended by adding thereto the following:

No musical instruments of any kind shall be played on Sunday in any of the places heretofore referred to in this section.

---

NOVEMBER 6, 1894.

Whereas the owners of the land required for the extension of North Capitol street object to the taking of their property and claim damages, and the Commissioners being unable to agree with said owners for the purchase of their land, it is—

*Ordered*, That the United States marshal for the District of Columbia be directed to summon a jury to assess the damages, if any, which said owners will sustain by the opening of said street.

---

NOVEMBER 9, 1894.

*Ordered*, That the regulations made October 24, 1894, to prevent the spread of smallpox are hereby amended by adding thereto the following:

SEC. 13. That the aforesaid regulations shall apply to all cases of smallpox, varioloid, or suspicious cases of disease not distinguishable from the aforesaid diseases; provided that the flag or warning placard shall be displayed only upon such premises as are known to be infected with smallpox or varioloid.

---

NOVEMBER 24, 1894.

*Ordered*, That John B. Brady, clerk in the inspector of buildings' office, is hereby appointed inspector of buildings, with compensation at the rate of \$2,400 per annum, vice Thomas B. Entwistle, deceased, appointment to take effect the 21st instant.

---

DECEMBER 7, 1894.

*Ordered*, That the order of September 9, 1885, making the assessor of the District of Columbia custodian of official bonds of officers of the District is hereby modified so as to make the auditor of the District custodian of said bonds.

---

DECEMBER 12, 1894.

*Ordered*, That section 3 of article 8 of the police regulations of the District of Columbia is hereby amended to read as follows:

No person shall, without previous lawful permit, construct, place, or leave in or upon any of such places as aforesaid any obstruction to travel or any deposit which may be dangerous to life or limb. Street railroad companies of the District of

Columbia will not be hereafter permitted to deposit upon any highway of said District any material to be used in the construction, alteration, repair, or removal of tracks or pavements unless specially authorized in each instance by the Commissioners so to do.

No structure to be used as a sign or advertisement of any sort shall be built, erected, or hung upon or from the roof or front of any buildings in the District of Columbia without a permit therefor first obtained from the inspector of buildings of said District; nor shall any such sign or advertisement project more than 3 feet 6 inches beyond the building line; nor shall any portion of any sign beyond the building line be less than 8 feet above the surface of the street; nor shall any box, board, or other sign, or form of any kind for a sign, be set up around or against any tree, lamp-post or other post, pole, or other object, or be placed elsewhere on any street, sidewalk, or other public space in said District, except when attached to buildings as hereinbefore limited, and any sign now erected or that may be erected on the top of or on the street front of any building, or attached to any awning frame, or other structure attached to such building shall be taken down and removed when rotten or unsafe, or when ordered by the inspector of buildings.

No carriage step shall be erected or located beyond the building line unless a permit therefor shall first have been obtained from the inspector of buildings of the District of Columbia. Carriage steps, when authorized, shall not exceed in dimensions  $3\frac{1}{2}$  feet by 20 inches, nor 8 inches in height, and in no case shall extend beyond the inner line of the curb.

No portion of any awning shall be erected or located beyond the building line unless a permit therefor shall first have been obtained from the inspector of buildings of the District of Columbia. Awning posts and frame shall be of iron. The posts shall be set in stone or iron blocks not less than 6 inches within the outer edge of the curb, and the frames must be firmly secured to the building; and in no case shall awnings now or hereafter erected interfere with street lamps or trees. On parked streets in front of business property awnings may be constructed to the outer edge of the parking, but in no case to exceed the distance of 15 feet to the building line. No part of the frame or canvas of an awning shall be less than 8 feet above the sidewalk. The fee for permits for awnings shall be \$1 for each awning.

Manure pits may be permitted below the surface of alleys that are 15 or more feet wide, but they shall not extend more than 4 feet beyond the building line. They must be constructed with brick walls, with granite coping not less than 8 by 9 inches thick, be covered close with heavy wrought-iron doors sufficiently strong to carry heavily loaded carts, wagons, or other vehicles, and ventilated through the contiguous stable by means of a flue constructed inside the stable or in the wall thereof and extending above its roof.

DECEMBER 12, 1894.

*Ordered,* That the schedule of limitations and provisions relative to the projection of portions of buildings beyond the building line, adopted as the basis of the concurrence of the Commissioners of the District of Columbia under the act of March 3, 1891, is hereby amended by adding after the word "openings," in the third paragraph under the head of "vaults," the following: "which must be covered with heavy cast-iron frames and covers set even with the surface of the sidewalk and so constructed as to avoid a smooth surface and to provide security to persons passing over them, and where intended to admit light, perforated with Hyatt or similar lights," so that said paragraph shall read:

Vaults in front of business property, the area shall be charged at the rate of 15 cents per cubic foot, and in front of dwellings at the rate of 10 cents per cubic foot; nor shall permit be issued until plan is submitted and approved showing openings, which must be covered with heavy cast-iron frames and covers set even with the surface of the sidewalk and so constructed as to avoid a smooth surface and to provide security to persons passing over them, and where intended to admit light, perforated with Hyatt or similar lights. Pavements over vaults must be constructed at the expense and risk of owner or owners of abutting property.

DECEMBER 18, 1894.

*Ordered,* That article 4 of the police regulations of the District of Columbia is hereby amended by the addition to section 7 thereof the following:

It shall be unlawful for the driver or owner of any carriage or other vehicle used for conveying persons to or from Albaugh's Opera House in the city of Washington, District of Columbia, to discharge or take up passengers at the Pennsylvania avenue entrance of said opera house; and during the time of performance in said opera house, if the drivers or owners of carriages or other vehicles desire to remain they shall stand their vehicles in Fifteenth street, south of Pennsylvania avenue, in such order as may be directed by the police department.

---

JANUARY 2, 1895.

*Ordered,* That the assessor of the District of Columbia is hereby directed to correct the assessment plats of properties abutting on Brightwood avenue, formerly known as Seventh street road, according to the opinion of the attorney of said District as to the legal width of said avenue or road, and for conformity to the Commissioners' orders of July 16, 1889, and December 13, 1892, concerning the location of the east line of said avenue and its width.

---

JANUARY 8, 1895.

The assessor is directed to correct the areas of all properties abutting on Brightwood avenue agreeably to this plat, being a correct copy of a map on file in the engineer's office, District of Columbia, and in conformity with the Commissioners' orders of July 16, 1889, December 13, 1892, and January 2, 1895, so that said avenue shall be 90 feet wide from the east line of said avenue, as established on the ground by the surveyor of the District of Columbia.

---

JANUARY 14, 1895.

*Ordered,* That the building regulations for the District of Columbia are hereby amended by adding to paragraph 3, section 8, the following:

Snow breaks or guards made of incombustible material shall be attached to all roofs that have an altitude equal to one-quarter or more of the width of the span of their respective buildings; and the inspector of buildings is hereby authorized to enforce this regulation and apply it to roofs of the character above named on all buildings now existing in the District of Columbia. All persons interested in such properties are hereby ordered to comply with this regulation within thirty days after receiving notification from the building inspector, and failure to do so will subject them to the penalties expressed in section 20 of these regulations.

---

JANUARY 14, 1895.

*Ordered,* That the major and superintendent of the Metropolitan police is hereby directed to remove all bootblack stands and other structures from any portion of the public streets, avenues, or public places in said District which are now occupied thereby in violation of law, and to prevent such illegal obstruction in the future.

JANUARY 15, 1895.

*Ordered*, That the order of December 18, 1894, amending article 4 of the police regulations of the District of Columbia is hereby amended to read as follows:

It shall be unlawful for the driver or owner of any carriage or other vehicle conveying persons from Albaugh's Opera House in the city of Washington, District of Columbia, to take up passengers at the Pennsylvania avenue entrance of said opera house; and during the time of the performance in said opera house if the drivers or owners of carriages or other vehicles desire to remain they shall stand their vehicles in Fifteenth street, south of Pennsylvania avenue, in such order as may be directed by the police department.

JANUARY 31, 1895.

Regulations requiring street cars in the District of Columbia to be provided with proper fenders:

1. On and after April 1, 1895, every grip and every motor car operated in the District of Columbia shall be fully equipped with front pick-up fenders of the Blackistone pattern, as shown by drawings on file in the office of the Commissioners of the District of Columbia: *Provided*, That any street railway company may substitute for the above any other fender which may hereafter be approved by the Commissioners of the District of Columbia.

2. On and after April 1, 1895, every grip and every motor car operated in the District of Columbia shall be fully equipped with wheel guard fenders of the "Brightwood automatic" pattern, or the "Blackistone" pattern, or the "Eldridge Smith" pattern: *Provided*, That any street railway company may substitute for the above any other wheel guard fender which may hereafter be approved by the Commissioners of the District of Columbia.

3. Any railroad company in the District of Columbia which shall, after April 1, 1895, operate any grip or motor car in the District of Columbia not fully equipped with fenders herein adopted or authorized shall be subject to a fine of \$25 per day for each and every car not so equipped and operated by said company.

4. On or before April 1, 1895, each railway company in the District of Columbia operating street cars requiring fenders shall, after thirty days' notice from the Commissioners of the District of Columbia, remove from its tracks all permanent obstructions projecting above the general surface of the pavement which prevent the satisfactory action of the wheel guard fenders herein adopted or authorized or increase danger to life or limb.

5. Any railroad company failing to comply with the above requirements shall be subject to a fine of \$5 a day for every such obstruction not so removed upon and after the date above specified.

6. On or before April 1, 1895, every cable and every motor car operated in the District of Columbia must be so constructed or altered that a clear space of 15 inches in height above the rails is provided between the wheel guard and the adjacent end of the car, in order to allow the effective action of the wheel guard.

7. Any railway company failing to comply with the above requirement shall be subject to a fine of \$5 a day for each car not so constructed or altered and operated by it upon and after the date above specified.

8. After the fenders are placed upon the cars, they must be kept in thorough working order and in good repair at all times during the use of such cars. Any railroad company failing to comply with this provision shall be subject to a fine of \$20 a day for each offense.

MARCH 6, 1895.

*Ordered*, That the sealer of weights and measures is hereby directed and empowered to make the same inspections and charge the same fees as has heretofore been done, and is especially directed to examine all counter scales and collect a fee of 25 cents for each six months, and all counter platform scales and collect a fee of 50 cents for all with a less capacity than 200 pounds each six months, and \$1 for those of 200 pounds or more each six months.

MARCH 9, 1895.

*Ordered*, That all official acts of the Commissioners be promptly given to the press by the secretary of the Board.

No employee in the District building except the secretary of the board will be allowed to give out any information for publication.

Reports, opinions, and recommendations of heads of departments or employees will not be given out for publication, or otherwise made public, until formally acted upon by the Board of Commissioners.

Letters received are not to be given out for publication, or otherwise made public, except upon order of the Board of Commissioners.

MARCH 9, 1895.

[Act of March 4, 1895.]

SEC. 4. That the Commissioners of the District of Columbia are hereby empowered and directed to prescribe a schedule of fees to be charged by the sealer of weights and measures for his services, in lieu of the fees now charged, which schedule shall be printed and conspicuously displayed in the office of the sealer of weights and measures. Such schedule of fees shall be so arranged as to provide as nearly as may be for all the salaries and expenses connected with the office of the sealer of weights and measures, and no more.

*Ordered*, That the sealer of weights and measures is hereby directed and empowered to make the following examination of all scales, weights, and measures in the District of Columbia, and charge and collect the following fees:

|   |         |
|---|---------|
| Coal, hay, and wagon scales, semiannually.....                    | \$2. 00 |
| Counter platform scales, semiannually.....                        | 1. 00   |
| Platform scales under 200 pounds, semiannually.....               | .50     |
| Platform scales over 200 pounds, semiannually.....                | 1. 00   |
| Potato scales, semiannually.....                                  | .25     |
| Counter scales, semiannually.....                                 | .25     |
| Spring-balance scales, quarterly.....                             | .25     |
| Large railroad scales, semiannually, a fee for first 10 tons..... | 2. 00   |
| (And 25 cents per ton to capacity.)                               |         |
| All weights sealed.....   | .10     |
| All dry measures, size of half bushel and less.....               | .10     |
| All dry measures over half bushel.....                            | .25     |
| All liquid measures of 1 gallon or less.....                      | .10     |
| All liquid measures over 1 gallon.....                            | .25     |
| All yard measures, annually sealed.....                           | .10     |

MARCH 12, 1895.

That section 3 of article 8 of the police regulations of the District of Columbia is hereby amended to read as follows:

No person shall, without previous lawful permit, construct, excavate, place, or leave, or cause to be constructed, excavated, placed, or left, in or upon any public space any obstructions to travel; or place, leave, or cause to be placed or left thereon any deposit which may be dangerous to life and limb.

No structure to be used as a sign or advertisement of any sort shall be built, placed, erected, or hung upon or from the roof or outer wall of any building without a permit therefor be first issued by the inspector of buildings. Nor shall any such sign or advertisement project more than 3 feet 6 inches beyond the building line. No portion of any sign projecting beyond the front building line shall be less than 8 feet above the surface of the sidewalk, nor less than 14 feet if projecting from an alley wall: *Provided*, That the said restrictions as to height and distance shall not apply to signs securely attached to and wholly in contact with the building wall. Any sign now erected on the top of or on the outer wall of any building, or attached to a projection thereto, shall be removed when rotten or unsafe, or when ordered to be removed by the inspector of buildings.

No lamp-post, pole, hitching post, carriage block, or other authorized structure on the sidewalk or roadway shall be painted, ornamented, or lettered as a sign or advertisement.

Awnings beyond the building line no part of which is less than 8 feet above the sidewalk may be erected under permits issued by the building inspector. Posts and frames of awnings shall be of iron; the frame must be securely attached to the building; the posts shall be set in iron or stone blocks, and the posts of sidewalk awnings shall not be more than 18 inches from the outer edge of the curb. In no case shall awnings now or hereafter erected interfere with street lamps or trees.

Temporary covered ways across sidewalks and parkings may be permitted by the superintendent of police. Such covered ways shall afford a free passage of at least 6 feet in width along the middle of the pavement.

Carriage blocks, hitching posts along the inner edge of the curb, hitching rings in the curb or in iron or stone blocks next to the curb, clocks for keeping time, and lamps showing white lights may be placed or erected on or over the sidewalk according to regulations of the engineer department and under permits issued at the permit office, the fee for which in each case shall be \$1. Carriage blocks shall not exceed in dimensions 30 inches by 15 inches by 8 inches in height, and shall not extend beyond the inner line of the curb.

---

MARCH 22, 1895.

In view of the decision of Mr. Justice Bradley, of the supreme court of the District of Columbia, rendered February 2, 1895, in the case of *Martha W. Goddard v. The District of Columbia*, to the effect that where Potomac water has been turned off because of the failure of the user to pay the water rent the Commissioners have no right to refuse to turn on the water for another user for the unexpired portion of the fiscal year, or to impose any condition upon the use of the water except the rate for such unexpired term and such expense as may be equal to the mechanical act of turning on the water, and of such other expenses as may be necessary to turn the water on, it is—

*Ordered*, That the fee for turning on the water in such cases shall be fixed at \$1, to which shall be added the cost of repairing pavements when it has been necessary to cut the same to turn off and on the water from the street

---

MARCH 22, 1895.

*Ordered*, That section 15 of article 10 of the police regulations of the District of Columbia is hereby amended by the addition thereto of the following:

That engineers of steam railway trains, or engines, coming into Washington City on the Washington Branch of the Baltimore and Ohio Railroad, before crossing H street shall bring their trains or engines to a full stop immediately north of said street, and not attempt to cross it until so directed by the conductor or brakeman in charge of the train or engine, who shall be satisfied from personal observation that the street may be crossed with safety.

APRIL 1, 1895.

Whereas the Commissioners of the District of Columbia were authorized by an act approved March 2, 1895, to make necessary regulations for the collection and disposition of garbage in said District and to annex thereto such penalties as will secure the enforcement thereof, the following regulations, to take effect May 1, 1895, are hereby promulgated for the guidance of all concerned:

It is hereby ordered that:

SECTION 1. The word garbage, where it occurs in these regulations, shall be held to mean the refuse of animal or vegetable matter which has been used or intended for food.

SEC. 2. Occupants of dwelling houses, proprietors of boarding houses, commission houses, hotels, restaurants, and other places where garbage is accumulated, and owners or occupants of apartment or tenement houses shall provide for the use of such premises a sufficient number of water-tight metal receptacles to contain all garbage which may accumulate on said premises during the usual interval between the collections of garbage therefrom, and shall keep such receptacles at all times water-tight and in good repair. Each such receptacle shall have a tight cover provided with a handle. No person without a permit from the health officer shall use for the reception of garbage any receptacle having a capacity of less than 3 or more than 10 gallons nor more than one receptacle containing less than 10 gallons.

SEC. 3. Occupants of any dwelling house, apartment or tenement house, and each proprietor of any boarding house, commission warehouse, hotel, restaurant, and other place where garbage is accumulated shall cause all garbage from his or her premises to be put into the receptacles provided for the purpose. Each person aforesaid shall cause such receptacle to be kept covered at all times and to be placed and to remain between the hours of 7 o'clock p. m. of each day on which the collection is made from his or her premises in such position as to be easily accessible to the garbage collector, or as may be designated by the health officer.

No person shall place or cause to be placed in any garbage receptacle any substance other than garbage.

SEC. 4. It shall be the duty of any person or persons having possession, custody, or care of meat, fish, vegetables, or provisions of any kind intended for sale as food, but which has become unfit for such use, to forthwith remove such meat, fish, vegetables, or provisions to such place as has been designated by the health officer for such purpose.

It shall be unlawful for any person or persons to knowingly bring or cause to be brought into the District of Columbia any diseased, spoiled, or decayed meat, fish, vegetables, or provisions of any kind intended for food.

SEC. 5. No driver, owner, or superintendent having charge or control of any cart or other vehicle for carrying garbage shall allow such cart or vehicle to needlessly remain nor allow a needless number of such carts or vehicles to gather before any residence, building, or place of business within the city of Washington or the more densely populated suburbs thereof, nor allow any such cart or vehicle or implement used in connection therewith to be stored or kept in any place where needless offense is given to any person or persons. No driver of any such cart or vehicle shall occupy any unreasonable length of time in loading or unloading such cart or vehicle, or in passing along any alley, street, avenue, or public road; nor allow the lid or cover of such cart or vehicle

to be otherwise than securely closed, except as may be necessary for the loading or unloading and cleaning of such cart or vehicle.

SEC. 6. No person other than the owner or authorized collector shall interfere with or disturb any garbage after it shall have been put in a garbage receptacle and placed in an accessible place for collection; nor shall any unauthorized person molest, hinder, delay, or in any other manner interfere with any garbage collector in the discharge of his duty.

SEC. 7. No person or persons other than such as hold permits from the health officer shall haul any garbage through or over any street, alley, or avenue in the city of Washington or its more densely populated suburbs, and each cart or other vehicle used for such purpose shall have the word "garbage" and the number of the permit in large white letters on a black ground plainly painted or attached to each side of the wagon bed. No cart or other vehicle shall be used for the collection of garbage except such as are water-tight and provided with tight-fitting covers and such as have been approved by the health officer.

SEC. 8. Any person violating any of the provisions of these regulations shall, on conviction thereof in the police court, be punished by a fine of not less than \$5 nor more than \$50 for each and every offense, and in default of payment of such fine shall be imprisoned in the work-house of the district of Columbia for not more than thirty days.

---

APRIL 8, 1895.

*Ordered,* That paragraph 8 of section 11 of the building regulations for the District of Columbia is hereby amended by adding after the words bath house, in line 14 thereof, the following:

*Provided,* That these restrictions as to size of the additions to existing frame buildings shall not apply beyond the boundary line of the city on lots 50 feet or more in width and where such additions will not be within 25 feet of any other building.

---

APRIL 29, 1895.

That the provisions of the first five sections of "An act for the removal of snow and ice from the sidewalks, crossings, and gutters in the cities of Washington and Georgetown, and for other purposes," approved March 2, 1895, are hereby extended over and made applicable to all of the District of Columbia.

---

APRIL 30, 1895.

*Ordered,* That section 19 of the building regulations of the District of Columbia is hereby amended by striking out the words "city of Washington" wherever they occur in the caption or body of said section and inserting in lieu of said words, in paragraph 1 of said section, the words "District of Columbia;" also inserting after the word "amusement," in the caption, preamble, and paragraph 1 of said section, the words "or assembly."

*Ordered,* That paragraph 3 of section 14 of the building regulations of the District of Columbia is hereby amended by adding the words "fronting a street or avenue" after the word "dwelling" in the fifth line thereof, and by adding the words "fronting a street or avenue. Buildings of the character named in this paragraph may be located within 30 feet of dwellings fronting on alleys, provided the written consent of the owners of such dwellings be first obtained and filed in the office of the inspector of buildings" after the words "dwelling house" in the sixth line thereof.

MAY 6, 1895.

*Ordered,* That the regulations for the collection and disposal of garbage, as promulgated April 1, 1895, be amended as follows:

That the following sections be inserted in the places indicated by the numbers, and that all sections after them be renumbered so as to correspond:

SEC. 4. Owners of premises from which garbage is to be removed having street and alley entrances shall place conspicuously at the alley entrance thereof the street and number designations in letters and figures, respectively, not less than 2 inches in height, so as to be easily read.

SEC. 5. It shall be unlawful for any person to alter, deface, or destroy any name of any street or number required to be displayed by these regulations.

MAY 20, 1895.

*Ordered,* That paragraph 10 of the general orders, made December 6, 1888, to regulate the future platting and subdividing of all lands and grounds in the District of Columbia is hereby amended by adding thereto the following: "Unless it be an extension of an existing minor street of not less than 50 feet in width, in which case it may conform in width to the portion already laid out," so that said paragraph shall read as follows:

No minor street in a square shall be less than 60 feet in width, unless it be an extension of an existing minor street of not less than 50 feet in width, in which case it may conform in width to the portion already laid out.

MAY 23, 1895.

*Ordered,* That hereafter all ordinary requisitions for general supplies shall be filled upon the approval of the auditor and the property clerk, except in cases where either of the said officers shall be in doubt as to the propriety or expediency of any requisition, when the item or items in question shall be submitted to the consideration of the Commissioners.

MAY 22, 1895.

*Ordered,* That paragraph 3 of section 11 of the building regulations of the District of Columbia, made May 2, 1894, is hereby amended by adding after the word "limits," in the second line thereof, the words "except in cases of removal of houses which have not depreciated over one-third of their original value, and where the written consent is obtained of the owners of property within 50 feet of the proposed location."

MAY 28, 1895.

Section 2 of article 6 of the police regulations in and for the District of Columbia, made August 31, 1894, is hereby amended to read as follows:

SEC. 2. Horses and mules shall not be driven loosely through any city street under any circumstances, but may be conducted in droves of not more than six, haltered together and in charge of at least one man holding the halter of the near animal of the drove, but such droves shall not be conducted along or over unpaved streets in the city, except by special permit from the major and superintendent of police. No horse, mule, sheep, swine, dog or bitch, bovine or other cattle, shall be allowed to run at large in the District of Columbia, and any person owning or harboring any such animal who shall suffer or permit the same to wander, rove, or run at large unrestrained, shall, upon conviction thereof before the police court of said District, be fined as hereinafter provided, with costs of prosecution for each offense.

JUNE 4, 1895.

*Ordered,* That section 16 of article 10 of the police regulations in and for the District of Columbia, made August 31, 1894, is hereby amended by the insertion of the word "roads" after the word "with," in the fourth line thereof, so that the first sentence of said section shall read as follows:

Whenever the grade of a steam railway track is approximately even with the adjacent surface, the line of the road shall be securely closed on both sides with a substantial fence, and all grade crossings or intersections of any steam railroad track with roads, streets, or avenues shall be securely guarded by a suitable gate or guard erected and maintained by the company owning or operating such track.

JUNE 8, 1895.

*Ordered,* That the channel conveying the sewer from Boundary sewer to Anacostia River be regulated and excavated as shown on the tracing accompanying L. R. 2466 E. D. 1895; the work to be done by the "chain gang" under the supervision of an inspector of the sewer department; the necessary expenses of the work to be defrayed from the appropriation for cleaning and repairing sewers and basins for the next fiscal year.

JUNE 18, 1895.

The work of removing the parking and paving the space in the center of New York avenue between Ninth and Tenth streets NW., authorized by act of Congress approved September 7, 1894, having been completed and the cost having been ascertained to be \$2,716.18, one-half of which (\$1,358.09) is to be assessed against the abutting property, the special-assessment division is hereby ordered to make said assessment.

JUNE 25, 1895.

*Ordered,* That paragraph 3 of the orders made December 6, 1888, pursuant to the requirements of "An act to regulate the subdividing of land within the District of Columbia," is hereby amended by adding thereto the following:

No fee shall be charged for tax certificates issued by the assessor, when called for by the Commissioners, to enable persons proposing to subdivide property to meet the requirements of this paragraph, in cases where there are no overdue taxes or assessments against such property, but the usual fee shall be charged in every such case where overdue taxes or assessments appear.

JUNE 26, 1895.

*Ordered,* That the following regulations made by the health officer of the District of Columbia, pursuant to the requirements of section 11 of "An act to regulate the sale of milk in the District of Columbia, and for other purposes," are hereby approved:

## REGULATIONS FOR GOVERNMENT OF DAIRY FARMS IN THE DISTRICT OF COLUMBIA.

SECTION 1. No building shall be used for stabling cows for dairy purposes which is not well lighted, ventilated, drained, and constructed.

SEC. 2. No building shall be used for stabling cows for dairy purposes which is not provided with a suitable floor, laid with proper grade and channels to immediately carry off all drainage; and if a public sewer abuts the premises upon which such building is situated, they shall be connected therewith whenever in the opinion of the health officer such sewer connection is necessary.

SEC. 3. No building shall be used for stabling cows for dairy purposes which is not provided with good and sufficient feeding troughs or boxes and with a covered water-tight receptacle outside of the building for the reception of dung and other refuse.

SEC. 4. No water-closet, privy, cesspool, urinal, inhabited room, or workshop shall be located within any building or shed used for stabling cows for dairy purposes, or for the storage of cream, nor shall any fawn, horse, hog, sheep, or goat be kept in any room used for such purposes.

SEC. 5. The space in buildings or sheds used for stabling cows shall not be less than 500 cubic feet for each cow, and the stalls therefor shall not be less than 4 feet in width.

SEC. 6. It shall be the duty of each person using any premises for keeping cows for dairy purposes to keep such premises thoroughly clean and in good repair and well painted or whitewashed at all times.

SEC. 7. It shall be the duty of each person using any premises for keeping cows for dairy purposes to keep such premises thoroughly cleaned and to remove all dung from the premises so as to prevent its accumulation in great quantities.

SEC. 8. It shall be the duty of any person having charge or control of any premises upon which cows are kept to notify the health officer in writing of the existence of any contagious or infectious disease among such cows within twenty-four hours of the discovery thereof, and to thoroughly isolate any cow or cows affected or which may reasonably be believed to be infected, and to exercise such other precautions as may be directed in writing by the health officer.

SEC. 9. Any person using any premises for keeping cows for dairy purposes shall provide and use a sufficient number of receptacles made of nonabsorbent material for the reception, storage, and delivery of milk, and shall cause them at all times to be cleansed and purified, and shall cause all milk to be removed without delay from the rooms in which the cows are kept.

SEC. 10. Every person keeping cows for the production of milk for sale shall cause every such cow to be cleansed every day and to be properly fed and watered.

SEC. 11. Every person using any premises for keeping cows shall cause the yard used in connection therewith to be provided with a proper receptacle for drinking water for such cows, none but fresh, clear water to be used in such receptacle.

SEC. 12. Any inclosure in which cows are kept shall be graded and drained so as to keep the surface reasonably dry and to prevent the accumulation of water therein, except as may be permitted for the purpose of supplying drinking water. No garbage, urine, fecal matter, or similar substances shall be placed or allowed to remain in such inclosure, and no open drain shall be allowed to run through it.

SEC. 13. These regulations shall apply to all premises upon which cows' milk is produced for sale.

SEC. 14. Any person violating any of these regulations shall, on conviction in the police court of said District, be punished by a fine of not less than \$5 nor more than \$10 for each and every offense, to be collected as other fines and penalties are collected.

## REPORT OF THE OPERATIONS OF THE SURFACE DEPARTMENT.

SUPERVISION OF ROADWAY IMPROVEMENTS, SIDEWALKS, PARKINGS, RIVER FRONT, BRIDGES, SUBDIVISION OF LAND, RAILWAYS, OVERHEAD ELECTRIC LINES, AND TESTING OF ENGINEERING MATERIALS.

Capt. G. J. FIEBEGER,

*Corps of Engineers, United States Army, Assistant to the Engineer Commissioner, in charge.*

GEORGE H. BAILEY,  
*Computing Engineer.*

GEORGE N. BEALE,  
*Superintendent of County Roads.*

WILLIAM P. RICHARDS,  
*In Charge of Surveys.*

E. Y. BEGGS,  
*General Inspector.*

H. N. MOSS,  
*Superintendent of Streets.*

CONWAY B. HUNT,  
*Engineer of Bridges.*

TRUEMAN LANHAM,  
*Superintendent of Parking.*

A. W. DOW,  
*Inspector of Asphalt and Cements.*

WILLIAM FORSYTH, *Surveyor.*

## REPORT OF ASSISTANT IN CHARGE.

WASHINGTON, D. C., August 1, 1895.

SIR: I have the honor to submit the following report of the operations of the surface department for the fiscal year ended June 30, 1895. The nature of the work is shown in the following statement of appropriations and expenditures:

| Nature of work.  | Appropriation,<br>1894-95. | Expenditures<br>and<br>liabilities. |
|--|----------------------------|-------------------------------------|
| For work on streets and avenues.....   | \$145,750.00               | \$145,750.00                        |
| Construction of county roads and suburban streets.....                                   | 68,590.00                  | 66,230.60                           |
| Improvements and repairs of alleys and construction of sidewalks<br>(permit system)..... | 135,000.00                 | 134,773.88                          |
| Repairs to concrete pavements.....   | 150,000.00                 | 149,994.36                          |
| Repairs to streets, avenues, and alleys.....   | 35,000.00                  | 34,901.60                           |
| Repairing sidewalks and curbs.....   | 5,000.00                   | 5,000.00                            |
| Repairs to county roads.....   | 40,000.00                  | 39,943.56                           |
| Care of bridges.....   | 15,000.00                  | 14,618.65                           |
| Surveys on account of subdivision of land.....   | 2,500.00                   | 2,499.28                            |
| Parking commission.....  | 15,000.00                  | 15,000.00                           |
| Contingent expenses, engineer stables.....   | 5,500.00                   | 5,494.86                            |
| Rent of property yard.....   | 300.00                     | 300.00                              |
| Board of examiners, steam engineers.....   | 900.00                     | 900.00                              |
| Surveyor's office, from March 2, 1895.....   | 4,000.00                   | 3,953.19                            |

## WORK ON STREETS AND AVENUES.

The following summary shows the amount of work done since the last annual report:

|   |                |           |
|---|----------------|-----------|
| Sheet asphalt on concrete, 6-inch base..... | square yards.. | 32,868.05 |
| Sheet asphalt on concrete, 4-inch base..... | do.....        | 1,842.32  |
| Sheet asphalt on cobble base.....           | do.....        | 3,984.36  |
| Sheet asphalt on macadam base.....          | do.....        | 4,076.51  |
| Asphalt block.....                          | do.....        | 5,729.25  |
| Granite block.....                          | do.....        | 561.00    |
| Brick sidewalk laid and relaid.....         | do.....        | 1,454.32  |

|                                   |                |           |
|-----------------------------------|----------------|-----------|
| Curb laid and relaid.....         | linear feet..  | 24,805.01 |
| Cobble gutters and crossings..... | square yards.. | 8,400.32  |
| Vitrified block gutters.....      | do.....        | 4,609.24  |
| Cobble removed.....               | do.....        | 17,054.79 |
| Old curb removed.....             | linear feet..  | 8,718.35  |
| Grading, earth.....               | cubic yards..  | 1,777.00  |
| Grading, macadam.....             | do.....        | 3,210.00  |
| Gravel roadway.....               | square yards.. | 25,366.32 |

This work was all done by contract, at the following prices:

|   |                 |
|---|-----------------|
| Sheet asphalt on 6-inch concrete base, exclusive of grading, per square yard.....           | \$1.68          |
| Sheet asphalt on 4-inch concrete base, exclusive of grading, per square yard.....           | 1.53            |
| Sheet asphalt on cobble base, exclusive of grading, per square yard.....                    | .45             |
| Asphalt block on concrete base, exclusive of grading, per square yard.....                  | 2.25            |
| Asphalt block on gravel base, exclusive of grading, per square yard.....                    | 1.78            |
| Granite block on gravel base, exclusive of grading and cost of blocks, per square yard..... | .98             |
| Relaying brick sidewalk, exclusive of grading, per square yard.....                         | .25             |
| 6 by 20 granite curb set, exclusive of grading, per linear foot.....                        | .15             |
| 6 by 20 granite curb delivered at property yard, per linear foot.....                       | .90             |
| 8 by 8 granite curb set on 6-inch concrete base, per linear foot.....                       | .32             |
| 8 by 8 granite curb delivered at property yards, per linear foot.....                       | \$0.67½ to .70½ |
| Resetting 6 by 20 granite curb, per linear foot.....  | .08             |
| Cobble gutters, exclusive of material, per square yard.....                                 | .35             |
| Vitrified block gutters of 6-inch concrete base, exclusive of cost of blocks.....           | 1.00            |
| Vitrified block delivered at property yard, per M.....                                      | 22.50           |
| Cobble taken up and removed to property yard, per square yard...                            | .12             |
| Curb taken up and removed to property yard, per linear foot.....                            | .06             |
| Grading, earth, 2,500-foot haul, per cubic yard.....  | .17 to .30      |
| Grading, macadam, 2,500-foot haul, per cubic yard.....                                      | .50             |
| Hauling earth and macadam, each 500 feet, over first 2,500 feet, per cubic yard.....        | .07½ to .22½    |
| Bluestone curb set, per linear foot.....  | .08             |

The price paid for sheet asphalt pavement during the present fiscal year is the lowest price ever paid for similar work in the District. This was due to competition between the companies using Trinidad Lake and those using Bermudez asphalt.

#### CONSTRUCTING COUNTY ROADS AND SUBURBAN STREETS.

The following table gives a summary of the amount of work done on these roads and streets during the fiscal year 1895:

|                                   |                |           |
|-----------------------------------|----------------|-----------|
| Sheet asphalt on 6-inch base..... | square yards.. | 742.32    |
| Sheet asphalt on 4-inch base..... | do.....        | 4,405.91  |
| Macadam.....                      | do.....        | 10,081.56 |
| Gravel.....                       | do.....        | 11,333.88 |
| Grading.....                      | cubic yards..  | 71,351.00 |

The most important improvements under this appropriation were the widening of Eighteenth street NW. between Florida avenue and Columbia road; the widening of Fourteenth street extended between Kenyon street and Whitney avenue, and the grading and graveling of Sherman avenue.

#### GRADING STREETS, ALLEYS, AND ROADS.

This appropriation is for the hire of carts, purchase of tools, etc., for the use of the chain gang, which is employed in grading unimproved streets. During the fiscal year the following streets were thus improved:

M street extended NE.; Fifteenth street E.; D street, Tenth to Fifteenth street SE.; Fourteenth street, Pennsylvania avenue to K street

SE.; K street SE., Fourteenth to Fifteenth street; Nineteenth street, A to B street SE., and C street, Sixteenth to Seventeenth street NE.

IMPROVEMENT AND REPAIR OF ALLEYS AND SIDEWALKS AND CONSTRUCTION OF SEWERS AND SIDEWALKS (PERMIT SYSTEM).

The following table gives a summary of the work done in improving alleys and sidewalks:

|                                     | Regular. | Assessment. | Total. |
|-------------------------------------|----------|-------------|--------|
| Asphalt block.....square yards..    | 116      | 5,740       | 5,856  |
| Granite block repaved.....do.....   |          | 68          | 68     |
| Vitrified brick repaved.....do..... | 8        |             | 8      |
| Vitrified block.....do.....         | 8        | 14,290      | 14,298 |
| Cobble.....do.....                  | 166      | 196         | 362    |
| Curb set.....linear feet..          | 5,937    | 11,633      | 17,570 |
| Curb reset.....do.....              | 1,562    | 8,989       | 24,651 |
| Flag relaid.....do.....             | 464      | 42          | 506    |
| Granolithic walk.....square yards.. | 10,657   | 18,316      | 28,973 |
| Asphalt tile walk.....do.....       | 303      | 111         | 414    |
| Brick walk laid.....do.....         | 4,193    | 15,860      | 20,053 |
| Brick walk relaid.....do.....       |          | 23,772      | 23,772 |
| Grading.....cubic yards..           | 6,173    | 10,770      | 16,943 |

New sidewalks are paved with granolithic mixture, asphalt tile, or ordinary paving brick; alleys are paved with asphalt block, vitrified paving brick, and block. The average cost of these improvements is as follows: Granolithic walk, \$1.44 per square yard; asphalt-tile walk, \$1.50 per square yard; paving-brick walks, 70 cents per square yard; asphalt-block pavement, \$2.10 per square yard, and vitrified brick and block pavement, \$1.96 per square yard.

Nearly three times as many square yards of granolithic sidewalks were laid during the fiscal year as during any previous year.

The alley pavements which have been heretofore laid by hired labor were this year laid by contract.

A comparison with previous years shows that the vitrified-block pavements have cost about 20 cents more per square yard, while the asphalt-block pavements have cost the same as heretofore.

REPLACING SIDEWALKS AND CURB AROUND PUBLIC RESERVATIONS.

Under this appropriation new granolithic sidewalks were laid on the north side of Pennsylvania avenue between Thirteenth and Thirteen-and-a-half streets; on the east side of Fifth street between F and G streets NW. (bordering Judiciary Square); on the south side of K street (bordering McPherson Square); intersection of Rhode Island avenue and M street; on the east side of Twentieth between Q street and Connecticut avenue. The sidewalks on Seventh street through the Mall and around Dupont and Iowa circles were repaired out of the same appropriation.

REPAIRS TO CONCRETE PAVEMENTS.

The term "concrete pavements" is applied to all the smooth pavements of the city, whether coal-tar distillate, asphalt, or asphalt block. On July 1, 1894, the total area of these pavements was 2,521,839 square yards.

The age of these pavement and the cost of repairs are given in the following tables:

Area of concrete pavements.

| Calendar year. | Coal tar.       | Asphalt.        | Asphalt block.  | Total.          | Calendar year. | Coal tar.       | Asphalt.        | Asphalt block.  | Total.          |
|----------------|-----------------|-----------------|-----------------|-----------------|----------------|-----------------|-----------------|-----------------|-----------------|
|                | <i>Sq. yds.</i> | <i>Sq. yds.</i> | <i>Sq. yds.</i> | <i>Sq. yds.</i> |                | <i>Sq. yds.</i> | <i>Sq. yds.</i> | <i>Sq. yds.</i> | <i>Sq. yds.</i> |
| 1871 .....     | 17,017          | .....           | .....           | 17,017          | 1885 .....     | .....           | 32,497          | 8,934           | 41,431          |
| 1872 .....     | 163,991         | .....           | .....           | 163,991         | 1886 .....     | 6,055           | 6,041           | 38,140          | 50,236          |
| 1873 .....     | 279,578         | 4,540           | .....           | 284,118         | 1887 .....     | 112,203         | 15,993          | 37,957          | 166,153         |
| 1874 .....     | 29,614          | 7,188           | .....           | 36,802          | 1888 .....     | 10,100          | 42,290          | 7,834           | 60,224          |
| 1875 .....     | 179,658         | 7,203           | .....           | 186,861         | 1889 .....     | 13,222          | 109,072         | 53,508          | 175,802         |
| 1876 .....     | 14,755          | 58,904          | .....           | 73,659          | 1890 .....     | .....           | 115,232         | 25,229          | 140,461         |
| 1877 .....     | 84,319          | 26,436          | .....           | 110,755         | 1891 .....     | .....           | 147,900         | 51,164          | 199,064         |

To the above must be added 82,177 square yards of asphalt laid by private parties, of which the office has no accurate record.

Of the coal-tar pavement there are now remaining only 502,683 square yards, the old pavement having been resurfaced with sheet asphalt.

Cost of maintaining concrete pavements.

The increased cost of resurfacing during the fiscal year was due to the fact that many of the old coal-tar pavements were so much out of shape that it became necessary to wholly remove and relay them with new pavements.

CURRENT REPAIRS TO STREETS, AVENUES, AND ALLEYS.

This appropriation provides for the repairs of all roadway pavements other than those paved with asphalt or coal tar, all alley pavements not relaid under the permit system, sidewalks around public reservations, all repairs made necessary by the growth of trees, and all cuts made by the sewer department. This work is done by hired labor. A detailed statement of work under this appropriation will be found in the report of the superintendent of streets.

## REPAIRS TO COUNTY ROADS.

An itemized list of expenditures during the fiscal year may be found in the report of the superintendent of county roads, Mr. George N. Beale. The work consisted in making general repairs on all the county roads and suburban streets in the District, viz, macadamizing and graveling, repairing washouts, cleaning gutters, repairing culverts, sprinkling, etc.

## CARE OF BRIDGES.

The principal work of the year was the replacement of two old-style wooden bridges by steel-girder constructions. The remainder of the appropriation was used in making ordinary repairs upon the sixty-five bridges now under charge of this department. A detailed statement of expenditures may be found in the report of the engineer of bridges.

## PARKING COMMISSION.

The work of the parking commission consisted principally in taking care of the 75,000 trees which now line the city streets. Six hundred and forty new trees were planted and 580 dead trees were removed from the streets. The entire appropriation was expended within the city limits, as the amount did not warrant undertaking improvements in the suburbs. A full report of the operations may be found in the report of the superintendent of the parking commission.

## SURVEYS ON ACCOUNT OF SUBDIVISIONS OF LAND.

During the fiscal year the following subdivisions have been put on record: Garfield Heights, Congress Heights, Mills's estate, Girls' Portion, and Clermont—about 105 acres in all.

## SURVEYOR.

Upon March 1, 1895, the "Act making the surveyor of the District of Columbia a salaried officer and to provide for a more efficient service in the surveyor's office" received the approval of the President. The deficiency act approved March 2, 1895, appropriated \$3,500 for the salaries and \$500 for contingent expenses for the remainder of the fiscal year. In accordance with the above act, upon March 23, 1885, the Commissioners approved a schedule of fees to be charged by that office. Since the passage of the act, the surveyor has made over thirty official surveys for the United States and the District of Columbia, thereby settling many disputed points. At his request, he is now furnished a list of all improvements, so that pegs and benches which would be disturbed by the improvement of roadways and pavements may be properly located before the improvement is made. Heretofore nearly all points of reference have been marked with wooden pegs, which are liable to be destroyed; it is proposed, as soon as money becomes available, to mark points of reference for every square with durable metal stakes.

STREET AND STEAM RAILWAYS.

The following table shows the street railways in actual operation July 1, 1895:

| Name.                             | Mileage operated.        |         |                                  |         | Motive power.       |

At the last session of Congress the following acts affecting street railroads were passed:

Public act No. 75: "An act authorizing the Metropolitan Railway Company to lay a single track upon L, Water, and P streets southwest; to lay a single track upon P, Thirty-sixth, Prospect, and Thirty-fifth streets, Georgetown; requiring the Brightwood, Rock Creek, Georgetown, and Tennallytown railway companies to sell four coupon tickets for twenty-five cents, good for one continuous ride in the District of Columbia over the lines of said companies and the Metropolitan Railroad Company; authorizing the Metropolitan and Rock Creek railroad companies to contract with each other for the purchase, sale, lease, or joint operation of the line on Florida avenue and U street, or any part thereof."

Public act No. 89: "An act authorizing the Rock Creek Railroad Company to contract with any street railway company owning or operating a connecting or intersecting line for the joint management, lease, or purchase of such connecting or intersecting line and operating the same in connection with its original line: *Provided*, That only one fare, not exceeding the rate now authorized by law, shall be charged for a single continuous ride in the District of Columbia over the lines affected by such contract, or any part thereof. In the event that said company enter into such contract the company is authorized to change its name to the Capital Traction Company."

Public act No. 99: "An act amending the charter of the Maryland and Washington Railway Company, authorizing said company to institute proceedings for the condemnation of so much land as may be required for the extension of Rhode Island avenue: *Provided*, That the strip so to be acquired by condemnation shall be one hundred and thirty feet in width, and shall be located according to the official plats for the extension of Rhode Island avenue: *And provided further*, That all the land within the line of the proposed extension of Rhode Island avenue which shall be acquired by purchase or condemnation shall, by appropriate conveyance, be dedicated before tracks are laid therein. That the line of said railway company from Fourth street northeast extended to a point at or near the intersection of Rhode Island avenue extended shall be commenced within six months and completed within twelve months from March second, eighteen hundred and ninety-five. That the company is authorized to extend its line along Rhode Island avenue to North Capitol street, and thence south over the line of the Eckington and Soldiers' Home Railway Company to F street."

Public act No. 100: "An act to authorize the Washington and Marlboro Railroad Company of Maryland to extend its line into and within the District of Columbia."

Public act No. 101: "An act to incorporate the Capital Railway Company."

During the fiscal year the transformation of the Columbia Railway into a cable railway was completed. The work was well done, and the streets through which it passes are now all in good condition. The pavement between the rails is vitrified brick and between tracks sheet asphalt. Two longitudinal courses of brick are laid adjacent to the rails. Wherever possible, projections above the pavement upon this road were avoided, and, in consequence, the streets have been left in a better condition than by any previous conduit railway company.

During the year the transformation of the Ninth street line of the Metropolitan Railway into a conduit electric road was begun and nearly completed. For future reference, the following description of the work was obtained from the Street Railway Journal, August, 1895; and from Mr. A. N. Connett, the engineer in charge:

The exact length of the track from Tenth street and Florida avenue to the southern terminus, at P and Four-and-a-half streets SW., is 40,800 feet, or 7.73 miles. The slot rail is the same as used on the Baltimore City Passenger Railway Company's cable lines, with the exception of the water drip at the edge of the slot; it weighs 67 pounds to the yard. The wheel rail is 7 inches deep, with the Washington groove; its weight is 83 pounds. The guard rail is same depth and takes the same splice bar; its weight is 87 pounds. The splice bars are 30 inches long, nine-sixteenths of an inch thick, and bolted on with six 1-inch bolts. The yokes weigh 267 pounds. Their depth from grade is 31 inches. The depth of the tube is 25 inches. Every 13½ feet a large manhole frame and cover, extending from track to slot rail and 20 inches wide, is placed; opposite to this is placed a small frame and cover just sufficiently large to hold an insulator. The corner of the large frame is also arranged to take the opposite insulator. The insulators in this way are clear from and entirely independent of the yokes.

The conduit is formed entirely of Portland cement concrete. In the entire space taken up by and between and 2 feet outside of the outer rails a concrete paving base is placed, made of natural cement.

The insulator is of porcelain. It is quite large, being 4 inches in diameter and 7½ inches deep over all. It is held in an iron cap, and in turn it supports a rod by having the corrugations filled with neat Portland cement. The cement has proved very satisfactory; in fact, the assembled insulator seems to be abundantly strong mechanically for the rough usage to which it may be subjected. A malleable iron clip is held by cast-iron nuts to the insulator bolt, and the clip in turn supports the conductor rail. Adjustment in a direction at right angles to the slot is provided for in the clip where the insulator bolt is held, while in a direction parallel to the slot the adjustment is made in the seat for the insulator case on the frame. The conductor rail is made of mild steel. It is a T section, weighing 23½ pounds to the yard. Its equivalent section in copper is assumed to be 300,000 circular mils. One-half of the road is double and the remaining half single bonded. These are of the type called the "Chicago rail bonds." Between the bond terminals 000-stranded cable is used to make them flexible. The circuit being made on the insulated conductor rails, the wheel rails are not bonded. Hatches are provided every 400 feet, by which the conductor rails, 27 feet long, are placed in the tube after it is finished.

For the purpose of drainage the tracks are connected by large sewer pipes to the manholes, from which connection is made to the sewer. The tracks are so drained about every 400 feet. Feed-wire ducts are laid from the station to Ninth and U streets nearly the whole length of the line. To Ninth and F streets, a distance of 10,400 feet, twelve-way ducts are laid, and from there on four-way ducts are used. The reason for laying the twelve-way duct is that the station is intended to operate hereafter the east half of the east and west line, which crosses the Ninth street line at F street. For the Ninth street line 35,600 feet of 1,000,000 C. M. and 32,400 feet of 500,000 C. M. lead-covered cable is used.

The road is divided into four distinct circuits. At F street the line is cut, and each track is made separate both north and south of F street. Below F street the conductor rails are used alone. Above F street the cables are tapped into the conductor rails about every 800 feet.

No final estimates having been made, it is impossible to give actual figures of cost, but the cost per mile of single track (of straight track), based on actual contract figures, is herewith given:

|  |                  |
|--|------------------|
| Wheel rails, slot rails, and joints.....                               | \$6,468.00       |
| Conductor rails .....  | 1,267.20         |
| Bolts, nuts, washers, liners, tie-rods, etc .....                      | 792.00           |
| Yokes, manhole frames, covers, and all cast iron .....                 | 5,068.00         |
| Insulators .....   | 264.00           |
| Malleable iron clips .....   | 264.00           |
| Bonds, finished (single bonding) .....                                 | 227.40           |
| Excavation .....   | 2,376.00         |
| First-class concrete for tube .....                                    | 5,068.80         |
| Second-class concrete for paving base .....                            | 3,062.40         |
| Track laying, hauling, and temporary track .....                       | 2,455.20         |
| Asphalt paving in, halfway between, and 2 feet outside of tracks ..... | 7,497.60         |
| <b>Total .....</b>   | <b>34,811.40</b> |

Where block paving is taken up in existing tracks and relaid, this price is reduced to \$29,832. These figures are for a straight, single-track mile, complete, but they include nothing for laying ducts, drains, subsurface obstructions, special track work, or any extras.

The power station located at Four-and-a-half and P streets SW. contains three nominal 400-horsepower tandem compound condensing Greene engines, made by the Providence Steam Engine Company, directly connected to 300-K. W. generators, made by the General Electric Company. The engine speed is slightly reduced to lower the voltage from that of the ordinary overhead plants 50 volts, i. e., the voltage is 450 at no load compounded to 500 at normal load. Water for condensing purposes is taken directly from the river by a 10-inch pipe, and overflow from condenser is 14-inch pipe.

*Equipment.*—Twenty-five motors, 25 open trailers, 25 closed. Twenty trains kept on street, headway between two and three minutes.

#### ROCK CREEK PARK.

The board of control of Rock Creek Park, consisting of the Chief of Engineers United States Army and the Commissioners of the District of Columbia, assumed control of the park January 1, 1895. The Commissioners directed the superintendent of police to detail one mounted police officer to take charge of the park under the orders of the secretary. Private J. T. Morgan was so detailed, and has performed the difficult duty of policing this extensive area to the complete satisfaction of the board of control.

Many of the old cabins which had hitherto been left standing were destroyed and removed under his supervision, without cost to the District. A few of the places have been rented to responsible parties, under authority of Congress.

#### SPECIAL REPORTS.

In pursuance to orders, on October 27, 1894, an inspection was made of the Mekarski compressed-air motor at Westfield, Mass. The motor examined is of about 8 tons weight, 16½ feet in length, inside measurement, and 23 feet over all. The compressed air is stored in tanks under the car body, from which it is passed through reducing valves into a tank containing hot water, and from there to the engine cylinders. The total capacity of the air tanks is about 89 cubic feet, and of the water tanks 28 gallons. The engine is placed in rear of and connected with the rear wheels of each car only; arrangements are made for connecting the rear and front wheels, if deemed necessary. The diameter of cylinder is 5¼ inches and the stroke 9 inches; the diameter of the car wheels, 27 inches. The hot-water tank is a vertical cylinder placed upon the front platform.

The mode of operating is as follows: The car is brought to the power house, where the air tanks are connected with a Rand compressor and in about fifteen minutes charged to pressure of about 650 pounds. At the same time the water in the tank is heated by steam to about 320°. The car being charged, the motorman, by means of valves, lets the air into the hot-water tank and then into the cylinders, and controls his engine as he would if he were running with steam. The brake is also worked by compressed air.

At the time of my visit, three of these cars were in operation upon a line 2 miles long. The motors were charged at the end of each run of 4 miles, though I was informed that by careful operating they could make a double run with a single charge at 750 pounds pressure.

The track is an ordinary street railway track in fair repair, generally level, but with one short grade of perhaps 4 per cent. The ordinary pressure in the cylinders when running being from 100 to 200 pounds,

the available pressure is the excess of this. The cars which were examined were running on their regular schedule time, so no record of speed was attempted.

It might be added that this motor is a French invention, which has been introduced into this country by Mr. James F. Lewis, of the Rand Drill Company, to whom I am indebted for the privileges granted me.

Upon February 21, 1895, an examination was made of the Hardie compressed-air motor at Rome, N. Y. The motor examined is of about 8½ tons weight, and is of the size of the Broadway, New York, or Columbia railroad cable car. The compressed air is stored in cylindrical cases of steel, "Mannesmann bottles," from which it passes through reducing valves into a hot-water tank placed under the body of the car. From this tank it passes through tubes to the valves located upon each of the platforms and thence to the engines. The operating mechanism occupies less space on the platform than that of the ordinary electric motor. The engines are placed under the car and are connected with all four wheels. The diameter of each cylinder is 6 inches, and the stroke 14 inches; the diameter of the wheel is 26 inches. The hot-water tank contains about 87 gallons and the air tanks 35 cubic feet. An experimental trip was made with this motor on the tracks of the New York Central Railroad east of Rome. The following gives the details of the trip:

## FIRST TRIP.

| Place.               | Time. | Difference. | Pressure in tank (pounds per square inch). | Loss. | Gauge. | Temperature of water. |
|----------------------|-------|-------------|--|-------|--------|-----------------------|
|                      |       |             |  |       |        | F.                    |
| Started.....         | 3.15  | -----       | 2,025                                      | ----- | -----  | -----                 |
| First milepost.....  | 3.18  | 3           | 1,950                                      | ----- | 180    | 330                   |
| Second milepost..... | 3.20½ | 2½          | 1,875                                      | 75    | -----  | -----                 |
| Third milepost.....  | 3.23¼ | 3¼          | 1,800                                      | 75    | -----  | -----                 |

| Sixth milepost.....  | 3.34  | 3           | 1,510                                      | 115   | 120    | -----                 |

## RETURN TRIP.

|                      |      |       |       |       |       |       |
|----------------------|------|-------|-------|-------|-------|-------|
| Sixth milepost.....  | 3.35 | ----- | 1,510 | ----- | 170   | ----- |
| Fifth milepost.....  | 3.39 | 4     | 1,360 | 150   | ----- | ----- |
| Fourth milepost..... | 3.42 | 3     | 1,240 | 120   | 120   | ----- |
| Fourth milepost..... | 3.43 | ----- | 1,240 | ----- | ----- | ----- |
| Third milepost.....  | 3.48 | 5     | 1,060 | 180   | 120   | ----- |
| Second milepost..... | 3.52 | 4     | 870   | 190   | ----- | ----- |
| First milepost.....  | 3.56 | 4     | 660   | 210   | 140   | 177   |

<sup>1</sup>Stopped one minute.

Not the slightest difficulty was experienced in starting or stopping the car or regulating its speed.

This table indicates that between the ranges of pressure, 2,025 and 200, the car could be run on the same track a distance of 13 miles, under conditions similar to those existing at the time. The car carried twenty-six passengers; the trip was made in a snowstorm, but upon a nearly level track in fine condition. If the capacity of the air tanks were doubled, or contained 70 cubic feet, with the same initial pressure the distance would be doubled.

Among the passengers were Gen. Herman Haupt, consulting engineer of the company, and Mr. Hardie, the inventor of the motor, to whom I am indebted for the privilege of examining this motor.

It is learned from one of the current engineer journals that a trial of this compressed-air motor will be made upon the Ninth avenue line, New York City.

#### FENDERS.

Upon November 25, 1894, an order was received to investigate the subject of fenders for the street cars in Washington operated other than by horsepower. A report was submitted December 22, 1894, recommending a front and a wheel-guard fender, and naming the Blakistone front and the Blakistone, Brightwood, and Smith wheel guards as suitable for the purpose.

Regulations requiring the railway companies, within a reasonable time, to equip their cars with the fenders named or others which might be afterwards approved by the Commissioners were drawn up, submitted to the attorney, and finally adopted. Since that time the Claude front and wheel-guard fenders and Parmenter wheel guard have likewise been approved.

Most of the cars in the city are now equipped with the Blakistone or Claude front fender, and the Blakistone, Claude, or Brightwood wheel guard.

Since the fenders have been attached to the cars three children have been picked up without injury by the front fender; in one case the car was running at a rate of 12 miles an hour. No person has yet been picked up by the wheel guard, but I have been informed by the officers of three companies that they have picked up several dogs without injuring them at all. In one case the speed was estimated at over 15 miles an hour.

Respectfully submitted.

G. J. FIEBEGER,

*Captain, Corps of Engineers, U. S. A.*

Maj. CHARLES F. POWELL,

*Corps of Engineers, U. S. A., Engineer Commissioner, D. C.*

*Inspectors, foremen, assistant engineers, and other employees temporarily required on surface work, showing appropriations from which paid, for year ended June 30, 1895.*

\* Incomplete.  
 † Cement and sand.

\* 561 yards new; balance relaid.  
 † Contract incomplete.

\* Rubble and brick masonry included.  
 † Assessment and permit work.

\* Cement and pipe.  
 † Incomplete.

\* Done by day labor and shown in report of superintendent of county roads.

## REPORT OF THE COMPUTING ENGINEER.

WASHINGTON, August 1, 1895.

SIR: I have the honor to submit the following as the operations of this office for the year ended June 30, 1895:

Table A gives a detailed statement of the cost of paving and improving roadways in the city and in the county under the appropriations for "Improvements and repairs" and "Construction of county roads."

Table B gives a detailed statement of the expenditures under the appropriation for "Repairs to concrete pavements."

Table C gives a detailed statement of work done for railway companies.

In addition to the above special work, grades were furnished the street railways, builders, and wherever required by the other departments of the District service.

Respectfully submitted.

GEO. H. BAILEY,  
Computing Engineer.

The ENGINEER COMMISSIONER.

(Through Capt. G. J. Fiebeger.)

TABLE B.—Repairs to concrete pavements, 1895.

[Contractor, H. L. Cranford.]

| Locality.  | Year laid.   | Square yards. | Contract work. | Extra work. | Total cost.             |

## REPORT OF SUPERINTENDENT OF STREETS.

WASHINGTON, D. C., August 9, 1895.

SIR: I have the honor to submit the following report of the operations of this department for the fiscal year ended June 30, 1895:

The appropriation for current repairs to streets, avenues, and alleys was \$35,000, which amount was expended. (See statement marked A.)

Respectfully submitted.

H. N. MOSS, *Superintendent of Streets.*

The ENGINEER COMMISSIONER.

(Through Capt. G. J. Fiebeger, U. S. A.)

STATEMENT A.—*Work done under the appropriation for current repairs to streets, avenues, and alleys, from July 1, 1894, to June 30, 1895.*

Under the act of Congress of August 7, 1894, the Commissioners of the District of Columbia are empowered, whenever in their judgment the public health, safety, or comfort requires it, to improve and repair alleys and sidewalks and pay the total cost of the work out of the appropriation for assessment and permit work. One-half the cost of work ordered under the assessment system is charged against the abutting property and becomes a lien upon said property. Statement marked C gives a list of the work which was done under the assessment system, the total amount of which is \$104,513.82.

## C.—Assessment work.

Very respectfully,

The ENGINEER COMMISSIONER.  
(Through Capt. G. J. Fiebeger, U. S. A.)

GEO. N. BEALE,  
Superintendent of Roads.

## REPORT OF ENGINEER OF BRIDGES.

WASHINGTON, D. C., July 1, 1895.

MAJOR: I have the honor to submit the following annual report for the fiscal year ended June 30, 1895:

### ORDINARY CARE OF BRIDGES, 1895.

Under this appropriation bridge keepers were maintained at the Aqueduct Bridge over the Potomac River (No. 7); the Pennsylvania Avenue Bridge over the Eastern Branch (No. 54), and the Navy-Yard bridge (No. 55); one keeper being located at each

## 702 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

of the first two, and two at the last-named structure, the operation of the draw requiring that number. At the present time such alterations have been made in the draw mechanism as will permit of its operation by one man and the services of one of these two bridge keepers will be dispensed with hereafter. On the recommendation of this office, dated April 3, 1895, the Commissioners of the District of Columbia ordered that the draw of the Navy-Yard Bridge be opened for the passage of water craft only between the hours of 9 a. m. and 4 p. m.

Inspector R. D. McClure has made intelligent and diligent general inspection of all District bridges and culverts throughout the year.

Acting as special officers the bridge keepers have arrested and secured the conviction of a number of violators of the police regulations respecting travel, etc., over public bridges.

## STATEMENT OF APPROPRIATION.

|                              |            |
|------------------------------|------------|
| Amount of appropriation..... | \$5,000.00 |
| Amount expended.....         | 4,645.72   |
| Balance.....                 | 354.28     |

## CONSTRUCTION AND REPAIR OF BRIDGES.

The work under this appropriation was principally confined to repair work, the limited amount of funds not permitting any new construction. The bridges on Blagden Mill road over Broad Branch (No. 19), on Pierces Mill road over Rock Creek (No. 20), and on N street SW. over James Creek Canal (No. 40), were entirely rebuilt, as the old structures were beyond repair. Bridge No. 19 was rebuilt in wood by day labor. The new steel superstructure of bridge No. 20 was furnished by the Shiffler Bridge Company, of Pittsburg, Pa., under contract No. 1933, dated August 21, 1894, and erected and the floor laid by this department by day labor. In the reconstruction of this bridge the floor level was raised about 6 feet, greatly benefiting the grade of the east approach. The steel superstructure of bridge No. 40 had been purchased during the fiscal year 1894, except the posts and brace frames. These last were purchased by letter proposal, and the bridge erected and the floor laid by day labor. All of these reconstructed bridges were well painted. In the case of structures such as the ones described, our experience indicates that an economy results from purchasing metallic superstructures and erecting them ourselves rather than contracting for them erected.

The bridges on Klinge Ford road over Rock Creek and on Connecticut avenue over Rock Creek were painted during the year, the first by day labor, the second under contract No. 2065, dated March 22, 1895, with Linskey & Son of this city. The superstructure of the bridge on Blagdens Mill road over Rock Creek was raised about 4 feet, incident to the improvement of the general grade of the road in that locality.

The reconstruction of the draw of the Navy-Yard bridge was completed, such additional details being added as would insure the possibility of its operation by a single keeper under almost all conditions of tide and wind. The remainder of the appropriation was expended in repairs to the various bridges and culverts under my charge, as more fully set forth in the following table. The unexpended balance of the appropriation of \$10,000 was \$10.71.

It seems proper to record here that the submarine repairs to the piers of the Aqueduct Bridge over the Potomac were executed during the year under the supervision of the Secretary of War to the extent of the appropriation made for the purpose. All the piers were repaired to some extent and pier No. 4 largely rebuilt at its upstream end. In the execution of this latter work the box girders placed on this pier last year, to transfer the weight of the upstream trusses to the center of the pier and insure the integrity of the superstructure in event of the pier's failure, were removed and brought ashore, their duty being provided for by a timber construction resting on the new cofferdam.

# REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA. 703

## Expenditures for construction and repair of bridges, 1895.

| Order.             | Bridge.      | Amount.   | Remarks.   |

CONWAY BUNT, *Engineer of Bridges.*

The ENGINEER COMMISSIONER.  
(Through Capt. G. J. Fiebeger.)

## REPORT OF ENGINEER IN CHARGE OF SUBDIVISION OF LAND.

WASHINGTON, D. C., *August 7, 1895.*

SIR: I have the honor to submit the following report of work in this department for the fiscal year ended June 30, 1895:

\* \* \* \* \*

Plats of subdivisions under the law of 1888 have been passed upon and recorded in five instances: Garfield Heights, Congress Heights, Mills estate, Girls Portion, and Clermont, about 105 acres in all.

Special surveys have been made for opening Albemarle street, locating streets in West Brookland, for new boundary of Zoo Park at Connecticut avenue, for street lines west of Tenleytown, for Massachusetts avenue extended, and for property lines at Fourteenth street and Spring road. A number of azimuth lines have been located and marked by monuments and subdivisions connected by transit lines with various points of reference. Maps have been made of all these surveys and sketches and plans submitted to this office have been passed upon from time to time.

Respectfully,

WM. P. RICHARDS,  
*Assistant Engineer, Subdivision of Land.*

The ENGINEER COMMISSIONER.  
(Through Capt. G. J. Fiebeger.)

## REPORT OF THE PARKING COMMISSION.

WASHINGTON, D. C., *July 18, 1895.*

SIR: The parking commission have the honor to submit the accompanying paper of the superintendent of parking as their report for fiscal year ending June 30, 1895.

JOHN SAUL,  
WILLIAM SAUNDERS,  
*Parking Commission.*

Maj. CHAS. F. POWELL,  
*Engineer Commissioner.*

WASHINGTON, D. C., *July 18, 1895.*

GENTLEMEN: I have the honor to submit the following report of the work performed under the supervision of this office during the fiscal year ended June 30, 1895:

One thousand six hundred and forty trees were planted on the streets during the year, the larger portion of which was done in the eastern section of the city. This was an increase of 950 over the number planted last year. About 7,000 seedlings were set out in the nursery, namely, oriental planes, oaks, elms, ginkgos, lindens, poplars, Norway, sugar and silver maples. These are in excellent condition with the exception of those which were removed from the ground taken for the smallpox hospital, the removal of which checked their growth considerably. There is an abundant supply of trees in the nursery of the proper size for planting on the streets, a number of which will have become overgrown if not used in the near future.

In addition to trimming individual trees and rows of trees in various places which needed special attention, this branch of the work was resumed where it was stopped the previous year. M street northwest at Connecticut avenue, and all that part of the northwest section north of M street, was taken systematically and the trees trimmed. Northeast Washington, between East Capital and C streets, inclusive, was also taken, thus leaving the larger portion of the northeast, all of the southeast and southwest sections to be gone over in order to finish the work to the place where it was begun two years ago, on north B street. If this latter named point can be reached during the year 1896, it will have taken three years for the trees of the city to be trimmed in this way.

The first trees planted by the parking commission are getting large and need attention yearly, in the way of trimming and removing the deadwood, also paving around the tree spaces. Unless the appropriations are increased in proportion to the number of trees, it will be impossible to keep the trees in good condition. The entire number of trees should receive some attention yearly, which is impossible with the limited annual appropriations. With an appropriation of \$15,000, and 75,000 trees, only 20 cents could be expended on each tree, which would not trim them and keep the ground around their roots in good condition, to say nothing of the removal of trees, the planting of more trees, paving, and purchasing of lumber for boxes, stakes, and wire netting, all costly and absolutely necessary items for the work.

The usual care was bestowed upon the cultivation of young trees, which was very necessary on account of the dry weather at the beginning of the year.

There are a number of trees which crowd each other at the corners of intersecting streets, and others which stand so close to street lamps as to seriously interfere with the dissemination of light. These could well be spared, and I think should be removed as soon as possible. In this connection I would recommend the removal of every box elder tree from the streets and the replacing of them by a different variety of trees. Those on L, N, and S streets northwest should be removed first, as they are the most inferior of their kind, and a sufficient amount of money has been spent upon them in the last eight or ten years in clearing them of caterpillars alone to have replaced them. They are also very unsatisfactory to the people who reside on the streets where they are planted, as they are annually infested with worms.

Five thousand two hundred and seventy-six trees were wired. All the trees in the northwest section of the city between North Capitol and Eighteenth streets are now protected, except those in unexposed places and some box elders which were not considered worth the cost. The wire used was purchased at a cost of \$1 per rod, and the cost of placing it around the trees made the cost per tree about 35 cents. There are yet many thousands of trees which require this wire protection. These trees have cost money to bring them to their present condition, and unless protected are liable to great damage if not destruction. If \$5,000 could be obtained for this purpose, with the reduced price of wire netting, a very large portion of the trees now

unwired could be placed out of danger. Surely the trees of this beautiful city are well worth this expenditure, and I strongly recommend that this sum be asked for this purpose. The total number of trees now protected is about 31,700.

Eighteen hundred new tree boxes were made and used.

Six hundred and thirty-nine communications were referred to the parking commission, examinations made and reports rendered, but some of the work asked for in these communications has not yet been reached.

The police department reported 438 casualties which were given immediate attention.

Caterpillars appeared on the trees in large numbers, but have been removed without leaving any visible trace except on some of the most inferior Negundos. These pests usually appear during the month of June, at a time when the funds of the parking commission are about exhausted. Several times have they done considerable damage before they could be successfully attacked for want of money. The elm beetle frequently attacks the elm trees during the month of May, and, while they disfigure the foliage for a time, do no lasting damage. The two last-named matters, occurring at a time so near the end of the year, and from the fact that it can not be definitely told whether or not they will appear, it is not considered wise to defer the expenditure of so large a sum as would be required for their destruction, on account of the uncertainty of their appearance, and the money is always needed for other purposes at the end of the year. As a remedy for these, and the removal of broken limbs, blown-down trees, etc., the result of storms which are liable to occur at any time, I recommend that a sum of \$3,500 be asked to be appropriated as an emergency fund for the parking commission, to be used only for these purposes, if required.

## REPORT OF GENERAL INSPECTOR.

WASHINGTON, D. C., August 14, 1895.

SIR: I have the honor to submit report of the operations of this office for the fiscal year ended June 30, 1895.

The assignment of duties for the year was as follows:

The supervision of street and steam railroads, involving periodical inspections looking to features of maintenance, equipment, and the general conduct of the roads as affected by charter provisions and municipal regulations thereunder.

The supervision of telegraph, telephone, and electric light overhead lines and underground conduits, involving regular inspections looking to safe and proper maintenance, the selections of routes, the designation of points for the location of poles, and an oversight of the stringing of wires.

The investigation of claims and damage suits against the District on account of injury to person or property, the examination and report upon communications and complaints, requiring information upon questions of varied description concerning matters under municipal control, and the inspection of sidewalks subject to injury on account of building operations.

## STEAM RAILROADS.

The situation respecting the steam surface tracks remains in statu quo, while the inconvenience and dangers resulting from the grade crossing and unprotected portions of the tracks lying in the line of the public streets are an ever-fruitful subject of discussion. The Baltimore and Ohio road has added no protection in the way of fencing during the year; in consequence long stretches of unprotected track, lying in and across the public streets on an approximate grade therewith, pass through populated localities, affording no security whatever against accident. The danger of this condition of affairs needs no comment, and if existing law can not abate it, legislation should be sought at the earliest practical moment that will. It would seem, however, that the requirement of fencing, so far at least as the right of way proceeds upon public property, is within the scope of present police power.

The maintenance of crossings on both branches of this road to the District line has noticeably improved, but some within the city are yet to be brought up to the required standard, and the company is now in receipt of orders to that effect.

The Baltimore and Potomac road, within the year, has inclosed its tracks along Sixth street as far as the station, and also of its most dangerous piece of road along Maryland avenue, between Sixth and Seventh streets, so that there remains to be fenced the tracks between Ninth street and the Long Bridge, for which the company now has a permit, and between Third and South Capitol streets east, which latter are, in part, above grade. Additional protective appliances and flagmen have also been provided at the New Jersey avenue, the Sixth and Virginia avenue, and the Sixth and Maryland avenue crossings, and, it is believed, that these crossings are now as well protected as is possible under the circumstances. The maintenance of crossings throughout this road has been of the usual high standard.

The Thirteenth street crossing of the Southern Railroad also received attention during the year, and safety gates were erected and manned in accordance with the recommendation.

## STREET RAILROADS.

Under this head, considerable time and study has been given to the question of safety fenders, suitable for use on the cars of the rapid-transit roads, the outcome of which has been the adoption of designs combining the action of what is styled "the front pick-up and wheel-guard fender," the practical merit of which has now been fully demonstrated and its capacity for saving life proven beyond question.

The roads having a full equipment as required by the fender regulations are in the order of compliance the following: The Rock Creek, the Eckington and Soldiers' Home, the Georgetown and Tennallytown, and the Brightwood. The Ninth street electric line has a regulation equipment upon such of its new cars as are in operation. The grips of the Washington and Georgetown and Columbia roads are not as yet fully equipped as required by the regulations.

Other events of interest occupying the time and attention of the office in the way of general supervision requiring compliance with permit conditions have been the completion and successful operation of the Columbia cable and Ninth street underground electric roads, both advantageous changes over previous conditions, the one as having substituted cable, the other electric for horsepower, and each alike dispensing with a considerable area of cobblestone paving, while the Ninth street construction has been of a special interest as demonstrating the feasibility of operating street railways by means of underground electric conductors. The work of construction of both these roads was expedited in the most workmanlike manner, and there was no real cause of complaint from any source, the contractor and his assistants in every instance showing a most willing disposition to comply with the orders of the Engineer Commissioner. The track surface of these new roads, barring slight defects in the paving of the Columbia tracks, is excellent, while the companies as a whole have given attention to paving and track surfacing, and good conditions of maintenance prevail as a rule.

## OVERHEAD LINES AND CONDUITS.

This office was relieved of the supervision of underground constructions early in the year, and the sewer department was given control of this branch of work. There was also one overhead line less to be looked after, the old dilapidated Rapid Transit Line having been removed from the streets under the direction of the superintendent of streets. Of the remaining companies operating overhead lines, the Chesapeake and Potomac Telephone Company alone has maintained a respectable standard of repairs, or made any effort in the way of improving distribution service, the other companies having done nothing except as absolute safety demanded or street improvements necessitated.

The work done by the Chesapeake and Potomac Telephone Company consisted in the replacement of old with new, stronger, and taller poles, the stringing of copper in place of iron wires, and uniting lines, the most extensive work of this character being done on the Bennings and Brentwood roads, extending as far as the District line. Owing to the lack of attention given to features of maintenance by the other companies, their lines of necessity are daily growing weaker, the poles in many instances have rotted at the base, and unless early legislation shall be secured compelling the companies to operate underground, loss of life and injury to property are likely to result. The lines especially noted as being in bad condition were the Western Union Company's line along Seventh street N.W. and Brightwood avenue, and the Postal Company's line, which traverses the city by way of Virginia avenue, I street south, and Thirteenth street east. This latter is an abandoned line, and there appears to be no excuse for its existence, except that an occasional pole is utilized for carrying a District wire. In this connection, I would again urge that all poles within the District, including District poles, be marked with the name or initials of the operating companies, as this not only greatly facilitates inspection, but affords an opportunity for the police to communicate directly with the responsible parties in the event of the necessity for immediate action.

#### CLAIMS AND DAMAGE SUITS.

Under this head, in addition to time occupied in investigation, there was the usual consumption of time in attendance upon the trial of causes. The method of investigation pursued was the same as in times past, the object being to ascertain the truth and facts as admitting of an equitable adjustment of damages. The number of cases at law investigated, involving damages for injury to person, was 8. The number of claims investigated, involving compensation for injury to property, was 5. The number of communications acted upon, showing in addition to work of general supervision that of a particular character occupying the attention of the office, was 360. The number of applications for inspections of sidewalks, requiring from one to three inspections each, was 284. The force employed and compensation received per annum was as follows: One general inspector and two assistant inspectors, \$1,200 each.

Very respectfully,

The ENGINEER COMMISSIONER.  
(Through Capt. G. J. Fiebeger.)

L. P. BRADSHAW,  
*Acting General Inspector.*

REPORT OF THE INSPECTOR OF ASPHALTS AND CEMENTS.

WASHINGTON, August 16, 1895.

SIR: I have the honor of presenting my report for the fiscal year ended June 30, 1895. The work performed by this office may be summarized as follows:

|  |        |
|--|--------|
| Hydraulic cements:                         |        |
| Natural, brands 10, lots 429, samples..... | 3, 728 |
| Portland, brands 21, lots 77, samples..... | 1, 433 |
|  | 5, 161 |
| Asphalts:                                  |        |
| Crude Trinidad.....                        | 17     |
| Refined asphalt.....                       | 15     |
| Residuum oil.....                          | 33     |
| Asphalt cement.....                        | 3      |
| Sands for asphalt surface.....             | 25     |
| Surface mixtures.....                      | 139    |
| Asphalt blocks.....                        | 2      |
| Old pavements.....                         | 11     |
| Natural asphalts.....                      | 7      |
| Miscellaneous.....                         | 15     |
|  | 267    |
| Sands, gravel, etc.....                    | 27     |
| Aqueduct.....                              | 16     |
| Public wells.....                          | 194    |
| Miscellaneous.....                         | 14     |
|  | 224    |
| Miscellaneous.....                         | 22     |
| Total.....                                 | 5, 701 |

ASPHALTS.

Crude Trinidad asphalt.—The crude asphalt received during the year has run quite uniform in quality (with the exception of two cargoes), varying less than 1 per cent in bitumen. The average bitumen per cent of the cargoes received during the past year is 52.9 per cent.

Asphalt cements.—Penetrations of the cement used each day have been made at the works, with the results following:

|                                 | Cranford<br>Paving Co. | Barber<br>Paving Co. | Thomas<br>Paving Co. |
|---------------------------------|------------------------|----------------------|----------------------|
| Highest penetration, 77° F..... | 80                     | 72                   | 94                   |
| Lowest penetration, 77° F.....  | 62                     | 61                   | 175                  |
| Average penetration, 77° F..... | 73                     | 69                   | 85                   |

<sup>1</sup> The first day's run of this yard on the paving at Lincoln Park was made with a cement penetrating 70 at 77° F. This was raised as soon as discovered.

Sands for asphalt surface.—There have been 25 samples of sand examined during the past year for the paving companies. Besides the above examinations, daily siftings of the sand in use are made at the works of the several companies, samples being taken each hour and combined to get an average of the day's work. The general character of the sand in use during the past year is given in the following table:

|                      | Cranford.                               |                                      |                     | Barber.             | Thomas.             |
|----------------------|---|--------------------------------------|---------------------|---------------------|---------------------|
|                      | Average<br>of first<br>three<br>months. | Average<br>of last<br>six<br>months. | Average<br>of year. | Average<br>of year. | Average<br>of year. |
| Retained on—         | Per cent.                               | Per cent.                            | Per cent.           | Per cent.           | Per cent.           |
| 20 mesh.....         | 4.5                                     | 5                                    | 5                   | 4.5                 | 0.5                 |
| 40 mesh.....         | 44                                      | 34                                   | 39                  | 40                  | 39                  |
| 60 mesh.....         | 33.5                                    | 30.5                                 | 33                  | 32                  | 41.5                |
| 80 mesh.....         | 8                                       | 10                                   | 9                   | 9.5                 | 6.5                 |
| 100 mesh.....        | 4                                       | 9.5                                  | 6                   | 6                   | 4                   |
| Passed 100 mesh..... | 0                                       | 11                                   | 8                   | 8                   | 8.5                 |

Petroleum residuum.—The residuum oils used this year for oiling asphalt have been very uniform in quality and similar to what have been in use for the last three years. Of the 33 samples examined, 5 have been for the Cranford Company, 1 of which was rejected; 27 for the Barber Company, 1 being rejected; and 1 for the Thomas Company.

*Asphalt surface mixtures.*—Samples of surface mixture are taken each day at the yards, and those representing new or resurface work are analyzed for their per cent bitumen soluble in carbon disulphide. The results obtained are as follows:

|                                  | Cranford. | Barber. | Thomas. |
|----------------------------------|-----------|---------|---------|
| Number of samples examined.....  | 106       | 22      | 11      |
| Highest per cent of bitumen..... | 12.2      | 12      | 10.4    |
| Lowest per cent of bitumen.....  | 8.7       | 9.8     | 9.4     |
| Average per cent of bitumen..... | 10.9      | 10.8    | 9.9     |

*Natural asphalts.*—Of the seven samples of natural asphalt presented to this office for examination as to their utility for paving purposes, three are worthy of notice. They were from the Standard and the Alcatraz companies of California, and the Pittsburg Asphalt Company. The Standard Asphalt Company presented 3 samples; one of natural asphalt, one of refined asphaltic oil, and another which they called refined asphalt. Their natural asphalt is of a glance pitch character and would be useless for paving without the liquid. The asphaltic oil, or liquid asphalt, is by far the best that I have found on the market for fluxing asphalts, and its mixture with the natural asphalt, making their so-called refined, produces an article that I believe will prove superior for paving. The Alcatraz Asphalt Company presented 3 corresponding samples. Their refined asphalt or asphalt cement, which is made by the admixture of their asphaltic oil with their natural asphalt, is a product that would require great care and skill in manipulation to produce a uniform and durable pavement, and I believe the precaution necessary is next to impracticable.

The Pittsburg asphalt is intended as a softening agent or flux for other asphalts. It is an artificial product and does not resemble asphalt in any way, being waxy and nonadhesive in character and possessing the property of being but slightly susceptible to change in temperature. This inestimable property is imparted to the cement which has been produced by fluxing an asphalt with this softening agent. A few practical tests are being made with both asphalt blocks and sheet asphalt pavements, in which is used Trinidad asphalt fluxed with Pittsburg asphalt, and thus far the results are proving favorable.

#### SHEET ASPHALT PAVEMENTS.

Considerable change has been made during the past year in asphalt pavement by the addition of a fine sand to a sand similar to that formerly used. This combining of sands is not to be commended, owing to the nonuniformity of the resulting mixture; but under the present circumstances it is the best that can be done as there is no suitable fine sand available. The only fine sand now available is that dredged off the foot of Seventeenth street. Its character and mesh composition well adapts it to asphalt paving, but being a dredged sand it is, as a consequence very wet, and if used separately great difficulty would be experienced in heating it by method in use. This could be overcome to a great extent by keeping large quantities in stock, thus allowing the water to drain and dry out of it. But thus far the consumption has kept pace with the supply. This change in sand has been made not only on a theoretical study of sand void, but on a practical study of the older pavements; comparing those which have been down from ten to eighteen years with those of recent date. The following table is given to illustrate this:

|                                 | Location of pavement.                                      |                                   |   |  |
|---------------------------------|--|-----------------------------------|---|--|
|                                 | First street W., between Pennsylvania and Indiana avenues. | New Jersey avenue and K street W. | Thirteenth street W., between New York avenue and I street. | Rhode Island avenue, between Sixteenth and Seventeenth streets. <sup>1</sup> |
| Years in use.....               | 12   | 12                                | 15  | 3  |
| Bitumen soluble.....per cent..  | 10.8   | 10.4                              | 11  | 10.1   |
| Sand mesh composition:          |  |                                   |   |  |
| Retained on 20 mesh.....do....  | .5   | 1.2                               | 1.5   | 5  |
| Retained on 40 mesh.....do....  | 18.5   | 2.4                               | 33.5  | 49.6   |
| Retained on 60 mesh.....do....  | 39   | 29.5                              | 37  | 27.5   |
| Retained on 80 mesh.....do....  | 14.5   | 30.5                              | 7   | 7.4  |
| Retained on 100 mesh.....do.... | 17.5   | 25.5                              | 4.5   | 3.8  |
| Passed 100 mesh.....do....      | 10   | 10.9                              | 12  | 6.7  |

<sup>1</sup> This is the type of all pavements laid for the past five years.

For sand being used at present see report in surface mixtures.

The use of this fine sand, which makes the asphalt surface much more impervious to moisture, will prevent to a large extent the rotting of Trinidad pavements from the absorption of water, provided they receive proper compression.

I have devised a simple apparatus, with which the relative porosity of pavements can be rapidly determined and the results prove conclusively that pavements made of fine sand are less porous than those made of coarse, all other conditions being the same.

The apparatus consists of a wide-mouthed bottle, fitted with a rubber stopper, with two holes through one of which is a bent tube, while through the other is an inverted glass stopcock burette. In the large end of this burette, which protrudes into the bottle, is inserted a funnel, stem upward, by means of a cork, thus allowing the funnel to hang inverted in the bottle. To determine the porosity of a pavement a solid piece of it, small enough to fit into the neck of the bottle, is placed in the bottle, which should be about three-quarters full of water. The bottle is then tightly stoppered, so that the funnel will hang directly over the sample of pavement. The stopcock is then opened, and by blowing into the bent tube the water is forced up into the burette to within about an inch of the top, then closing the stopcock the height of the water in the burette is read. On applying an exhaust to the bottle through the bent tube the air contained in the pores of the sample will be extracted and caught under the inverted funnel. On removing the exhaust, this air will be drawn from the funnel into the burette and its volume then measured by deducting the previous amount of air from that in the burette at present, this being the volume extract from the sample. The volume of the sample is then determined by some simple method and with this the per cent of air extracted from the pavement can be calculated.

Below are a few results of the per cent of air extracted and the mesh composition of sand contained in the several pavements:

| Retained on 40 mesh.....  | 17.7           | 44.2           | 37             | 2.4            | 47.5           | 36             | 2              |
| Retained on 60 mesh.....  | 28.3           | 33.5           | 31             | 29.5           | 30             | 27.5           | 24             |
| Retained on 80 mesh.....  | 21.2           | 7.8            | 12             | 30.5           | 5.5            | 10             | 30             |
| Retained on 100 mesh..... | 15.5           | 4.2            | 6              | 25.5           | 5              | 9.5            | 36             |
| Passed 100 mesh.....      | 14.9           | 5.8            | 10             | 10.9           | 7              | 12             | 7.5            |

An exhaust of 20 inches of mercury was used in the above determination.

*Origin of samples.*—Samples No. 1, fine sand, and No. 2, coarse sand, were inch cubes of mixture, made under a pressure of 1,000 pounds, composed of Trinidad asphalt cement, 15 parts to 85 parts of sand. No. 3, pavement from First street W. near K street, had received full compression of roller, but no traffic. No. 4, pavement from New Jersey avenue and K street NW., down under medium traffic thirteen years. No. 5, pavement from Pennsylvania avenue near Fifth street NW., under medium traffic five years. No. 6, Pennsylvania avenue and Fifteenth street, a piece of pavement from a patch that rotted out in five weeks. It was put down with chilled surface mixture just before a cold rain which was followed by frost. Its great porosity was evidently due to improper compression which allowed absorption of water, thus causing its speedy disintegration. No. 7, pavement taken from Main street, Buffalo, N. Y., down under heavy traffic two years.

*Asphalt binder.*—Great improvement can be noted in the binder mixture as laid at the present time over that of last year. This improvement is due to the addition of smaller stone and dust, to a limited extent, to the old one-sized binder stone. This change is very marked and well illustrates the importance and necessity of a thorough study of the character and grade of stone or sand to be used with asphalt in the manufacture of pavements.

## HYDRAULIC CEMENTS.

The following tables give the average results from tests on the natural and Portland cements examined, and also the number rejected and cause of rejection:

## A.—Natural cements.

| Brand.                       | Number of barrels. | Number of samples. | Per cent of residue, 100 mesh. | Per cent of water. |               | Initial set, neat. |
|------------------------------|--------------------|--------------------|--------------------------------|--------------------|---------------|--------------------|
|                              |                    |                    |                                | Neat.              | 2 parts sand. |                    |
|                              |                    |                    |                                |                    |               | <i>h. m.</i>       |

Long-time tests.—Long-time tests have been started on the following brands of natural and Portland cement, and are to be continued for a period of five years. Other well-known brands will be added to the list as soon as time will permit the making up of the necessary briquettes. These tests are being carried on to ascertain the relative increase in tensile strength of sand mortars made with the various brands, and also to determine if the statement made by many that a cement attaining a high tensile strength in a short time will in a longer period of time show a falling off or be surpassed in a long time by a cement that has acquired tensile strength much slower.

## C.—Long-time tests.

*Cement for cement sidewalks.*—Special care has been given to the sampling of cement for sidewalks, and a system of labeling has been introduced so that every barrel that has been inspected is labeled, giving the lot number and date when inspected. No barrels are allowed to be used on the street unless so labeled.

## THE STUDY OF SAND FOR MORTARS AND CONCRETE.

As much time as was possible, without interfering with the current work, has been given to the study of sands in its relation to mortars, etc. It is strange what little work appears to have been done on this subject, and when one considers that sand and broken stone are the larger ingredients of mortars and concrete it is evident that much more attention should be devoted to this subject.

The following table shows the great variation in tensile strength of mortars made with a Cumberland cement and various sands:

D.—Tensile strength of sands of different mesh composition.

[Mixed 2 parts sand with 1 part Cumberland cement].

| 28 days.....             | 67     | 56     | 156    | 94     | 59     | 128    | 103    | 102    | 98     | 83      |

Tensile strength of standard quartz: 7 days, 81; 28 days, 265.

ORIGIN OR NAME OF SAND.

|  |   |
|--|---|
| No. 1. Lord's, Seventeenth street dredged sand (bleached). | No. 5. Lord's, gray down-river sand.    |
| No. 2. Lord's, front sand.                                 | No. 6. Lord's, gravel sand.             |
| No. 3. Lord's, first concrete.                             | No. 7. Worthington's, first-pit sand.   |
| No. 4. Lord's, yellow down-river sand (bleached).          | No. 8. Worthington's, second-pit sand.  |
|  | No. 9. Worthington's, third-pit sand.   |
|  | No. 10. Worthington's, fourth-pit sand. |

It is evident from the above table that if the true value of a mortar is to be determined it is necessary to test not only the cement, but the sand to be used with it. An investigation as to the influence of the mesh composition of sand on the strength of mortar is being carried on, but the results are as yet too meager to draw conclusions therefrom.

WATER.

The public wells analyzed in the past year may be localized as follows:

| Locality.      | Good. | Suspicious. | Condemned. | Total. |
|----------------|-------|-------------|------------|--------|
| Northwest..... | 34    | 16          | 14         | 64     |
| Northeast..... | 18    | 5           | 8          | 31     |
| Southwest..... | 8     | 6           | 16         | 30     |
| Southeast..... | 36    | 14          | 19         | 69     |
| Total.....     | 96    | 41          | 57         | 194    |

The aqueduct water has been analyzed at intervals for the information of the water department.

The investigation of the action of Potomac water on lead pipe.—As requested, I have been investigating for the past year the action of the Potomac water on lead pipes to determine if enough lead is dissolved by the water to be injurious to the public health. Great diversity of opinion exists as to the quantity of lead necessary to be contained in a water to make it unsafe for drinking. I have found, however, good authorities to state that less than 0.05 grains of lead per imperial gallon (equivalent to 0.0416 grains per United States gallon) produces no deleterious effect on the health of those using the water, but such a point should be left to the medical profession to determine.

This action of water on lead pipes can only be determined by actual aqueduct service continued through a series of seasons, as it is well known that the action of water on lead has been intermitted. Hence water apparently free from lead to-day may become charged with that metal to-morrow. In order to have all conditions corresponding as near as possible with those of actual service in carrying on this investigation, I had one new 40-foot lead service pipe in Anacostia and 50 feet of new lead pipe attached to the high service main at the U street pump house. My object in having pipes at these two places was to include all conditions that might exist in

the water service of the District. The water in the pipe at Anacostia was at a low pressure and had traveled the maximum distance in the service mains. That contained in the pipe at the U street pump house was under high pressure and had traveled the minimum distance in mains. Both pipes were sealed after the drawing of every sample so that no water could be drawn from either without my knowledge of the fact.

*Results from pipe at U street pump house.*

| Date.    | Water analyzed.  | Grains in U. S. gall. |

| July 1   | Water after 1 month in pipe, first sample drawn off quietly, contained.....<br>Second sample drawn off rapidly, detaching coating from interior of pipe, sample appeared muddy, contained..... | .032<br>.06           |

But three tests had been made on water from the pipe situated at Anacostia when the investigation there had to be discontinued on account of the house changing hands. As the results were all lower than corresponding ones at the U street pump house, I did not consider it of sufficient importance to continue tests on a similar pipe.

It can readily be seen from the results obtained so far that the only great source of danger is where the coating becomes detached by a rapid flow of water after the pipe had remained unused for some time. However, I consider it of sufficient importance to continue this investigation and will report in full at a later date.

The force employed by this office and compensation received are as follows: One assistant inspector of asphalt and cements, \$3 per diem; one inspector, at works, \$4 or \$2 per diem, according to character of work.

Very respectfully,

The ENGINEER COMMISSIONER.

A. W. Dow,  
Inspector of Asphalt and Cement.

## REPORT OF THE SURVEYOR.

WASHINGTON, D. C., August 10, 1895.

GENTLEMEN: I have the honor to submit the following report of the operations of this office for the year ended June 30, 1895: During that period 949 lots were surveyed, 103 subdivisions were recorded, and 49 copies of plats were furnished to private parties; of this number 587 surveys and 19 plats were made and 76 subdivisions and 2 plats of Cathedral avenue were recorded prior to March 19, 1895, the date on which I qualified as surveyor of the District of Columbia, in accordance with act of Congress approved February 28, 1895. The remaining 362 surveys, 30 plats, and 27 subdivisions were made and recorded between that date and June 30, 1895.

The following services were performed, by order of Commissioners, prior to March 19, 1895:

*Surveys.*—Square 175, lot 3, pump house; square 1023, lots 37, 38, and 39, engine house.

*Plats.*—Square 830, opening and closing alleys; square 897, opening and closing alleys; extension of W street from Burleith to Thirty-fifth street NW; right of way through Branch avenue, East Washington Park; widening road at Rives Station; inclosure and Haddocks Hills; extension of Massachusetts avenue through the Naval Observatory grounds; addition to Zoological Park, dedicated by H. P. Waggaman; Rock Creek Park.

By order of the Commissioners, the following services were performed between March 19 and June 30, 1895:

*Surveys.*—Location of curb on Valley street, complaint of John A. Joyce; square 684, marking lines and locating obstructions in proposed alley; square 337, marking lines and locating obstructions in alley; Mount Pleasant (S. P. Brown's subdivision), block 3, lot 5, schoolhouse; reservation No. 7, lines of market and open space, north side thereof; District of Columbia line through Fowler tract, request of D. J. Howell; squares 90 and 109, surveying lines and locating obstructions on Florida avenue between Nineteenth street and Connecticut avenue; square 11, Bloomingdale, lines of 3-foot alley; square 175, lot 3, pump house; locating obstructions on Water street between M and O streets SW.; square south of 17, locating obstruction on Virginia and New Hampshire avenues; square 1187, lot 40, locating lines of bay window; square 555, lots 67 and 68, engine house; Mount Pleasant (S. P. Brown's subdivision), block 3, lot 5, schoolhouse; establishing lines of different squares fronting on Water street between the Long Bridge and United States arsenal; lines of alleys running north and south through blocks 2, 3, 6, 7, 10, and 11, Trinidad; line of O street extending 100 feet west from Twelfth street, Trinidad.

*Subdivisions, etc.*—Squares 833, 536, 684, and 464; widening Sherman avenue through Garfield Hospital grounds; 5 plats, opening of Albemarle street and extension of Thirty-eighth street; widening of Naylor road from Good Hope road to River road.

I respectfully recommend that an appropriation of \$2,000 be asked of Congress for the purchase of suitable material to be used in marking the different points of surveys throughout the city. Many of the stones which marked the original boundaries of squares have been removed, some prior and many during and subsequent to the late war. In the eastern section of the city the greatest damage in this respect has been done. The large area of open field in that section held out special inducements to the Government to occupy the same for the camping of troops and the erection of temporary buildings. While the work of building was going on large and heavily laden Government wagons engaged in hauling material and commissary stores ran against the stones located at the corners of many of the squares and broke and displaced them. In the thickly settled parts of the city large iron pins can be used to advantage, but in large areas of country, and especially in that portion of the city lying east of the Capitol, large square stones should be used. I feel deeply interested in this matter, and feel assured it will receive your serious consideration. The work can be done better and more quickly now, while the ground is unoccupied by houses, and the range of the streets can be more accurately determined than at a later date, when buildings are erected and the march of improvements blocks the way. I can not too earnestly request your cooperation in this matter, which is of such vital importance to Government and private interests.

Since the recent order of the Commissioners directing notification of this office previous to disturbance of sidewalks and roadway by improvements of any description, I have been able to prevent the loss of many valuable marks, both ends of about 200 square fronts and one end of each of some 400 other square fronts having been referenced so that the marks may be restored on completion of the improvements.

The gentlemen assigned to assist me are capable and efficient, and I can not speak too highly of them.

In conclusion, permit me to express my appreciation of the honor conferred upon me.

Very respectfully,

WM. FORSYTH,  
Surveyor, District of Columbia.

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

## REPORT OF THE BOARD OF EXAMINERS OF STEAM ENGINEERS.

WASHINGTON, D. C., July 30, 1895.

SIRS: We take pleasure in submitting to you the report of the board of examiners of steam engineers for the year ending June 30, 1895.

The following table will show the work as it progressed during each month:

| Year and month. | Meetings held. | Applications received. | Applications approved. | Applicants not competent. | First class. | Second class. | Third class. |
|-----------------|----------------|------------------------|------------------------|---------------------------|--------------|---------------|--------------|
| 1894.           |                |                        |                        |                           |              |               |              |
| July.....       | 4              | 5                      | 4                      | 1                         | 0            | 1             | 3            |
| August.....     | 5              | 13                     | 10                     | 3                         | 1            | 4             | 5            |
| September.....  | 6              | 8                      | 8                      | 0                         | 0            | 4             | 4            |
| October.....    | 9              | 17                     | 16                     | 1                         | 3            | 5             | 8            |
| November.....   | 9              | 23                     | 17                     | 6                         | 1            | 4             | 12           |
| December.....   | 7              | 17                     | 15                     | 2                         | 3            | 2             | 10           |
| 1895.           |                |                        |                        |                           |              |               |              |
| January.....    | 9              | 17                     | 15                     | 2                         | 4            | 2             | 0            |
| February.....   | 7              | 8                      | 6                      | 2                         | 0            | 2             | 4            |
| March.....      | 9              | 9                      | 5                      | 4                         | 0            | 3             | 2            |
| April.....      | 9              | 14                     | 10                     | 4                         | 2            | 2             | 6            |
| May.....        | 8              | 12                     | 9                      | 3                         | 0            | 6             | 3            |
| June.....       | 8              | 12                     | 11                     | 1                         | 2            | 0             | 9            |
| Total.....      | 90             | 155                    | 126                    | 29                        | 16           | 35            | 75           |

In concluding this report we deem it proper to state that the law regulating steam engineering and the rigid examination of applicants for steam engineer's license has been a great benefit to the community. As we now have a better class of engineers running steam plants, which is proven by the fact that during the year no accidents have occurred with any of the steam boilers in the District, and as a further evidence of the estimation put on the examining board by Government officials, citizens, or superintendents owning steam plants applicants for steam engineer's license frequently inform us that they will not be employed, and in some cases will lose their situation, if they do not obtain engineer's license.

The board of examiners are doing all in their power to make the office more efficient. Our estimate of the expenses for the year ending June 30, 1897, is \$900, and we most respectfully ask that the above amount be appropriated.

Respectfully submitted.

JOHN H. WILKERSON, *Chairman,*  
H. BOESCH, *Secretary,*  
DANIEL JOHNSON,  
*Examining Board.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

## REPORT OF THE INSPECTOR OF STEAM BOILERS.

WASHINGTON, D. C., July 29, 1895.

GENTLEMEN: I have the honor to make the following report for the fiscal year ended June 30, 1895:

## OPERATIONS AND RECEIPTS.

|   |            |
|---|------------|
| Fee boilers inspected during the year.....                              | 605        |
| Boilers inspected for the District of Columbia.....                     | 6          |
| Total.....  | 611        |
| New boilers erected.....  | 37         |
| Boilers condemned for repairs.....                                      | 20         |
| Boilers condemned for new ones.....                                     | 5          |
| Explosions.....   | None.      |
| Fees received for inspecting 595 boilers, at legal fee of \$5 each..... | \$2,975.00 |
| Fee still due from 10 boilers.  |            |

# 718 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

## EXPENSE FOR THE YEAR.

|  |                   |
|--|-------------------|
| Assistant, B. R. Wilkerson.....  | \$632. 00         |
| Laborer, A. Addison.....   | 400. 50           |
| Care of horse, \$240; shoeing horse, \$21.50.....                            | 261. 50           |
| Printing and stationery, \$12.25; material and tools for wagon, \$12.75..... | 25. 00            |
| Repairing and painting wagon.....  | 27. 50            |
| Repairing harness, 50 cents; one bridle and reins, \$3.50.....               | 4. 00             |
| <b>Total .....</b>   | <b>1, 350. 50</b> |
| <b>Received .....</b>  | <b>2, 975. 00</b> |
| <b>Expended .....</b>  | <b>1, 350. 50</b> |
| <b>Balance .....</b>   | <b>1, 624. 50</b> |

Estimate for expenses of the office for the year ending June 30, 1896, \$1,400.

I would most respectfully state that the year was one of great success. There was no loss of life or property. Although it was a year of business depression, there has been an increase in the number of steam boilers in the District of Columbia.

Respectfully submitted.

JOHN H. WILKERSON,  
*Inspector of Steam Boilers.*

The COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

## INSPECTED IN 1894.

*July 2.*—No. 1. Horizontal tubular boiler in building southwest corner Ninth and F streets NW., owned by the Washington Loan and Trust Company. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires July 2, 1895.

*July 2.*—No. 2. Horizontal tubular boiler in Builders' Exchange, No. 719 to 721 Thirteenth street NW., owned by the Builders' Exchange Improvement Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires July 2, 1895.

*July 2.*—No. 3. Locomotive-form boiler in Government Printing Office. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires July 2, 1895.

*July 3.*—No. 4. Vertical tubular boiler in wood and coal yard, Fourteenth street, between B and C streets NW., owned by J. Edward Chapman. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires July 3, 1895.

*July 3.*—No. 5. New vertical tubular boiler (on sewer) used for hoisting purposes; owned by H. L. Cranford. Hydrostatic pressure, 165 pounds; working pressure allowed, 110 pounds to square inch. Expires July 3, 1895.

*July 5.*—No. 6. Horizontal tubular boiler in Swiss Steam Laundry, No. 2115 E street NW., owned by the Swiss Steam Laundry Company. Hydrostatic pressure, 135 pounds; working pressure allowed, 90 pounds to square inch. Expires July 5, 1895.

*July 7.*—No. 7. Babcock & Wilcox Company boiler in car house, Eighth and L streets SE., owned by the Washington and Georgetown Railroad Company. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires July 7, 1895.

*July 9.*—No. 8. Horizontal tubular boiler in Swiss Steam Laundry, No. 2115 E street NW., owned by the Swiss Steam Laundry Company. Hydrostatic pressure, 135 pounds; working pressure allowed, 90 pounds to square inch. Expires July 9, 1895.

*July 9.*—No. 9. Horizontal tubular boiler in Agricultural Department. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires July 9, 1895.

*July 9.*—No. 10. Horizontal tubular boiler in Agricultural Department. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires July 9, 1895.

*July 9.*—No. 11. Horizontal tubular boiler in annex, Agricultural Department. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires July 9, 1895.

*July 9.*—No. 12. Horizontal tubular boiler in Fendall Building, No. 344 D street NW., E. A. Newman, manager. Hydrostatic pressure, 140 pounds; working pressure allowed, 80 pounds to square inch. Expires July 9, 1895.

*July 9.*—No. 13. Vertical tubular boiler in machine shop at Deanwood, D. C., owned by the American Energizer Manufacturing Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires July 9, 1895.

*July 10.*—No. 14. Horizontal tubular boiler in Builders' Exchange, No. 719 to 721 Thirteenth street NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires July 10, 1895.

*July 10.*—No. 15. Horizontal tubular boiler in building, southwest corner Ninth and F streets NW., owned by the Washington Loan and Trust Company. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires July 10, 1895.

*July 10.*—No. 16. Horizontal tubular boiler in No. 624 to 626 Virginia avenue SW., owned by N. Auth. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires July 10, 1895.

*July 12.*—No. 17. Horizontal tubular boiler in laundry at Deaf and Dumb Asylum. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires July 12, 1895.

*July 13.*—No. 18. Vertical tubular boiler in Pacific Building, No. 622-624 F street NW., owned by the Pacific Building Company. Hydrostatic pressure, 120 pounds; working pressure, allowed 70 pounds to square inch. Expires July 13, 1895.

*July 13.*—No. 19. Horizontal tubular boiler in iron works, No. 460 to 474 Maine avenue SW., owned by George White & Sons. Hydrostatic pressure, 140 pounds; working pressure allowed; 80 pounds to square inch. Expires July 13, 1895.

*July 14.*—No. 20. Horizontal tubular boiler in steam bakery, No. 413 I street NW., owned by Charles Schneider. Hydrostatic pressure, 80 pounds; working pressure allowed, 50 pounds to square inch. Expires July 14, 1895.

*July 14.*—No. 21. Vertical tubular boiler in brickyard at Ivy City, D. C., owned by the Childs Brick Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 95 pounds to square inch. Expires July 14, 1895.

*July 16.*—No. 22. Horizontal tubular boiler in mill, Virginia avenue and Four-and-a-half street SW., owned by the Washington Flour and Feed Company. Hydrostatic pressure, 125 pounds; working pressure allowed, 85 pounds to square inch. Condemned for repairs; repaired and passed. Expires July 16, 1895.

*July 17.*—No. 23. Locomotive-form boiler at wharf and mill, foot of Sixth street SW., owned by estate of G. L. Sheriff. Hydrostatic pressure, 85 pounds; working pressure allowed, 50 pounds to square inch. Expires July 17, 1895.

*July 17.*—No. 24. Vertical tubular boiler in No. 1005 Seventh street SW., owned by Leonard J. Nilson. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires July 17, 1895.

*July 17.*—No. 25. Vertical tubular boiler in Union Stock Yards, Bennings, D. C., used for pumping purposes. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires July 17, 1895.

*July 18.*—Nos. 26 and 27. Horizontal tubular boilers in works, South Capitol and R streets SE., owned by the Washington Asphalt Block and Tile Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds each to square inch. Expire July 18, 1895.

*July 18.*—No. 28. Horizontal tubular boiler in Pacific Building. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires July 18, 1895.

*July 18.*—No. 29. Vertical tubular boiler in galvanized iron and copper works, 632 K street SW., owned by A. S. Reavis. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires July 18, 1895.

*July 19.*—No. 30. Locomotive-form boiler in works, Seventh and L streets SW., owned by Chace & Bro. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires July 19, 1895.

*July 20.*—No. 31. Vertical tubular boiler foot of Seventeenth street NW., owned by J. B. Lord. Hydrostatic pressure, 140 pounds; working pressure allowed, 80 pounds, if necessary 90 pounds, to square inch. Expires July 20, 1895.

*July 20.*—Nos. 32 (1), 33 (2), and 34 (4). Babcock & Wilcox Company boilers in Power House, Fourteenth and E streets NW., owned by the Washington and Georgetown Railroad Company. Hydrostatic pressure, 200 pounds; working pressure allowed, 125 pounds each to square inch. Expire July 20, 1895.

*July 21.*—No. 35. Vertical tubular boiler in printing office, No. 623 D street NW., owned by J. F. Sheiry. Hydrostatic pressure, 155 pounds; working pressure allowed, 60 pounds, if necessary 70 pounds, to square inch. Expires July 21, 1895.

*July 23.*—Nos. 36 (3), 37 (5), and 38 (6). Babcock & Wilcox Company boilers in power house, Fourteenth and E streets NW. Hydrostatic pressure, 200 pounds; working pressure allowed, 125 pounds each to square inch. Expire July 23, 1895.

*July 23.*—No. 39. New Horizontal tubular boiler in Hotel Emrich, Nos. 485 to 499 Pennsylvania avenue NW. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds, if necessary 90 pounds, to square inch. Expires July 23, 1895.

*July 23.*—No. 40. Vertical tubular boiler in Bureau of Animal Industry of the United States Agricultural Department, No. 1362 B street SW. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires July 23, 1895.

*July 23.*—No. 41. Vertical tubular boiler in Chemical Laboratory of the United States Agricultural Department, Fourteenth and B streets SW. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Condemned for a new boiler; allowed to run three months. Expires October 23, 1894.

*July 24.*—No. 42. Vertical tubular boiler in slaughterhouse, Ninth and C streets NE., owned by John Howard. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires July 24, 1895.

*July 24.*—No. 43. Vertical tubular boiler in machine shop, Maine avenue, between Third and Four-and-a-half streets SW., owned by E. N. Gray & Co. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires July 24, 1895.

*July 25.*—No. 44. Vertical tubular boiler in dye works, No. 1535 Fourteenth street NW., owned by R. C. Douglas. Hydrostatic pressure, 90 pounds; working pressure allowed, 50 pounds to square inch. Expires July 25, 1895.

*July 25.*—No. 45. Babcock & Wilcox Company boiler in car house, Mount Pleasant, D. C., owned by the Washington and Georgetown Railroad Company. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires July 25, 1895.

*July 25.*—Nos. 46 (7) and 47 (8). Babcock & Wilcox Company boilers in power house, Fourteenth and E streets NW. Hydrostatic pressure, 200 pounds; working pressure allowed, 125 pounds each to square inch. Expire July 25, 1895.

*July 25.*—No. 48. Vertical tubular boiler in plant, Nos. 624 and 626 Virginia avenue SW., owned by N. Auth. Hydrostatic pressure, 225 pounds; working pressure allowed, 150 pounds to square inch. Expires July 25, 1895.

*July 26.*—No. 49. Horizontal tubular boiler in printing office, No. 1346 Florida avenue NW., owned by the Brodix Publishing Company. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires July 26, 1895.

*July 26.*—No. 50. Horizontal tubular boiler in brewery, Nos. 1221 to 1233 Twentieth street NW., owned by the Christian Heurich Brewing Company. Hydrostatic pressure, 140 pounds; working pressure allowed, 80 pounds to square inch. Expires July 26, 1895.

*July 27.*—No. 51. Vertical tubular boiler used for hoisting purposes owned by W. C. Morrison. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires July 27, 1895.

*July 27.*—No. 52. Vertical tubular boiler in No. 1634 Fourteenth street NW., owned by D. J. Weyman. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires July 27, 1895.

*July 28.*—No. 53. New vertical tubular boiler used for hoisting purposes, owned by Henry Conradis & Son. Hydrostatic pressure, 155 pounds; working pressure allowed, 100 pounds to square inch. Expires July 28, 1895.

*July 30.*—No. 54. Horizontal tubular boiler in exhaust house, Twenty-seventh and H streets NW., owned by the Washington Gas Light Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires July 30, 1895.

*July 30.*—No. 55. Vertical boiler in gas works, Twelfth and M streets SE., owned by the Washington Gas Light Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires July 30, 1895.

*July 31.*—No. 56. Horizontal tubular boiler in printing office, No. 1346 Florida avenue NW., owned by the Brodix Publishing Company. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires July 31, 1895.

*July 31.*—No. 57. Economic boiler in Franklin Steam Laundry, No. 504 Thirteenth street NW., owned by F. V. Killian. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch. Expires July 31, 1895.

*July 31.*—No. 58. Vertical tubular boiler in Washington City Orphan Asylum, Fourteenth and S streets NW. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds, if necessary 90 pounds, to square inch. Expires July 31, 1895.

*August 2.*—No. 59. New vertical tubular boiler in steam bakery in rear of No. 116 Virginia avenue SW., owned by John H. Trusheim. Hydrostatic pressure, 150 pounds; working pressure allowed, 70 pounds, if necessary 80 pounds, to square inch. Expires August 2, 1895.

*August 2.*—No. 60. Vertical tubular boiler in steam bakery, Wiltberger street NW., owned by J. M. Ruth. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 2, 1895.

*August 3.*—No. 61. Baxter boiler in ice-cream depot, No. 1427 New York avenue NW., owned by the Jacob Fussell Company. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires August 3, 1895.

*August 3.*—No. 62. Locomotive-form boiler in wood and coal yard, 2618 Pennsylvania avenue NW., owned by H. Tumety. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires August 3, 1895.

*August 4.*—No. 63. Vertical tubular boiler in wood and coal yard, Third and P streets NW., owned by Mrs. J. E. Divver. Hydrostatic pressure, 140 pounds; working pressure allowed, 80 pounds to square inch. Expires August 4, 1895.

*August 4.*—No. 64. Vertical tubular boiler in steam bakery, Seventh street NW., owned by Corby Bros. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 4, 1895.

*August 6.*—No. 65. New horizontal tubular boiler in slaughterhouse, Seventh street NW., owned by A. Löffler. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds to square inch. Expires August 6, 1895.

*August 6.*—No. 66. Vertical boiler in gas works, Twelfth and M streets SE., owned by the Washington Gas Light Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires August 6, 1895.

*August 7.*—Nos. 67 and 68. Horizontal tubular boilers in ammonia works, Twenty-seventh street, between G and H streets NW., owned by the B. P. Clapp Ammonia Company. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds each to square inch. Expires August 7, 1895.

*August 7.*—No. 69. Horizontal tubular boiler in Riggs House, Fifteenth and G streets NW., G. De Witt, manager. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 7, 1895.

*August 8.*—No. 70. Horizontal tubular boiler in McGill Building, No. 906 G street NW., owned by James H. McGill. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 8, 1895.

*August 9.*—No. 71. Vertical tubular boiler in grocery store, No. 946 to 950 Louisiana avenue NW., owned by W. H. Walker. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires August 9, 1895.

*August 10.*—No. 72. Vertical tubular boiler in slaughterhouse, Cottage Hill NE., District of Columbia, owned by J. H. Ruppert. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 10, 1895.

*August 11.*—No. 73. Vertical tubular boiler in bottling works, Twenty-seventh and K streets NW., owned by the Arlington Bottling Company. Hydrostatic pressure, 110 pounds; working pressure allowed, 70 pounds to square inch. Expires August 11, 1895.

*August 11.*—No. 74. Vertical tubular boiler in warehouse, K street and James Creek Canal SW., owned by Nicolai Bros. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires August 11, 1895.

*August 11.*—No. 75. Horizontal tubular boiler in Columbia Hospital, Twenty-fifth and L streets NW. Hydrostatic pressure, 115 pounds; working pressure allowed, 70 pounds to square inch. Expires August 11, 1895.

*August 13.*—No. 76. Horizontal tubular boiler in planing mill, foot of Ninth street SW., owned by Wimsatt & Uhler. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 13, 1895.

*August 13.*—No. 77. Horizontal tubular boiler in power house, Ontario avenue and Superior street NW., owned by the Rock Creek Railway Company. Hydrostatic pressure, 155 pounds; working pressure allowed, 100 pounds to square inch. Expires August 13, 1895.

*August 13.*—Nos. 78 and 79. Horizontal tubular boilers in slaughterhouse, Benning, D. C., owned by the Washington Abattoir Company. Hydrostatic pressure, 140 pounds; working pressure, 80 pounds each to square inch. Expires August 13, 1895.

*August 14.*—No. 80. Horizontal tubular boiler in Riggs House, Fifteenth and G streets NW. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch. Expires August 14, 1895.

*August 14.*—Nos. 81 and 82. Horizontal tubular boilers in Central Building, northwest corner Pennsylvania avenue and Ninth street NW., owned by the Gunton estate. Hydrostatic pressure, 90 pounds; working pressure allowed, 60 pounds each to square inch. Expires August 14, 1895.

*August 15.*—No. 83. Horizontal tubular boiler in Providence Hospital, Second and D streets SE. Hydrostatic pressure, 120 pounds; working pressure, 60 pounds to square inch. Expires August 15, 1895.

*August 15.*—No. 84 (67). Locomotive boiler in roundhouse, South Capitol and I streets SE., owned by the Philadelphia, Wilmington and Baltimore Railroad Company. Hydrostatic pressure, 165 pounds; working pressure allowed, 110 pounds to square inch. Expires August 15, 1895.

*August 15.*—No. 85. Horizontal tubular boiler in McGill Building, No. 906 G street NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 15, 1895.

*August 16.*—No. 86 (81). Locomotive boiler in roundhouse, South Capitol and I streets SE. Hydrostatic pressure, 175 pounds; working pressure allowed, 120 pounds to square inch. Expires August 16, 1895.

*August 17.*—No. 87. Vertical tubular boiler in works, Nos. 458 to 460 Pennsylvania avenue NW., owned by the Norris Peters Company. Hydrostatic pressure, 110

pounds; working pressure allowed, 70 pounds to square inch. Condemned for repairs; repaired and passed. Expires August 17, 1895.

*August 17.*—No. 88 (70). Locomotive boiler in station, corner Sixth and B streets NW., owned by the Philadelphia, Wilmington and Baltimore Railroad Company. Hydrostatic pressure, 125 pounds; working pressure allowed, 65 pounds, if necessary 80 pounds, to square inch. Expires August 17, 1895.

*August 18.*—No. 89 (27). Locomotive boiler in station, corner Sixth and B streets NW. Hydrostatic pressure, 125 pounds; working pressure allowed, 65 pounds, if necessary 80 pounds, to square inch. Expires August 18, 1895.

*August 20.*—No. 90. Horizontal tubular boiler in restaurant, No. 1016 Pennsylvania avenue NW., owned by George W. Harvey. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 20, 1895.

*August 20.*—Nos. 91 and 92. Horizontal tubular boilers in dry goods house, Nos. 420 to 426 Seventh street NW., owned by Lansburgh & Bro. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds each to square inch. Expire August 20, 1895.

*August 21.*—Nos. 93 and 94. Horizontal tubular boilers in Saks Building, Nos. 300 to 308 Seventh street NW., owned by Saks & Co. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds each to square inch. Expire August 20, 1895.

*August 21.*—No. 95. Horizontal tubular boiler in Star Building, No. 1101 Pennsylvania avenue NW., owned by the Evening Star Newspaper Company. Hydrostatic pressure, 145 pounds; working pressure allowed, 90 pounds to square inch. Expires August 21, 1895.

*August 22.*—No. 96. Horizontal tubular boiler in Providence Hospital. Hydrostatic pressure, 120 pounds; working pressure allowed, 60 pounds to square inch. Expires August 22, 1895.

*August 23.*—Nos. 97 and 98. Economic boilers in Corcoran Building, corner Fifteenth street and Pennsylvania avenue NW., owned by estate of W. W. Corcoran. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds each to square inch. Expire August 23, 1895.

*August 23.*—No. 99 (2). Horizontal tubular steel boiler in plant, Thirteen-and-a-half and B streets NW., owned by the United States Electric Lighting Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 95 pounds to square inch. Expires August 23, 1895.

*August 24.*—Nos. 100 (4) and 101 (5). Horizontal tubular steel boilers in plant, Thirteen-and-a-half and B streets NW. Hydrographic pressure, 150 pounds; working pressure allowed, 95 pounds each to square inch. Expire August 24, 1895.

*August 24.*—No. 102. Horizontal tubular boiler in the Concord, corner New Hampshire avenue and Oregon street NW., owned by Dr. Gregory. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 24, 1895.

*August 24.*—No. 103. Combination boiler in power house, owned by the Rock Creek Railway. Hydrostatic pressure, 160 pounds; working pressure allowed, 105 pounds to square inch. Expires August 24, 1895.

*August 27.*—No. 104. Horizontal tubular boiler in planing mill, Thirtieth and K streets NW., owned by Wheatley Bros. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch. Expires August 27, 1895.

*August 27.*—Nos. 105 and 106. Horizontal tubular boilers in Palais Royal, Eleventh and G streets NW., owned by A. Lisner. Hydrostatic pressure, 150 pounds; working pressure allowed, 95 pounds each to square inch. Expire August 27, 1895.

*August 28.*—No. 107. Vertical tubular boiler used for hoisting purposes, owned by G. H. Turton & Son. Hydrostatic pressure, 130 pounds; working pressure allowed, 80 pounds to square inch. Expires August 28, 1895.

*August 28.*—No. 108. Horizontal tubular boiler in Star Building, No. 1101 Pennsylvania avenue NW. Hydrostatic pressure, 145 pounds; working pressure allowed, 90 pounds to square inch. Expires August 28, 1895.

*August 29.*—No. 109. Vertical tubular boiler in bottling works, Virginia avenue, near First street SW., owned by the Anheuser-Busch Brewing Company. Hydrostatic pressure, 90 pounds; working pressure allowed, 60 pounds to square inch. Expires August 29, 1895.

*August 29.*—No. 110. Horizontal tubular boiler in Post Building, E street between Thirteenth and Fourteenth streets NW., owned by the Daily Post Publishing Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 29, 1895.

*August 29.*—No. 111. Horizontal tubular boiler in Ebbitt House, Fourteenth and F streets NW., H. C. Burch, manager. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 29, 1895.

*August 31.*—No. 112. Horizontal tubular boiler in Post Building. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 31, 1895.

*August 31.*—No. 113. Horizontal tubular boiler in Hooe Building, Nos. 1328 to 1334 F street NW., owned by C. C. Willard. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires August 31, 1895.

*August 31.*—No. 114. Horizontal tubular boiler in Adams Building, Nos. 1333 and 1335 F street NW., owned by C. C. Willard. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds, if necessary 80 pounds, to square inch. Expires August 31, 1895.

*August 31.*—No. 115. Vertical tubular boiler in wood and coal yard, Virginia avenue and Twenty-first street NW., owned by William Muirhead. Hydrostatic pressure, 100 pounds; working pressure allowed, 50 pounds to square inch. Condemned. Expires December 1, 1894.

*September 1.*—No. 116. Vertical tubular boiler in steam bakery, No. 1254 Thirty-second street NW., owned by Fred Stohlman. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 1, 1895.

*September 3.*—No. 117. Horizontal tubular boiler in the Ebbitt. H. C. Burch, manager. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 3, 1895.

*September 3.*—No. 118. Locomotive-form boiler in the Ebbitt. Hydrostatic pressure, 80 pounds; working pressure allowed, 50 pounds to square inch. Condemned for a new boiler. Allowed to run two months. Expires November 3, 1894.

*September 4.*—No. 119. Horizontal tubular boiler in Baltic Building, No. 606 F street NW., owned by Christian Ruppert's estate. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires September 4, 1895.

*September 4.*—Nos. 120 and 121. Horizontal tubular boilers in Palais Royal, G and Eleventh streets NW., owned by A. Lisner. Hydrostatic pressure, 150 pounds; working pressure allowed, 95 pounds to each square inch. Expires September 4, 1895.

*September 4.*—No. 122. Horizontal tubular boiler in Hooe Building, No. 1328 to 1334 F street NW. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires September 4, 1895.

*September 4.*—No. 123. Horizontal tubular boiler in Adams Building, Nos. 1333 and 1335 F street NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 4, 1895.

*September 5.*—No. 124. Horizontal tubular boiler in Department of Justice, Pennsylvania avenue NW. Hydrostatic pressure, 75 pounds; working pressure allowed, 50 pounds to square inch. Expires September 5, 1895.

*September 6.*—No. 125. Horizontal tubular boiler in Corcoran Building Pennsylvania avenue and Fifteenth street NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 6, 1895.

*September 6.*—No. 126. Water-tube boiler in gas works, Twenty-sixth and G streets NW., owned by the Washington Gaslight Company. Hydrostatic pressure, 165 pounds; working pressure allowed, 110 pounds to square inch. Expires September 6, 1895.

*September 7.*—No. 127. Vertical tubular boiler in brewery, Twenty-fifth and F streets NW., owned by the Albert Brewing Company. Hydrostatic pressure, 95 pounds; working pressure allowed, 60 pounds to square inch. Expires September 7, 1895.

*September 8.*—No. 128. Horizontal tubular boiler in wood yard, foot of Thirtieth street NW., owned by W. H. and C. R. Schutt. Hydrostatic pressure 110 pounds; working pressure allowed, 70 pounds to square inch. Expires September 8, 1895.

*September 10.*—No. 129. Horizontal tubular boiler in printing office, Nos. 420 and 422 Eleventh street NW., owned by Judd and Detweiler. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 10, 1895.

*September 10.*—Nos. 130 and 131. Horizontal tubular boilers in planing mill, G near First street NE., owned by Thos. W. Smith. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds each to square inch. Expire September 10, 1895.

*September 10.*—No. 132. Horizontal tubular boiler in Sun Building, Nos. 1315 and 1317 F street NW., Edwin F. Abell, trustee. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 10, 1895.

*September 11.*—No. 133. Economic boiler in steam stone works, Third street and Maine avenue SW., owned by Robert Low & Co. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires September 11, 1895.

*September 11.*—No. 134. Horizontal tubular boiler in exhaust house, Twenty-seventh and H streets NW., owned by the Washington Gaslight Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires September 11, 1895.

*September 11.*—No. 135. Locomotive-form boiler in machine shop, gas works, Twenty-sixth and G streets NW., owned by the Washington Gaslight Company. Hydrostatic pressure, 90 pounds; working pressure allowed, 40 pounds to square inch. Expires September 11, 1895.

pounds; working pressure allowed, 70 pounds to square inch. Condemned for repairs; repaired and passed. Expires August 17, 1895.

*August 17.*—No. 88 (70). Locomotive boiler in station, corner Sixth and B streets NW., owned by the Philadelphia, Wilmington and Baltimore Railroad Company. Hydrostatic pressure, 125 pounds; working pressure allowed, 65 pounds, if necessary 80 pounds, to square inch. Expires August 17, 1895.

*August 18.*—No. 89 (27). Locomotive boiler in station, corner Sixth and B streets NW. Hydrostatic pressure, 125 pounds; working pressure allowed, 65 pounds, if necessary 80 pounds, to square inch. Expires August 18, 1895.

*August 20.*—No. 90. Horizontal tubular boiler in restaurant, No. 1016 Pennsylvania avenue NW., owned by George W. Harvey. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 20, 1895.

*August 20.*—Nos. 91 and 92. Horizontal tubular boilers in dry goods house, Nos. 420 to 426 Seventh street NW., owned by Lansburgh & Bro. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds each to square inch. Expire August 20, 1895.

*August 21.*—Nos. 93 and 94. Horizontal tubular boilers in Saks Building, Nos. 300 to 308 Seventh street NW., owned by Saks & Co. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds each to square inch. Expire August 20, 1895.

*August 21.*—No. 95. Horizontal tubular boiler in Star Building, No. 1101 Pennsylvania avenue NW., owned by the Evening Star Newspaper Company. Hydrostatic pressure, 145 pounds; working pressure allowed, 90 pounds to square inch. Expires August 21, 1895.

*August 22.*—No. 96. Horizontal tubular boiler in Providence Hospital. Hydrostatic pressure, 120 pounds; working pressure allowed, 60 pounds to square inch. Expires August 22, 1895.

*August 23.*—Nos. 97 and 98. Economic boilers in Corcoran Building, corner Fifteenth street and Pennsylvania avenue NW., owned by estate of W. W. Corcoran. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds each to square inch. Expire August 23, 1895.

*August 23.*—No. 99 (2). Horizontal tubular steel boiler in plant, Thirteen-and-a-half and B streets NW., owned by the United States Electric Lighting Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 95 pounds to square inch. Expires August 23, 1895.

*August 24.*—Nos. 100 (4) and 101 (5). Horizontal tubular steel boilers in plant, Thirteen-and-a-half and B streets NW. Hydrographic pressure, 150 pounds; working pressure allowed, 95 pounds each to square inch. Expire August 24, 1895.

*August 24.*—No. 102. Horizontal tubular boiler in the Concord, corner New Hampshire avenue and Oregon street NW., owned by Dr. Gregory. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 24, 1895.

*August 24.*—No. 103. Combination boiler in power house, owned by the Rock Creek Railway. Hydrostatic pressure, 160 pounds; working pressure allowed, 105 pounds to square inch. Expires August 24, 1895.

*August 27.*—No. 104. Horizontal tubular boiler in planing mill, Thirtieth and K streets NW., owned by Wheatley Bros. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch. Expires August 27, 1895.

*August 27.*—Nos. 105 and 106. Horizontal tubular boilers in Palais Royal, Eleventh and G streets NW., owned by A. Lisner. Hydrostatic pressure, 150 pounds; working pressure allowed, 95 pounds each to square inch. Expire August 27, 1895.

*August 28.*—No. 107. Vertical tubular boiler used for hoisting purposes, owned by G. H. Turton & Son. Hydrostatic pressure, 130 pounds; working pressure allowed, 80 pounds to square inch. Expires August 28, 1895.

*August 28.*—No. 108. Horizontal tubular boiler in Star Building, No. 1101 Pennsylvania avenue NW. Hydrostatic pressure, 145 pounds; working pressure allowed, 90 pounds to square inch. Expires August 28, 1895.

*August 29.*—No. 109. Vertical tubular boiler in bottling works, Virginia avenue, near First street SW., owned by the Anheuser-Busch Brewing Company. Hydrostatic pressure, 90 pounds; working pressure allowed, 60 pounds to square inch. Expires August 29, 1895.

*August 29.*—No. 110. Horizontal tubular boiler in Post Building, E street between Thirteenth and Fourteenth streets NW., owned by the Daily Post Publishing Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 29, 1895.

*August 29.*—No. 111. Horizontal tubular boiler in Ebbitt House, Fourteenth and F streets NW., H. C. Burch, manager. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 29, 1895.

*August 31.*—No. 112. Horizontal tubular boiler in Post Building. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires August 31, 1895.

*August 31.*—No. 113. Horizontal tubular boiler in Hooe Building, Nos. 1328 to 1334 F street NW., owned by C. C. Willard. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires August 31, 1895.

*August 31.*—No. 114. Horizontal tubular boiler in Adams Building, Nos. 1333 and 1335 F street NW., owned by C. C. Willard. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds, if necessary 80 pounds, to square inch. Expires August 31, 1895.

*August 31.*—No. 115. Vertical tubular boiler in wood and coal yard, Virginia avenue and Twenty-first street NW., owned by William Muirhead. Hydrostatic pressure, 100 pounds; working pressure allowed, 50 pounds to square inch. Condemned. Expires December 1, 1894.

*September 1.*—No. 116. Vertical tubular boiler in steam bakery, No. 1254 Thirty-second street NW., owned by Fred Stohlman. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 1, 1895.

*September 3.*—No. 117. Horizontal tubular boiler in the Ebbitt. H. C. Burch, manager. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 3, 1895.

*September 3.*—No. 118. Locomotive-form boiler in the Ebbitt. Hydrostatic pressure, 80 pounds; working pressure allowed, 50 pounds to square inch. Condemned for a new boiler. Allowed to run two months. Expires November 3, 1894.

*September 4.*—No. 119. Horizontal tubular boiler in Baltic Building, No. 606 F street NW., owned by Christian Ruppert's estate. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires September 4, 1895.

*September 4.*—Nos. 120 and 121. Horizontal tubular boilers in Palais Royal, G and Eleventh streets NW., owned by A. Lisner. Hydrostatic pressure, 150 pounds; working pressure allowed, 95 pounds to each square inch. Expires September 4, 1895.

*September 4.*—No. 122. Horizontal tubular boiler in Hooe Building, No. 1328 to 1334 F street NW. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires September 4, 1895.

*September 4.*—No. 123. Horizontal tubular boiler in Adams Building, Nos. 1333 and 1335 F street NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 4, 1895.

*September 5.*—No. 124. Horizontal tubular boiler in Department of Justice, Pennsylvania avenue NW. Hydrostatic pressure, 75 pounds; working pressure allowed, 50 pounds to square inch. Expires September 5, 1895.

*September 6.*—No. 125. Horizontal tubular boiler in Corcoran Building Pennsylvania avenue and Fifteenth street NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 6, 1895.

*September 6.*—No. 126. Water-tube boiler in gas works, Twenty-sixth and G streets NW., owned by the Washington Gaslight Company. Hydrostatic pressure, 165 pounds; working pressure allowed, 110 pounds to square inch. Expires September 6, 1895.

*September 7.*—No. 127. Vertical tubular boiler in brewery, Twenty-fifth and F streets NW., owned by the Albert Brewing Company. Hydrostatic pressure, 95 pounds; working pressure allowed, 60 pounds to square inch. Expires September 7, 1895.

*September 8.*—No. 128. Horizontal tubular boiler in wood yard, foot of Thirtieth street NW., owned by W. H. and C. R. Schutt. Hydrostatic pressure 110 pounds; working pressure allowed, 70 pounds to square inch. Expires September 8, 1895.

*September 10.*—No. 129. Horizontal tubular boiler in printing office, Nos. 420 and 422 Eleventh street NW., owned by Judd and Detweiler. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 10, 1895.

*September 10.*—Nos. 130 and 131. Horizontal tubular boilers in planing mill, G near First street NE., owned by Thos. W. Smith. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds each to square inch. Expire September 10, 1895.

*September 10.*—No. 132. Horizontal tubular boiler in Sun Building, Nos. 1315 and 1317 F street NW., Edwin F. Abell, trustee. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 10, 1895.

*September 11.*—No. 133. Economic boiler in steam stone works, Third street and Maine avenue SW., owned by Robert Low & Co. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires September 11, 1895.

*September 11.*—No. 134. Horizontal tubular boiler in exhaust house, Twenty-seventh and H streets NW., owned by the Washington Gaslight Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires September 11, 1895.

*September 11.*—No. 135. Locomotive-form boiler in machine shop, gas works, Twenty-sixth and G streets NW., owned by the Washington Gaslight Company. Hydrostatic pressure, 90 pounds; working pressure allowed, 40 pounds to square inch. Expires September 11, 1895.

*September 11.*—Nos. 136 and 137. National water-tube boilers, west side. Plant Thirteen-and-a-half and B streets NW., owned by the United States Electric Lighting Company. Hydrostatic pressure, 225 pounds; working pressure allowed, 150 pounds each to square inch. Expire September 11, 1895.

*September 12.*—No. 138. Water-tube boiler in gas works, Twenty-sixth and G streets NW. Hydrostatic pressure, 165 pounds; working pressure allowed, 110 pounds to square inch. Expires September 12, 1895.

*September 12.*—No. 139. Horizontal tubular boiler in asphalt works, Littlefield Wharf NW., owned by Thomas H. Thomas. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch. Expires September 12, 1895.

*September 12.*—No. 140. Vertical tubular boiler on steam roller, owned by Thos. H. Thomas. Hydrostatic pressure, 180 pounds; working pressure allowed, 120 pounds to square inch. Expires September 12, 1895.

*September 13.*—No. 141. Horizontal tubular boiler in Sun Building, Nos. 1315 to 1317 F street NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 13, 1895.

*September 13.*—No. 142. National water-tube boiler, west side. Plant Thirteen-and-a-half and B streets NW. Hydrostatic pressure, 225 pounds; working pressure allowed, 150 pounds to square inch. Expires September 13, 1895.

*September 14.*—No. 143. New vertical tubular boiler in machine shop, No. 1054 Thirty-first street NW., owned by Herman Hollerith. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires September 14, 1895.

*September 14.*—No. 144. Locomotive-form boiler in wood and coal yard, Virginia avenue and Sixth street SE., J. E. Rose, agent. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires September 14, 1895.

*September 14.* No. 145. Babcock & Wilcox Co. boiler in the Arlington, Vermont avenue and H street NW., T. E. Roeselle, proprietor. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires October 1, 1895.

*September 15.*—No. 146. Vertical tubular boiler in carpet-cleaning works, Fifth and K streets SE., owned by F. H. Youngs. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 15, 1895.

*September 17.*—No. 147. Horizontal tubular boiler in slaughterhouse, Bladensburg road, owned by N. Auth. Hydrostatic pressure, 135 pounds; working pressure allowed, 90 pounds to square inch. Expires September 17, 1895.

*September 17.*—No. 148. Horizontal tubular boiler in steam stone works, 407 Thirteen-and-a-half street NW., owned by C. M. Manning. Hydrostatic pressure, 125 pounds; working pressure allowed, 70 pounds to square inch. Expires September 17, 1895.

*September 18.*—No. 149. Horizontal tubular boiler in the Wormley, Fifteenth and H streets NW., Charles E. Gibbs, proprietor. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires September 18, 1895.

*September 18.*—Nos. 150, 151, and 152. Horizontal tubular boilers in Weather Bureau of Department of Agriculture, Twenty-fourth and L streets NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 60 pounds, if necessary 80 pounds, each to square inch. Expires September 18, 1895.

*September 19.*—No. 153. Vertical tubular boiler in wood and coal yard, Fifth and R streets NE., owned by George W. Merrill. Hydrostatic pressure, 150 pounds; working pressure allowed 80 pounds to square inch. Expires September 19, 1895.

*September 20.*—No. 454. Horizontal tubular boiler in bottling works, Virginia avenue between Sixth and Seventh streets SW., owned by Samuel C. Palmer. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 20, 1895.

*September 20.*—No. 155. Horizontal tubular boiler in store Thirteenth and F streets NW., Craig and Harding, proprietors. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 20, 1895.

*September 20.*—No. 156. Return tubular boiler at Tenth street wharf SW., owned by Great Falls Ice Company. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires September 20, 1895.

*September 21.*—No. 157. Vertical tubular boiler at new Post-Office Building, used for hoisting purposes, owned by John Peirce. Hydrostatic pressure, 170 pounds; working pressure allowed, 110 pounds to square inch. Expires September 21, 1895.

*September 21.*—No. 158. Locomotive-form boiler at wharf, Georgetown, D. C., owned by Great Falls Ice Company. Hydrostatic pressure, 115 pounds; working pressure allowed, 70 pounds to square inch. Expires September 21, 1895.

*September 21.*—No. 159. Babcock & Wilcox Company boiler in the La Normandie, Fifteenth and I streets NW., H. M. Cake, proprietor. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires September 21, 1895.

*September 22.*—No. 160. Horizontal tubular boiler in the Wormley. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires September 22, 1895.

*September 24.*—No. 161. Horizontal tubular boiler in the Academy of Visitation, Connecticut avenue and L street NW. Hydrostatic pressure, 30 pounds; working pressure allowed, 15 pounds to square inch. Expires September 24, 1895.

*September 25.*—No. 162. Horizontal tubular boiler in Second National Bank, 509 Seventh street NW. Hydrostatic pressure, 100 pounds; working pressure allowed, 50 pounds to square inch. Expires September 25, 1895.

*September 25.*—No. 163. Horizontal tubular boiler in store Thirteenth and F streets NW., Craig and Harding, proprietors. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 25, 1895.

*September 26.*—No. 164. Horizontal tubular boiler in the Cochran, Fourteenth and K streets NW., John C. Mulford, proprietor. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires September 26, 1895.

*September 27.*—No. 165. Horizontal tubular boiler in the Cochran. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires September 27, 1895.

*September 28.*—No. 166. Babcock & Wilcox Company boiler in La Normandie. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires September 28, 1895.

*September 28.*—No. 167. Horizontal tubular boiler in The Concord, New Hampshire avenue and Oregon street NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires September 28, 1895.

*October 1.*—Nos. 168 and 169. Horizontal tubular boilers in brickyard at Ivy City, D. C., owned by the Childs Brick Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds each to square inch. Expires October 1, 1895.

*October 1.*—No. 170. Babcock & Wilcox Company boiler in The Arlington. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires October 1, 1895.

*October 2.*—Nos. 171, 172, 173, and 174. Horizontal tubular boilers in National Museum. Hydrostatic pressure, 125 pounds; working pressure allowed, 50 pounds each to square inch. Expires October 2, 1895.

*October 3.*—No. 175. Vertical tubular boiler in steam bakery, No. 3159 O street NW., owned by H. Coppeithite. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires October 3, 1895.

*October 3.*—No. 176. Vertical tubular boiler in wood and coal yard, owned by S. C. Carter. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires October 3, 1895.

*October 3.*—No. 177. Horizontal tubular boiler in Kellogg Building, No. 1416 F street NW., owned by H. A. Willard. Hydrostatic pressure, 110 pounds; working pressure allowed, 65 pounds to square inch. Expires October 3, 1895.

*October 4.*—No. 178. Horizontal tubular boiler in Perry Building, Pennsylvania avenue and Ninth street NW., owned by Seaton Perry. Hydrostatic pressure, 110 pounds; working pressure allowed, 70 pounds to square inch. Expires October 4, 1895.

*October 4.*—No. 179. New patent cast-iron boiler in Metzert Music Hall, Twelfth and F streets NW. Hydrostatic pressure, 158 pounds; working pressure allowed, 90 pounds (if necessary 100 pounds) to square inch. Expires October 4, 1895.

*October 5.*—No. 180. Locomotive form boiler in Metropolitan Hotel, W. H. Selden, proprietor. Tested by hammer test. Working pressure, 50 pounds to square inch. Expires October 5, 1895.

*October 5.*—No. 181. Vertical tubular boiler in plant Thirty-fifth and K streets NW., owned by Lewis Hopfenmair. Hydrostatic pressure, 100 pounds; working pressure allowed, 55 pounds to square inch. Expires October 5, 1895.

*October 8.*—Nos. 182, 183, and 184. Horizontal tubular Coleman boilers in plant Thirteen-and-a-half and B streets NW., owned by the United States Electric Lighting Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 95 pounds each to square inch. Expires October 8, 1895.

*October 8.*—No. 185. Horizontal tubular boiler in Kellogg Building, No. 1416 F Street NW. Hydrostatic pressure, 110 pounds; working pressure allowed, 65 pounds to square inch. Expires October 8, 1895.

*October 8.*—No. 186. Vertical tubular boiler in Albaugh's Grand Opera House, Pennsylvania avenue and Fifteenth street NW., Edward H. Allen, manager. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires October 8, 1895.

*October 9.*—Nos. 187, 188, and 189. Horizontal tubular boilers in Garfield Hospital, Tenth street and Florida avenue NW. Hydrostatic pressure, 110 pounds; working pressure allowed, 70 pounds each to square inch. Expires October 9, 1895.

*October 9.*—Nos. 190 and 191. New horizontal tubular boilers in mill and warehouse Delaware and Florida avenues NE., owned by S. S. Daish & Son. Hydrostatic pres.

sure, 150 pounds; working pressure allowed, 80 pounds (if necessary 90 pounds) each to square inch. Expires October 9, 1895.

*October 10.*—No. 192. Vertical tubular boiler in tannery No. 709 L street SE. owned by W. D. Sullivan. Hydrostatic pressure, 95 pounds; working pressure allowed, 60 pounds to square inch. Condemned; allowed to run six months. Expires April 10, 1895.

*October 10.*—No. 193. Horizontal tubular boiler in Perry Building, Pennsylvania avenue and Ninth street NW. Hydrostatic pressure, 110 pounds; working pressure allowed, 70 pounds to square inch. Expires October 10, 1895.

*October 11.*—No. 194. Horizontal tubular boiler in Atlantic Building, Nos. 928-930 F street NW., owned by the Atlantic Building Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires October 11, 1895.

*October 12.*—No. 195. Vertical tubular boiler in restaurant, No. 602 Pennsylvania avenue NW., owned by Thomas L. Selby. Hydrostatic pressure, 100 pounds; working pressure allowed, 50 pounds to square inch. Expires October 11, 1895.

*October 12.*—No. 196. Horizontal tubular boiler in Butler's New Bijou Theater, Ninth and C streets NW. Hydrostatic pressure, 75 pounds; working pressure allowed, 35 pounds to square inch. Expires October 12, 1895.

*October 12.*—No. 197. Horizontal tubular boiler in Interocean Building, No. 514 Ninth street NW. owned by the Interocean Building Company. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires October 12, 1895.

*October 13.*—No. 198. Locomotive form boiler in wood and coal yard, South Capitol and K streets SW. owned by John Kennedy. Hydrostatic pressure, 95 pounds; working pressure allowed, 60 pounds to square inch. Expires October 13, 1895.

*October 15.*—Nos. 199 (1) and 200 (2). Horizontal tubular steel boilers in plant Thirteen-and-a-half and B streets NW. owned by United States Electric Lighting Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 95 pounds each to square inch. Expires October 15, 1895.

*October 15.*—Nos. 201 and 202. Horizontal tubular boilers in National Hotel, Sixth street and Pennsylvania avenue NW., Burton, Crosby & Co. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds each to square inch. Expires October 15, 1895.

*October 15.*—No. 203. Horizontal tubular boiler in Kernan's Lyceum Theater, Eleventh and C streets NW., James L. Kernan, manager. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires October 15, 1895.

*October 16.*—No. 204. Horizontal tubular boiler in Interocean Building, No. 514 Ninth street NW. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires October 16, 1895.

*October 16.*—No. 205. Horizontal tubular boiler in Metropolitan Hotel. Hydrostatic pressure, 85 pounds; working pressure allowed, 50 pounds to square inch. Expires October 16, 1895.

*October 17.*—No. 206. Horizontal tubular boiler in Atlantic Building, 928-930 F street NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires October 17, 1895.

*October 17.*—No. 207. Horizontal tubular boiler in Moses Building, Eleventh and F streets NW., owned by W. B. Moses & Sons. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires October 17, 1895.

*October 17.*—No. 208. Vertical tubular boiler in restaurant 605 B street NW. owned by Mrs. Elizabeth Moore. Hydrostatic pressure, 90 pounds; working pressure allowed, 50 pounds to square inch. Expires October 17, 1895.

*October 18.*—No. 209. Horizontal tubular boiler in The Richmond, Seventeenth and H streets NW., F. W. Coleman, proprietor. Hydrostatic pressure, 100 pounds, working pressure allowed, 60 pounds to square inch. Expires October 18, 1895.

*October 18.*—No. 210. Horizontal tubular boiler in The Hamilton, Fourteenth and K streets NW., William M. Gilson, proprietor. Hydrostatic pressure, 120 pounds; working pressure allowed, 60 pounds (if necessary 80 pounds) to square inch. Expires October 18, 1895.

*October 18.*—Nos. 211 (1) and 212 (2). Horizontal tubular boilers in Boston House, Tenth street side, owned by Woodward & Lothrop. Hydrostatic pressure, 145 pounds; working pressure allowed, 95 pounds to square inch. Expires October 18, 1895.

*October 18.*—Nos. 213, 214, and 215. Horizontal tubular boilers in building southwest corner of Pennsylvania avenue and Thirteenth street NW., owned by the Southern Railway Company. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds each to square inch. Expires October 18, 1895.

*October 19.*—No. 216. Horizontal tubular boiler in The Arno, Sixteenth and I streets NW., William E. Prall, proprietor. Hydrostatic pressure, 85 pounds; working pressure allowed, 55 pounds to square inch. Expires October 19, 1895.

*October 22.*—No. 217. Horizontal tubular boiler in printing office southeast corner Pennsylvania avenue and Thirteenth street NW., owned by Gibson Brothers. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires October 22, 1895.

*October 22.*—No. 218. Horizontal tubular boiler in Moses Building, owned by W. B. Moses & Sons. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires October 22, 1895.

*October 22.*—No. 219. New vertical tubular boiler at new Post-Office Building, used for hoisting purposes, owned by Arthur Consill. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires October 22, 1895.

*October 23.*—No. 220. Horizontal tubular boiler in The Richmond, Seventeenth and H streets NW. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires October 23, 1895.

*October 23.*—Nos. 221 and 222. Horizontal tubular boilers in greenhouse (county, District of Columbia), owned by J. H. Small & Sons. Hydrostatic pressure, 75 pounds; working pressure allowed, 40 pounds each to square inch. Expires October 23, 1895.

*October 24.*—No. 223. Horizontal tubular boiler in the Hillman House, North Capitol and C streets NW., N. J. Hillman, proprietor. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires October 24, 1895.

*October 25.*—No. 224. Vertical tubular boiler in restaurant, Seventh and G streets NW., Osborne & Hoban, proprietors. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires October 25, 1895.

*October 25.*—No. 225. Horizontal tubular boiler in The Hamilton. Hydrostatic pressure, 120 pounds; working pressure allowed, 60 pounds (if necessary, 80 pounds) to square inch. Expires October 25, 1895.

*October 25.*—No. 226. Horizontal tubular boiler in the Academy of Music, Ninth and D streets, NW., owned by Fred. W. Pratt. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires October 25, 1895.

*October 26.*—No. 227. Vertical tubular boiler in bottling works, Virginia avenue and Sixth street SW. owned by The Bergner & Engel Brewing Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires October 26, 1895.

*October 26.*—No. 228. Locomotive form boiler in wood and coal yard, No. 519 Four-and-a-half street SW., owned by V. Baldwin Johnson. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires October 25, 1895.

*October 26.*—No. 229. Horizontal tubular boiler in Willard's Hotel, Pennsylvania avenue and Fourteenth street NW., O. G. Staples, proprietor. Hydrostatic pressure, 110 pounds; working pressure allowed, 60 pounds to square inch. Expires October 26, 1895.

*October 27.*—No. 230. Vertical boiler in Thompson's Dairy, No. 511 Four-and-a-half street SW., owned by J. S. Thompson. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires October 27, 1895.

*October 27.*—No. 231. Horizontal tubular boiler in Havenner's Bakery, Nos. 472-476 C street NW., owned by Havenner's Baking Company. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires October 27, 1895.

*October 29.*—Nos. 232 and 233. Horizontal tubular boiler in The Portland, Vermont avenue and Fourteenth street NW., Edward L. Weston, manager. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds each to square inch. Expires October 29, 1895.

*October 30.*—No. 234. New vertical tubular boiler in The Fredonia, Nos. 1221 and 1223 H street NW., Washington Danenhower, manager. Hydrostatic pressure, 150 pounds; working pressure allowed, 70 pounds to square inch. Expires October 30, 1895.

*October 31.*—Nos. 235 (3) and 236 (4). Horizontal tubular boilers in Boston House, Tenth street side, owned by Woodward & Lothrop. Hydrostatic pressure, 145 pounds; working pressure allowed, 93 pounds each to square inch. Expires October 31, 1895.

*October 31.*—No. 237. Vertical tubular boiler in Willard's Hotel, Fourteenth street and Pennsylvania avenue NW. Hydrostatic pressure, 110 pounds; working pressure allowed, 60 pounds to square inch. Expires October 31, 1895.

*October 31.*—No. 138. Vertical tubular boiler in wood and coal yard, corner Eighth and O streets NW., owned by C. H. Burgess. Hydrostatic pressure, 90 pounds; working pressure allowed, 50 pounds to square inch. Expires October 31, 1895.

*October 31.*—No. 239. Vertical tubular boiler in Lawrence Building, No. 617 Fourteenth street NW., owned by Dr. Lawrence. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires October 31, 1895.

*November 1.*—No. 240. Horizontal tubular boiler in plant Thirty-fifth and K streets NW., owned by Lewis Hopfenmaier. Hydrostatic pressure, 110 pounds; working pressure allowed, 65 pounds to square inch. Expires November 1, 1895.

*November 2.*—No. 241. Vertical tubular boiler in wood and coal yard, foot of Third street SE., owned by Kinder & Co. Hydrostatic pressure, 105 pounds; working pressure allowed, 60 pounds to square inch. Condemned for repairs; repaired and passed. Expires November 2, 1895.

*November 2.*—No. 242. Vertical tubular boiler, owned by Robert Mangum. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds to square inch. Expires November 2, 1895.

*November 3.*—No. 243. Vertical tubular boiler in Banner Steam Laundry, No. 1240 Half street SE., owned by F. H. Litchfield. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires November 3, 1895.

*November 5.*—No. 244. Locomotive-form boiler in box factory, No. 508 R street NW., owned by R. A. Daniell. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires November 5, 1895.

*November 6.*—No. 245. Locomotive-form boiler in wood and coal yard, No. 3323 M street NW., owned by Tavenner & Co. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires November 6, 1895.

*November 6.*—No. 246. Vertical tubular boiler in wood and coal yard, Twenty-ninth street and Chesapeake and Ohio Canal NW., owned by Mayfield & Hieston. Hydrostatic pressure, 130 pounds; working pressure allowed, 80 pounds to square inch. Expires November 6, 1895.

*November 7.*—No. 247. Horizontal tubular boiler in The Portland. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires November 7, 1895.

*November 7.*—No. 248. Horizontal tubular boiler in Freedmen's Hospital. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires November 7, 1895.

*November 8.*—No. 249. Vertical tubular boiler in store, No. 312 Pennsylvania avenue NW. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch; owned by Chris. Rummling. Expires November 8, 1895.

*November 9.*—No. 250. Patent boiler in Star Building, No. 1101 Pennsylvania avenue NW. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires November 9, 1895.

*November 10.*—No. 251. Vertical tubular boiler in hair factory, Anacostia, D. C., owned by H. A. Linger. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires November 10, 1895.

*November 12.*—No. 252. Locomotive-form boiler in machine shop, Seventh and K streets SW., owned by Forsberg & Murray. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires November 12, 1895.

*November 12.*—No. 253. Horizontal tubular boiler in Freedmen's Hospital. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires November 12, 1895.

*November 13.*—No. 254. Horizontal tubular boiler in Hotel Johnson, Thirteenth and E streets NW., owned by E. L. Johnson. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires November 13, 1895.

*November 13.*—No. 255. Vertical tubular boiler in No. 239 North Capitol street NE., owned by the National Economist Publishing Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires November 13, 1895.

*November 14.*—No. 256. Vertical tubular boiler in slaughterhouse, Bladensburg road, owned by F. S. Erdman & Son. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires November 14, 1895.

*November 14.*—No. 257. Vertical tubular boiler in dye works, No. 1955 Fourth street NW., owned by R. A. Reeves. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds to square inch. Expires November 14, 1895.

*November 15.*—No. 258. Horizontal tubular boiler in Evans Building, 1420 New York avenue NW., D. S. Evans, jr., owner. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires November 15, 1895.

*November 15.*—No. 259. Horizontal tubular boiler in Hotel Johnson, Thirteenth and E streets NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires November 15, 1895.

*November 15.*—No. 260. Vertical tubular boiler in mattress factory, No. 1111 Nineteenth street NW. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch; owned by H. A. Linger. Expires November 15, 1895.

*November 16.*—No. 261. Vertical tubular boiler in Hotel Lawrence, E between Thirteenth and Fourteenth streets NW., Samuel Gassenheimer, proprietor. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires November 16, 1895.

*November 17.*—No. 262. Vertical tubular boiler at Eleventh Street Wharf NW., owned by J. E. Donaldson. Hydrostatic pressure, 100 pounds; working pressure allowed, 50 pounds to square inch. Expires November 11, 1895.

*November 19.*—No. 263. Vertical tubular boiler in No. 1218 C street NW., owned by Andrew Renz. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires November 19, 1895.

*November 19.*—No. 264 (1). Horizontal tubular boiler in terra cotta works, county, District of Columbia, owned by the Potomac Terra Cotta Company. Hydrostatic pressure, 185 pounds; working pressure allowed, 120 pounds to square inch. Expires November 19, 1895.

*November 19.*—No. 265 (2). Horizontal tubular boiler in works owned by the Potomac Terra Cotta Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds to square inch. Condemned; allowed to run six months. Expires May 19, 1895.

*November 19.*—Nos. 266 and 267. Horizontal tubular boiler in terra cotta works, county, District of Columbia, owned by Thomas Somerville & Sons. Hydrostatic pressure, 165 pounds; working pressure allowed, 110 pounds each to square inch. Expire November 19, 1895.

*November 20.*—Nos. 268 and 269. Horizontal tubular boiler in Hutchins Building, Tenth and D streets NW., owned by Stilson Hutchins. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds each to square inch. Expire November 20, 1896.

*November 21.*—No. 270. New vertical tubular boiler in steam bakery, No. 1322 Fifth street NW., owned by William H. Burk. Hydrostatic pressure, 150 pounds; working pressure allowed, 60 pounds (if necessary, 80 pounds) to square inch. Expires November 21, 1895.

*November 21.*—No. 271. Vertical tubular boiler in Hotel Lawrence. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires November 21, 1895.

*November 21.*—No. 272. Vertical tubular boiler in wood and coal yard, foot of Thirteen-and-a-half street SW., owned by the Home Ice Company, E. M. Willis, general manager. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires November 21, 1895.

*November 21.*—No. 273. Vertical tubular boiler in wood and coal yard, No. 464 E street SW., owned by R. J. Collins. Hydrostatic pressure, 90 pounds; working pressure allowed, 50 pounds to square inch. Expires November 21, 1895.

*November 22.*—No. 274. Vertical tubular boiler in works No. 108 Second street SW., owned by Fauth & Co., G. N. Saegmuller, manager. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires November 22, 1895.

*November 23.*—No. 275. Vertical tubular boiler in Masonic Hall, Ninth and F streets NW. Hydrostatic pressure, 105 pounds; working pressure allowed, 65 pounds to square inch. Expires November 23, 1895.

*November 23.*—No. 276 (1). Vertical tubular boiler in National Zoological Park. Hydrostatic pressure, 105 pounds; working pressure allowed, 60 pounds to square inch. Expires November 23, 1895.

*November 23.*—No. 277 (2). Vertical tubular boiler in National Zoological Park. Hydrostatic pressure, 120 pounds; working pressure allowed, 60 pounds to square inch. Expires November 23, 1895.

*November 24.*—No. 278. Horizontal tubular boiler in The Oxford, New York avenue and Fourteenth street NW., H. P. Marshall & Co., proprietors. Hydrostatic pressure, 90 pounds; working pressure allowed, 60 pounds to square inch. Expires November 24, 1895.

*November 26.*—No. 279. Vertical tubular boiler on dredge *Roland*, owned by Thos P. Morgan. Hydrostatic pressure, 130 pounds; working pressure allowed, 80 pounds to square inch. Condemned for repairs; repaired and passed. Expires November 26, 1895.

*November 26.*—No. 280. Horizontal tubular boiler in store Twelfth and F streets NW., Robinson, Cherry & Co., proprietors. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires November 26, 1895.

*November 28.*—No. 281. Vertical tubular boiler in printing office No. 511 Eleventh street NW., owned by W. H. Moore & Co. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds per square inch. Expires November 28, 1895.

*November 28.*—No. 282. New horizontal tubular boiler in Fendall Building, 344 D street NW. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds to square inch. Expires November 28, 1895.

*November 28.*—No. 283. Compound boiler in building Seventh street and Louisiana avenue NW., owned by The Firemen's Insurance Company. Hydrostatic pressure, 140 pounds; working pressure allowed, 80 pounds to square inch. Expires November 28, 1895.

*November 29.*—No. 284. Horizontal tubular boiler in mill corner Massachusetts avenue and North Capitol street NE., owned by McDowell's Sons. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires November 29, 1895.

*November 29.*—No. 285. Horizontal tubular boiler in planing mill Twelfth street and Ohio avenue NW., owned by J. B. Hammond. Hydrostatic pressure, 155 pounds; working pressure allowed, 90 pounds, if necessary 100 pounds, to square inch. Expires November 29, 1895.

*November 30.*—No. 286. Horizontal tubular boiler in store Twelfth and F streets NW., Robinson, Cherry & Co., proprietors. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires November 30, 1895.

*November 30.*—No. 287. Vertical tubular boiler in printing office 664 Pennsylvania avenue NW., W. J. Brewer, owner. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires November 30, 1895.

*December 1.*—No. 288. Locomotive form boiler, owned by M. L. Price. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch. Condemned for repairs; repaired and passed. Expires December 1, 1895.

*December 3.*—No. 289. Vertical tubular boiler in wood and coal yard Ninth and Water streets SW., owned by Kinder & Co. Hydrostatic pressure, 130 pounds; working pressure allowed, 80 pounds to square inch. Condemned for repairs; repaired and passed. Expires December 3, 1895.

*December 3.*—No. 290. Vertical tubular boiler in wood and coal yard Delaware avenue and D street NE., owned by Elia Chelini. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires December 3, 1895.

*December 3.*—No. 291. New vertical tubular boiler in Hotel Emrich, New Jersey avenue and C street NW. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires December 3, 1895.

*December 4.*—Nos. 292 and 293. Horizontal tubular boilers in market Fifth and L streets NW., owned by The Northern Liberty Market Association. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds each to square inch. Expires December 4, 1895.

*December 6.*—No. 294. Vertical tubular boiler in printing office Seventh and G streets NW., owned by W. Koch. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires December 6, 1895.

*December 7.*—No. 295. Vertical tubular boiler in bottling works No. 813 Second street SE., Chas. Fleishman. Hydrostatic pressure, 90 pounds; working pressure allowed, 50 pounds to square inch. Expires December 7, 1895.

*December 7.*—No. 296. Vertical tubular boiler in bottling works 462 H street SW., owned by Smithson & Mazinger. Hydrostatic pressure, 90 pounds; working pressure allowed, 60 pounds to square inch. Expires December 7, 1895.

*December 7.*—No. 297. New horizontal tubular boiler in The Cairo, Q street between Sixteenth and Seventeenth streets NW. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds, if necessary 100 pounds, to square inch. Expires December 7, 1895.

*December 8.*—No. 298. Vertical tubular boiler in steam bakery Mount Pleasant, D. C., owned by Carl Hoffman. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires December 8, 1895.

*December 10.*—No. 299. Horizontal flue boiler at Stephenson's wharf foot of Seventh street SW., owned by Stephenson & Bro. Hydrostatic pressure, 95 pounds; working pressure allowed, 60 pounds to square inch. Expires December 10, 1895.

*December 11.*—No. 300. Vertical tubular boiler in plant 1315 Union street SW., owned by J. N. Smith. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds, to square inch. Expires December 11, 1895.

*December 12.*—No. 301. New locomotive form boiler in the Ebbitt House. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds, if necessary 100 pounds, to square inch. Expires December 12, 1895.

*December 13.*—No. 302. Water-tube boiler in building Pennsylvania avenue and Thirteenth street NW., owned by the Southern Railway Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires December 13, 1895.

*December 13.*—No. 303. Vertical tubular boiler in Chemical Works Twenty-seventh and H streets NW., owned by E. B. Warren. Hydrostatic pressure, 120 pounds; working pressure allowed, 60 pounds to square inch. Expires December 13, 1895.

*December 14.*—No. 304. New vertical tubular boiler in steam bakery 1811 Seventh street NW. Hydrostatic pressure, 150 pounds; working pressure allowed, 70 pounds to square inch. Charles Specht owner. Expires December 14, 1895.

*December 14.*—No. 305. Vertical tubular boiler in works Half and I streets SE., owned by The Standard Oil Company. Hydrostatic pressure, 90 pounds; working pressure allowed, 50 pounds to square inch. Expires December 14, 1895.

*December 14.*—No. 306. Horizontal tubular boiler in The Clarendon, Fourteenth and H streets NW., Mrs. M. J. Colley, proprietress. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires December 14, 1895.

*December 14.*—No. 307. New horizontal tubular boiler in The Cairo. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds, if necessary 100 pounds, to square inch. Expires December 14, 1895.

*December 14.*—No. 308. Vertical tubular boiler in steam coffee mills Maryland avenue and C street SW., owned by W. G. Lown. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires December 14, 1895.

*December 15.*—No. 309. Vertical tubular boiler in steam bakery No. 2122 L street NW., owned by George Klenk. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires December 15, 1895.

*December 15.*—No. 310. Vertical tubular boiler in steam bakery No. 1751 L street NW., owned by G. H. Schulze. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires December 15, 1895.

*December 17.*—No. 311. Horizontal tubular boiler in machine shop Twelfth and B streets NW., owned by J. E. Hurley. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires December 17, 1895.

*December 17.*—No. 312. Vertical tubular boiler in steam laundry No. 3237 K street NW., owned by Wells & Barber. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires December 17, 1895.

*December 17.*—No. 313. Horizontal tubular boiler in The Clarendon, Fourteenth and H streets NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires December 17, 1895.

*December 18.*—No. 314. Horizontal tubular boiler sold by Forsberg & Murray. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires December 18, 1895.

*December 18.*—No. 315. Vertical tubular boiler used for hoisting purposes, owned by Joseph F. Collins. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires December 18, 1895.

*December 18.*—No. 316. New horizontal tubular boiler in The Cairo. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds, if necessary 100 pounds, to square inch. Expires December 18, 1895.

*December 19.*—No. 317. Economic boiler in steam laundry No. 344 Pennsylvania avenue NW., owned by Dexter & Co. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch. Expires December 19, 1895.

*December 19.*—No. 318. Vertical tubular boiler in pumping station at Georgetown College. Hydrostatic pressure 90 pounds; working pressure allowed, 50 pounds to square inch. Expires December 19, 1895.

*December 19.*—No. 319. Horizontal tubular boiler in mattress factory No. 631 to 635 Massachusetts avenue NW., owned by Stumph & Bro. Hydrostatic pressure, 125 pounds; working pressure allowed, 75 pounds to square inch. Expires December 19, 1895.

*December 20.*—No. 320. Horizontal tubular boiler in Center Market, owned by The Washington Market Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch. Expires December 20, 1895.

*December 20.*—No. 321. Locomotive form boiler in wood and coal yard No. 910 Virginia avenue SE., owned by R. Ullman. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires December 20, 1895.

*December 20.*—No. 322. Vertical tubular boiler in Mount Vernon Seminary, Eleventh and M streets NW., owned by Mrs. E. Somers. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires December 20, 1895.

*December 22.*—No. 323. New vertical tubular boiler in slaughterhouse, Bladensburg road, owned by Anton Ruppert. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds to square inch. Expires December 22, 1895.

*December 28.*—No. 324. Ellis patent boiler on dredge *Morgan*, owned by Thos. P. Morgan. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires December 28, 1895.

INSPECTED IN 1895.

*January 1.*—Nos. 325 and 326. Horizontal tubular boilers in mill First street and Indiana avenue NW., owned by W. M. Galt & Co. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds each to square inch. Expires January 1, 1896.

*January 2.*—No. 327. Vertical tubular boiler in Montrose Flats, No. 1115 Ninth street NW. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires January 2, 1896.

*January 3.*—No. 328. Vertical tubular boiler in the American House, Pennsylvania avenue and Seventh street NW., Duffy & Leannarda, proprietors. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires January 3, 1896.

*January 3.*—No. 329. Vertical tubular boiler in steam laundry at Seventh street wharf SW., owned by the Norfolk and Washington Steamboat Company. Hydrostatic pressure, 75 pounds; working pressure allowed, 50 pounds to square inch. Condemned for repairs; repaired and passed. Expires January 3, 1896.

*January 5.*—No. 330. Vertical tubular boiler at new post office building, owned by John Peirce. Hydrostatic pressure, 165 pounds; working pressure allowed, 110 pounds to square inch. Expires January 5, 1896.

*January 6.*—Nos. 331 and 332. New horizontal tubular boilers in United States Senate annex, New Jersey avenue and B street NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds each to square inch. Expires January 6, 1896.

*January 8.*—No. 333. Horizontal tubular boiler in Warder Building, southeast corner Ninth and F streets NW., owned by estate of B. H. Warder. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires January 8, 1896.

*January 8.*—No. 334. Horizontal tubular boiler in building No. 458 to 464 Louisiana avenue NW., owned by the National Capital Investment Company. Hydrostatic pressure, 130 pounds; working pressure allowed, 85 pounds to square inch. Expires January 8, 1896.

*January 10.*—No. 335. Horizontal tubular boiler in building Nos. 458 to 464 Louisiana avenue NW. Hydrostatic pressure, 130 pounds; working pressure allowed, 85 pounds to square inch. Expires January 10, 1896.

*January 10.*—No. 336. Horizontal tubular boiler in Warder Building, southeast corner Ninth and F streets NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires January 10, 1896.

*January 12.*—No. 337. Vertical tubular boiler in steam bakery, No. 711 Twelfth street SE., owned by J. G. Meinberg. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires January 12, 1896.

*January 14.*—No. 338. Vertical tubular boiler in mill, Virginia avenue and Four-and-a-half street SW., owned by the Washington Flour and Feed Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires January 14, 1896.

*January 15.*—No. 339. Vertical tubular boiler in building southwest corner Tenth street and Pennsylvania avenue NW., owned by the Washington Times Company. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires January 15, 1896.

*January 16.*—Nos. 340 (4) and 341 (5). Horizontal tubular boilers in works Fifteenth and E streets NE., owned by the Hygienic Ice Company. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds each to square inch. Expire January 16, 1896.

*January 21.*—Nos. 342 and 343. Horizontal tubular boilers in No. 929 to 931 D street NW., owned by the Evening News Publishing Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds each to square inch. Expire January 21, 1896.

*January 22.*—No. 344. Vertical tubular boiler at new post-office building, owned by John Peirce. Hydrostatic pressure, 165 pounds; working pressure allowed, 110 pounds to square inch. Expires January 22, 1896.

*January 23.*—No. 345. Locomotive boiler in wood yard, New Hampshire and Virginia avenues NW., owned by C. C. Walker. Hydrostatic pressure, 100 pounds; working pressure allowed, 65 pounds to square inch. Expires January 23, 1896.

*January 24.*—No. 346. Vertical tubular boiler at new Corcoran Gallery of Art, owned by Norcross Bros. Hydrostatic pressure, 130 pounds; working pressure allowed, 80 pounds to square inch. Expires January 24, 1896.

*January 26.*—No. 347. New vertical tubular boiler used for hoisting purposes, owned by Manning & Parsons. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch. Expires January 26, 1896.

*January 31.*—No. 348. New vertical tubular boiler used for hoisting purposes, owned by Manning & Parsons. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch. Expires January 31, 1896.

*January 31.*—No. 349. Vertical tubular boiler in steam coffee mills in rear of 327 Pennsylvania avenue NW., owned by Browing & Baines. Hydrostatic pressure, 90 pounds; working pressure allowed, 60 pounds to square inch. Expires January 31, 1896.

*February 1.*—No. 350. Vertical tubular boiler in The Page, No. 721 to 727 Fifteenth street NW., T. L. Page, proprietor. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires February 1, 1896.

*February 2.*—No. 351. Locomotive form boiler in yard, No. 2632 D street NW., owned by the Crawford Paving Company. Hydrostatic pressure, 115 pounds; working pressure allowed, 70 pounds to square inch. Expires February 2, 1896.

*February 4.*—No. 352. Vertical tubular boiler in Eagle Iron Works, Fourteenth and B streets NW., owned by Pettit & Dripps. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires February 4, 1896.

*February 4.*—No. 353. Horizontal tubular boiler in printing office, No. 1308 Pennsylvania avenue NW., owned by R. H. Darby. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires February 4, 1896.

*February 5.*—No. 354. New vertical tubular boiler in German Orphan Asylum, Anacostia, D. C. Hydrostatic pressure, 150 pounds; working pressure allowed, 60 pounds, if necessary 80 pounds, to square inch. Expires February 5, 1896.

*February 11.*—Nos. 355 (2) and 356 (3). Horizontal tubular boilers in works, Fifteenth and E streets NE., owned by the Hygienic Ice Co. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds each to square inch. Expire February 11, 1896.

*February 12.*—Nos. 357 (7) and 358 (8). Campbell & Zell improved boilers in plant, Thirteen-and-a-half and B streets NW., owned by United States Electric Lighting Company. Hydrostatic pressure, 200 pounds; working pressure allowed, 130 pounds each to square inch. Expire February 12, 1896.

*February 13.*—Nos. 359 (4) and 360 (6). National water-tube boilers in plant, Thirteen-and-a-half and B streets NW. Hydrostatic pressure, 200 pounds; working pressure allowed, 130 pounds each to square inch. Expire February 13, 1896.

*February 14.*—No. 361. Horizontal tubular boiler in Center Market, Pennsylvania avenue and Seventh street NW. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch. Expires February 14, 1896.

*February 15.*—No. 362 (2). National water-tube boiler in plant, Thirteen-and-a-half and B streets NW. Hydrostatic pressure, 200 pounds; working pressure allowed, 130 pounds to square inch. Expires February 15, 1896.

*February 16.*—No. 363. Horizontal tubular boiler in Yale Steam Laundry, No. 43 G street NW., owned by F. H. Walker & Co. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires February 16, 1896.

*February 18.*—No. 364. Economic boiler in Metzert Music Hall. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Condemned for repairs, repaired and passed. Expires February 18, 1896.

*February 19.*—No. 365. Horizontal tubular boiler in club house, No. 1732 G street NW., owned by Columbia Athletic Club. Hydrostatic pressure, 80 pounds; working pressure allowed, 50 pounds to square inch. Expires February 19, 1896.

*February 19.*—No. 366. Vertical tubular boiler at new post-office building, owned by John Peirce. Hydrostatic pressure, 160 pounds; working pressure allowed, 105 pounds to square inch. Expires February 19, 1896.

*February 21.*—No. 267. Horizontal tubular boiler in Center Market, Pennsylvania avenue and Seventh street NW. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch. Expires February 21, 1896.

*February 21.*—No. 368. Vertical tubular boiler in National Homeopathic Hospital. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires February 21, 1896.

*February 21.*—No. 369. Vertical tubular boiler in laundry at National Homeopathic Hospital. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires February 21, 1896.

*February 21.*—Nos. 370 and 371. Babcock & Wilcox Company boilers in power house, foot of Sixth street SW., owned by the Washington and Georgetown Railroad Company. Hydrostatic pressure, 200 pounds; working pressure allowed, 125 pounds each to square inch. Expire February 21, 1896.

*February 22.*—No. 372. Horizontal tubular boiler in building No. 918 F street NW., owned by the National Union Insurance Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires February 22, 1896.

*February 23.*—No. 373. Vertical tubular boiler in slaughterhouse, Bladensburg road, owned by John Augusterfer. Hydrostatic pressure, 80 pounds; working pressure allowed, 55 pounds to square inch. Condemned for repairs, repaired and passed. Allowed to run six months. Expires August 23, 1895.

*February 26.*—Nos. 374 and 375. Horizontal tubular boilers in brewery, D between Thirteenth and Fourteenth streets SE., owned by the National Capital Brewing Company. Hydrostatic pressure, 135 pounds; working pressure allowed, 90 pounds each to square inch. Expire February 26, 1896.

*February 28.*—No. 376. Vertical tubular boiler in plant, No. 461 to 463 C street NW., owned by the National Lithographing Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires February 28, 1896.

*February 28.*—No. 377. Vertical tubular boiler in steam bakery, 18 Harrison street, Anacostia, D. C., owned by Frederick W. Bergmann. Hydrostatic pressure, 100 pounds; working pressure allowed, 65 pounds to square inch. Expires February 28, 1896.

*March 1.*—No. 378. Vertical tubular boiler in Slater's Fourteenth street Steam Laundry. Hydrostatic pressure, 90 pounds; working pressure allowed, 60 pounds to square inch. Expires March 1, 1896.

*March 4.*—Nos. 379 and 380. New Campbell & Zell boilers in power house, Benning's road NE., owned by the Columbia Railway Company. Hydrostatic pressure, 205 pounds; working pressure allowed, 125 pounds each to square inch. Expire March 4, 1896.

*March 5.*—No. 381. Babcock & Wilcox Company boiler in power house, foot Sixth street SW. Hydrostatic pressure, 200 pounds; working pressure allowed, 125 pounds to square inch. Expires March 5, 1896.

*March 7.*—No. 382. Horizontal tubular boiler in brewery, D street between Thirteenth and Fourteenth streets SE. Hydrostatic pressure, 135 pounds; working pressure allowed, 90 pounds to square inch. Expires March 7, 1896.

*March 8.*—No. 383. Vertical tubular boiler in mill, Anacostia, D. C., owned by J. N. Garrison & Sons. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires March 8, 1896.

*March 8.*—Nos. 384 and 385. Horizontal tubular boilers in yard, No. 2632 D street NW., owned by the Cranford Paving Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds each to square inch; used for stone crusher. Expire March 8, 1896.

*March 12.*—No. 386. Vertical tubular boiler on steam roller Pioneer, owned by the Cranford Paving Company. Hydrostatic pressure, 200 pounds; working pressure allowed, 120 pounds to square inch. Expires March 12, 1896.

*March 12.*—No. 387. Vertical tubular boiler on steam roller Percy, owned by the Cranford Paving Company. Hydrostatic pressure, 160 pounds; working pressure allowed, 100 pounds to square inch. Expires March 12, 1896.

*March 12.*—No. 388. Vertical tubular boiler on steam roller Ludwig, owned by the Cranford Paving Company. Hydrostatic pressure, 160 pounds; working pressure allowed, 100 pounds to square inch. Expires March 12, 1896.

*March 13.*—No. 389. Vertical tubular boiler at new post-office building, owned by John Peirce. Hydrostatic pressure, 165 pounds; working pressure allowed, 105 pounds to square inch. Condemned for repairs, repaired and passed. Expires March 13, 1896.

*March 13.*—No. 390. Vertical tubular boiler in Emergency Hospital. Hydrostatic pressure, 90 pounds; working pressure allowed, 60 pounds to square inch. Expires March 13, 1896.

*March 13.*—No. 391. Vertical tubular boiler in warehouse, Third and R streets NE., owned by James H. McGill. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires March 13, 1896.

*March 14.*—No. 392. Vertical tubular boiler in printing office, No. 1108 to 1116 E street NW., owned by H. L. McQueen. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires March 14, 1896.

*March 18.*—No. 393. Horizontal tubular boiler in soap factory, First and W streets SW., owned by C. B. Jewell & Co. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires March 18, 1896.

*March 18.*—No. 394. New economic boiler in brickyard, South Capitol and O streets SE., owned by the Alfred Richards Brick Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds to square inch. Expires March 18, 1896.

*March 22.*—No. 395. Horizontal tubular boiler in soap factory, First and W streets SW., owned by C. B. Jewell & Co. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires March 22, 1896.

*March 22.*—No. 396. Horizontal tubular boiler in The Randall, Pennsylvania avenue and Fifteenth street NW., John T. Trego, proprietor. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires March 22, 1896.

*March 25.*—No. 397. Vertical tubular boiler in the Briggs New York Dye Works, E. K. Plant, manager and proprietor, No. 709 Ninth street NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires March 25, 1896.

*March 25.*—No. 398. Horizontal tubular boiler in planing mill, Thirteenth and C streets NW., owned by Belt & Dyer. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires March 25, 1896.

*March 25.*—No. 399. Horizontal tubular boiler in brickyard, Nineteenth and B streets NE., owned by Thomas Potee & Co. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch. Expires March 25, 1896.

*March 26.*—Nos. 400 and 401. Horizontal tubular boilers in brickyard at Ivy City, D. C., owned by the Ivy City Brick Company. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds each to square inch. Expires March 26, 1896.

*March 26.*—No. 402. Horizontal tubular boiler in brewery, D street between Thirteenth and Fourteenth streets SE., owned by the National Capital Brewing Company. Hydrostatic pressure, 135 pounds; working pressure allowed, 90 pounds to square inch. Expires March 26, 1896.

*March 27.*—No. 403. Horizontal tubular boiler in The Randall, Pennsylvania avenue and Fifteenth street NW. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires March 27, 1896.

*March 27.*—No. 404. Vertical tubular boiler in works, No. 3220 K street NW., used for hoisting purposes, owned by the Potomac Stone Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 85 pounds (if necessary 100 pounds) to square inch. Expires March 27, 1896.

*March 29.*—No. 405. Horizontal tubular boiler in machine shop and foundry, No. 3105 K street NW., owned by Donnelly & Pruett. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires March 29, 1896.

*March 29.*—No. 406. Vertical tubular boiler in foundry, foot of Thirty-third street NW., owned by Stewart, Garner & Co. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires March 29, 1896.

*March 29.*—Nos. 407 and 408. Cylinder boilers at shipping wharf NW., owned by John P. Agnew & Co. Hydrostatic pressure, 145 pounds; working pressure allowed, 90 pounds each to square inch. Condemned for repairs; repaired and passed. Expires March 29, 1896.

*March 30.*—No. 409. Vertical tubular boiler at gas works, Twenty-sixth and G streets NW., used for hoisting purposes, owned by the Washington Gas Light Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires March 30, 1896.

*April 1.*—Nos. 410 and 411. Horizontal tubular boilers in guano factory, Giesboro, D. C., owned by P. Mann. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds each to square inch. Expires April 1, 1896.

*April 2.*—Nos. 412 and 413. New vertical tubular boilers, used for hoisting purposes, owned by Frank N. Carver. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds each to square inch. Expires April 2, 1896.

*April 2.*—No. 414. Horizontal tubular boiler in power house, Brightwood avenue NW., owned by the Brightwood Railway Company. Hydrostatic pressure, 180 pounds; working pressure allowed, 120 pounds to square inch. Expires April 2, 1896.

*April 3.*—No. 415. Vertical tubular boiler in dye works, No. 114 Four-and-a-half street NW., owned by Birkner & Co. Hydrostatic pressure, 100 pounds; working pressure allowed, 80 pounds to square inch, condemned for repairs; repaired and passed. Expires April 3, 1896.

*April 3.*—No. 416. Horizontal tubular boiler in mill, No. 425-429 New Jersey avenue NW., owned by Lyell & Mohler. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires April 3, 1896.

*April 3.*—Nos. 417 and 418. Horizontal tubular boilers, sold by Forsberg & Murray. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds each to square inch. Expires April 3, 1896.

*April 4.*—No. 419. Vertical tubular boiler in greenhouse, Blandensburg road, owned by C. Strauss & Co. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds (if necessary 100 pounds) to square inch. Expires April 4, 1896.

*April 5.*—No. 420. Horizontal tubular boiler in Capital Steam Laundry, No. 512 Eighth street NW., owned by Mrs. M. A. Weaver. Hydrostatic pressure, 130 pounds; working pressure allowed, 80 pounds to square inch. Expires April 5, 1896.

*April 5.*—No. 421. New vertical tubular boiler used for pumping purposes, owned by Shailer & Schniglan Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires April 5, 1896.

*April 6.*—No. 422. Horizontal tubular boiler in brewery, Fourth and E streets NE., owned by the Washington Brewery Company. Hydrostatic pressure, 130 pounds; working pressure allowed, 80 pounds to square inch. Expires April 6, 1896.

*April 8.*—Nos. 423 and 424. Economic boilers in brickyard, Ivy City, D. C., owned by the Childs Brick Company. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds each to square inch. Expires April 8, 1896.

*April 8.*—Nos. 425 and 426. Horizontal tubular boilers in planing mill, Thirteenth and B streets NW., owned by E. E. Jackson & Co. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds each to square inch. Expires April 8, 1896.

*April 9.*—No. 427. Economic boiler in slaughterhouse, No. 1340 Twenty-second street NW., owned by J. J. Pfluerger. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires April 9, 1896.

*April 9.*—No. 428. Horizontal tubular boiler in brickyard, Florida avenue NE., owned by the Washington Brick Company. Hydrostatic pressure, 155 pounds; working pressure allowed, 90 pounds (if necessary 100 pounds) to square inch. Expires April 9, 1896.

*April 9.*—No. 429. Horizontal tubular boiler in brickyard, Ivy City, D. C., owned by The Ivy City Brick Company. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires April 9, 1896.

*April 10.*—No. 430. Vertical tubular boiler in slaughterhouse, Bladensburg road, owned by Santus Auth. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires April 10, 1896.

*April 10.*—Nos. 431 and 432. New horizontal tubular boilers in building, Eighth street and Market space NW., owned by S. Kann Sons & Co. Hydrostatic pressures 150 pounds; working pressure allowed, 80 pounds each to square inch. Expire, April 10, 1896.

*April 10.*—No. 433. Horizontal tubular boiler in power house, Brightwood avenue NW., owned by the Brightwood Railway Company. Hydrostatic pressure, 180 pounds; working pressure allowed, 120 pounds to square inch. Expires April 10, 1896.

*April 11.*—No. 434. Locomotive-form boiler in United States Government Printing Office. Hydrostatic pressure, 145 pounds; working pressure allowed, 90 pounds to square inch. Expires April 11, 1896.

*April 11.*—No. 435. Horizontal tubular boiler in National Theater, W. W. Rapley, manager. Hydrostatic pressure, 110 pounds; working pressure allowed, 70 pounds to square inch. Expires April 11, 1896.

*April 12.*—No. 436. Horizontal tubular boiler in brewery, Fourth and E streets NE., owned by the Washington Brewery Company. Hydrostatic pressure, 130 pounds; working pressure allowed, 80 pounds to square inch. Expires April 12, 1896.

*April 12.*—No. 437 (3). Horizontal tubular boiler in planing mill, Thirteenth and B streets NW., owned by E. E. Jackson & Co. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Condemned for repairs; repaired and passed. Expires April 12, 1896.

*April 13.*—No. 438. Vertical tubular boiler used for pumping purposes, owned by Shailer & Schniglan Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds (if necessary 100 pounds) to square inch. Expires April 13, 1896.

*April 13.*—No. 439. Economic boiler used for pumping purposes, owned by Shailer & Schniglan Company. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires April 13, 1896.

*April 13.*—No. 440. Economic boiler in stone works, No. 3220 K street NW., owned by the Potomac Stone Company. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires April 13, 1896.

*April 15.*—No. 441. Vertical tubular boiler in wood and coal yard, No. 3041 K street NW., owned by A. Geary Johnson. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires April 15, 1896.

*April 16.*—Nos. 442 and 443. Horizontal tubular boilers in works foot of Thirty-third street NW., owned by Lewis Hopfenmaier. Hydrostatic pressure, 120 pounds; working pressure allowed, 60 pounds (if necessary 80 pounds) each to square inch. Expires April 16, 1896.

*April 16.*—No. 444. Locomotive-form boiler in cycle works, No. 809 Water street SW., owned by D. S. Owen Manufacturing Company. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Condemned for repairs; repaired and passed. Expires April 16, 1896.

*April 16.*—No. 445. New horizontal tubular boiler in warehouse, No. 1140 Fifteenth street NW., owned by the American Security and Trust Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch. Expires April 16, 1896.

*April 17.*—No. 446. Horizontal tubular boiler in power house, Brightwood avenue NW., owned by the Brightwood Railway Company. Hydrostatic pressure, 180 pounds; working pressure allowed, 120 pounds to square inch. Expires April 17, 1896.

*April 18.*—No. 447. Horizontal tubular boiler in National Theater, W. W. Rapley, manager. Hydrostatic pressure, 110 pounds; working pressure allowed, 70 pounds to square inch. Expires April 18, 1896.

*April 18.*—No. 448. Vertical tubular boiler in bottling works, Nos. 703 to 705 North Capitol street NE., owned by the Pabst Brewing Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires April 18, 1896.

*April 19.*—Nos. 449 and 450. Horizontal tubular boiler in brewery, Fourth and E streets NE., owned by the Washington Brewery Company. Hydrostatic pressure, 130 pounds; working pressure allowed, 80 pounds each to square inch. Expire April 19, 1896.

*April 19.*—No. 451. Horizontal tubular boiler in brewery, Nos. 1221 to 1233 Twentieth street NW., owned by the Christian Heurich Brewing Company. Hydrostatic pressure, 130 pounds; working pressure allowed, 80 pounds to square inch. Expires April 19, 1896.

*April 20.*—No. 452. Vertical tubular boiler in steam bakery, Nos. 119 to 123 First street SW., owned by H. B. Leary. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires April 20, 1896.

*April 20.*—No. 453. Vertical tubular boiler in steam bakery, Sixth and G streets NW., owned by Mrs. F. Stolpp. Hydrostatic pressure, 95 pounds; working pressure allowed, 60 pounds to square inch. Expires April 20, 1896.

*April 20.*—Nos. 454 and 455. Horizontal tubular boilers in printing office, No. 1729 New York avenue NW., owned by George E. Lemon. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds each to square inch. Boiler No. 454, condemned for repairs, repaired and passed. Expire April 20, 1896.

*April 22.*—No. 456. Horizontal tubular boiler in slaughterhouse, No. 1332 Twenty-second street NW., owned by G. L. Botschs's Sons. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires April 22, 1896.

*April 22.*—No. 457. Horizontal tubular boiler in stable, P street NW., owned by the Metropolitan Railroad Company. Hydrostatic pressure, 80 pounds; working pressure allowed, 50 pounds (if necessary 60 pounds) to square inch. Expires April 22, 1896.

*April 23.*—No. 458. Locomotive from boiler in plant foot of Third street SE., owned by the Great Falls Ice Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires April 23, 1896.

*April 23.*—No. 459. Vertical tubular boiler in Troy Steam Laundry, No. 731 Ninth street NW. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires April 23, 1896.

*April 24.*—No. 460. Vertical tubular boiler in mill, James Creek Canal between N and O streets SW., owned by McDonald & Co. Hydrostatic pressure, 140 pounds; working pressure allowed, 80 pounds to square inch. Expires April 24, 1896.

*April 24.*—No. 461. Horizontal tubular boiler in foundry, corner Seventh and I streets SW., owned by John Springman. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires April 24, 1896.

*April 25.*—No. 462. Horizontal tubular boiler in warehouse, No. 1140 Fifteenth street NW. Hydrostatic pressure, 145 pounds; working pressure allowed, 90 pounds to square inch. Expires April 25, 1896.

*April 25.*—No. 463. Horizontal tubular boiler in power house, Eckington, D. C., owned by the Eckington and Soldiers' Home Railway Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires April 25, 1896.

*April 26.*—No. 464. Vertical tubular boiler in steam bakery, No. 209 G street NE., owned by G. W. Haas. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires April 26, 1896.

*April 26.*—No. 465. Vertical tubular boiler in wood and coal yard, No. 1325 First street SW., owned by B. Underwood. Hydrostatic pressure, 95 pounds; working pressure allowed, 60 pounds to square inch. Expires April 26, 1896.

*April 26.*—No. 466. Economic boiler (used for stone crusher) in works, Twenty-sixth and D streets NW., owned by the Barber Asphalt Paving Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires April 26, 1896.

*April 26.*—No. 467. Horizontal tubular boiler in works, Twenty-sixth and D streets NW., used for mixing asphaltum; owned by the Barber Asphalt Paving Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires April 26, 1896.

*April 29.*—Nos. 468 and 469. Horizontal tubular boilers in Glover Building, No. 1419 F street NW. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds each to square inch. Expires April 29, 1896.

*April 29.*—No. 470. Horizontal tubular boiler in brickyard, Delaware avenue and O street, SW., owned by the Washington Brick and Terra Cotta Company. Hydrostatic pressure, 145 pounds; working pressure allowed, 90 pounds to square inch. Expires April 29, 1896.

*April 30.*—No. 471. Horizontal tubular boiler in the Harrison, Third and G streets NW.; owned by Harvey Spalding. Hydrostatic pressure, 110 pounds; working pressure allowed, 70 pounds to square inch. Expires April 30, 1896.

*April 30.*—No. 472. Vertical tubular boiler in Fleming Building, No. 1419 G street NW.; owned by Judge W. S. Cox. Hydrostatic pressure, 110 pounds; working pressure allowed, 70 pounds to square inch. Expires April 30, 1896.

*May 1.*—No. 473. Horizontal tubular boiler in brewery, Nos. 1221 to 1233 Twentieth street, NW., owned by the Christian Heurich Brewing Company. Hydrostatic pressure, 130 pounds; working pressure allowed, 80 pounds to square inch. Expires May 1, 1896.

*May 1.*—No. 474. Horizontal tubular boiler in Lenman Building, No. 1425 New York avenue NW.; owned by estate of J. T. Lenman. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires May 1, 1896.

*May 2.*—No. 475. Horizontal tubular boiler in building, No. 918 F street NW., owned by the National Union Insurance Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires May 2, 1896.

*May 3.*—No. 476. Vertical tubular boiler in gas works, No. 1128 Twenty-ninth street NW., owned by the Georgetown Gas Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires May 3, 1896.

*May 3.*—No. 477. Vertical tubular boiler in steam bakery, No. 2315 L street NW.; owned by P. Stanton. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires May 3, 1896.

*May 4.*—No. 478. Vertical tubular boiler in steam bakery, No. 647 H street NE., owned by Robert W. Blair. Hydrostatic pressure, 90 pounds; working pressure allowed, 60 pounds to square inch. Expires May 4, 1896.

*May 6.*—No. 479. Horizontal tubular boiler in slaughterhouse, No. 2717 Seventh street NW., owned by Jacob Franz. Hydrostatic pressure, 125 pounds; working pressure allowed, 70 pounds to square inch. Expires May 6, 1896.

*May 6.*—No. 480. Horizontal tubular boiler in soap factory, K between Thirty-second and Thirty-third streets NW., owned by Weaver, Kengla & Co. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires May 6, 1896.

*May 7.*—No. 481. Horizontal tubular boiler in dye works, Nos. 1206 to 1208 I street NW., owned by Anton Lerch. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires May 7, 1896.

*May 7.*—No. 482. Horizontal tubular boiler in Lenman Building, No. 1425 New York avenue NW. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires May 7, 1896.

*May 7.*—No. 483. Horizontal tubular boiler in The Harrison, Third and G streets NW. Hydrostatic pressure, 110 pounds; working pressure allowed, 70 pounds to square inch. Expires May 7, 1896.

*May 7.*—No. 484. Vertical tubular boiler in No. 1217 Pennsylvania avenue NW., owned by The Evening News Publishing Company. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires May 7, 1896.

*May 8.*—No. 485. Vertical tubular boiler in gas works, No. 1128 Twenty-ninth street NW. Hydrostatic pressure, 115 pounds; working pressure allowed, 70 pounds to square inch. Expires May 8, 1896.

*May 8.*—No. 486. Horizontal tubular boiler in brickyard, Delaware avenue and O street SW., owned by The Washington Brick and Terra Cotta Company. Hydrostatic pressure, 90 pounds; working pressure allowed, 60 pounds to square inch. Expires May 8, 1896.

*May 8.*—No. 487. Locomotive-form boiler in wood and coal yard, Virginia and Delaware avenues SW., owned by Walter H. Marlow. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Condemned for repairs; repaired and passed June 29, 1895. Expires June 29, 1896.

*May 8.*—No. 488. Horizontal tubular boiler in brickyard, Twenty-first and A streets SE., owned by The Capitol Hill Brick Company, C. R. Monroe, manager. Hydrostatic pressure, 125 pounds; working pressure allowed, 60 pounds (if necessary 70 pounds) to square inch. Expires May 8, 1896.

*May 9.*—No. 489. Horizontal tubular boiler in Government Printing Office. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires May 9, 1896.

*May 10.*—No. 490. Coil boiler in factory, No. 512 North Capitol street, owned by the Forster Bros. Manufacturing Company, H. S. Martin, manager. Hydrostatic pressure, 200 pounds; working pressure allowed, 120 pounds to square inch. Expires May 10, 1896.

*May 10.*—No. 491. New vertical tubular boiler in No. 423 Four-and-a-half street SW., owned by A. Oehlmann. Hydrostatic pressure, 150 pounds; working pressure allowed, 90 pounds to square inch. Expires May 10, 1896.

*May 10.*—No. 492. Vertical tubular boiler in steam carpet cleaning works, No. 1706 to 1708 E street NW., M. Neumyer, manager. Hydrostatic pressure 100 pounds; working pressure allowed, 60 pounds to square inch. Expires May 10, 1896.

*May 11.*—No. 493. Vertical tubular boiler in steam bakery, No. 476 L street SW., owned by C. E. Berger. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires May 11, 1896.

*May 11.*—No. 494. Horizontal tubular boiler in building, corner New York avenue and Fifteenth street NW., owned by the National Safe Deposit Company. Hydrostatic pressure, 95 pounds; working pressure allowed, 60 pounds to square inch. Expires May 11, 1896.

*May 13.*—No. 495. Locomotive-form boiler in West End Steam Laundry, No. 1755 Pennsylvania avenue NW., owned by Henry Wagner. Hydrostatic pressure, 110 pounds; working pressure allowed, 70 pounds to square inch. Expires May 13, 1896.

*May 13.*—No. 496. Horizontal tubular boiler in planing mill, Nos. 451 to 465 Maryland avenue SW., owned by Wood & Co. Hydrostatic pressure, 125 pounds; working pressure allowed, 70 pounds to square inch. Expires May 13, 1896.

*May 14.*—No. 497. Vertical tubular boiler used for hoisting purposes, owned by Henry F. Getz. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires May 14, 1896.

*May 14.*—No. 498. Vertical cylinder boiler in yard, Thirteenth and E streets SW., owned by the Southern Railway Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires May 14, 1896.

*May 14.*—No. 499. New water-tube boiler in works, Nos. 458 and 460 Pennsylvania avenue NW., owned by The Norris Peter's Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 60 pounds (if necessary 80 pounds) to square inch. Expires May 14, 1896.

*May 15.*—No. 500. Horizontal tubular boiler in building, corner New York avenue and Fifteenth street NW., owned by the National Safe Deposit Company. Hydrostatic pressure, 95 pounds; working pressure allowed, 60 pounds to square inch. Expires May 15, 1896.

*May 15.*—No. 501. New vertical tubular boiler in wood and coal yard, corner Fourteenth and C streets NW., owned by Miller, Robbins & Co. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds to square inch. Expires May 15, 1896.

*May 15.*—No. 502. Vertical tubular boiler on steam roller No. 5, owned by the Barber Asphalt Paving Company. Hydrostatic pressure, 160 pounds; working pressure allowed, 110 pounds to square inch. Expires May 15, 1896.

*May 15.*—No. 503. Horizontal tubular boiler in power house, Thirty-second street NW., owned by the Georgetown and Tenallytown Railway Company. Hydrostatic pressure, 160 pounds; working pressure allowed, 105 pounds to square inch. Expires May 15, 1896.

*May 16.*—No. 504. Horizontal tubular boiler in power house, Third street NW. Hydrostatic pressure, 160 pounds; working pressure allowed, 105 pounds to square inch. Expires May 16, 1896.

*May 16.*—No. 505. Vertical tubular boiler in plant, Nos. 18 to 22 Harrison street, Anacostia, D. C., owned by J. S. Fowler. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires May 16, 1896.

*May 17.*—No. 506. Vertical tubular boiler in plant foot of G street NW., used for hoisting purposes, owned by J. Maury Dove. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires May 17, 1896.

*May 17.*—No. 507. Vertical tubular boiler, Twenty-eighth and K streets NW., owned by J. Maury Dove, used for hoisting purposes. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires May 17, 1896.

*May 18.*—No. 508. Horizontal tubular boiler in brick yard, South Capitol and N streets SW., owned by Charles Ford. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires May 18, 1896.

*May 20.*—No. 509. Horizontal tubular boiler in carpet cleaning works, No. 488 Maine avenue SW., owned by M. R. Thorp. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires May 20, 1896.

*May 20.*—No. 510. Horizontal tubular boiler in mortar works, South Capitol and I streets SW., owned by the National Mortar Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires May 20, 1896.

*May 20.*—No. 511. Horizontal tubular boiler at wharf, foot of Thirtieth street NW., owned by Meredith, Winship & Co. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires May 20, 1896.

*May 20.*—No. 512. Vertical tubular boiler in works, South Capitol and R streets SE., used for hoisting purposes, owned by the Washington Asphalt Block and Tile Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires May 20, 1896.

*May 21.*—No. 513. Vertical tubular boiler in slaughterhouse, Seventeenth street NE., owned by F. P. Seibert. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires May 21, 1896.

*May 22.*—No. 514. Vertical tubular boiler in Corcoran Gallery of Art, Pennsylvania avenue and Seventeenth street NW. Hydrostatic pressure, 90 pounds; working pressure allowed, 60 pounds to square inch. Expires May 22, 1896.

*May 22.*—No. 515. Horizontal tubular boiler in power house, Thirty-second street NW., owned by the Georgetown and Tenallytown Railway Company. Hydrostatic pressure, 160 pounds to square inch; working pressure allowed, 105 pounds to square inch. Expires May 22, 1896.

*May 23.*—No. 516. National water-tube boiler in the Raleigh, northeast corner Pennsylvania avenue and Twelfth street NW., B. W. Frazier, manager. Hydrostatic pressure, 145 pounds; working pressure allowed, 95 pounds to square inch. Expires May 23, 1896.

*May 24.*—No. 517. Vertical tubular boiler at wharf, K street NW., owned by the Independent Ice Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires May 24, 1896.

*May 24.*—No. 518. Babcock & Wilcox Company boiler in the Shoreham, Fifteenth and H streets NW., John T. Devine, proprietor. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires May 24, 1896.

*May 24.*—No. 519. Horizontal tubular boiler in the St. James Hotel, Pennsylvania avenue and Sixth street NW., Levi Woodbery, proprietor. Hydrostatic pressure, 130 pounds; working pressure allowed, 80 pounds to square inch. Expires May 24, 1896.

*May 25.*—No. 520. Vertical tubular boiler in wood and coal yard, No. 609 New York avenue NW., owned by Thomas M. Draney. Hydrostatic pressure, 110 pounds; working pressure allowed, 70 pounds to square inch. Expires May 25, 1896.

*May 25.*—No. 521. Vertical tubular boiler on lighter *Chesapeake*, owned by Littlefield, Alvord & Co. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires May 25, 1896.

*May 25.*—No. 522. Vertical tubular boiler in steam bakery, Eighth and M streets NW., Adolf Gassman, proprietor. Hydrostatic pressure, 110 pounds; working pressure allowed, 70 pounds to square inch. Expires May 25, 1896.

*May 27.*—No. 523. Horizontal tubular boiler in Galvanized Iron Works, Nos. 215 to 221 Fourteenth street NW., owned by the National Mould and Stamping Company, D. W. Stockstill, manager. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires May 27, 1896.

*May 27.*—Nos. 524, 525, and 526. New water-tube boilers in power house, Four-and-a-half street SW., owned by the Metropolitan Railroad Company. Hydrostatic pressure, 200 pounds; working pressure allowed, 125 pounds each to square inch. Expires May 27, 1896.

*May 28.*—No. 527. Horizontal tubular boiler in Union Building, G street between Sixth and Seventh streets NW., owned by the Union Building Company. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires May 28, 1896.

*May 29.*—No. 528. Horizontal flue boiler in machine shop, No. 487 Missouri avenue NW., owned by Corbett Mill and Machine Company. Hydrostatic pressure, 125 pounds; working pressure allowed, 60 pounds to square inch. Expires May 29, 1896.

*May 29.*—No. 529. Horizontal tubular boiler in St. James Hotel, Pennsylvania avenue and Sixth street NW. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires May 29, 1896.

*May 30.*—No. 530. Vertical tubular boiler in machine shop, No. 211 Twelfth street NW., owned by McKenzie & Jenks. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires May 30, 1896.

*May 30.*—No. 531. Vertical tubular boiler in carriage factory, No. 310 Pennsylvania avenue NW., owned by the McDermott Carriage Company. Hydrostatic pressure, 95 pounds; working pressure allowed, 60 pounds to square inch. Expires May 30, 1896.

*May 30.*—No. 532. Horizontal tubular boiler in iron foundry, Twelfth street and Ohio avenue NW., owned by C. A. Schneider's Sons. Hydrostatic pressure, 90 pounds; working pressure allowed, 60 pounds to square inch. Expires May 30, 1896.

*May 30.*—No. 533. Horizontal tubular boiler, brass foundry, No. 322 Thirteenth street NW., owned by Thomas Somerville & Sons. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires May 30, 1896.

*May 31.*—No. 534. Horizontal tubular boiler in the United States Government Printing Office. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires May 31, 1896.

*May 31.*—No. 535. Horizontal tubular boiler in stone works, First and M streets NE. owned by Lane & Malnati. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires May 31, 1896.

*May 31.*—No. 536 (64). Horizontal tubular boiler at Ninth street wharf SW., owned by the Independent Ice Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires May 31, 1896.

*June 1.*—No. 537. Horizontal tubular boiler at Ninth street wharf SW., owned by the Independent Ice Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires June 1, 1896.

*June 3.*—No. 538. Vertical tubular boiler in wood and coal yard, No. 15 Massachusetts avenue NE., owned by D. K. Hackman. Hydrostatic pressure, 120 pounds; working pressure allowed, 70 pounds to square inch. Expires June 3, 1896.

*June 3.*—No. 539. New vertical tubular boiler in steam bakery, No. 1849 Seventh street NW., owned by M. Holzbeirlein. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds to square inch. Expires June 3, 1896.

*June 3.*—No. 540. Vertical tubular boiler in machine shop, Sixth and O streets SW., owned by Charles White & Co. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires June 3, 1896.

*June 3.*—No. 541. Vertical tubular boiler in plant, lot 13, Chinchister, sub-Anacostia, D. C., owned by B. Bryan. Hydrostatic pressure, 125 pounds; working pressure allowed, 80 pounds to square inch. Expires June 3, 1896.

*June 4.*—No. 542. Locomotive foundry boiler in Hotel Gerst, corner Four-and-a-half and I streets SW., Gregor Gerst, proprietor. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires June 4, 1896.

*June 4.*—No. 543. National water-tube boiler in The Raleigh. Hydrostatic pressure, 145 pounds; working pressure allowed, 95 pounds to square inch. Expires June 4, 1896.

*June 6.*—No. 544. Vertical tubular boiler at Littlefield's wharf, used for hoisting purposes, owned by Littlefield, Alvord & Co. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires June 6, 1896.

*June 6.*—No. 545. Horizontal tubular boiler in power house at Eckington, D. C., owned by the Eckington and Soldiers' Home Railway Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires June 6, 1896.

*June 6.*—No. 546. Horizontal tubular boiler in money-order office, Eighth and E streets NW. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires June 6, 1896.

*June 7.*—No. 547. Vertical tubular boiler in slaughterhouse, Half and R streets SW., owned by Fred Dietz. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires June 7, 1896.

*June 7.*—No. 548. Horizontal tubular boiler in The Portland, Vermont avenue and Fourteenth street NW., Edward L. Weston, manager. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Condemned for repairs; repaired and passed. Expires June 7, 1896.

*June 8.*—No. 549. Locomotive foundry boiler in brickyard, Half street SW., owned by T. Martin & Bro. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Condemned for repairs; repaired and passed. Expires June 8, 1896.

*June 8.*—No. 550. Vertical tubular boiler in plant, No. 922 Louisiana avenue NW., owned by Hillman & Co. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires June 8, 1896.

*June 10.*—No. 551. Vertical tubular boiler in the Cochran, Fourteenth and K streets NW., John C. Mulford, proprietor. Hydrostatic pressure, 145 pounds; working pressure allowed, 80 pounds to square inch. Expires June 10, 1896.

*June 10.*—No. 552. Economic boiler in brickyard, South Capitol and O streets SE., owned by the Alfred Richards Brick Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires June 10, 1896.

*June 10.*—No. 553. Economic boiler in brickyard, South Capitol and O streets SE., owned by the Alfred Richards Brick Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires June 10, 1896.

*June 10.*—No. 554. Babcock & Wilcox boiler in The Shoreham. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires June 10, 1896.

*June 11.*—No. 555. Vertical tubular boiler in Gerhard Lang's Bottling Works, No. 359 M street SW., Phil Hellriegel, manager. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires June 11, 1896.

*June 11.*—No. 556 (67). Locomotive boiler in roundhouse, South Capitol and I streets SE., owned by the Philadelphia, Wilmington and Baltimore Railroad Company. Hydrostatic pressure, 160 pounds; working pressure allowed, 110 pounds to square inch. Expires June 11, 1896.

*June 11.*—No. 557 (81). Locomotive boiler in roundhouse, South Capitol and I streets SE. Hydrostatic pressure, 160 pounds; working pressure allowed, 110 pounds to square inch. Expires June 11, 1896.

*June 11.*—No. 558. Locomotive-form boiler in the Arno, Sixteenth and I streets NW., William E. Prall, proprietor. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires June 11, 1896.

*June 12.*—No. 559. Vertical tubular boiler in bottling works, Tenth and I streets SE., owned by J. F. Herrmann & Son. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires June 12, 1896.

*June 12.*—Nos. 560 and 561. Horizontal tubular boilers in works, South Capitol and R streets SE., owned by the Washington Asphalt Block and Tile Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds each to square inch. Expire June 12, 1896.

*June 12.*—No. 562. Vertical cast-iron boiler in No. 231 Seventh street SW., owned by William S. Sammon. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires June 12, 1896.

*June 12.*—No. 563. Vertical tubular boiler in money order office, Eighth and E streets NW. Hydrostatic pressure, 130 pounds; working pressure allowed, 60 pounds to square inch. Expires June 12, 1896.

*June 13.*—No. 564. Babcock & Wilcox Company boiler in power house, Eckington, owned by the Eckington and Soldiers' Home Railway Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires June 13, 1896.

*June 13.*—Nos. 565 and 566. Horizontal tubular boilers in Grand Army Building, Nos. 1412-1414 Pennsylvania avenue NW., owned by G. G. Cornwell & Son. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds each to square inch. Expire June 13, 1896.

*June 14.*—No. 567. Vertical tubular boiler used for hoisting purposes, owned by the Christian Heinrich Brewing Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires June 14, 1896.

*June 14.*—No. 568. Vertical tubular boiler in works in rear of I street, between Twenty-first and Twenty-second streets NW., owned by Duckett & Wright. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires June 14, 1896.

*June 14.*—No. 569. Vertical tubular boiler used for hoisting purposes at Heurich's new brewery, owned by R. D. McClure. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires June 14, 1896.

*June 15.*—No. 570. Horizontal tubular boiler in Small Building, Fourteenth and G streets NW., owned by J. H. Small & Sons. Hydrostatic pressure, 110 pounds; working pressure allowed, 60 pounds (if necessary 70 pounds) to square inch. Expires June 15, 1896.

*June 17.*—No. 571. Vertical tubular boiler at Littlefield's Wharf, used for hoisting purposes, owned by Littlefield, Alvord & Co. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Condemned for repairs; repaired and passed. Expires June 17, 1896.

*June 17.*—No. 572. Babcock & Wilcox Company boiler in The Shoreham. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires June 17, 1896.

*June 17.*—No. 573. Horizontal tubular boiler in small building, Fourteenth and G streets NW. Hydrostatic pressure, 110 pounds; working pressure allowed, 60 pounds (if necessary 70 pounds) to square inch. Expires June 17, 1896.

*June 17.*—No. 574. Horizontal tubular boiler in steam laundry, Nos. 491 to 499 C street NW., owned by James P. and Edward M. Tolman. Hydrostatic pressure, 115 pounds; working pressure allowed, 70 pounds to square inch. Expires June 17, 1896.

*June 18.*—No. 575. Horizontal tubular boiler in brickyard, Florida avenue NE., owned by the Washington Brick Company. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires June 18, 1896.

*June 18.*—No. 576. Vertical tubular boiler in Boston Steam Laundry, First and G streets NW., J. K. Korff, proprietor. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires June 18, 1896.

*June 18.*—No. 577. Vertical tubular boiler on schooner *John W. Linnell*, of Boston, Mass., Capt. S. N. Handy. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Condemned for repairs; repaired and passed. Expires June 18, 1896.

*June 19.*—No. 578. Vertical tubular boiler in steam bakery, No. 1339 H street NE., owned by J. J. Bischof. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires June 19, 1896.

*June 19.*—No. 579. Vertical tubular boiler in Mount Olivet Cemetery. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires June 19, 1896.

*June 20.*—No. 580. Locomotive-form boiler in wood and coal yard, I street, between Twenty first and Twenty-second streets NW., owned by J. Maury Dove. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds to square inch. Expires June 20, 1896.

*June 20.*—No. 581. Horizontal tubular boiler in building southwest corner Ninth and F streets NW., owned by the Washington Loan and Trust Company. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires June 20, 1896.

*June 21.*—No. 582. Vertical tubular boiler used for hoisting purposes, owned by Frank N. Carver. Hydrostatic pressure, 160 pounds; working pressure allowed, 100 pounds to square inch. Expires June 21, 1896.

*June 21.*—Nos. 583 and 584. Horizontal tubular boilers in The Portland, Vermont avenue and Fourteenth street NW., Edward L. Weston, manager. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds each to square inch. Expires June 21, 1896.

*June 21.*—No. 585. Scotch return tubular boiler in works, Twenty-sixth and D streets NW., owned by the Barber Asphalt Paving Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires June 21, 1896.

*June 21.*—No. 586. Vertical tubular boiler at Eighth street wharf SW., owned by the National Capital Ice Company. Hydrostatic pressure, 145 pounds; working pressure allowed, 90 pounds to square inch. Expires June 21, 1896.

*June 24.*—No. 587. Vertical tubular boiler on steam roller Dexter, owned by the Cranford Paving Company. Hydrostatic pressure, 160 pounds; working pressure allowed, 105 pounds to square inch. Expires June 24, 1896.

*June 24.*—No. 588. Return tubular boiler in wood and coal yard, Tenth street wharf SW., owned by Carter & Clarke. Hydrostatic pressure, 110 pounds; working pressure allowed, 70 pounds to square inch. Expires June 24, 1896.

*June 24.*—No. 589. Vertical tubular boiler in store, Seventh, between B and C streets SW., owned by Nixon Brewer. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires June 24, 1896.

*June 24.*—No. 590. Vertical tubular boiler in Glenwood Cemetery. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires June 24, 1896.

*June 25.*—No. 591. Economic boiler in Palace Steam Laundry, No. 113 Four-and-a-half street SW., owned by W. F. Barker and E. Shephardson. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires June 25, 1896.

*June 25.*—No. 592. Vertical tubular boiler on lighter *Potomac*, owned by Littlefield, Alvord & Co. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires June 25, 1896.

*June 25.*—No. 593. Locomotive boiler in roundhouse, Trinidad, D. C., owned by the Baltimore and Ohio Railroad Company. Hydrostatic pressure, 160 pounds; working pressure allowed, 110 pounds to square inch. Expires June 25, 1896.

*June 26.*—No. 594. Vertical tubular boiler at sand wharf in works No. 2632 D street NW., used for hoisting purposes, owned by the Cranford Paving Company. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires June 26, 1896.

*June 26.*—No. 595. Horizontal tubular boiler in No. 921 Pennsylvania avenue NW., owned by the Adams Express Company. Hydrostatic pressure, 90 pounds; working pressure allowed, 60 pounds to square inch. Condemned for repairs; repaired and passed. Expires June 26, 1896.

*June 26.*—No. 596. Horizontal tubular boiler in terra-cotta works (county, District of Columbia), owned by A. Lamond; tested by hammer test; working pressure allowed, 110 pounds to square inch. Expires June 26, 1896.

*June 26.*—No. 597. Vertical tubular boiler in works No. 2632 D street NW., used for pumping purposes, owned by the Cranford Paving Company. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Condemned for repairs; repaired and passed. Expires June 26, 1896.

*June 27.*—No. 598. Horizontal tubular boiler in shop at Littlefield's wharf, owned by Littlefield, Alvord & Co. Hydrostatic pressure, 130 pounds; working pressure allowed, 70 pounds (if necessary 80 pounds) to square inch. Expires June 27, 1896.

*June 27.*—No. 599. Vertical tubular boiler in wood and coal yard No. 12 H street NE., owned by Frank Lillie. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires June 27, 1896.

*June 27.*—No. 600. Horizontal tubular boiler in brickyard, Florida avenue NE., owned by the Washington Brick Company. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires June 27, 1896.

*June 27.*—No. 601. Locomotive boiler in roundhouse, Trinidad, D. C., owned by the Baltimore and Ohio Railroad Company. Hydrostatic pressure, 160 pounds; working pressure allowed, 110 pounds to square inch. Expires June 27, 1896.

*June 28.*—No. 602. Vertical tubular boiler in The Hotel Page, No. 721-727 Fifteenth street NW., T. L. Page, proprietor. Hydrostatic pressure, 150 pounds; working pressure allowed, 100 pounds to square inch. Expires June 28, 1896.

*June 28.*—No. 603. Vertical tubular boiler in wood and coal yard, Virginia avenue and First street SW., owned by W. A. Eliason. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires June 28, 1896.

*June 29.*—No. 604. Horizontal tubular boiler in building No. 921 Pennsylvania avenue NW., owned by Adams Express Company. Hydrostatic pressure, 90 pounds; working pressure allowed, 60 pounds to square inch. Expires June 29, 1896.

*June 29.*—No. 605. Vertical tubular boiler in steam bakery, No. 622 E street NW., owned by W. Berens & Sons. Hydrostatic pressure, 100 pounds; working pressure allowed, 60 pounds to square inch. Expires June 29, 1896.

BOILERS INSPECTED FOR THE DISTRICT OF COLUMBIA.

*November 23, 1894.*—No. 1. Vertical tubular boiler in Manual Training School, Nos. 624-626 O street NW. Hydrostatic pressure, 150 pounds; working pressure allowed, 80 pounds (if necessary 90 pounds) to square inch. Expires November 23, 1895.

*April 11, 1895.*—Nos. 2 and 3. New water-tube boilers in U street pumping station. Hydrostatic pressure, 225 pounds; working pressure allowed, 150 pounds each to square inch. Expire April 11, 1896.

*April 12, 1895.*—No. 4. Horizontal tubular boiler in U street pumping station. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires April 12, 1896.

*April 18, 1895.*—No. 5. Horizontal tubular boiler in U street pumping station. Hydrostatic pressure, 140 pounds; working pressure allowed, 90 pounds to square inch. Expires April 18, 1896.

*April 29, 1895.*—No. 6. Vertical tubular boiler in Industrial Home School, Thirty-second street extended. Hydrostatic pressure, 120 pounds; working pressure allowed, 80 pounds to square inch. Expires May 29, 1896.

## DIVISION OF WATER AND STREET LIGHTING.

*Supervision of water distribution, water rates, street lighting, conduits, and inspection of gas and meters.*

### REPORT OF OFFICER IN CHARGE.

OFFICE OF THE ENGINEER COMMISSIONER,  
*Washington, D. C., August 30, 1895.*

MAJOR: I have the honor to submit the following report upon the operations of the division of water and street lighting for the fiscal year ended June 30, 1895. This division includes the supervision of water distribution, water rates, street lighting, and inspection of gas and meters.

### DISTRIBUTION BRANCH OF THE WATER DEPARTMENT.

The maintenance of an ample supply of water for the District of Columbia, for its public buildings and grounds, and for the use of its citizens, is a divided responsibility. The water supply was originally provided by the United States for the use of its public buildings and grounds, and is under the charge of its officers. The use of any water in excess of that requisite for its own needs was freely given by the United States to the citizens of the District. Necessary increases and improvements in the supply system have been made, in part at the expense of the United States and in part at the expense of the District. The system for distributing the water to the private consumer has been provided by the District of Columbia and, together with the collection of revenues for its maintenance and extension, is under the control of the Commissioners.

The supply of water available for the use of private consumers has at times been very inadequate to the demands made upon it. The last increase in the supply system was completed in 1890, when the 48-inch main was put in service. At that time the city was divided into separate areas of which the higher, including Capitol Hill and the northern portion of the city, was supplied by the 48-inch main, and it was thought that no additional facilities would be necessary for many years. The increasing demand for water, due to the rapid growth of the city, and particularly in the higher areas, has, however, been much greater than was anticipated and the consumption has in five years outgrown the supply system which in 1890 was considered ample for at least fifteen

years. Pressures taken on the lines of the large supply mains indicate a general lowering of the pressure in the mains from that existing in 1890, after the last increase of the water supply. These pressures, together with the pressures existing at the same points in 1890, are embodied in Tables I, II, III, and IV.

TABLE I.—Pressures on the line of the 30-inch main, the water in the reservoir standing at 146 feet above datum on February 27, 1890, at 145 feet above datum on June 27, 1890, and 144 feet above datum on August 8, 1895.

| Location.  | Elevation of locality. | February 27, 1890. |       |                                 | June 27, 1890. |       |                                 | August 8, 1895. |       |                                 |
|--|------------------------|--------------------|-------|---------------------------------|----------------|-------|---------------------------------|-----------------|-------|---------------------------------|
|  |                        | Pressures.         |       | Elevation of water above datum. | Pressures.     |       | Elevation of water above datum. | Pressures.      |       | Elevation of water above datum. |
|  |                        | Lbs.               | Feet. | Feet.                           | Lbs.           | Feet. | Feet.                           | Lbs.            | Feet. | Feet.                           |

| East Capitol and Eleventh streets..... | 86                     | 6½  | 15    | 101                             | 18½ | 42.7   | 128.7 | 17½                             | 39.84 | 125.84  |       |                                 |

An examination of the tables shows that, while the pressure is fairly well maintained on Capitol Hill, there is a marked falling off in all other localities, and at some points the conditions are very little better than 1890. It is to be remembered that these pressures are taken in the nearest proximity to the large mains and represent the conditions in the most favored localities. At points off the large mains the deficiency in pressure is still greater. It should also be noted that these pressures were taken at a time when the draft on the mains was probably no greater than normal, and when few or no complaints of insufficient supply were making. When the draft on the mains is greatest,

as in very cold weather, the pressures are greatly reduced from those shown in the tables. During the past winter complaints were very numerous, and came from all parts of the city, including Capitol Hill, where the supply, under normal condition, is ample. Where the deficiency in water supply is confined to a single locality, relief may be had by resorting to temporary expedients, but a general deficiency can only be improved by an increase in the general supply. It will be noticed from the tables of pressures that, while the pressures in the large mains have fallen off 10 or 11 feet, the water in the distributing reservoir was maintained at practically the same level in 1895 as in 1890, the difference in level being only 1 foot, and this difference being due largely to causes outside of the draft of the city mains. There is undoubtedly urgent necessity for increasing the means for supplying the reservoirs, but there is an equal or greater urgency for immediately increasing the facilities for bringing water from the distributing reservoir to the city. With an unlimited supply in the reservoir, the consumers can expect no increase in the amount of water furnished them until the tunnel conduit or a substitute therefor is completed. Much inconvenience, distress, and danger are now continually experienced from the present inadequate supply of water, and with prompt action no relief can be had for at least two years. It can not, then, be too urgently recommended that steps be immediately taken for increasing the facilities for bringing water from the distributing reservoir to the city.

The total length of water mains laid during the year is 142,902 feet, the largest year's work ever done in the water department. Of this amount 28,903 feet of 6-inch mains were laid in accommodating the system of distributing mains to the underground traction systems of the Columbia Railway Company and Metropolitan Railway Company. Ninety-seven thousand three hundred and ten feet of water mains were laid in the low-service area, and 45,592 feet of mains in the middle and upper high-service areas. The following tables summarize the extent of the distribution system on June 30, 1895, and the operations of the distribution branch of the water department during the fiscal year just closed:

TABLE V.—*Mains laid during year, and miscellaneous work.*

| New mains laid.                       | Feet.   | New mains laid.                           | Feet.  |

| Total.       | 39½               | 8,928½            | 13,179            | 2,500             | 113,126½          | 6,573             | 26                | 606,831           | 54,246½           | 51,186            | 856,636½          | 733,514.27  |

<sup>1</sup> Laid on Road street, Georgetown, to replace old cement pipe.

<sup>2</sup> Cost of laying intersections not included herein.

<sup>3</sup> 1,074 feet laid to United States Library site; cost not included herein.

<sup>4</sup> 12,366 feet laid under permit system; cost not included herein.

<sup>5</sup> 5,576 feet laid under permit system; cost not included herein.

<sup>6</sup> 26,574 feet laid under permit system; cost not included herein.

<sup>7</sup> 730 feet laid under permit system; cost not included herein.

<sup>8</sup> 434 feet laid under permit system and 1,938½ feet used for connections for fire hydrants; cost not included herein.

<sup>9</sup> 307 feet 3-inch, 229½ feet 4-inch, and 14,253½ feet 6-inch mains laid under permit system, and 3,405½ feet used for connections to fire hydrants; cost not included herein.

For the work of this department the materials were in general obtained by contract and the mains were laid by hired labor.

The following table shows the average cost per linear foot of the mains laid during the year:

TABLE IX.—Average cost per foot for laying mains of different sizes.

| Size.        | Linear feet. | Cost of material. | Cost of labor. | Total cost. |
|--------------|--------------|-------------------|----------------|-------------|
| 3-inch.....  | 2,426        | \$0.2562          | \$0.3563       | \$0.6125    |
| 4-inch.....  | 5,063½       | .2472             | .2880          | .5352       |
| 6-inch.....  | 85,687½      | .3659             | .3025          | .6684       |
| 12-inch..... | 27,730½      | .8757             | .5276          | 1.4033      |
| 24-inch..... | 6,616½       | 2.7724            | 1.8316         | 4.6040      |

The above table does not include the cost of relaying pavements. Brick and cobble pavements have been relaid by the water department, and other kinds by the surface department.

TABLE X.—Average cost per foot of relaying pavements.

| Size.        | Cobble.      |          | Trap rock.   |          | Brick.       |          | Belgian.     |          | Vitrified brick. |          | Asphalt blocks. |          | Sheet asphalt. |          |

## HIGH SERVICE.

More than 90 per cent of the water furnished the District of Columbia is supplied by gravity to the low-service area. The distributing reservoir for this area has a water level of 146 feet above mean high water and gives a fair service, when the mains are not overtaxed, to localities as high as 100 feet above datum. Under conditions such as exist at present with the supply mains overtaxed, the service in all localities between 85 and 100 feet above datum is at times very inadequate. Much of Georgetown, a small portion of Washington, and the greater part of the remainder of the District of Columbia lie above the level of 100 feet above datum, and for these areas the supply of water has to be pumped. A considerable part of the northwest section of Washington lies between 85 and 100 feet above datum, and in this area under present conditions the water supply from the gravity system is precarious. At times it is inadequate on account of the overtaking of the 48-inch main and the resulting loss of pressure. The high-service system has, during the past year, been extended to include some small portions of this area, and with increased pumping and reservoir facilities it is expected to make further extensions in the future and until the general supply of water is increased.

On account of the great variation in the elevation of the different parts of the District of Columbia the high-service system of water distribution has been divided into an upper and a middle high service. The upper high service is intended to supply those areas of the District which lie above the level of 210 feet above datum and the middle high service those areas between the levels of 100 and 210 feet above datum. The middle high-service area covers much of Georgetown, a part of Washington, and the suburban districts between Rock Creek and the Soldiers' Home and to the eastward of the Soldiers' Home. Population and improvements are rapidly increasing in this area, with an increasing demand for water facilities.

The following table shows the average amount of water pumped daily for the middle high-service area during the fiscal year ending June 30, 1895:

TABLE XI.—Average daily consumption, middle high service.

| Month.                | Gallons.    | Month.               | Gallons.    |
|-----------------------|-------------|----------------------|-------------|
| July, 1894 .....      | 2, 670, 973 | January, 1895 .....  | 3, 772, 300 |
| August, 1894 .....    | 2, 885, 335 | February, 1895 ..... | 3, 744, 418 |
| September, 1894 ..... | 3, 140, 500 | March, 1895 .....    | 3, 069, 329 |
| October, 1894 .....   | 3, 299, 378 | April, 1895 .....    | 3, 375, 131 |
| November, 1894 .....  | 3, 244, 301 | May, 1895 .....      | 3, 432, 571 |
| December, 1894 .....  | 3, 378, 825 | June, 1895 .....     | 3, 747, 570 |

Until recently two pumping stations have been maintained for supplying this area. The Georgetown station was closed in 1893, although held in readiness for emergencies, and the entire area is now supplied from the pumping station on U street between Sixteenth and Seventeenth streets NW. All pumping plant for the high service areas will be concentrated at this station and increased as the demand grows.

The act of March 3, 1893, and subsequent acts making appropriations for this department have appropriated, for extending the high-service system of water distribution, so much as may be available in the water fund after providing for the other expenditures authorized in the same acts. Under these appropriations much needed extensions and improvements in the high-service system have been commenced.

Additional ground was acquired at the station during the past year for storage purposes and future extensions. Plans have been prepared for a building to replace the old and cramped structures at the station. It is expected that this building will be completed in January, 1896.

The 5,000,000-gallon pumping engine contracted for with the Nordberg Manufacturing Company, and which was to have been completed in January 1895, has, after unavoidable delays, been completed, although not yet offered for test. This engine has been designed for use in the upper high service, but with the expectation of using it in the middle high service with as great or greater economy than the old engines. Additional pumping facilities will be shortly needed and it is expected that during the coming fiscal year a contract will be made for an 8,000,000-gallon pumping engine for the middle high service to replace one of the old 2,500,000-gallon engines.

The two 2,500,000-gallon engines at the U street station have been relied on to supply the middle high-service area since the discontinuance of the Georgetown station, and during a large part of the past year have been operated to their maximum capacity for a portion of every day. With insufficient pumping and reservoir capacity, it has been impossible to stop the engines excepting for a few hours at night in order to make minor repairs to the engines or changes in the water-main connections. These engines have not been thoroughly overhauled for two years and are much in need of repairs.

The only reservoir facilities on the middle high-service system are furnished by a small reservoir at Thirty-second and U streets, Georgetown, the property of the United States and under the control of its officers. The capacity of this reservoir is much too small, and its elevation, 220.5 feet above datum, is insufficient to give a fair service to the higher points of this system. The most urgent needs of this system are increased reservoir facilities and larger force mains. A new reservoir should be located at some point on the high ground back of the central part of the city and at an elevation of about 260 feet above datum. Several sites are now under consideration, and it is hoped that the construction of a reservoir, with a capacity of not less than 15,000,000 gallons, will be commenced during the next fiscal year. During the past year 6,616 linear feet of 24-inch main were laid in making connection at the pumping station with the new 5,000,000-gallon engine and for a force main from the pumping station toward the proposed reservoir. This main was laid from Sixteenth and U streets to Thirteenth street and Whitney avenue, and will be extended to the reservoir as soon as a site therefor has been acquired.

The capacity of the force main for the middle high service from the U street pumping station to Georgetown, now in part 12-inch main and in part 10-inch main, is overtaxed. During the coming year a 20-inch main with two 12-inch extensions will be laid for the improvement of the service in the Georgetown high-service area. The 12-inch main for supplying Eckington and Brookland should be completed as early as practicable.

During the previous year a site for a reservoir for the upper high service was purchased at Fort Reno, 420 feet above datum. A 12-inch main was laid from the U street pumping station via Woodley lane and the Tennallytown road to the reservoir site and a small tank erected for service pending the construction of the reservoir. A small Knowles pump, having a capacity of about 100,000 gallons per diem, which was kindly loaned to the water department by the Architect of the Capitol, was put in operation in July, 1894, and since that time has been sup-

plying all the water necessary on the line of the main to Tennallytown and Reno. The average amount pumped for this service during the fiscal year was 47,253 gallons per diem.

TABLE XII.—Average daily consumption, upper high service.

| Month.                | Gallons. | Month.               | Gallons. |
|-----------------------|----------|----------------------|----------|
| September, 1894 ..... | 38,923   | February, 1895 ..... | 36,720   |
| October, 1894 .....   | 48,844   | March, 1895 .....    | 26,395   |
| November, 1894 .....  | 54,793   | April, 1895 .....    | 34,637   |
| December, 1894 .....  | 57,090   | May, 1895 .....      | 33,457   |
| January, 1895 .....   | 36,398   | June, 1895 .....     | 47,062   |

A 12-inch main for supplying Brightwood and Takoma has been laid from Reno. This main was completed at the end of the fiscal year, with the exception of the portion under Rock Creek, where a temporary connection was made for use until such time as low water will permit of laying the permanent main in the bed of the stream. Water was turned into this main early in July.

A contract for the excavation and embankment of the Reno reservoir was let in September, 1894, and completed in December. Early in the coming fiscal year a contract will be made for completing the reservoir, and it is expected that it will be available for use in December next. Until the reservoir is completed this service will continue to be served by the Knowles pump, and afterwards by the 5,000,000-gallon engine designed for this service. The area higher than 210 feet above datum and to be supplied by this upper high service now is, and for many years will continue to be, but thinly settled. The Reno reservoir, with a capacity of 4,500,000 gallons, and the new 5,000,000-gallon engine will meet all of its requirements for many years to come.

The following table summarizes the extent of the mains laid previous to June 30, 1895, from the appropriation for the high-service system and the mains laid in this service during the past year. These items are also included in Tables V, VI, VII, and VIII. Many mains now in the high-service system were laid previous to the making of a separate appropriation for this system, and are not included in the following table.

TABLE XIII.—Statement of the length and cost of water mains laid under the appropriation for extending the high-service system of water distribution, from July 1, 1893, to June 30, 1895.

| Fiscal year. | 24-inch.        | 20-inch.        | 12-inch.        | 6-inch.         | 4-inch.         | Total.          | Cost.      |
|--------------|-----------------|-----------------|-----------------|-----------------|-----------------|-----------------|------------|
|              | <i>Lin. ft.</i> | <i>Lin. ft.</i> | <i>Lin. ft.</i> | <i>Lin. ft.</i> | <i>Lin. ft.</i> | <i>Lin. ft.</i> |            |
| 1893 .....   |                 |                 | 2,682           | 2,822½          |                 | 5,504½          | \$6,760.16 |
| 1894 .....   |                 | 278             | 52,789½         | 14,269½         |                 | 67,337½         | 69,247.27  |

| Total .....  | 6,616½          | 278             | 65,096¾         | 45,488½         | 954             | 118,433¾        | 153,724.09 |

## PUBLIC WELLS.

An appropriation is made annually for the care of the public wells in the District. There were 171 of these wells in use on June 30, 1895. During the year 47 wells were filled and abandoned and 2 new wells were driven. Excepting the two new wells, all the existing wells are shallow. In any metropolitan district such wells are liable to contamination from sewage and surface drainage and it may be confidently

asserted that sooner or later the water in all of them will become unfit for potable purposes. Continued efforts are being made to have the water from the public wells in the District frequently examined chemically, and upon the concurrent showing of two examinations by different chemists that the water in any well is so contaminated as to be unfit for use the well has been closed. These wells are frequently located in close proximity to sewers and in places that are otherwise unsanitary. Since sewers are rarely absolutely water-tight, all wells near them are surely liable to contamination with sewage at no distant time. As a matter of fact a large percentage of all the wells so far examined have been found to be polluted, and it is safe to assert that every shallow well in a densely populated metropolitan district is, or soon will be, a menace to the public health.

During the year two deep wells were driven for experimental purposes. One of these wells is located at Brightwood, on Brightwood avenue just south of the Military road, and the other at Sixth and G streets SW. Both wells were driven to a depth of nearly 150 feet and were lined with 6-inch wrought-iron pipe, excepting where driven in rock. The Brightwood well was driven some distance into the rock, but the other well did not reach it. A supply of water was obtained in each well sufficient to meet the demands on it. The water from each well has been examined chemically and found to be of very good quality.

The desire of the people to have well water and their objections to the closing of shallow wells is readily comprehended. Well water is clear and cool when Potomac water is warm and at times turbid, and, excepting when vilely polluted, it is unobjectionable in taste and odor even when so contaminated as to be unfit for use. The majority of the existing public wells are located where they will be of service to the poorer classes, and, when the water is good, are undoubtedly of great benefit and comfort to the people who can not afford to cool their water with ice for drinking purposes. If contaminated and abandoned shallow wells can be replaced by deep wells furnishing pure water, a lasting benefit will be conferred on these classes.

The two experimental wells driven during the year indicate that good water can be had at a reasonable depth and cost, and it is recommended that the number of public wells of this class be increased. An item of \$10,000 for this purpose should be included in the estimates for 1897.

#### REVENUE BRANCH OF THE WATER DEPARTMENT.

The following statement shows the receipts and expenditures of the water department for the fiscal year ended June 30, 1895:

| Estimated receipts, 1897.....                  |              |                         |            |               | 296,500.00      |
| Estimated total available, 1897.....           |              |                         |            |               | 512,489.10      |

The receipts have fallen considerably below the estimates. The falling off is almost entirely in the receipts from water-main assessments, due to litigation as to their validity. The decision of the court of appeals was adverse to the District, and invalidates all water-main assessments made previous to its handing down. The amount invalidated can not now be exactly determined, but is very large, and such legislation as may be necessary to authorize the correction of informalities in the invalid assessments should be requested of Congress at its next session.

The force in the revenue branch is entirely inadequate to efficiently perform all the duties devolved upon it. The work of the office, as indicated by the receipts, has more than doubled in the past ten years, due to the rapid extension of the water-distribution system and increase in the number of water takers. Practically no increase in the force in this branch has been made in this time, and with present force it is

<sup>1</sup> Of this amount, \$1,921.66 was paid on account of 1893, and \$178.46 on account of 1894.

<sup>2</sup> Of this amount, \$253.57 was paid on account of 1894.

<sup>3</sup> Of this amount, \$9,764.51 was paid on account of 1894.

<sup>4</sup> This item of \$40,408.89 was not advanced to Treasurer United States until after close of fiscal year and is not included in expenditures.

impossible to attend to the increased work of the office and maintain an adequate system of inspection for waste and leakage. The present number of inspectors should be at least doubled. With the prospective increase in the meter system the present force will be still more inadequate.

#### WATER METERS.

During the year the number of water meters in use has increased from 202 to 231. Only 29 new meters have been placed since the last annual report. Notwithstanding the extremely low meter rates, only 3 cents per 1,000 gallons, it is evident that meters will not be introduced as required by law until stringent measures for the enforcement of the law are taken.

The act of July 14, 1870, provides that "the supply of water to all manufacturing establishments, hotels, livery stables, and other places requiring a large quantity, shall be determined by meters erected and maintained at the expense of the consumer." This statute should be rigidly enforced, and from its enforcement may result a sufficient economy in the use of water by large consumers to somewhat diminish the inconvenience from deficient water supply that the public has now to submit to, and from which it must continue to suffer for some time, even if steps for an increased supply are undertaken at once.

There are more than 500 places that should be supplied with water through meters, under the above act, in addition to those now metered. The existing system of private ownership of meters has not proved satisfactory in this city, and it was desired in this department, in extending the system, that the necessary meters should be provided and owned by the water department. The Comptroller of the Treasury has, however, decided that the law requires that the consumer shall provide the meter, as well as place, and maintain it. New meter regulations have been drawn up, and during the coming year all consumers covered by the act of July 14, 1870, will be required to comply with its provisions.

The numbers, sizes, and kinds of water meters in service on July 30, 1895, are shown in the following table:

TABLE VII.—*Meters.*

| Size.                       | Worth-<br>ington. | Thomson. | Crown. | Nash. | Buffalo. | Union. | Total. |
|-----------------------------|-------------------|----------|--------|-------|----------|--------|--------|
| $\frac{1}{4}$ -inch .....   |                   | 1        |        |       |          |        | 1      |
| $\frac{1}{2}$ -inch .....   |                   |          |        |       |          |        |        |

#### STREET LIGHTING.

At the close of the fiscal year the streets and roads in the District were being lighted by three hundred and thirty-eight 1,000-candle-power electric arc lamps, an increase of 11; 6,188 gas lamps, a decrease of 58, and 868 naphtha lamps, an increase of 121.

The service has been about the same as heretofore. The streets of this city are most difficult to light, owing to the great number of shade trees on the curb line. The heavy shade makes the use of large electric lights at wide intervals generally unsuitable, and the high price charged

by the electric-lighting company and the limited appropriations make it impossible to extend this system even to all the streets where the trees will permit. The trees are generally located so near the curb line that the lamp-posts have to be set on practically the same line as the trunks of the trees, so that even in winter, when the trees are bare of leaves, the streets look gloomy at night as compared with those of most large capitals. Some experiments have been made with a view to a change in the type of lamp-post and lantern to obviate this difficulty, but so far without developing anything that can be considered a satisfactory solution of the problem.

Some steps have been taken during the year to improve the methods of marking the names of streets at street corners. On streets lighted with gas and oil or naphtha the existing method of glass signs on the lanterns is perhaps as satisfactory as any other, although subject to the objection that the glass signs are frequently broken and are expensive and slow to replace. On streets lighted with electricity no entirely satisfactory method has as yet been found for this city. During the year a number of enameled street designations were placed on buildings at street corners on Pennsylvania avenue. It can not be said that the experiment has been satisfactory. The designations, while as large as practicable, are not sufficiently legible, and difficulty is experienced in finding suitable locations for them on buildings so that they may be seen from the footwalk as well as the roadway. The great width of roadways, sidewalks, and parkings removes the building in many cases to such a distance from the street corner to be designated that this method of marking the corners can not be universally satisfactory. Other methods will probably be tried in the near future.

The street-lighting service, so far as the appropriations permit, has been satisfactorily executed during the year. An advantageous contract was entered into for the substitution of naphtha for oil in lamps in alleys and where gas mains have not been laid. These lamps are lighted from forty minutes after sunset until forty minutes before sunrise every night of the year, and the contract price was \$17 per lamp per annum. For the next fiscal year the use of naphtha will be continued, and the service extended to include other lamps in alleys, in order to have all-night and every-night lighting in these places. The contract price is \$20.25 per lamp per annum, and the increased cost of the service, together with the limited appropriations, will prevent many necessary extensions.

An important change should be made in the number of hours for gas lighting. The acts making appropriations for street lighting with gas or oil have provided for a maximum price and a minimum of 3,000 hours of lighting per annum. In the gas-lighting service it has, to the present time, been impossible to secure from the gas companies more than the minimum service for the maximum price. The number of hours of total darkness, from the end of evening twilight to the beginning of morning twilight, is 3,116 in a year. All lamps should be lighted at least thirty minutes before and after evening and morning twilight, and one hour each night is allowed the gas companies for lighting and extinguishing, making a total of 3,846 hours per annum. With a 3,000-hour schedule and variable conditions of the sky, an uncertain twilight and an unreliable moon are called upon to furnish 846 hours of lighting per annum, or an average of 70.5 hours per month. It has been found impossible to so regulate the schedule as to secure this result, and even with the nearest possible approximation to it the service has been insufficient and caused many complaints. In this city, with the dense shade of trees at the curb, and in narrow, populous alleys, the moon is of practically no service as a factor in street lighting, and the attempt to use it as such

should be abandoned. A uniform schedule of 3,800 hours per annum should be adopted for all classes of street lighting.

A marked increase is asked for in the appropriations for street lighting. The existing service is not satisfactory or in keeping with the high standards maintained in the other branches of the city government. Nearly all the city streets are but dimly lighted, and many streets and populous alleys are not lighted at all. In many of the suburbs improvements are rapidly going forward, and there are not sufficient funds for establishing the absolutely necessary lights even in those suburbs that are practically a part of the city. The change from horse to power traction is steadily going forward on city transportation lines, and all streets occupied by power traction lines should be well lighted with electric arc lamps. The installation of electric lamps on the line of the Columbia Railway, from Fourteenth street and New York avenue NW., to Fifteenth and H streets NE., and on the lines of the Metropolitan Railway, are most urgently needed.

The reasons for the proposed increase in the salary of the superintendent of lamps are stated in the report of that officer, and are fully concurred in. It may be added, with every assurance of certainty, that no man competent to fill the position can be found who will hold it for any length of time at the salary of \$1,000 per annum. The position is a difficult one to fill, requiring technical training and experience, and frequent changes in it are most disadvantageous to the service.

The services of an additional inspector are necessary, and a clerk should be provided for, in order that the necessary clerical work now done by the inspectors may be removed from their hands, leaving them freer to attend to their proper duties.

#### INSPECTION OF GAS AND METERS.

Four laboratories for testing gas have been in operation during the year. The gas supplied by the Washington Gaslight Company is tested at 403 Tenth street NW., 1335 Fourteenth street NW., and at Fifth and D streets SE. The gas furnished by the Georgetown Gas Light Company is examined at 1338 Thirty-second street NW. The quality of the gas has been tested at these laboratories daily, and has, with very few exceptions, exceeded the standard prescribed by law.

The contingent expenses of the two new laboratories and the one in Georgetown are paid by the gas companies, in accordance with the provisions of the appropriation bill for 1894. There appears to be no good reason why the remaining laboratory—the one on Tenth street—should not be provided for in the same way. I would recommend that the necessary legislation be obtained to secure this result.

For more detailed information with regard to the operations of the different departments, attention is invited to the reports herewith of their respective heads.

In conclusion, I have great pleasure in bearing witness to the faithful, conscientious, and painstaking performance of their duties by all of my assistants in this division, and in acknowledging the assistance received from them in caring for the important duties in my charge.

Very respectfully, your obedient servant,

EDW. BURR,

*Captain of Engineers, U. S. A., Asst. to Engineer Commissioner.*

Maj. CHAS. F. POWELL,

*Corps of Engineers, U. S. A., Engineer Commissioner, D. C.*

# 762 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

## REPORT OF THE SUPERINTENDENT OF THE WATER DEPARTMENT.

WASHINGTON, D. C., August 20, 1895.

SIR: I have the honor to submit the following report upon the operations of the distribution branch of the water department for the fiscal year ended June 30, 1895.

The total length of water mains laid during the year is 142,902½ feet—2,733 feet of 3-inch, 5,442 feet of 4-inch, 100,379½ feet of 6-inch, 27,730½ feet of 12-inch, and 6,616½ feet of 24-inch. Of this amount 14,253½ feet of 6-inch water main was laid for the Columbia Railway Company, on account of the introduction of cable power, at a cost of \$10,054.14; of this amount \$4,554.14 was paid by the railway company and \$5,500 was charged against the annual appropriation for the water department. Fourteen thousand six hundred and fifty feet of 6-inch main was laid along the Ninth street line of the Metropolitan Railway Company on account of the change of motive power to the underground electric system, at a cost of \$19,560.25 for labor and material. Of the total cost of the work, \$5,722.16 was paid by the Metropolitan Railway Company and \$13,838.09 was charged against the annual appropriation for the water department.

Three thousand four hundred and five feet of 6-inch water mains were laid in the erection of fire hydrants; 1,072 feet of 6-inch and 1,300 feet of 12-inch water mains were lowered to the required depth. One hundred three-quarter-inch lead service pipes, 2,811 feet, and 122 1½-inch cast-iron service pipes, 4,554 feet, were laid from the mains to within 6 feet of the building line on streets to be improved with pavements of a permanent nature. Eight hundred and forty feet of service pipes were lowered and stopcocks and street washers adjusted to new grade, 35 stop-valve casings adjusted to new grade, 92 repairs made to stop valves, and 399 new stop valves were connected to water mains.

The following table shows the locations of water connections made at the expense of applicants:

| Location.  | Size.   | Length.    |
|--|---------|------------|
|  | Inches. | Lin. feet. |
| Fifteenth street, between I and K NW.....                        | 3       | 53         |
| Tenth street, between D and E SW.....                            | 3       | 41         |
| Fourteenth and Corcoran streets NW.....                          | 3       | 33         |
| Bennings road, between Fifteenth and Sixteenth streets NE.....   | 3       | 43         |
| Ninth street, near B SW.....                                     | 3       | 15         |
| Fourteenth street, between Columbia and Kennesaw avenues NW..... | 3       | 78         |
| Third and A streets NE.....                                      | 3       | 39         |
| Alley, between Fifteenth and Sixteenth, L and M streets NW.....  | 3       | 5          |
| Newark street and Tenley road.....                               | 4       | 15½        |
| Third and A streets SE.....                                      | 4       | 39         |
| Florida avenue, between Sixth and Seventh streets NW.....        | 4       | 81         |
| Delaware avenue and I streets NE.....                            | 4       | 55         |
| Bunker Hill road.....  | 4       | 39         |
| Total .....  | .....   | 536½       |

There are 1,688 fire hydrants in service; 190 fire hydrants were erected in new locations; 3 fire hydrants moved to new curb line; 4 fire hydrants moved from one location and erected in another; 5 old fire hydrants removed and new hydrants erected in their place; 781 repairs were made to fire hydrants. There are about 800

McClelland fire hydrants in service that are nearly worn out, and that require constant attention to keep them in condition for service. I would recommend that they be gradually replaced with new hydrants. There are 320 public hydrants in service; 27 new hydrants erected; 14 erected in place of old ones; 18 removed and abandoned; 2 moved to new curb line; 742 repairs were made to hydrants.

There are 67 drinking fountains for animals in the District; 5 new fountains were erected; 125 repairs made to fountains.

There are 171 public pumps and wells in the District; 13 new pumps were erected; 47 pumps removed and the wells filled and abandoned; 50 wells cleaned; 427 repairs made to pumps. Two wells were sunk to a depth of 146 feet and lined with 6-inch wrought-iron pipe and deep-well pumps erected; one on Brightwood avenue south of Military road, and one at Sixth and G streets SW. Samples of water from these wells have been analyzed by the chemists of the engineer and health departments and found exceptionally pure. I renew the recommendation made in my annual reports of 1889 and 1890, that the annual appropriation for the purchase of public pumps and care of wells be increased from \$4,000 to \$6,000, and that \$2,000 of the amount be used for sinking wells to a considerable depth by boring and lining them with wrought-iron tubing and erecting pumps adapted for deep-well service.

The following tables will show the locations of public pumps and locations of public wells filled and abandoned during the year:

*Location of public pumps.*

At no time since the 48-inch main was laid has the pressing need of an ample supply of pure, clear water for all legitimate purposes been felt more than during the past year. The gradual diminution of pressure in the gravity supply and distribution mains has been the cause of much complaint among those living upon the higher levels. In a considerable number of locations the level at which Potomac water was delivered in 1893 and 1894 has fallen considerably and, in some localities, below the second stories. The equalization process was resorted to in a number of cases, and by manipulation of stops the flow of water in the mains to the lower ground was somewhat retarded. Where great inconvenience existed all that could be was done to give temporary relief. The city and its environments are expanding rapidly; the population increasing; distribution system extending, not only within the city limits, but also to the suburban districts in northwest, northeast, and southeast portions, making the demand for an increased supply of water more imperative.

The present condition of the water supply renders it necessary that steps be taken to effectually repress the excessive waste, or a water famine and an unsanitary condition in some parts of the city can not be averted in the near future. From experience and observation, I am convinced that the careless waste of water can only be prevented by a systematic introduction of the meter system on all service pipes to premises where large quantities of water are consumed. Meters should also be placed on all supply pipes to public buildings in the District owned and leased by the United States, to determine the proportion of Potomac water actually consumed and wasted per diem. If this could be done, and stringent rules and regulations established by the heads of departments prohibiting the excessive use and careless waste of water, the enormous quantity now taken by the General Government would be materially reduced and a more equitable supply go to the consumers on the higher levels for some time to come.

I would urgently recommend that Congress at the next session be asked to make provision for the purchase and compulsory introduction of meters on service pipes to public and private buildings under such regulations as the Commissioners may deem necessary for economical use of water and suppression of waste. The meter system would undoubtedly reduce the present water rates in some places, but it is the only way economy in the use of water can be secured.

In making recommendation in favor of the compulsory use of meters, and in spite of extremely low meter rates (3 cents per 1,000 gallons) I am not unmindful that the community may not take to the meter system generously. I believe it is best for all concerned that the present limited supply of water should be used as sparingly as possible.

The Georgetown pumping station has not been in service since August, 1893. The engines and boilers are in good condition and are kept ready to relieve the Washington station in case of disablement to engines.

The Gaskill engines and boilers at U street station have been in almost continuous operation during the year. Occasionally at night the engines have been stopped a few hours only for repairs and necessary changes in the receiving and delivery mains on U street in front of the pump house. The engines have supplied the Washington and Georgetown middle high service areas since the discontinuance of the Georgetown station.

The water level in Georgetown reservoir has been kept standing in the early morning at 220 feet above datum—an increase of 2 feet above the maximum level carried during the time the Georgetown station supplied the reservoir. It has been impossible to maintain a uniform level of water in the reservoir during the day, owing to the rate of delivery through the present 12-inch supply main from the U street station being considerably less than the rate of consumption, leaving the area to be fed to some extent dependent on the storage of water in the reservoir at night.

The Gaskill engines have not been thoroughly overhauled in two years. At present they are much in need of repairs, but owing to several unavoidable delays in the completion of the new 5,000,000 plant at the U street station the engines can not be stopped for any length of time. The average daily pumpage at the U street station at the close of the fiscal year 1894 was 2,571,429 gallons; the average daily pumpage at the close of the last fiscal year was 3,313,386 gallons, an increase of 733,959 gallons. The average cost of pumpage for the middle high-service areas was 8½ cents per 1,000 gallons.

The Knowles pump erected in the engine room of the U street station in July, 1894, for supplying temporarily the Fort Reno high service until the completion of the new reservoir at that point has been in almost continuous operation delivering water into a tank at Fort Reno 320 feet above the pump, through the 12-inch delivery main 22,500 feet in length, laid in 1894, to supply the new reservoir. The average daily pumpage at Fort Reno at the close of the last fiscal year was 47,253 gallons. The line of 12-inch main from Fort Reno along the Chappell, Broad Branch, Rock Creek Ford, and Military roads to Brightwood avenue, and on Brightwood avenue from Flint to Aspen streets, which was nearly all laid in 1894, except two short sections at low points, was completed on the 30th of last June and charged with water from the Fort Reno main. The 6-inch mains on Flint, Ninth, and Des Moines streets in Brightwood Park connecting with the 12-inch on Brightwood avenue at Flint street were charged at the same time, making a total of 56,874.48 feet of 12 and 6 inch mains in the Fort Reno high-service area. The average pumpage to Fort Reno and Brightwood since the introduction of water in the Brightwood mains was 65,110 gallons. The new reservoir at Fort Reno of 4,200,000 gallons capacity will probably be completed and ready for storage of water November 1, present year.

The contract for the erection of the Nordberg pumping engine, 5,000,000 gallons capacity, and two water-tube boilers at the U street station specified that the plant should be completed and ready for duty trial November 5, 1894. During the month of October, 1894, a considerable portion of the machinery while in transit from Milwaukee to this city was thrown from a car and badly injured. The accident to the machinery caused a delay of several months and necessitated several extensions of the original contract. The new engine has been operated at intervals during the past six weeks for the purpose of adjusting the various parts, and will be in condition for the trial test during the present month.

The Nordberg engine was especially designed to supply the new reservoir at Fort Reno, an elevation of 320 feet above center of pumps, and also for the middle high-service areas. A 24-inch suction and delivery main was laid at the U street station in the spring and early part of the summer for the Nordberg engine and a second new engine, 8,000,000 gallons, the latter to take the place of the east Gaskill engine, 2,500,000 gallons capacity, in the near future. The suction and delivery mains referred to are arranged with connections and valves, so that the Nordberg engine can deliver to the Fort Reno reservoir or may be used for supplying the middle high service. The new mains in connection with the Fort Reno and middle-service system in front of the U street station were laid with great care, pipe, valves, and specials are firmly supported by piers of concrete and brick laid in hydraulic mortar to prevent the pipes from settling or leaking at joints.

A 24-inch delivery main for the middle high service was laid from the U street station along New Hampshire and Florida avenues to Thirteenth street extended, north on Thirteenth street extended to Whitney avenue, and connections made with 6-inch high-service mains and 12-inch mains at Sixteenth and U streets to Mount Pleasant, 12-inch main at Florida avenue and Thirteenth street extended to Brightwood avenue, Eckington, and Brookland, and with the 12-inch main on Whitney avenue at Thirteenth street extended. Since water was introduced in the 24-inch main in June, the pressures in the Washington middle-service area have increased considerably, and the delivery of water to the Georgetown reservoir through the present main has been somewhat more satisfactory. The extension of the 24-inch middle high-service delivery main from Whitney avenue and Thirteenth street extended to a point within or near the Soldiers' Home and the construction of a 15,000,000-gallon distribution and storage reservoir—elevation about 262 feet above datum—and the erection of a new pumping plant, 8,000,000 gallons capacity, at the U street station for the middle service, as contemplated during the present fiscal year, are urgently recommended for the reason that the middle high-service area is rapidly extending north and south of Florida avenue. A further extension of the middle

high-service area south of Florida avenue and east of Rock Creek as far as Eckington to levels of 80 feet above datum can not be averted during the present fiscal year. This extension will gradually increase the daily pumpage at the U street station beyond the capacity of present engines.

The displacement of one of the 2,500,000-gallon engines by one of 8,000,000 capacity can not be effected too soon to meet the present and future demand for a greater supply in the middle service. With the proposed increase in the pumping capacity the reservoir at Fort Reno and the reservoir to be located at or near the Soldiers' Home could be very nearly supplied at night from the U street station at a time when the supply of water for both reservoirs could be taken from the gravity mains without affecting to any extent the pressure during the day. The maximum quantity of water taken from the gravity mains during twenty-four hours is from 6 a. m. to 6 p. m., and with the present inadequate supply of water to do nearly all the pumping at night for both high service areas would assist materially in keeping the pressures up for some time in localities where they are rapidly growing less.

In the event of the examination and test of the tunnel connecting the receiving reservoir with the storage reservoir at Howard University demonstrating that the tunnel can be used to increase the water supply for the city, a 48-inch connection could be made with the Champlain avenue shaft and a 48-inch main laid in Champlain avenue, V, Seventeenth, and U streets to the U street pumping station capable of delivering all the water necessary for pumping engines for many years to come.

The 20-inch middle service delivery main recently authorized to be laid from the U street station to Georgetown and connections made with existing mains, when completed, will improve the water supply on the higher elevations that heretofore have not received a just proportion of water.

With the proposed middle service reservoir at Soldiers' Home, 265 feet above datum, water can be delivered to the Georgetown middle service to a height of about 40 feet above maximum level of water allowable in the old reservoir; the reservoir can then be dispensed with.

The laying of a 12-inch gravity main from Tenth and B streets south, south on Tenth to H street, east on H street to Four-and-a-half street, and connections made with 20-inch main at Tenth and B streets south, existing mains on H street and 12-inch main on Four-and-a-half street at H street, as contemplated, will equalize the pressure and greatly benefit that portion of the southwest section where considerable complaint has been made on account of a meager supply of water.

A 12-inch middle service main should be laid on Columbia avenue from the Quarry road to Florida avenue, and connections made with existing 12-inch main on Columbia avenue at Quarry road, 6-inch mains along Columbia avenue to Nineteenth street extended, and with the proposed 20-inch middle service delivery main for Georgetown at Florida and Columbia avenues, to reenforce the present mains on Washington Heights, and afford necessary protection in case of fire.

I renew my recommendation of 1894 for the extension of the 12-inch middle service main at First and Albany streets to Lincoln avenue by the way of First and T streets, and on Lincoln and Central avenues to Brookland, and connections with existing 6-inch mains at Lincoln avenue and T street, Central avenue and Fourth street extended, and in Brookland. The necessity for laying this main is much greater now than at that time for the reason that the 6-inch mains in Brookland have been largely extended within the past six months. Eckington and Brookland are now, as then, wholly dependent on one 6-inch main for water, and in case of fire serious loss of property may result from insufficient supply of water for fire purposes. The proposed extension of Albany street through Prospect Cemetery to Lincoln avenue may not be carried out for several years; I would therefore recommend, in the interest of public safety, that the main be laid as soon as practicable.

The lot recently purchased by the Commissioners on the north side of U street west of the pumping station, and the additional ground at the east line of the pump-house lot, leaving a space of 5 feet between the east line and the adjoining property, was a step in the right direction, the water department having been in pressing need of more ground at this station for the past five years.

Upon completion, the new building and stack proposed to be erected on present site, U street station, covering the entire lot, will be a model structure of its kind, and will include coal vault, storerooms, shops, and room for testing and storing water meters.

In conclusion, in submitting this report I beg leave to commend the fidelity and general efficiency of the employees of this office.

Respectfully submitted.

H. F. HAYDEN,  
*Superintendent, Water Department.*

Maj. CHARLES F. POWELL,  
*Corps of Engineers, U. S. A., Engineer Commissioner, D. C.*

## REPORT OF THE WATER REGISTRAR.

ENGINEER DEPARTMENT, WATER OFFICE,  
Washington, D. C., August 7, 1895.

SIR: I have the honor to submit the following report of the operations of the revenue and inspection division of the water department for the year ended June 30, 1895:

The following tables are submitted:

Table I.—Statement of the receipts of the water department from all sources, from July 1, 1878, to June 30, 1895, amounting to \$3,586,937.26.

Table II.—Statement of expenditures from July 1, 1878, to June 30, 1894, amounting to \$1,989,969.29.

Table III.—Statement of assessments and collections of water-main tax from June 30, 1878, to July 1, 1895. Total amount assessed, \$925,360.09; total amount collected, \$632,992.38.

Table IV.—Statement of advances to the Treasurer of the United States from 1880 to 1895, amounting to \$1,443,264.63.

Table V.—Number and size of houses in the District of Columbia supplied with Potomac water.

Table VI.—Number of miscellaneous water takers.

Table VII.—Kind, size, and number of water meters in use to June 30, 1895.

*Estimates for the revenue and inspection branch of the water department for fiscal year 1897.*

|  |          |
|--|----------|
| One water registrar.....   | \$1, 800 |
| Two clerks, at \$1,400 each.....   | 2, 800   |
| Two clerks, at \$1,000 each.....   | 2, 000   |
| One chief inspector, at \$1,000 (\$64 submitted).....  | 1, 000   |
| Ten inspectors, at \$900 (4 additional submitted).....   | 9, 000   |
| One messenger.....   | 600      |
| For contingent expenses, including books, blanks, stationery, forage, printing, advertising, and other necessary items and services..... | 2, 500   |

There are now 44,000 premises in the District of Columbia where Potomac water is used. Owing to the great area of ground to be covered in the inspection for leaks and waste of water, in the delivery of water bills and water-main assessment notices—the requirements of the law making the personal delivery of the latter obligatory where possible—the present force of inspectors is found to be inadequate for the performance of all the duties assigned it.

I therefore renew my recommendation for the appointment of four additional inspectors at a salary of \$900 each.

Very respectfully,

JNO. J. BEALL,  
Water Registrar.

Maj. CHAS. F. POWELL,  
Corps of Engineers, U. S. A., Engineer Commissioner.

TABLE I.—Statement of receipts of the water department, District of Columbia, from July 1, 1878, to June 30, 1895.

| Fiscal year.                          | Balance on hand July 1, 1878. | Mains to Government Printing Office. | Water-main tax. |             | Interest, water-main tax. |            | Water rents. | Taps.      | Permits and othersources. | Total receipts. |
|---------------------------------------|-------------------------------|--------------------------------------|-----------------|-------------|---------------------------|------------|--------------|------------|---------------------------|-----------------|
|                                       |                               |                                      | Advertised.     | Current.    | Advertised.               | Current.   |              |            |                           |                 |
| Balance on hand July 1, 1878.....     | \$16,809.42                   |                                      |                 |             |                           |            |              |            |                           | \$16,809.42     |

<sup>1</sup> This does not include \$12.50 which the United States Treasurer has credited to this year's receipts, but which does not appear on books of water department.

<sup>2</sup> December 10, 1880, there was collected \$10.75 on account of water-main tax (advertised), which sum was deposited to credit of "arrears of general taxes."

<sup>3</sup> July 29, 1890, there was collected \$2 on account of water rents, which sum was deposited to credit of general taxes August 13, 1890.

TABLE II.—Expenditures.

| Fiscal year.                                      | Purchase of pump-house lot and erection of stand-pipe. | Extra clerical services making new water-rent and numerical books. | High service. | Material and labor, pumping expenses, and pipe distribution. | Salaries water department. | Contingent expenses. | Water rent refunded. | Water-main tax refunded. | Interest on water-main tax refunded. | Purchase of new pumping engines and boilers. | Water main to Government Printing Office. | Total expenditures. |

## REPORT OF THE SUPERINTENDENT OF LAMPS.

WASHINGTON, D. C., *July 26, 1895.*

SIR: I have the honor to submit the following report of the operations of the street-lighting department for the fiscal year ended June 30, 1895:

## NAPHTHA LIGHTING.

On October 1, 1894, all the lamps in the District formerly lighted with kerosene oil were changed to naphtha. A contract was entered into with Messrs. Nicolai Brothers for this system of lighting, whereby the lamps were burned from forty minutes after sunset until forty minutes before sunrise every night for the remainder of the year, a total of 3,828 hours per annum. In making contracts for this style of lighting in the future no reduction should be made in this number of hours. In alleys where it is always dark, whether the moon is shining or not, naphtha lamps are of great benefit, since under the present circumstances they can be burned longer than gas and every night as well. An increase in the number of these lamps is most urgently desired. Many of the alleys in the city are without light. All the principal roads leading into Washington should be lighted, and on those roads where there are a few lights the lighting should be extended to the District line. Many of the suburbs have no lamps, notably Bennings, Langdon, Ivy City, and Twining City. All these places should be lighted. An addition of 650 naphtha lamps would no more than meet the present needs. This system of lighting is now very satisfactory and can be advantageously extended.

During the year all the lanterns inside the city limits formerly used for oil lighting were thoroughly cleaned and given two coats of white paint on the inside. These lanterns, 750 in number, should be replaced at as early a date as possible by new ones. They have been in use for many years, are worn out and loose at the joints, are wholly unadapted for naphtha lighting, and are unfit for gas lighting.

## GAS LIGHTING.

An important change should be made in the number of hours of gas lighting, beginning with the fiscal year 1897. The present schedule of 3,000 hours should be abandoned and the moon not be relied upon to furnish any portion of the light for the city. The number of hours of total darkness during the year, from the end of twilight in the evening to the beginning of twilight in the morning, is alone 3,116 hours. As all the lamps should burn at least one hour each night in addition, and as another hour each night is allowed the gas companies for lighting, making a total of 3,846 hours, an uncertain twilight and an unreliable moon are called upon to furnish approximately 850 hours of lighting, an average of 71 hours per month. It is a matter of the greatest difficulty to so use the moon that the 3,000 hours required by Congress will not be exceeded. Even on the brightest moonlight nights many of the streets are in absolute darkness, the dense heavy foliage of the trees completely overshadowing the streets. In the populous and dangerous alleys, too, where gas lamps are used and into which the moon only shines when about on the meridian, the darkness is intense. I would recommend that a uniform schedule of 3,828 hours per annum be adopted for all kinds of lighting—naphtha, gas, and electric.

In many of the suburbs improvements are going on rapidly, but there are not sufficient funds for establishing new lights. A few will be put up during the next fiscal year where they are absolutely needed, but in order to do so lights in other parts of the city will have to be discontinued. There are locations throughout the city and in the suburbs where fully 380 new gas lamps are absolutely needed.

During September and October, 1894, nightly tests were made of the consumption of gas in each lamp throughout a large portion of the city. Wherever burners were found using less than 6 cubic feet per hour the gas companies changed them upon notification.

In October, 1894, the Baltimore and Ohio Railroad Company substituted electric arc lamps for the gas and naphtha lamps along its tracks, thereby giving a better service, with no expense to the District.

One hundred and twenty old lanterns that were entirely worn out were replaced with new ones. A great many more lanterns, the majority of which have been in service for over ten years, should be replaced with new ones. It is not possible to make this substitution this next year, but in the estimates for the year 1897 an item to cover this expense is included.

## STREET DESIGNATIONS.

One hundred and five corners where designations had not before been placed have been equipped with street signs. Three hundred and forty painted glass street

signs, placed on lamps by the gas companies since July, 1894, have been replaced by these companies with blown glass ones similar to those furnished by the District. Forty painted glass signs put up a number of years ago by the District have also been replaced with blown glass ones. Forty-five signs on both First street east and First street west, which had been so made that it was almost impossible to tell whether they were intended for First street or I street, have been replaced with those of an approved pattern.

There are about 600 signs broken and missing annually, the greater part resulting from the insecure frames in use. These frames are of iron and so poorly designed that unless the glass is of a certain thickness it can not be put in or, being too thin, will not stay in. It would be a great saving and insure a better service if these frames were replaced with new copper ones properly designed to retain the glass, even if broken. All new corners are being equipped with such frames.

On Pennsylvania avenue NW., from Third to Twenty-first streets, a new pattern of enameled designations has been placed on most of the corners. These signs are similar in design to those in use in Paris. They have been placed, where possible, on a level with the second-story windows of the buildings. One hundred have been put up as an experiment, but the prevailing opinion seems to be that they are placed too high and are indistinct. They are of such size, however, that they could not well be placed lower. It is possible to use such signs on the buildings only on the line of the electric lights and where there is no parking.

#### ELECTRIC LIGHTING.

The only changes in the electric-lighting service has been the addition of seven arc lamps on H street NW., between North Capitol and First streets along the line of the Columbia Cable Railroad, and one on the north side of Washington Circle. Three lights discontinued in May, 1894, for want of funds were relighted in July, 1894. The addition of arc lights along the line of the above-mentioned railroad from Fourteenth street and New York avenue NW. to H and Fifteenth streets NE. is most urgently needed. The line of the Metropolitan Electric Railway from Four-and-a-half and P streets SW. to Ninth street and Florida avenue NW. should also be lighted by arc lamps. This road will be in full operation by August 1, 1895, and will be a rapid-transit line and therefore dangerous. The east and west lines of the same company, which Congress has ordered changed to underground electric, will be in full operation when the next appropriation is made and available for street lighting, and provision should be made for establishing arc lamps on those lines also.

Arc lamps should be placed on Eighth street SE. from Pennsylvania avenue to the Navy-Yard, and on First street NW. from the Peace Monument to the Baltimore and Ohio Railroad depot. Cable lines run on these streets and it is absolutely necessary that they should be lighted better than at present.

During the months of March, April, May, and June, 1895, nightly tests with photometer and voltmeter were made of the candlepower and voltage of about one-half of the arc lamps. These tests were made in the street while the lamps were in use, and showed, in all but a few instances, that they were up to the requirements of the appropriation act. Simultaneous readings were made of the volts across the arc, and of the candlepower as indicated by the photometer, the readings being taken on each lamp. The record of the current was obtained from a recording ampere meter placed in the circuit under test at the electric-light station. Comparative readings of the candlepower and wattage were thus obtained, but these varied greatly in themselves, and although satisfactory as far as they went, are not to be recommended in making regular tests. As readings were desired without the globes, which in many cases are of ground glass and porcelain, the arc was exposed to the action of the slightest breeze and steady readings for any length of time rendered impossible.

The recording ampere meter mentioned above has proved very satisfactory, and in every circuit in which it has been placed has shown that the current for that night was maintained constant. It would be desirable to have one such meter for every circuit. The electric-lighting service has been well maintained throughout the year, with very few interruptions, and those of but short duration.

#### INTENDED OPERATIONS FOR THE FISCAL YEAR 1896.

Bids were opened June 3, 1895, for street lighting for 1896. The rate for gas lamps, \$20.50 per annum, remains as heretofore, the propositions submitted by the Washington and the Georgetown gas companies being not accepted. The lowest bidder for naphtha lighting was the Pennsylvania Globe Gas Light Company, of Philadelphia, their bid being \$20.25 per lamp per annum. The increase in the price of naphtha lighting from \$17 to \$20.25 and the necessity of increasing the number of such lamps to 1,000, as called for in the specifications of the contract, will materially affect the extension of the street-lighting service.

It is intended to discontinue 24 gas lamps on the north side of Pennsylvania avenue, between Second and Eleventh streets SE., and 1 on Eleventh street, near Pennsylvania avenue. There are 13 electric lights on the south side of the avenue, between the streets named, which are sufficient to light that avenue. To make up the 1,000 naphtha lamps, there being but 868 under the former contract, it will be necessary to change at least 132 gas lamps to naphtha. These lamps will be taken from Bladensburg road, from the outlying sections of the city, and from the alleys. To meet the pressing demand for lights in new localities, every other naphtha lamp on Bennings road will be discontinued and erected elsewhere as needed. Discontinuing the above-mentioned gas lamps on Pennsylvania avenue will enable the department to erect new gas lamps in a few sections where improvements are going on rapidly and lights are necessary.

Beyond this readjustment of the lighting service, no material changes can be made this fiscal year. With the appropriation for gas and naphtha the same as for the year 1895, and with the increase of \$3.25 per lamp for 1,000 naphtha lamps, there will be just sufficient funds to maintain the present service.

There is great need of a clerk in this office who at the same time shall be an assistant to the superintendent. Whenever it is necessary for the latter to have the assistance of some one during the day—and such occasions arise daily—he is compelled to call upon one of the inspectors, taking him from his regular nightly inspection. Another one of the inspectors devotes from three to four hours a day in the office, making out the daily reports and doing other clerical work which the superintendent has not time for. No regular systematic inspection can be carried on with such interruptions. There are but three inspectors provided for by Congress, one of whom gives his entire time to the naphtha lamps, leaving two men to cover the entire District. Out of the appropriation for electric lighting sufficient money is set aside to pay one inspector, whose duties are divided between the electric lights and clerical work. At least one additional inspector should be allowed. A great deal more work could be accomplished and the records of the office kept as they should be were these two additional men provided for.

It is also to be earnestly hoped that the Commissioners will continue to urge upon Congress the necessity of increasing the salary of the superintendent of lamps. This position is one of great responsibility and one that demands his time both day and night, Sundays and holidays. He must not only look after the general business of the department and perform the greater part of the clerical work, but also must be occupied with all the minor details. It seems no more than just that the increase asked for should be granted.

The following table shows the number of lamps of all kinds in use on the 1st day of July, 1895, as compared with the 1st day of July, 1894:

|   | 1894.  | 1895.  |
|---|--------|--------|
| Gas .....                                     | 6, 246 | 6, 188 |
| Oil (changed October, 1894, to naphtha) ..... | 747    | 868    |
| Electric.....                                 | 327    | 338    |
| Total.....                                    | 7, 320 | 7, 394 |

Total increase during the year, 74.

The changes have been as follows:

|                             | Added. | Discontinued. |
|-----------------------------|--------|---------------|
| Gas lamps .....             | 21     | 79            |
| Naphtha lamps .....         | 139    | 18            |
| Electric (3 relighted)..... | 11     | .....         |
| Total.....                  | 171    | 97            |

Total increase during the year, 74.

Number of gas lamps erected, 70; number of these lighted, 14; number of posts removed and reerected, 63; number of posts disconnected and taken down, 39; number broken down by runaways and reerected, 13; number of electric lights moved, 1.

WALTER C. ALLEN,  
*Superintendent of Lamps.*

Maj. CHAS. F. POWELL,  
*Engineer Commissioner, District of Columbia.*

## REPORT OF THE INSPECTOR OF GAS AND METERS.

## GAS SUPPLY.

The illuminating power of the gas supplied by the Washington Gas Light Company during the year ended June 23, 1895, was, by average of the photometric tests made at the old Post Building, Southeast, and Northwest laboratories, found to equal 19.63 standard candles.

This is an increase of 1.61 candles over the average obtained during the year ended June 23, 1894. The highest candle-power was found at the Southeast laboratory, corner Fifth and D streets. The average illuminating power of the gas tested at that station was 20.43 candles, which is an increase of 1.33 candles over the average candle-power obtained at the old Post Building laboratory and 1.05 candles over the average found at the Northwest laboratory.

No defaults occurred in the illuminating power and purity standards. The impurity known as sulphureted hydrogen has been present on many occasions during the past year in the gas supplied by the Washington Gas Light Company, inspected at the laboratory 1335 Fourteenth street NW. and old Post Building laboratory, corner Tenth and D streets NW., and on several occasions this impurity has been found in the gas tested at the laboratory Fifth and D streets SE.

Sulphureted hydrogen should not exist in purified gas supplied to consumers, it being the most offensive and deleterious of all the sulphur compounds found in illuminating gas. The recommendation made in the last annual report of this office that this impurity be included with the other impurities under supervision, as provided for in section 2 of an act regulating gas works approved June 23, 1874, is again renewed.

The illuminating power of the gas supplied by the Georgetown Gas Light Company during the year ended June 23, 1895, averaged 16.97 standard candles. This is practically the same candle-power found during the previous year. Six defaults in the illuminating power occurred, but they were slight deviations from the standard; only in one instance did the default amount to 0.53 of one candle. This loss of light in a flame consuming 5 cubic feet per hour would hardly be noticeable.

On eight occasions the quantity of ammonia found in this company's gas exceeded the 5 grains allowed. The large quantity of this impurity present, from the 6th to the 15th of May, was owing to the fact that the scrubbers, an apparatus used for washing gas, had to be dismantled for repairs, and as soon as the scrubbers were again in working order the ammonia was brought within the limits allowed. These deviations were unavoidable.

The unusually large number of defaults of excess of sulphur found in the gas supplied by this company during the past year, namely, twenty-nine, was, I think, owing to the purifying apparatus "used in freeing gas, to a limited extent, of the sulphur compounds contained therein" not being of sufficient capacity for efficiently performing the work required, or it was owing to the use of coal containing an unusually large quantity of sulphur. The latter cause, I know, did exist last spring, and I have no doubt that the defaults which have occurred recently may be attributable to the same cause.

As it is essential that the standard of purity established by law for illuminating gas manufactured in this District be complied with, I would suggest that the Georgetown Gas Light Company be required, at as early a day as practicable, to either provide a coal for manufacturing gas which their purifying apparatus will remove the sulphur from within the limits prescribed, or enlarge the purifying capacity of their plant so as to be able to furnish gas under all ordinary conditions and circumstances that will in every respect be in conformity with the requirements of the act of Congress regulating gas works in the District of Columbia.

## INSPECTION AND PROVING OF METERS.

Two thousand seven hundred and thirteen meters were inspected and proved by this office from June 24, 1894, to June 23, 1895. With the exception of six meters inspected and proved for the Alexandria Gas Works, the above number was inspected and proved for the Washington and Georgetown Gas Light companies and for consumers of gas in Washington and Georgetown. The results of inspection were as follows:

Two hundred and forty-nine registered fast; average error, 4.20 per cent. Sixty-one registered slow; average error, 4.63 per cent. Two thousand three hundred and ninety-four registered within the limits allowed by law, namely, 2 per cent either way, and three did not register the gas flowing through them. Five hundred and ninety-one of the above-described meters were ordered out and inspected and proved on complaint. Five hundred and eighty were complained of by consumers of gas,

they believing them to be wrong. Of this number two hundred and thirty-eight registered fast against the consumer; average error, 4.43 per cent. Fifty-nine registered slow against the companies; average error, 4.96 per cent. Two hundred and eighty registered within the limits allowed by law, and three did not register the gas flowing through them. Eleven meters were complained of by the gas companies. Of this number three registered fast; average error, 4.10 per cent. One registered slow, 4.33 per cent; and seven registered within the limits allowed.

#### FEEES COLLECTED FOR METER INSPECTIONS.

The sum of \$882.80 was collected for meters inspected from June 24, 1894, to June 23, 1895, and paid to the collector of the District of Columbia, to be placed to the credit of the United States and District of Columbia in equal parts.

I respectfully renew the recommendation made in previous annual report, that a penalty clause should be added to the provisions of the act of March 3, 1893, entitled "An act making appropriations for the expenses of the government of the District of Columbia for the fiscal year ending June thirtieth, eighteen hundred and ninety-four, and for other purposes," in so far as the said act applies to the placing in service of meters from which the heads shall have been removed by any gas company in the District of Columbia for the purpose of examining and repairing the same, and no gas meter from which the head shall have been removed shall be again placed in service by any gas company in the District of Columbia without having been duly inspected, proved, and sealed, as provided for in the said act.

Several cases have been reported to this office by consumers of gas where meters of the kind referred to in the act of Congress just cited were placed in service by the Washington Gas Light Company without having been inspected, proved, and sealed by this office, as required by law. In each instance the company was promptly notified by the inspector and request made that the unbadged meter be removed and that a meter which had been inspected, proved, and sealed be put in service, which demand was complied with in each case.

I would further recommend that the Washington Gas Light Company be required to send to this office all meters that they remove from consumers' premises, for the purpose of test, to ascertain whether the meter is registering too slow. There is quite a large number of meters removed for this object, and the inspector's office is the proper place where the meter should be brought for inspection, to determine the accuracy with which it registers gas, and not the company's shops, as is the custom at present.

The recommendations made in the annual report of this office for the year ended June 30, 1894, that a suitable person be appointed to perform clerical services and assist generally in the work required to be performed in the laboratories and that the salary of the messenger be increased from \$480 to \$600 per annum are again renewed.

S. CALVERT FORD,  
*Inspector of Gas and Meters.*

To the COMMISSIONERS OF THE DISTRICT OF COLUMBIA.

#### ILLUMINATING POWER AND PURITY.

*Photometric and purity tests of gas furnished by the Washington Gas Light Company, in the old Post Building laboratory.*

Illuminating power during the year:

|               |           |       |
|---------------|-----------|-------|
| Average ..... | candles.. | 19.10 |
| Highest ..... | do....    | 21.81 |
| Lowest .....  | do....    | 16.38 |

December 5, 1894, the highest illuminating power was found.

April 12, 1895, the lowest illuminating power was found.

Ammonia in each 100 cubic feet:

|               |          |      |
|---------------|----------|------|
| Average ..... | grains.. | 1.21 |
| Highest ..... | do....   | 4.42 |
| Lowest .....  | do....   | .11  |

July 28, 1894, the highest quantity of ammonia was found.

February 25 and 27, 1895, the lowest quantity of ammonia was found.

Sulphur in each 100 cubic feet:

|               |          |       |
|---------------|----------|-------|
| Average ..... | grains.. | 5.31  |
| Highest ..... | do....   | 11.81 |
| Lowest .....  | do....   | 2.56  |

August 18, 1894, the highest quantity of sulphur was found.

December 3, 1894, the lowest quantity of sulphur was found.

# 780 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

*Photometric and purity tests of gas furnished by the Washington Gas Light Company, in the laboratory corner Fifth and D streets SE.*

Illuminating power during the year:

|              |           |       |
|--------------|-----------|-------|
| Average..... | candles.. | 20.43 |
| Highest..... | do.....   | 23.80 |
| Lowest.....  | do.....   | 17.20 |

December 26, 1894, the highest illuminating power was found.

April 12, 1895, the lowest illuminating power was found.

Ammonia in each 100 cubic feet:

|              |          |      |
|--------------|----------|------|
| Average..... | grains.. | 1.10 |
| Highest..... | do.....  | 2.55 |
| Lowest.....  | do.....  | .34  |

September 11, 1894, the highest quantity of ammonia was found.

February 7, 1895, the lowest quantity of ammonia was found.

Sulphur in each 100 cubic feet:

|              |          |      |
|--------------|----------|------|
| Average..... | grains.. | 4.85 |
| Highest..... | do.....  | 8.51 |
| Lowest.....  | do.....  | 1.78 |

July 19, 1894, the highest quantity of sulphur was found.

June 11, 1895, the lowest quantity of sulphur was found.

*Photometric tests of gas furnished by the Washington Gas Light Company, in the Northwest laboratory, 1335 Fourteenth street NW.*

Illuminating power during the year:

|              |           |       |
|--------------|-----------|-------|
| Average..... | candles.. | 19.38 |
| Highest..... | do.....   | 21.93 |
| Lowest.....  | do.....   | 16.23 |

December 29, 1894, the highest illuminating power was found.

June 25, 1894, the lowest illuminating power was found.

## RECAPITULATION.

At three laboratories:

|   |           |       |
|---|-----------|-------|
| Average mean illuminating power.....    | candles.. | 19.63 |
| Average maximum illuminating power..... | do.....   | 22.51 |
| Average minimum illuminating power..... | do.....   | 16.60 |

At two laboratories:

|  |          |       |
|--|----------|-------|
| Average mean quantity of ammonia.....    | grains.. | 1.15  |
| Average maximum quantity of ammonia..... | do.....  | 3.48  |
| Average minimum quantity of ammonia..... | do.....  | .22   |
| Average mean quantity of sulphur.....    | do.....  | 5.08  |
| Average maximum quantity of sulphur..... | do.....  | 10.16 |
| Average minimum quantity of sulphur..... | do.....  | 2.17  |

*Illuminating power and purity of gas supplied by the Georgetown Gas Light Company, in laboratory, 1338 Thirty-second street NW.*

Illuminating power during the year:

|              |           |       |
|--------------|-----------|-------|
| Average..... | candles.. | 16.97 |
| Highest..... | do.....   | 20.43 |
| Lowest.....  | do.....   | 15.47 |

April 29, 1895, the highest illuminating power was found.

October 13, 1894, the lowest illuminating power was found.

Ammonia in each 100 cubic feet:

|              |          |       |
|--------------|----------|-------|
| Average..... | grains.. | 2.97  |
| Highest..... | do.....  | 30.48 |
| Lowest.....  | do.....  | .96   |

May 8, 1895, the highest quantity of ammonia was found.

December 7, 1894, the lowest quantity of ammonia was found.

Sulphur in each 100 cubic feet:

|              |          |       |
|--------------|----------|-------|
| Average..... | grains.. | 18.47 |
| Highest..... | do.....  | 31.50 |
| Lowest.....  | do.....  | 12.36 |

April 10, 1895, the highest quantity of sulphur was found.

October, 8, 1894, the lowest quantity of sulphur was found.

## DEFAULTS IN ILLUMINATING POWER AND PURITY.

On six occasions the illuminating power of the gas furnished by the Georgetown Gas Light Company was found to be less than sixteen candles. On eight occasions the quantity of ammonia found exceeded the 5 grains allowed. On twenty-nine occasions the quantity of sulphur found exceeded the 20 grains allowed.

## SPECIFIC GRAVITY.

The specific gravity of the gas furnished by the Washington Gas Light Company was as follows:

Average at three laboratories:

|               |       |
|---------------|-------|
| Mean .....    | 0.625 |
| Maximum ..... | .637  |
| Minimum ..... | .611  |

The specific gravity of the gas furnished by the Georgetown Gas Light Company was as follows:

|               |       |
|---------------|-------|
| Mean .....    | 0.447 |
| Highest ..... | .492  |
| Lowest .....  | .432  |

## PRESSURE OF THE GAS.

The pressure of the gas supplied by the Washington Gas Light Company, as recorded in the old Post Building, Southeast, and Northwest laboratories, was as follows:

|               |          |      |
|---------------|----------|------|
| Mean .....    | inches.. | 1.79 |
| Maximum ..... | do....   | 2.61 |
| Minimum ..... | do....   | 1.18 |

The pressure of the gas supplied by the Georgetown Gas Light Company, as recorded in laboratory No. 1338 Thirty-second street NW., was as follows:

|               |          |      |
|---------------|----------|------|
| Mean .....    | inches.. | 1.64 |
| Maximum ..... | do....   | 2.83 |
| Minimum ..... | do....   | .95  |

*Report of the illuminating power and purity of the gas supplied by the Washington Gas Light Company from June 24, 1894, to June 23, 1895.*

[As determined in the old Post Building laboratory, Tenth and D streets NW.]

[Each observation consists of twenty readings on the Bunsen photometer, at intervals of one minute.]

AVERAGE FOR THE YEAR.

|  |          |       |
|--|----------|-------|
| Illuminating power, in sperm candles:  |          |       |
| Mean of 301 observations.....          |          | 16.97 |
| Highest (April 29, 1895).....          |          | 20.43 |
| Lowest (October 13, 1894).....         |          | 15.47 |
| Quantity of ammonia in 100 cubic feet: |          |       |
| Mean.....                              | grains.. | 2.97  |
| Highest (May 8, 1895).....             | do....   | 30.48 |
| Lowest (December 7, 1894).....         | do....   | .96   |
| Quantity of sulphur in 100 cubic feet: |          |       |
| Mean.....                              | do....   | 18.47 |
| Highest (April 10, 1895).....          | do....   | 31.50 |
| Lowest (October 8, 1894).....          | do....   | 12.36 |

On six occasions the illuminating power of the gas was less than 16 candles..

On eight occasions the quantity of ammonia was in excess of the 5 grains allowed.

On twenty-nine occasions the quantity of sulphur found exceeded the 20 grains allowed.

Report showing the pressure of the gas supplied by the Washington Gas Light Company, as registered in this office, old Post Building, corner Tenth and D streets, from July 1, 1894, to June 30, 1895.

<sup>1</sup> Average. <sup>2</sup> Consumers' complaint.

Two thousand four hundred and eighty-five meters were inspected and proved for the Washington Gas Light Company and for consumers of gas in Washington. Of this number 216 registered fast, average error, 4.09 per cent; 56 registered slow, average error, 4.41 per cent; 2,210 registered within the limits allowed by law, namely, 2 per cent either way, and 3 meters did not register the gas flowing through them. Six meters were tested for the Alexandria Gas Works.

## DIVISION OF SEWERS AND PLUMBING.

*Supervision of sewers, examination of plans for plumbing and inspection of plumbing work, supervision of permit office, inspection of engineering materials and care of engineering property.*

Capt. LANSING H. BEACH,  
*Corps of Engineers, United States Army, Assistant to Engineer Commissioner, in charge.*

D. E. McCOMB,  
*Superintendent of Sewers.*  
H. M. WOODWARD,  
*Permit Clerk.*

CHARLES B. BALL,  
*Inspector of Plumbing.*  
L. T. BOISEAU,  
*Superintendent of Property.*

### REPORT OF ASSISTANT IN CHARGE.

WASHINGTON, D. C., *July 31, 1895.*

MAJOR: I have to submit the following report of the operations of the different departments of the division of sewers and plumbing during the fiscal year ended June 30, 1895:

#### SEWER DEPARTMENT.

The accompanying report of Mr. McComb, with its tables, gives an itemized statement of what was accomplished in this department during the past year, but to permit comparisons in cost between present and future work, as well as to enable persons not already familiar with sewer construction in the District of Columbia to understand the work done, it has been considered advisable to give here a description of the engineering features involved, the methods in use, with the reasons therefor, and the system of property and material accountability.

The portion of the city of Washington west of North Capitol and South Capitol streets varies in altitude from about 5 or 6 feet to a little over 120 feet above tide, sloping abruptly to Rock Creek on the west and gently toward the Potomac on the south; east of the Capitol is a plateau about 75 feet above tide sloping gently in all directions. Contours of 20 feet interval are shown on the accompanying map. Outside of the city the ground rises toward the north and west, reaching altitudes of 300 and 400 feet.

The soil in which sewers are laid varies greatly, from solid rock and disintegrated granitic rock on the west through the compacted gravel and hard clay of the heart of the city to the loose earth of filled up streets and the soft mud of the river front, most of the work being in the gravel and clay.

All sewer work exceeding \$1,000 in cost is required by law to be done by contract after advertisement. The effect of this is practically to cause all large brick or concrete sewers and the longer lines of pipe sewers to be built by contract, leaving only the shorter lines of pipe sewers to be constructed by hired labor. The contractor is required to use the cement, vitrified brick, invert blocks and pipe furnished by the District; other material he provides himself, subject to the Dis-

strict specifications for quality. On the smaller sewers the contract price is usually for the linear foot of completed sewer; on the largest sewers the contract is generally by the cubic yard of material in the sewer. All contractors are required to make eight hours a labor day. Inspectors are paid \$4 per day, the amount paid them being included in the cost of the sewer upon which they are engaged.

In all work done by hired labor the day is of eight hours, ordinarily from 7 a. m. to 12 m., and from 1 p. m. to 4 p. m., but in late fall and early spring, work begins at 7.30 a. m., with half-hour intermission at noon time. The wages paid are all by the day and are as follows: Foreman, \$4; laborers, first class, \$1.75; second class, \$1.50; masons and bricklayers, \$4; watchman, \$1.50; water boys, 50 cents; two-horse wagon, with driver, \$3.50; one-horse cart, with driver, \$1.75. The foreman is responsible for all tools belonging to the District used by his party, and for all material issued for use in construction of the sewer, and that all work is properly performed. The first-class laborers are generally those engaged at the bottom of the trench, where the throw is hardest, and in mixing and handling concrete.

The materials used in all sewers built by hired labor are purchased by the District in large quantities by contract and stored in the District property yards. The yards are five in number, adjacent to the railroads or water front, and each contains the material which can be placed in it with the least haul from the point of unloading, as a rule such hauls being less than 500 feet. The prices paid during the past year were as follows: Concrete sand, per cubic yard, 47 cents; screened sand for brickwork, per cubic yard, 69 cents; gravel, per cubic yard, 75 cents; sewer pipe, per foot, 6-inch,  $4\frac{1}{2}$  cents; 8-inch,  $6\frac{3}{4}$  cents; 10-inch, 10 cents; 12-inch,  $11\frac{1}{4}$  cents; 15-inch,  $18\frac{1}{2}$  cents; 18-inch,  $26\frac{1}{2}$  cents; 21-inch, 40 cents, and 24-inch, 49 cents; Y-branches, each, 30 cents, 41 cents, 46 cents, 75 cents, \$1.13, \$1.63, and \$2.08, respectively; invert block, per linear foot, 40 cents; vitrified sewer brick, per M, \$16.50; hard arch brick, per M, \$6; natural cement, per barrel, in sacks, 79 cents; in barrels, \$1; Portland cement, per barrel, in barrels, \$2.12.

Under these prices for material and labor the cost of the different size sewers per linear foot was, during the past year, as follows:

By hired labor, 8-inch pipe, \$1.18; 10-inch pipe, \$1.09; 12-inch pipe, \$1.25; 15-inch pipe, \$1.64; 18-inch pipe, \$1.86; 21-inch pipe, \$2.07; 24-inch pipe, \$2.81; 24-inch concrete, \$3.19; 2 by 3 feet, egg-shaped, \$5.27.

By contract, 15-inch pipe, \$1.76; 18-inch pipe, \$1.97; 21-inch pipe, \$2.19; 24-inch pipe, \$2.60; 2 by 3 feet, egg-shaped, \$4.68; 2.25 by 3.375 feet, egg-shaped, \$5.53; 2.5 by 3.75 feet, egg-shaped, \$5.92; 2.75 by 4.125 feet, egg-shaped, \$7.42; 3 by 4.5 feet, egg-shaped, \$6.46; 3.25 by 4.875 feet, egg-shaped, \$6.81; 4-foot, circular, \$6.77.

Catch basins, including connections, by hired labor, averaged in cost \$53.83.

The sand used is of exceptional quality, being a nearly pure silica, of sharp, regular grain, obtained by dredging in the Potomac, and is delivered in a condition that would be termed "washed" in most localities; two sizes are used, the coarser for concrete and the finer for brickwork.

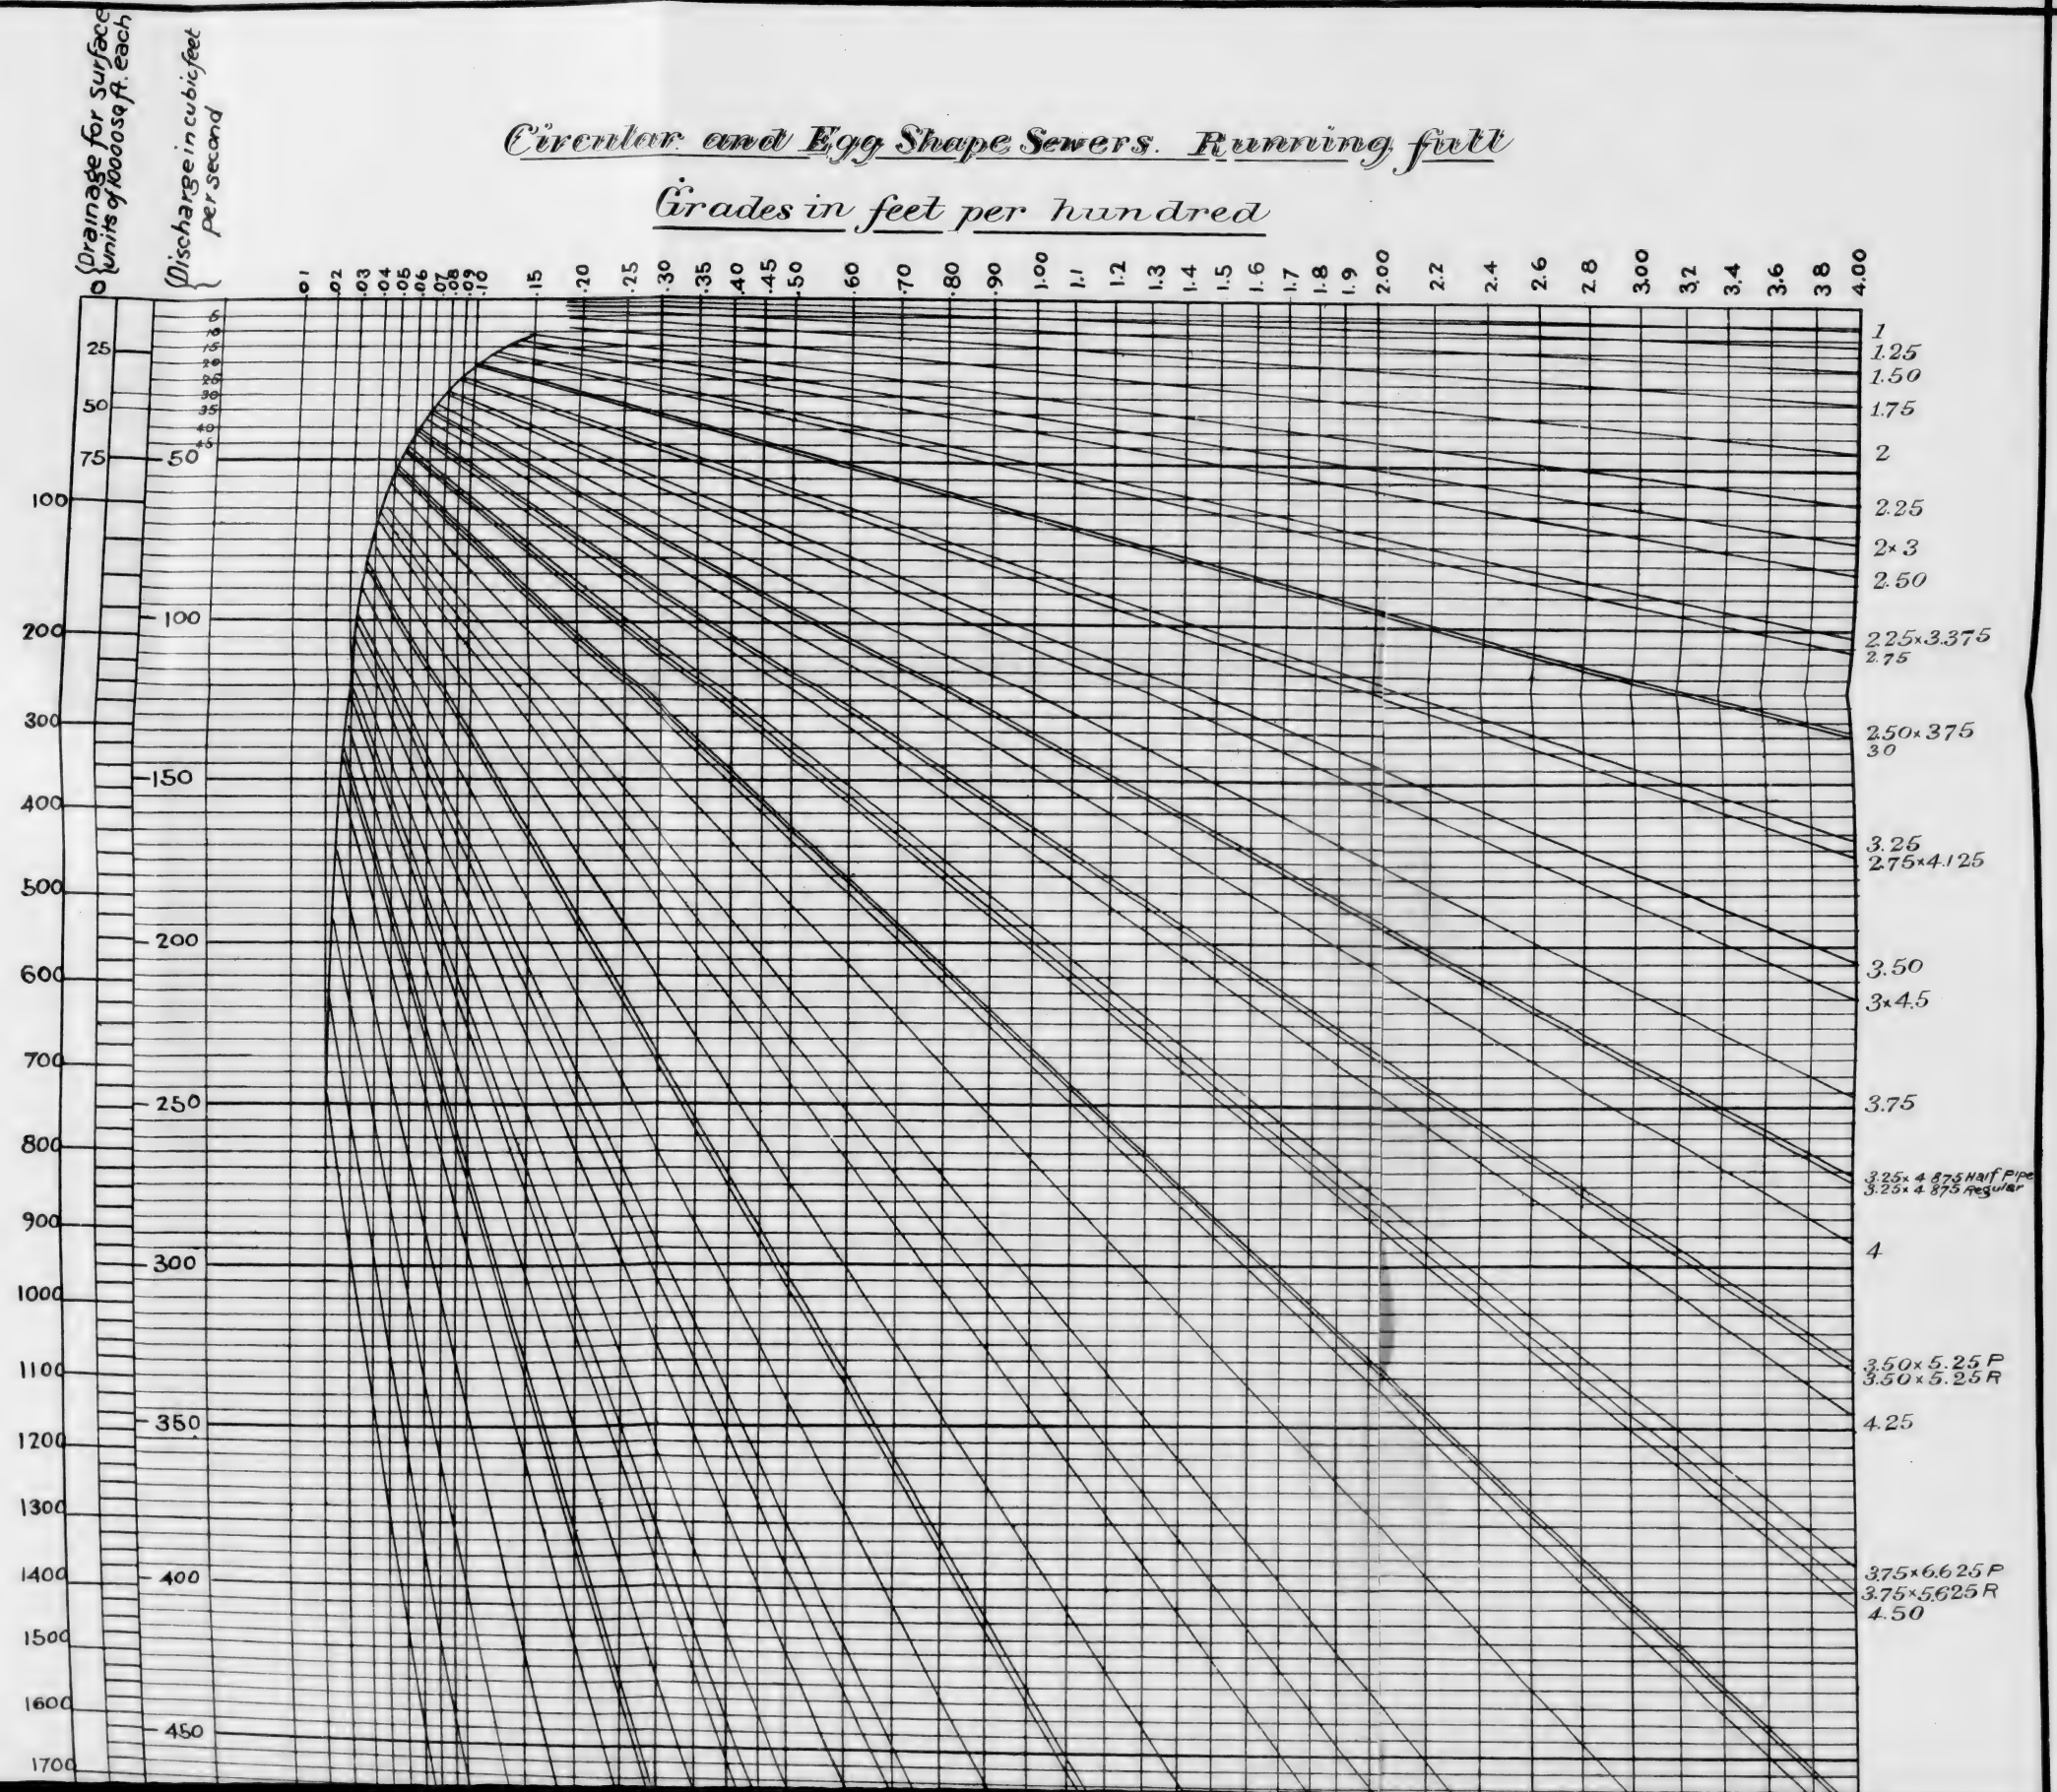

The gravel is used for concrete. Broken stone, at \$1.50 per cubic yard, was formerly used for this purpose, but the saving in purchase price by using gravel, as well as other advantages following its use, which are stated in describing the construction of sewers, have caused it to be employed exclusively in the department. All pipe larger than

# *Circular and Egg Shape Sewers. Running full*

*Grades in feet per hundred*

Formula

$$V = \frac{(180.99 S^{\frac{3}{2}} + .002807 S^{\frac{1}{2}}) 34}{.54158 S + .00003649 + SR^{\frac{1}{2}}}$$

Engr. Dept. D. C.

8-inch is of the ring pattern, that is, without bell ends. It is found that the bottom of the sewer, with this pipe, can be made much more even and free from projections due to irregularities of circumference. The timber used for braces and shoring is Virginia pine, costing \$13.50 per 1,000 feet, and can be ordinarily used about eight or ten times.

Plans for sewers are prepared in the office of the superintendent of sewers. The sewers in the city being upon the combined system, the quantity of rain water which any one will have to carry controls its size and gradient, and to determine this quantity the empirical rule has been adopted, that one draining an area of 10 acres or less must be capable of carrying an amount equal to 3 inches per hour reaching the sewer. For areas of 60 acres or over the formula  $Q=5.29375 A^{\frac{3}{4}}$  is used, in which  $Q$  is the number of cubic feet per second to be carried by the sewer and  $A$  is the area in acres; this corresponds to an amount of 2 inches per hour reaching the sewer; for areas between 10 acres and 60 acres the quantity of discharge is assumed to vary proportionally to the area.

For determining the grade and size of sewer, the formula

$$V = \frac{(180.99 S^{\frac{3}{2}} + .002907 S^{\frac{5}{2}}) R}{.54158 S + .00003649 + S R^{\frac{1}{2}}},$$

is used, which is practically Kutter's formula with  $n = .013$ . A graphical table was prepared some years ago showing the relation between grade and size of sewer and velocity and quantity of flow and published in the annual report of 1890, and is again inserted. In this table the abscissas vary according to the law of square roots, with the result that the line representing each size of pipe is a straight line, with corresponding greater accuracy of position and intersection of coordinates than would be the case were the abscissas to vary according to the natural numbers and the size of pipe be represented by a curve constructed by points. The table also shows the drainage area furnishing the quantity of water carried by the sewer in units of 10,000 square feet.

The plan for the sewer, including such drawings as may be necessary and an estimate of its cost, is then forwarded to the officer in charge for his approval, and is by him sent to the Engineer Commissioner of the District; if approved by him and ordered by the Board of Commissioners, the papers are returned through the same channel to the superintendent of sewers, who assigns the work to one of the assistant engineers, who locates the line upon the ground, giving stations every 50 feet, with the depth of excavation to the bottom of the interior of the sewer at each.

For pipe sewers a table giving the quantity of material per 100 feet for each size has been made, and is as follows:

*Materials required for concrete for laying 100 linear feet of pipe sewer.*

| Proportions, 1: 2: 4.         | 24 inches<br>dia. | 21 inches<br>dia. | 18 inches<br>dia. | 15 inches<br>dia. | 12 inches<br>dia. | 10 inches<br>dia. | 8 inches<br>dia. |
|-------------------------------|-------------------|-------------------|-------------------|-------------------|-------------------|-------------------|------------------|
| Cement, unit = barrel .....   | 19.14             | 17.16             | 14.77             | 12.79             | 10.58             | 9.14              | 6.76             |
| Sand, unit = cubic yard ..... | 5.85              | 5.25              | 4.52              | 3.92              | 3.23              | 2.79              | 2.07             |
| Pebbles, unit = cubic yard .. | 11.70             | 10.49             | 9.04              | 7.83              | 6.47              | 5.59              | 4.16             |

NOTE.—Pebbles and sand increased 10 per cent for waste.

A requisition upon the superintendent of property for the estimated amount of material necessary for the sewer, naming the locality of the work and appropriation to which chargeable, is then made out by the

assistant engineer and after being approved by the superintendent of sewers is sent to the accounting clerk of the engineer department, who is entirely independent of the division of sewers and plumbing; this clerk verifies the fact of the work having been ordered by the Commissioners and enters the items with their money value upon his books and notes these facts upon the paper. It then goes to the officer in charge for his approval and after that to the superintendent of property. He enters the requisition upon his books and draws an order for the material upon the property yard which has the articles or that one which gives the shortest haul and gives the order to the foreman in charge of the work, who presents it at the yard upon which it is drawn. The hauling is done by the carts engaged upon each job and at such times as will be to the advantage of the work and not cause obstructions in the streets. The foreman gives the property-yard keeper a receipt ticket for each load hauled. The amounts hauled and destinations are reported to the superintendent of property at the end of each day and the receipted tickets inclosed. Upon issue of all the property or completion of the job the order is indorsed by the yard keeper and returned to the superintendent of property, who reports the amounts actually used to the accounting clerk and superintendent of sewers, to be charged into the cost of the work. In case material hauled for a work remains over it is carried by the foreman to the next locality, being credited to the first work and charged to the second as if it were an issue from the yard. If the material ordered proves insufficient a supplementary requisition for the necessary amount is made. No material whatever is allowed to leave the property yards without receipt.

The same method is followed in furnishing material to a contractor except that the contract specified value of such issued material, except pipe and manhole irons, is charged against him and deducted from payments made to him.

The trenches for pipe sewers are ordinarily from 2½ to 3 feet wide with headers of about 2 feet in width at intervals of about 10 to 16 feet, these headers being tunneled through 3 or 4 feet above the bottom. The stations given by the assistant engineer are always left in a header. The foreman erects a stout stake at each station and marks on it, at a convenient distance above the ground, an arbitrary number of feet above the bottom of the interior of the sewer, this number of feet being the same for all the stations; a cord is then stretched from stake to stake at the marked point, and is therefore parallel to the bottom of the sewer. Foremen are required to keep this cord stretched across four stations, or for a distance of 150 feet, thus giving an opportunity to detect any error. Measurements to the bottom of the trench are then easily made by means of a graduated pole or plumb-bob line. When the trench is to the required depth, 6 inches of concrete is spread over the bottom and well rammed with iron rammers of about 18 square inches striking surface, weighing 16 pounds, and wooden rammers of 1 foot square striking surface and 4 inches thick, with wooden handle. The concrete is made in batches of 1 barrel natural cement, 2 barrels sand, and 4 barrels gravel, and is mixed by a gang of eight men, as follows:

The cement is turned upon the mixing platform, which measures 12 feet by 16 feet, the sand is then added, and the men, working two on each side of the platform, turn the mass with shovels from the center into four piles at the corners, then back again to the center until it is of a uniform color; it is then spread out about 2 inches thick and the

Longitudinal and Transverse Sections  
Showing manner of laying  
**Pipe Sewers**

THE NORRIS PETERS CO., PHOTO-LITHO., WASHINGTON, D. C.

gravel spread evenly over it; water is then added and the gravel and mortar thoroughly incorporated by turning from the center to the corners and back as before. Hoes are sometimes used in mixing, but for continuous work the men appear to prefer the shovels. Ordinarily the mixing gang helps place the concrete, the time of mixing and placing averaging thirty minutes per batch. If a gang mixes steadily it can make a batch every fifteen minutes. Gravel is found to be much better for sewer purposes than broken stone for several reasons: It mixes more readily, the average time for making a batch with stone being nineteen minutes; it can be rammed quickly and also much more compactly in the quantities used, thus giving a cheaper and better product. Better results are obtained by adding the water after the gravel is placed upon the mixed sand and cement than by adding the gravel to a mortar of the other materials. The preparation of the ingredients is done by the mixing gang.

After the concrete has been brought to the required depth, as determined by the rod and cord, the pipe is lowered and placed in position, each section being tested for grade by the rod, which has a projection of about an inch in length upon its lower end for this purpose, allowing it to enter the pipe and the measurement to thus be made from the bottom of the interior; to measure from the top of the pipe would not insure an even surface along the bottom. For alignment the pipe is tested by a plumb-bob whose string is held against the cord. The pipe being properly bedded, concrete is lowered in buckets, care being taken to empty the first three or four on the axis of the pipe, the concrete falling to the sides, it being found that if the bucketful is placed in at one side there is danger of displacing the pipe laterally. After 4 or 5 inches have been placed in this manner the concrete is worked against the pipe by a shovel or trowel, and when about 6 inches has been put in it is well rammed; after being brought up slightly above the horizontal diameter bands of concrete are placed over the joints as shown in the drawings; it being impossible to ram these bands without displacing them, they are compacted as much as possible with wooden paddles and heavy trowels made of five-sixteenths-inch iron. Where possible the concrete is allowed to remain twenty-four hours before any earth is filled back into the trench. The interior of the sewer is always examined to see that no mortar has been forced through the joints so as to form a projection or obstacle to the flow of water.

Contractors upon pipe sewers are required to follow the same methods, the inspector setting the cord.

This city has had great trouble with the pipe sewers laid about twenty years ago, and very many of them have to be replaced entirely, the expense of doing so without interrupting the flow of sewage making the replacing sewer cost more than one of the same size laid as a new one. The active cause of the failure of these sewers is root intrusion, but the primary causes are several, as stated by Mr. McComb in his report, one being lack of proper gradient of the bottom of the sewer trench, the grade having been tested at intervals of 100 feet and guessed at for the intervening interval, and if any obstacle, such as a boulder or stump, was encountered in the trench the sewer was simply laid around it or over it; another, as stated, was carelessness in jointing, the pipe having been simply laid in the bottom of the trench without any particular care to see that each section occupied its proper position. This defect has doubtless been increased by the action of the roots of trees entering the joints and forcing the pipes apart, but when a sewer on being uncovered resembles in lines a rail fence on undulating ground more

than any engineering structure the trees can not be held entirely responsible. The failure in strength of the pipe is also fully explained by Mr. McComb. This work was all done by contract, and as the District had but one inspector to each section of the city, who was supposed to look after all operations of building, street paving, sewers, etc., in that section, it is not surprising that contractors could do work pretty much as they pleased, and it may be a matter of congratulation that only one sewer, that on the east side of Twenty-first street NW., between N and O streets, was paid for and never found. Were it not on account of the stoppage of the sewers by tree roots many of those that now have to be replaced would continue tolerably serviceable for many years to come, but when a single root not as large as a lead pencil entering a joint can develop such a mass of rootlets as to completely choke a 10 inch pipe for a length of several feet, and entrances for the roots exist every few feet, the necessity for replacing many of these pipe sewers without delay is evident. The photograph accompanying this report shows a mass of roots similar to what is encountered in almost every sewer being replaced.

Washington streets, with their width, fine pavements, and magnificent lines of shade trees, are models for the world, but owing to the width and expensive pavements it has been necessary to place most of the pipe sewers in the sidewalks where they are most exposed to the action of the tree roots. This condition of affairs renders necessary in sewers now built a degree of protection for the joints that would be extravagance in most cities. In many cases where the roots have entered the sewers they are cut out, and the interior of the sewer freed in this manner. This method, however, can afford but temporary relief; and as the larger part of the old sewers are so crooked that nothing can be done beyond a few feet from the manhole, the only remedy is to rebuild them. The softer-wooded and most rapidly growing trees appear to cause the most trouble.

All large sewers for which contracts were let during the year are entirely of concrete, with the exception of the invert surface, which is of vitrified brick. Bids in each case were asked for brick and for concrete construction, and in each case the concrete was the lower. Upon the Rock Creek sewer the bids of the contractor to whom the work was awarded were, brick, \$64,964; concrete, \$55,910. Upon the sewer in Twelfth street SE. the bids were, brick, \$18,430; concrete, \$17,590. A photograph of this sewer when near completion accompanies the report, and also cross sections of the sewers wholly or partly constructed during the year.

The 24-inch sewer built of concrete cost more per foot than the same size sewer of pipe; but this was partly due to the exceptional depth at which it had to be laid. A careful comparison will be made this year between the smaller sewers of each material, and next year's report will be able to contain more definite information. One great difficulty in this city of building the smaller sizes of sewers in concrete is, that the sewer is almost invariably put into use within such a short time after construction that the concrete does not have opportunity to acquire its strength before it is subjected to abrading effects.

The number of new connections with brick sewers has during the year been restricted as much as possible, and in all cases where practicable connections with pipe sewers have been made instead. The reason for this is that a sewer of the combined system being necessarily much larger than required to carry merely the sewage or dry-weather flow, and the house lateral entering the sewer not lower than

the springing line, it follows that, except during time of heavy rains, the sewage from the house trickles down the side of the sewer in a thin layer exposed to the air, thus being placed in a condition most favorable for putrefaction, with all the resulting discomfort of offensive odors and some of the dangers which the sewerage system was constructed to avoid.

It is to be recommended that hereafter all subdivisions of blocks or lots be submitted to the sewer department for examination before being approved and placed of record. These subdivisions are frequently made without any consideration concerning the laying of sewers, or under the impression that sewerage facilities exist, with the result that it afterwards becomes necessary for the District to build sometimes as much as 300 feet of sewer which would have been entirely unnecessary, and whose cost would have been saved had the property lines been slightly changed.

As soon as the system of street extension is approved and the grades of the streets decided upon, the plans and estimates for the trunk sewers to the outlying districts will be prepared, so that work thereon can be begun as soon as the appropriations at the disposal of the department permit.

The importance of carrying out the plans adopted by the Government for the system of sewage disposal has been reported before, and it is not necessary here to do more than invite attention to those reports, with the remark that time has emphasized all that was said in them.

In conclusion, I would state that the credit for the sewer system of the District of Columbia as described belongs to my predecessors in charge of this office, and to Mr. D. E. McComb, who has been superintendent of sewers for many years. Having been here but a few months, my share has necessarily been small.

#### PLUMBING OFFICE.

Mr. Ball, inspector of plumbing, in his report appended, describes the operations of this office for the past year. The value of plumbing inspection is becoming better known and appreciated by the citizens, and in many cases people now decline to rent a dwelling unless a certificate is furnished as to the safe condition of its plumbing. Were this stand assumed more generally, the people would be much better protected in the sanitary conditions of their homes and the reputable plumbers of the city greatly assisted in their effort to secure a proper and safe quality of work under all circumstances.

The amount of work devolved upon this office is such that it taxes the present force of inspector and five assistants to the utmost to make all the necessary examinations, and it is only with great exertion that they are able at times to avoid causing the plumbers to wait for inspection. Were the force increased by an additional assistant, the work of keeping the office records could be brought to date and kept in a more satisfactory manner than is possible now. With the increase of building in the outlying districts, the inspectors are able to make fewer inspections than was possible when work was confined to localities nearer the center of the city, and this condition of affairs is growing steadily more onerous to the office.

It is in many respects desirable to extend the province of the office to the inspection of gas fixtures in old houses, but until some increase of force is made it is impossible to properly take up this duty. The inspectors, in examining plumbing repairs, have occasionally notified

the springing line, it follows that, except during time of heavy rains, the sewage from the house trickles down the side of the sewer in a thin layer exposed to the air, thus being placed in a condition most favorable for putrefaction, with all the resulting discomfort of offensive odors and some of the dangers which the sewerage system was constructed to avoid.

It is to be recommended that hereafter all subdivisions of blocks or lots be submitted to the sewer department for examination before being approved and placed of record. These subdivisions are frequently made without any consideration concerning the laying of sewers, or under the impression that sewerage facilities exist, with the result that it afterwards becomes necessary for the District to build sometimes as much as 300 feet of sewer which would have been entirely unnecessary, and whose cost would have been saved had the property lines been slightly changed.

As soon as the system of street extension is approved and the grades of the streets decided upon, the plans and estimates for the trunk sewers to the outlying districts will be prepared, so that work thereon can be begun as soon as the appropriations at the disposal of the department permit.

The importance of carrying out the plans adopted by the Government for the system of sewage disposal has been reported before, and it is not necessary here to do more than invite attention to those reports, with the remark that time has emphasized all that was said in them.

In conclusion, I would state that the credit for the sewer system of the District of Columbia as described belongs to my predecessors in charge of this office, and to Mr. D. E. McComb, who has been superintendent of sewers for many years. Having been here but a few months, my share has necessarily been small.

#### PLUMBING OFFICE.

Mr. Ball, inspector of plumbing, in his report appended, describes the operations of this office for the past year. The value of plumbing inspection is becoming better known and appreciated by the citizens, and in many cases people now decline to rent a dwelling unless a certificate is furnished as to the safe condition of its plumbing. Were this stand assumed more generally, the people would be much better protected in the sanitary conditions of their homes and the reputable plumbers of the city greatly assisted in their effort to secure a proper and safe quality of work under all circumstances.

The amount of work devolved upon this office is such that it taxes the present force of inspector and five assistants to the utmost to make all the necessary examinations, and it is only with great exertion that they are able at times to avoid causing the plumbers to wait for inspection. Were the force increased by an additional assistant, the work of keeping the office records could be brought to date and kept in a more satisfactory manner than is possible now. With the increase of building in the outlying districts, the inspectors are able to make fewer inspections than was possible when work was confined to localities nearer the center of the city, and this condition of affairs is growing steadily more onerous to the office.

It is in many respects desirable to extend the province of the office to the inspection of gas fixtures in old houses, but until some increase of force is made it is impossible to properly take up this duty. The inspectors, in examining plumbing repairs, have occasionally notified

the occupants of the houses of the dangerous condition of the leaky fixtures or keys unprovided with stops.

#### PERMIT OFFICE.

The work done in this office during the past year is shown in the report of Mr. Woodward, permit clerk, which is appended hereto. In its new location it is hoped that the complaint and intelligence office and employment bureau features will render even more satisfactory service to the public than during the past.

The District courts have decided that the police department has no authority to prevent unauthorized persons digging up the city streets and sidewalks, and that no power is vested in the Commissioners to make or enforce regulations to protect the pavements. It is recommended that steps be taken to secure legislation necessary to give the Commissioners power of control in this respect.

#### PROPERTY OFFICE.

The appended report of Mr. Boiseau, superintendent of property, shows the work done by this office during the year in caring for District property to be used for engineering purposes.

The advisability of fencing in the property yards has been reported so many times without securing an appropriation for the purpose that it seems superfluous to renew it. Most of the material kept in the open yards is of such nature that it could not be used to advantage by private parties, and the greatest loss is in pipe broken by boys playing around the yard in the evening.

Very respectfully,

LANSING H. BEACH,  
*Captain of Engineers, U. S. A.*

Maj. CHAS. F. POWELL,  
*Corps of Engineers, U. S. A., Engineer Commissioner, D. C.*

#### REPORT OF SUPERINTENDENT OF SEWERS.

WASHINGTON, D. C., July 25, 1895.

SIR: I have the honor to submit the following report of the operations of the sewer division for the fiscal year ending June 30, 1895.

Under the appropriation for cleaning and repairing sewers and basins, work was performed as follows: 110,472 linear feet of pipe sewers, 51,861 linear feet of brick sewers, 9,079 manholes and 74,007 receiving basins were cleaned, from which were removed 16,235 cubic yards (estimated) of sediment, consisting of street detritus and sludge; 1,637 linear feet of pipe sewers were taken up and relaid; 1,068 linear feet of brick sewers were repaired; 78 linear feet of 2.75 feet by 4.125 feet egg-shaped brick sewer was constructed; 633 minor repairs to sewers were made; 29 manholes were constructed, 350 were repaired, 6 were abandoned, 6 were reconstructed, and 69 had new covers placed on; 5 basins were constructed, 377 basins were repaired, 13 new tops and 36 new grates and frames were placed on basins, 10 basins were reconstructed, and 2 basins were abandoned.

Tiber and Missouri avenue sewers were cleaned during the year after each storm at a cost of \$1,451.46.

In order to properly drain square No. 379, it was found necessary to reconstruct 98 linear feet of sewer and one basin in alley opening upon D street.

Owing to change in surface grades in north half of square No. 510, it was necessary to reconstruct 204 linear feet of 8-inch and 10-inch pipe sewer and 2 manholes.

The brick sewer, which was constructed in 1875 along the north side of Q street NW., from New Hampshire avenue to Connecticut avenue, was in defective condition, the gradient being false in places, causing pools of sewage to exist at all times, and the arch was badly distorted and cracked in several places. As the sewer along

the south side was found to be of sufficient capacity to carry its drainage, the sewer on the north side was abandoned and the sewers discharging into it were connected with the sewer along the south side of the street. To do this there was constructed 78 linear feet of 2.75 by 4.125 feet egg-shaped brick sewer and 126 linear feet of pipe sewer, ranging from 10 inches to 24 inches in diameter.

The flushing gates at the facade of Tiber sewer have been operated during the year advantageously to the sewer and also to James Creek Canal.

Under the appropriation for relief sewers and replacing obstructed sewers there was constructed: Under contract, 9,761.25 linear feet of pipe sewers, varying from 12 to 24 inches in diameter, and by day labor 14,311.7 linear feet of pipe sewers, varying from 8 to 24 inches in diameter, 1,024 linear feet of 6-inch lateral connections, 83 manholes, and 2 basins.

The principal faults requiring the replacement of sewers laid under board of public works contracts are these.

1. Little attention was paid to securing good alignment, the trenches being excavated to the given grade at station points (usually 100 feet apart); the trenches between stations were graded by sighting along the trench, and if bowlders or other obstacles were encountered the sewer was bent around either to one side of or over the obstacle.

2. The jointing is generally defective and tree roots intrude, which develop until the sewer becomes obstructed, the soft-wood trees, maples and poplars, causing the greatest amount of mischief.

3. Failure is also caused by an insufficient compacting of the earth filling alongside pipes, the effect being that the horizontal resultant of the arch stress is not sufficiently resisted; as a result the pipe spreads, the upper portion drops and cracks, and if the collapse is not sufficient to obstruct the sewer, that result will come later from root intrusion through the cracked pipe. This effect is noted generally in pipe sewers of 18 inches diameter and above, of earthenware and in all sizes of cement-pipe sewers. The 12-inch and 15-inch earthenware sewers seldom fail from this cause.

The work performed under the permit system included the construction of 7,925 linear feet of pipe sewers, varying from 8 inches to 21 inches in diameter; 52 manholes and 4 basins, divided among 57 jobs, averaging in cost per job \$214.66, in length of sewer per job 139 feet, and in cost per linear foot, \$1.543.

Under the assessment system there was constructed 26,103 linear feet of pipe sewers varying between 8 inches and 24 inches in diameter, 152 manholes, and 4 receiving basins, divided among 84 jobs, averaging in cost per job \$494.21, in length of sewer per job 310.75, and in cost per linear foot \$1.59.

Sewers were constructed at whole cost to applicants aggregating 1,186 linear feet, varying in sizes between 6 inches and 12 inches in diameter, 12 manholes, and 5 receiving basins, divided among 29 jobs, averaging in cost per job \$82.33.

Under the appropriation for main and pipe sewers, main sewers were constructed under contract as follows: L street NE., between North Capitol and First streets; Fourteenth street SE., between A and B streets; Fifteenth street NE., between Tennessee avenue and C street; B street SE., between Nineteenth street and Anacostia River; K street SE., between Thirteenth and Fourteenth streets; L street NE., between First street and Delaware avenue. Work was commenced on the extension to deep water of the sewers in Sixth and Twelfth streets SE. There was also constructed 1,418.6 linear feet of pipe sewers, varying in size from 15 inches to 24 inches in diameter. By day labor there was constructed 7,167 linear feet of pipe sewers, varying from 8 inches to 24 inches in diameter; 325.18 linear feet of 2 by 3 feet egg-shaped concrete sewer; 9.25 linear feet of 2.75 feet diameter circular brick sewer; 1,340.4 linear feet of 24 inches diameter concrete sewer; 53 manholes, and 50 receiving basins.

Under the appropriation for suburban sewers the following main sewers were constructed under contract: Thirteenth street NW., between Columbia and Kenyon streets; Sherman avenue NW., between Marshall and Farragut streets; Sherman avenue NW., between Farragut and Sheridan streets, and work was commenced on sewer in Linden street NW., between Wilson and Pomeroy streets. There was also constructed 1,979.9 linear feet of pipe sewers, varying from 18 inches to 24 inches in diameter. By day labor there was constructed 2,587 linear feet of pipe sewers, varying from 10 to 24 inches in diameter; 5 linear feet of 24 inches diameter concrete sewer, 15 manholes, and 23 basins.

Under the appropriation for automatic siphons 12 flushing basins were constructed by day labor.

The following work was performed for the surface division and charged to appropriation for improvements and repairs to streets: 793 linear feet of pipe sewer was constructed, varying from 8 inches to 18 inches in diameter; 15 receiving basins were constructed, 29 receiving basins and 4 manholes were reconstructed and adjusted to conform to new lines and grades of streets being improved.

Of the Easby's Point main intercepting sewer there has been constructed 740.4 linear feet of 11.25 feet diameter, 381 feet of 10.50 feet diameter, and 417 linear feet of 9.67 feet diameter circular brick sewer.

Under contract, work upon the Rock Creek intercepting sewer was begun in March of this year, and 2,564 linear feet of the sewer has been completed. This sewer is now complete between Q street and the Zoological Park.

Observations of rainfall and sewer discharge have been continued through the year, and the result will be compiled and tabulated when this may be done without interference with the regular work by the office force.

The reduced prices for materials which have prevailed during the year have caused a reduction in cost of work performed as compared with the previous year's work. The average cost of 8-inch sewers is larger than the average cost of 1894, but in that year the general average was reduced by the construction of a shallow sewer 1,871 feet long for the sewerage of the Girls' Reform School, which was built at a very low price, viz, 77.2 cents per linear foot. If that sewer be taken from the table of work performed in 1894, the cost of 8-inch sewer work for 1895 will fall below the cost of sewers of that size in 1894.

The cost of pipe sewer work performed by day labor compares well with that performed under contract. The average cost of 15-inch sewers by day labor was 12.4 cents per linear foot less than by contract. The average cost of 18-inch sewers by day labor was 10.5 cents per linear foot less than by contract; the average cost of 21-inch pipe sewers by day labor was 11.8 cents per linear foot less than by contract, while the average cost of 24-inch pipe sewers by day labor was 20.9 cents per linear foot greater than by contract. The four jobs containing 24-inch sewers constructed by day labor contained one job of more than usual difficulty, viz, the sewer in D street NW., between Twenty-sixth street and the Potomac River, where a large amount of rock excavation was necessary, which increased the cost much beyond the average. If this exceptionally difficult job be taken from the table, the cost of 24-inch pipe sewers constructed by day labor will be 16 cents per linear foot less than the average cost by contract.

Tables numbered from 1 to 12 are transmitted herewith.

Table 1 shows contract work under appropriation for relief sewers and replacing obstructed sewers.

Table 2 shows contract work under appropriation for main and pipe sewers and main intercepting sewer.

Table 3 shows contract work under appropriation for suburban sewers and Rock Creek intercepting sewer.

Table 4 shows work done under the voluntary permit system.

Table 5 shows work done under the assessment system.

Table 6 shows work performed at whole cost to applicant.

Table 7 shows work done by day labor under appropriation for relief sewers and replacing obstructed sewers.

Table 8 shows work done by day labor under appropriation for main and pipe sewers.

Table 9 shows work done by day labor under appropriation for suburban sewers.

Table 10 shows work performed by day labor under miscellaneous appropriations.

Table 11 shows comparative cost of sewers.

Table 12 shows number of inspectors, overseers, and other employees of the sewer division or paid from sewer appropriations.

Very respectfully,

D. E. McCOMB,  
*Superintendent of Sewers.*

The ENGINEER COMMISSIONER OF THE DISTRICT OF COLUMBIA.

## REPORT OF THE INSPECTOR OF PLUMBING.

WASHINGTON, D. C., July 30, 1895.

MAJOR: I have the honor to submit the following report upon the operation of the division of inspection of plumbing for the fiscal year ended June 30, 1895:

Until November 21, 1894, this bureau was under the direction, as it had been from its inception, of the late Samuel A. Robinson. The responsibilities of its conduct having, since his death, and in accordance with his recommendation to the Commissioners, devolved upon me, it is fitting that I express in this formal record both my appreciation of his noble character as a man and the great value and lasting effect of his labors as an official for the conservation of the health of this community. The advances made by this office under his administration and the increased estimation of its importance as a factor in the public welfare will always testify more strongly than can any words to the faithfulness and wisdom with which he discharged his duties.

The record of inspection of plumbing during the period covered by this report shows a slight increase over the amount stated last year, with no increase in the force employed, and comprises 5,789 inspections, of which number 1,054 were examinations of existing plumbing, 2,118 inspections or proving new work, 2,508 inspections of remodeling or repairs, and 109 peppermint tests not otherwise counted. This record, as has been customary, includes only, both for new and old work, such inspections as demand tests, approval, or other formal action, and intentionally excludes numerous calls made by the inspector to secure information as to the progress or character of the various jobs. It is desirable, as was often urged by Mr. Robinson, that the scope and completeness of the records of this office should be extended.

The established practice of my predecessor has been followed in the close scrutiny of plans for plumbing, in the character of inspections made, in the methods of examination and testing employed, and in the interpretation and application of the regulations, with a single noteworthy extension of the previous usages. It was found

that in the issuance of permits for remodeling of buildings or for adding apartments to contain plumbing fixtures there had been no concerted action between the office of the inspector of buildings and this office. Such a lack of coordination resulted oftentimes in violations of the plumbing regulations or the construction of ill-arranged or unprotected plumbing. In order to correct this defect of practice it has been agreed that no permit will be issued for building work in which an alteration or extension of the plumbing system is proposed without securing the antecedent approval of this office. In many cases a mere statement of the plumbing work intended to be done is accepted. Sometimes an inspection of the premises is made to insure an accurate knowledge of the conditions to be met, and in important cases plans and specifications are required to be filed.

The reconstruction of antiquated and defective plumbing is still constantly in progress and is stimulated by a well-grounded objection in the public mind to the presence and use of unventilated, foul, and often leaky pipes and fixtures, which contrast so unfavorably in convenience and cleanliness with modern plumbing appurtenances. The substitution of an entirely new system of plumbing extending from the main sewer to all the fixtures frequently results from the disclosure of grave defects existing in the old work.

The steady extension of the public sewers and water mains has afforded these facilities to many premises not thus favored heretofore, and the opportunity to introduce a water supply combined with house sewerage has been quite fully improved by the owners affected. It seems preeminently necessary that the main sewers be extended into suburban districts at a rate of progress at least equal to that at which water mains are advanced. If this be not accomplished, the copious use of water without adequate means for the removal of the foul wastes will result here, as so notably elsewhere, in a permanent and dangerous pollution of the soil.

This office has recently had occasion to consider and investigate certain of the problems which are incidental to the forms of plumbing construction demanded for the sanitary service of large and high buildings, and it is certain that increased attention must, in the immediate future, be paid to the evolution of plumbing design and practice adapted to such structures.

The record of gas-fitting inspections shows an increase in the number of inspections from 1,080 during the fiscal year 1894 to 1,327 during the year just ended. The good results attained have continued to justify the establishment of a service of supervision over new gas piping construction. The feasibility of extending this service to include examination into the condition of gas pipes and fixtures in old buildings has been demonstrated by a limited experience in such inspections during the past few months. There is clearly no reason why defective keys or leaky joints or fixtures should be allowed to endanger health, and occasionally even life, without a vigorous attempt on the part of the constituted authorities to have such defects corrected. It is expected that the present force of this bureau will be able to accomplish certain good results along this line.

The assistant inspectors have manifested commendable zeal, fidelity, and discretion in the performance of their allotted duties as well as that spirit of accommodation which should characterize every public official. Their responsibility and exacting duties merit compensation at least commensurate with that provided for the discharge of similar duties in other departments of the District government.

The close association of the plumbing board with the administration of this office is deemed a sufficient reason for briefly noting herein the work it has thus far performed. The present board was constituted by the Commissioners on March 23, 1893, in accordance with the provisions of the new plumbing regulations which went into effect on the 15th of that month. It held seventy meetings prior to June 30, 1895, and has conducted 249 examinations into the qualifications of 202 original candidates for licensing as master plumbers and gas fitters, of whom four have been finally rejected as a result of failure in a third examination. This board has also considered in detail many important questions connected with the application of the regulations to our current practice, and has made valuable recommendations to the Commissioners respecting both the materials and methods of construction. It is but just to add that its actions have been impartial and without bias in favor of either persons or organizations. The members of the board have thus far received no salaries, but have devoted their time and energy to this service as a contribution to the cause of sound government and progressive sanitation.

Very respectfully,

CHAS. B. BALL,  
*Inspector of Plumbing.*

Maj. CHARLES F. POWELL,  
*Engineer Commissioner, District of Columbia.*  
(Through Capt. Lansing H. Beach.)

*List of licensed plumbers, July 1, 1895.*

## REPORT OF PERMIT CLERK.

WASHINGTON, D. C., July 26, 1895.

MAJOR: I have the honor to submit the following as the operations of the permit clerk's office for the fiscal year ended June 30, 1895:

The permits issued during the year were—

|   |       |       |
|---|-------|-------|
| Water connections.....                                    | 1,563 |       |
| Water repairs.....  | 1,403 |       |
| Water specials.....                                       | 292   |       |
|   |       | 3,258 |
| Sewer connections.....                                    | 1,515 |       |
| Sewer repairs.....  | 991   |       |
| Sewer specials.....                                       | 243   |       |
|   |       | 2,750 |
| Gas and electric light connections.....                   | 802   |       |
| Gas and electric light repairs.....                       | 281   |       |
| Gas and electric light specials.....                      | 43    |       |
|   |       | 1,126 |
| Lay and repair gas mains and electric conduits.....       | 72    |       |
| Erect and replace poles and posts.....                    | 253   |       |
| Erect parking fences.....                                 | 237   |       |
| Erect awnings.....  | 23    |       |
| Build manholes.....                                       | 2     |       |
| Lay water main (Metropolitan Railroad Company).....       | 1     |       |
| Make excavations.....                                     | 26    |       |
| Connect and repair sewers (United States Government)..... | 2     |       |
| Lay and repair railroad tracks.....                       | 14    |       |
| String wires.....   | 11    |       |
| Drive and haul across sidewalks.....                      | 55    |       |
| Pave and repair sidewalks and parking leads.....          | 182   |       |
| Erect and repair safety gates and fences.....             | 3     |       |
| Repair parking fences.....                                | 144   |       |
| Repair steps and copings.....                             | 19    |       |
| Miscellaneous.....  | 142   |       |
| Permits to employees, District of Columbia.....           | 420   |       |
| Grand total.....  |       | 8,740 |

There has been an increase in both the amount paid for permits and the number of permits issued, as compared with the fiscal year ending June 30, 1894.

Permits issued during the fiscal year—

|              |       |
|--------------|-------|
| 1893-94..... | 8,064 |
| 1894-95..... | 8,740 |

The following table shows the number of permits issued during the four preceding years and the amount of money paid the collector of taxes, District of Columbia, during that time:

| Fiscal year. | Permits issued. | Fees paid |
|--------------|-----------------|-----------|
| 1890-91..... | 5,561           | \$7,638   |
| 1891-92..... | 9,456           | 8,631     |
| 1892-93..... | 12,989          | 12,214    |
| 1893-94..... | 8,064           | 7,024     |
| 1894-95..... | 8,740           | 7,229     |

The increase in the amount of money paid is due principally to the large number of permits issued during the months of February and March for thawing out and repairing water-service pipes and for the erection of fences and railings around the parkings.

The work of the office is increased each year by the continued improvements of sidewalks and roadways in all sections of the District of Columbia. When the improved pavements are cut, or in any manner displaced by plumbers or other persons having permits to make excavations, a deposit is required to cover the cost of repairing them. In the case of the registered plumbers, they are required to make a deposit of \$50 with the collector of taxes, District of Columbia, and against this deposit is charged the costs of repairing the cuts made by them. The location is reported to the superintendent of streets weekly, and the repairs are made by the

employees of that department. When the amount charged against the account of the plumber amounts to \$40, he is notified by statement from this office, and must bring his deposit or balance to the original amount (\$50) before additional permits can be issued to cut the improved pavements. No permit to do any work contemplated by the plumbing regulations can be issued to any plumber who fails to settle his indebtedness after being notified from this office. The vouchers showing the cost of each cut repaired are paid by the auditor, District of Columbia, a copy of each deposit and repair cost being kept in this office.

Owing to the continued laying of underground electric-light, telegraph, and telephone wires in the roadways and sidewalks, the greatest care has to be exercised by the office to notify all persons having permits to make excavations of the location of such underground constructions, so as to protect them from being injured by the tools of the workmen.

All permits to make excavations to connect with or repair underground constructions are issued from this office. With the exception of work done by the employees of the District of Columbia, and special permits allowed by the plumbing regulations, or ordered by the Commissioners, a fee of \$1 is charged for each excavation made, this fee being paid to the collector of taxes and his receipt entered upon the application. The fees so paid are deposited in the United States Treasury, one-half to the credit of the District of Columbia and the other half to the United States. There seems no more reason why the United States should receive this fund than one-half of the other funds received for taxes, especially that received for water permits. The water department being self-sustaining, all moneys received from any source connected with it should be credited in full.

New branches of work have been added to the duties of this office during the past year, in addition to issuing all permits for connecting with and repairing sewer, water, gas, and electric-light mains and conduits, which has for years been the principal work of the office—work that was formerly done by the employees of the office of the inspector of buildings—has been transferred to the permit clerk's office. All parking railing and fences, hitching posts along the inner edge of the curb, hitching rings in the curb or in iron or stone blocks next the curb, clocks for keeping the time, and lamps showing white lights on or over the sidewalks, are issued according to the regulations of the engineer department, District of Columbia, from this office.

The tracings furnished this office of the sewerage system of the District of Columbia are kept posted at all times by employees of the sewer department, and are of great value in giving information to plumbers and the public generally as to the location, depth, and size of sewers.

In concluding my report, I wish to call attention to the fact that the courts have decided that the plumbing regulations are defective so far as any penalty is prescribed for making excavations in the avenues, streets, roads, alleys, or public spaces, and I would respectfully recommend that the attention of Congress be called to this defect, so that a penalty may be fixed and any unauthorized excavations be prevented.

Very respectfully,

H. M. WOODWARD,  
*Permit Clerk, District of Columbia.*

Maj. CHARLES F. POWELL,  
*Corps of Engineers, U. S. A.,*  
*Engineer Commissioner, District of Columbia.*  
(Through Capt. Lansing H. Beach, Corps of Engineers, U. S. A., assistant to Engineer Commissioner.)

## REPORT OF SUPERINTENDENT OF PROPERTY.

WASHINGTON, D. C., July 30, 1895.

SIR: I have the honor to submit the following report relative to material purchased on account of appropriation for 1894-95:

### GRANITE CURBING.

Granite curbing to the amount of 34,558.57 feet was purchased, at a cost of \$27,322.79. These figures include the 6 by 20 inch, 8 by 8 inch, and 5 by 16 inch sizes. The latter is of an inferior grade, and was only purchased because of the near approach of the winter season. The prices were 74½ and 90 cents for 6 by 20 inch, 67½, 69, 70½, and 78 cents for the 8 by 8 inch, and 60 and 67½ cents for the 5 by 16 inch; the circular cost \$1.25 and \$1 per foot for the 6 and 8 inch, respectively. With the exception of 1,490 feet of the 5-inch curbing, the whole year's supply came from southern Virginia and North Carolina. The prices paid were the lowest at which curbing has been purchased in years.

Curbing to the amount of 2,026.25 feet of 8 by 8 inches were bought in open market, because of the failure on the part of the regular contractors to deliver as rapidly as required. The price paid was 78 cents per foot—7½ cents in excess of the regular contract price. This excess, amounting to \$151.97, was charged against the contractor.

#### GRANITE BLOCKS.

No contract was awarded for furnishing granite blocks. But one street was scheduled for this class of improvement. To meet its requirements, second-class and old blocks were purchased, at \$26 and \$18.50 per 1,000, respectively. By the exercise of care in culling and paving, these blocks have made good work.

#### VITRIFIED PAVING BLOCKS AND BRICKS.

During the past year paving blocks (9½ by 4 by 3½ inches) have largely supplanted the bricks formerly in use. The prices paid were \$22.80 and \$18 per 1,000, respectively. Both the blocks and bricks furnished during the year were Ohio River fire clay.

There were purchased, on account of 1894-95 appropriations, 1,094,656 blocks and 108,955 bricks, the cost being \$26,020.04. In addition, there were purchased for use in streets to be improved from appropriations for 1895-96, 165,026 blocks, costing \$3,762.59.

#### VITRIFIED SEWER BRICKS.

There were purchased 525,763 repressed vitrified fire-clay bricks for use in inverts of sewers. These bricks cost \$16.50 per 1,000—45 cents less than was paid under the preceding contract. \$8,675.09 were expended in this line.

#### RED PAVING BRICKS.

There were purchased 1,269,153 red paving bricks, at a cost of \$12,024.43; 10,333 were supplied by a local dealer, and the balance came from Frederick, Md. The price for the former, delivered on line of work, was \$7.50 per 1,000, while the latter cost \$9.50 at the property yard. The cost of hauling was 90 cents per 1,000 for city deliveries, making the Frederick bricks cost \$2.90 more than the local product. It is thought that their manifest superiority justified this additional expense.

Of second-quality bricks, 3,450 were purchased. The price for these was \$7.50 per 1,000.

#### RED SEWER BRICKS.

Seven hundred and forty-one thousand three hundred and eighty-three red sewer bricks, costing \$4,721.44, were purchased during the year. Pending award of the annual contract, bricks were delivered on line of work at \$7.20 for city deliveries, higher prices being charged for outlying work. Under the contract the District received the bricks at the contractors' yards, and hauled them with its own teams. The price at the yard was \$6 per 1,000. This method has been thoroughly satisfactory, and will likely be continued during the current year.

#### ASPHALT BLOCKS AND TILES.

One hundred and ninety-three thousand six hundred and eighty-seven asphalt blocks and 8,006 tiles were purchased at a cost of \$12,633.88, the prices being \$63 and \$52.50 per 1,000, respectively. These were of local manufacture. There is no competition in this class of material. The prices, however, are lower than before the establishment of the local plant.

#### VITRIFIED INVERT BLOCKS.

A contract for furnishing 17,600 feet of vitrified invert blocks was awarded last November. This contract is still in course of prosecution. There were delivered, to July 1, 8,388 feet, at a cost of \$3,355.20. It will be necessary to defray part of the cost of this contract from the 1895-96 appropriations, and the proposals for the current year have been made accordingly. The price under existing contracts is 40 cents per foot, 20 cents less than paid for the year 1893-94, and the lowest at which the articles have yet been purchased.

The present contractor has patented these blocks, and a suit against the District for infringement because of purchases from other parties is now pending.

## TERRA COTTA SEWER PIPE.

Eighty-three thousand seven hundred and fifty-three feet of sewer pipe and branches, costing \$18,397.55 (including two ventilating traps), were purchased during the year. The prices paid were: 6-inch pipe, 4½ cents; 8-inch, 6½ cents; 10-inch, 10 cents; 12-inch, 11½ cents; 15-inch, 18½ cents; 18-inch, 26½ cents; 21-inch, 40 cents; 24-inch, 49 cents. Branches cost 30 cents, 41 cents, 46 cents, 75 cents, \$1.13, \$1.63, and \$2.08, respectively. Bends were 16 cents each. These prices are the lowest that have been reached for years, if, indeed, they have ever touched these figures. Deliveries have not yet been completed.

## NATURAL HYDRAULIC CEMENT.

The annual contract for furnishing natural hydraulic cement was awarded to a new company, the proposals opened September 22, being their first tender to the District. While their ability to fulfill a contract from their own mill seemed questionable, the specifications and contracts amply secured the District from loss through failure to deliver cement as required. Because of the tardiness of the contractors, it was necessary to go repeatedly into the market and purchase cement. Four thousand four hundred and twenty-five barrels were bought under these conditions, and the increased cost, amounting to \$44, was charged against the contractors. With the exception of about 600 barrels, all cement furnished by the contractors was of a brand other than their own. It has, however, all passed the tests provided in the specifications, and the deliveries of the past spring seem to have given much satisfaction.

While the prosecution of this contract has caused this office much care and annoyance, the District has lost absolutely nothing, because of what may be termed the slowness of the contractors. In view of the fact that competition in this line has been somewhat restricted, and the low prices at which it has been lately possible to buy cement, the advisability of the course pursued seems patent. The prices paid under this contract were \$1 for barreled cement and 79 cents for cement in sacks. The prices for the previous year were \$1.05 and 90 cents, respectively.

This contract is still incomplete. To July 1, there were purchased, both under the contract and in open market, 27,740½ barrels, at a cost of \$24,218.16.

During the past two years the District has been purchasing much of its cement in sacks, thereby reducing the cost by about 25 per cent. If this were applied to the entire cement business, the saving would be somewhere in the neighborhood of \$7,500 per annum. It is recommended that during the current year only barreled cement sufficient for outlying jobs be purchased. Many of the sewer contracts are drawn requiring the District to furnish cement in barrels. A change in this respect is suggested.

Another departure in the District's cement business was the delivery and issue of cement at the contractor's place of business instead of the District's storehouse on Canal street. This practice saves the hauling charge of about 5 cents per barrel. As the District uses from 30,000 to 40,000 barrels annually, this course means a net saving of something over \$1,200, after allowing for the additional storekeeper which this system involves. The contractor insures the safety of the cement; and, as the District is represented by its storekeeper, there is no real objection to urge against this practice. Two years' experience confirms this statement.

## PORTLAND CEMENT.

Of Portland cement 2,899 barrels were purchased from the 1894-95 appropriation, at a cost of \$6,130.40. The price paid was \$2.12 per barrel; \$2.29 was the ruling price during 1893-94.

All Portland cement furnished during the year was of domestic manufacture. This, with the exception of 300 barrels purchased as an experiment during the two preceding years, is the first American Portland cement used in District sewers. As far as can be ascertained it has given thorough satisfaction. The reports of the inspector of asphalts and cements show it to be ground very fine and to possess great tensile strength.

## SAND.

Sand to the amount of 713½ cubic yards was purchased from the 1894-95 appropriation. This small quantity is explained by the fact that the lowest bid for furnishing concrete sand was 21 per cent higher than that of the preceding year, and this at a time when the ruling prices of all materials were low. It so happened that the supply on hand was quite large, the result of accumulated balances from prior years. All bids were therefore rejected, and the year's requirements were met from this stock. Proposals have recently been received and contract awarded for this class at 44 cents per cubic yard, 13 cents lower than the lowest price last summer. About 7,300 cubic yards of this sand were used during the year.

## 828 REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA.

Screened sand was purchased as needed, the prices ranging from 45 to 70 cents per cubic yard. The total amount expended was \$412.54.

### PEBBLES.

In continuance of the practice inaugurated during the summer of 1893, 4,512 $\frac{1}{2}$  cubic yards of screened pebbles were purchased for use in concrete around sewers. The total cost was \$3,330.38. Seventy-five cents per cubic yard was the ruling price, 10 cents less than that paid the year previous. Broken stone, formerly used for this purpose, cost \$1.50 per yard.

### BLUESTONE TRAP FRAMES AND COVERS.

No contract for these articles was awarded until the cold weather made it necessary to discontinue the building of concrete covers. Fifty-nine bluestone covers, etc., were purchased between the commencement of the winter season and the close of the fiscal year. The prices range from \$16.50 to \$17.75 and \$18 to \$19 for side and corner traps, respectively. There were expended in this line \$999.75.

### CASTINGS.

The castings purchased during the year consisted of 616 manhole frames, 696 manhole covers, 178 alley grates and frames, 12 extra grates, and 600 water stopcock boxes; 2,128 wrought-iron manhole steps are also included in this account. In addition, 502 steps, costing \$58.92, were made at the blacksmith shop. The stopcock boxes were what is known as Buffalo pattern. The total expenditures for castings were \$5,053.13.

### LUMBER.

Of lumber 207,506 feet were purchased as needed, at a cost of \$3,907.23.

### PITCH.

Experiments made by the inspector of asphalts and cements having demonstrated the superiority of the Scotch pitch, 4,950 gallons were purchased, at a cost of \$383.62, 7 $\frac{1}{4}$  cents per gallon being the price paid.

### BROKEN STONE.

Of broken stone 66 $\frac{1}{2}$  cubic yards were purchased, at a cost of \$97.83. This includes granolithic used in concrete basin tops.

### BLUESTONE FLAGGING.

Of bluestone flagging 61 feet were purchased for use in manholes repaired to accommodate electric railroad built by Metropolitan Railroad Company. Twenty-seven cents per foot (\$16.47 in all) were paid.

### STRUCTURAL STEEL.

There were expended for structural steel for bridges \$211.50.

### REPAIRS TO TOOLS.

There were expended \$185.28 in repairing tools, including the steeling of 472 picks, at 35 cents each. The work was not thoroughly satisfactory. The District has recently established its own blacksmith shop with good results, the work being of better character and less expensive than under the old system. The question of providing sufficient work to keep this shop running is now engaging attention.

### EMPLOYEES.

There were paid to employees of the division other than those on the annual roll \$7,473.92. The appropriation act provides for two inspectors of property and one messenger.

In addition to the above, \$6.62 were expended for hauling and \$300 for rent of one property yard.

Statements showing expenditures in detail, also list of per diem employees, herewith.

Respectfully submitted.

L. T. BOISEAU,  
*Superintendent of Property.*

The ENGINEER COMMISSIONER,  
*District of Columbia.*  
(Through Capt. Lansing H. Beach, assistant.)

# REPORT OF COMMISSIONERS OF DISTRICT OF COLUMBIA. 829

Construction materials purchased on account of appropriations, 1894-95.

## DIVISION OF HIGHWAY EXTENSIONS.

OFFICE OF THE ENGINEER COMMISSIONER,  
*Washington, September 30, 1895.*

SIR: I have the honor to submit the following report of work in this department for the fiscal year ended June 30, 1895:

The preparation of the "highway extension plans," under the act of March, 1893, and "plats of subdivisions," under the act of 1888, have been made jointly by the force of this office.

## PERMANENT SYSTEM OF HIGHWAYS.

That part of the District north of the city and between North Capitol street extended and Rock Creek has been designated as section No. 1 of the highway plans. The surveys, calculations, etc., were completed on this section by the end of the year, and a bound volume of 40 sheets, showing all necessary lines, data, and explanations was submitted to and approved by the Commissioners of the District of Columbia.

Section No. 2 was made to include that part of the District north of the city and between North Capitol street extended and the Eastern Branch. A tentative map, on a scale of 1 inch to 400 feet, has been drawn of the whole section, showing lines of contemplated highways and present contours.

Detail maps, on a scale of 1 inch to 100 feet, were made of all recorded subdivisions of this section. These maps are on 20 sheets, 24 by 30 inches, and 200 lithographs were made of each of 19 of them. A set of these lithographs has been joined, so as to form 3 large maps of the section, and contours have been platted (enlarged) upon them from the Coast Survey sheets. These large sheets are to serve for detail study in the location of permanent highways. A set has also been prepared in volume form, which will receive all calculations and details in regard to new locations, and will include 43 sheets.

Section No. 3, which includes all the District west of Rock Creek and outside of Georgetown, has in part been treated by Messrs. Olmsted, Olmsted, and Elliot, and very little study has been given it by this office. A tentative map was made of this area early in the year, in which a plan was shown for street lines along Massachusetts avenue extended and the Tenleytown road. This plan simply followed a system previously made for this section under the act of 1888 and which is conformed to by several recorded subdivisions. It has lately been proposed to extend this plan to Connecticut avenue, and to there connect with a system of curved highways running to the Rock Creek Park. Between Massachusetts avenue extended and the Conduit road is another section similar to that near the park, and requiring a like departure from right line extensions.

Section No. 4 has been made to embrace that part of the District east and south of the Eastern Branch. It is the most difficult part of the District to deal with in formulating some highway plan, and will not admit of direct extensions without an enormous expense. The irregular subdivisions of Anacostia, Garfield, and Barry Farm are also a great impediment to any well-devised plan.

The high ridge running parallel with the District line affords a fine location for an avenue several miles in length which will in part give a view of the whole city.

Some little study has been given to the location of such an avenue, lines of slight curvature being suggested in certain parts in order to retain the best grade and outlook.

Special surveys have been made for opening Albemarle street; locating streets in West Brookland; for new boundary of Zoo Park at Connecticut avenue; for street lines west of Tenleytown; for Massachusetts avenue extended, and for property lines at Fourteenth street and Spring road.

A number of azimuth lines have been located and marked by monuments and subdivisions connected by transit lines with various points of reference. Maps have been made of all these surveys and sketches, and plans submitted to this office from time to time have been passed upon.

Very respectfully,

WM. P. RICHARDS,  
*Assistant Engineer.*

Maj. CHARLES F. POWELL,  
*Engineer Commissioner, District of Columbia.*

## REPORT OF CHIEF CLERK, ENGINEER'S DEPARTMENT.

OFFICE OF THE ENGINEER COMMISSIONER,  
*Washington, July 16, 1895.*

MAJOR: I have the honor to submit the following report for the fiscal year ended June 30, 1895:

|   |         |
|---|---------|
| Communications received, briefed, and recorded in L. R. book..... | 10, 385 |
| Indorsements, references, and reports on above .....              | 56, 925 |
| Letters and orders prepared .....                                 | 8, 524  |
| Copies of contracts drawn.....                                    | 700     |
| Vouchers and bills prepared, recorded, and forwarded.....         | 4, 351  |

Schedules of bids received during the fiscal year for work and materials under the Engineer office, and statements of contracts for street improvement, sewers, construction material, supplies, and miscellaneous work are herewith.

Very respectfully,

A. Y. LAKENAN,  
*Chief Clerk, Engineer's Office.*

Maj. CHARLES F. POWELL,  
*Corps of Engineers, U. S. A.,*  
*Engineer Commissioner of the District of Columbia.*
